ORNAMENTAL GLASS, English and Foreign.

Mess, Export, and Furnishing Orders promptly executed.

All articles marked in plain figures.

45, OXFORD STREET, W.

MANUFACTORY AND SHOW ROOMS.—Broad Stree Birmingham.

Established 1807.

## NOTICE.

THE PARTNERSHIP hitherto existing between JAMES DOW, JAMES H. WRIGHT, and WILLIAM S. MACLEAN, under the Firm of DOW and Co., ceases this day by efflux of time; the affairs of the Firm will be liquidated by Mr. JAMES DOW, who will sign the firm "in liquidation."

Shanghai, Dec. 31, 1868. DOW AND Co.

## NOTICE.

THE PARTNERSHIP hitherto existing between THOMAS BLAKE GLOVER, FRANCIS A. GROOM, EDWARD HARRISON, and RYLE HOLME, under the firm of GLOVER and Co., of Japan and Shanghai, ceases this day by efflux of time. The business in Shanghai will be conducted on and after the 1st Jan., 1869, under the style of GLOVER, DOW, and Co., in which Firm FRANCIS A. GROOM and JAMES DOW will be partners.

Shanghai, Dec. 31, 1868. GLOVER AND Co.

## TO PARENTS IN INDIA AND CHINA.

THE ADVERTISER (who is the wife of a professional man), is willing to receive TWO YOUNG LADIES to be EDUCATED with her own daughter. The best course of education will be combined with all the advantages of a comfortable home. The house and garden are large, and in the neighbourhood of the Crystal Palace. Terms, £100 per annum each.

Address "T.," "London and China Telegraph" Office 2, Cowper's-court, Cornhill. Unexceptionable references given and required.

## THE "CHINA MAIL,"

No. 2, WYNDHAM-STREET, HONG KONG.

NOTICE.—THE BUSINESS heretofore carried on under the style of "Shortrede and Co," was this day purchased by the undersigned, in whose name and by whom it will henceforth be conducted, and to whom all outstanding accounts owing to the said business are to be paid.

Hong Kong, Aug. 15, 1867. CHAS. A. SAINT.

NOTICE TO ADVERTISERS.

THE DAILY CHINA MAIL.—Six pages; published every evening (except Sunday). Subscription, 24 dols. per annum. Circulates in Hong Kong and along the China and Japan coasts. Terms of advertising:—Ten lines and under, 1 dol.; each additional line, 10 cents; one-half of these charges for repetitions. In Chinese, 2 cents per character for any number of days during the current week.

THE OVERLAND CHINA MAIL.—Compiled from the *Daily China Mail*, is published twice a month on the morning of the English mail's departure, and is a record of each fortnight's current history of events in China and Japan, contributed in original reports and collated from the journals published at the various ports in those countries. It contains, besides, a Shipping List for Shanghai, Hong Kong, Canton, and Macao, and a complete Commercial Summary.

Subscription, 12 dols. per annum, payable to any of the undermentioned agents. Postage added. Terms of advertising:—Same as in *Daily China Mail*.

AGENTS.—London: F. Algar, 11, Clement's-lane, Lombard-street, E.C. San Francisco: White and Bauer, 518, Clay-street, San Francisco. Swatow: Drown and Co. Amoy: Giles and Co. Foochow: Thompson and Co. Shanghai: H. Fogg and Co. Manila: Karuth, Heinzen, and Co. Australia: Gordon and Gotch, Melbourne and Sydney. Singapore: Locke. Hongghee, and Co. Batavia: H. Van Dorp.

THE STRAITS TIMES.—Daily, weekly, and fortnightly editions; published in Singapore, for circulation throughout the STRAITS SETTLEMENTS JAVA, BORNEO, SIAM, FRENCH COCHIN CHINA, CHINA and JAPAN.

This paper, which is the oldest in Singapore, and the most widely circulated throughout the FAR EAST, offers an excellent medium for the advertisements of shipbuilders, machinists, manufacturers, patentees, &c., in the United Kingdom.

Advertisements to be forwarded through an Agent in Singapore, or GEORGE STREET, 30, Cornhill, London.

## THE SAIGON ADVERTISER & SHIPPING GAZETTE.

A SUMMARY of Commercial and Shipping Reports from SAIGON, and a Record of Progress in COCHIN CHINA.

Subscription, £5 per annum, exclusive of postage.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

**LONDON AGENTS.**

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

CHINA AND JAPAN.

### THE MAILS, &c.

The inward French mail delivered this morning is one day late, and by some accident the bulk of our despatches, correspondents' letters, &c., have not reached us. The mail, however, brings but very few days' later advices, and the news is meagre in the extreme.

The next inward mail will bring dates as follow:—Yokohama, June 16; Shanghai, June 18; Hong Kong, June 24; Singapore, July 2; Galle, July 11. It may be expected on Monday next, and will be the first of the P. and O. homeward mails conveyed direct from Yokohama to Hong Kong, by which a saving of five days is effected in the transit from Japan.

Telegrams in advance of the succeeding mail (Hong Kong, July 7) were received *via* Galle on the 27th ult.

## List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer *Bangalore*, from Southampton, July 24.—To Shanghai: Mr. Eustace. To Hong Kong: Mr. R. Johnson. To Ceylon: Mr. H. de Bangy.

## Summary of News from the Far East.

### CHINA.

#### SHANGHAI.

Our advices from Shanghai extend to the 11th June; the outward mail of April 23 was received there on the 6th June, and conveyed London telegrams to the 15th May. The following summary of news is from the *North China Herald*:—

The week has been a very uneventful one; indeed the large arrivals of tea from Hankow are almost the only point worthy of note.

It seems likely that the Shanghai market will be well supplied with teas. In addition to the cargoes of the *Hirado*, *Moyune* and *Rona*,—some 35,000 chests, the *Fire-Queen*, *Plymouth Rock* and *Hang-chow*, carrying about 50,000 chests, have all come in, having sailed without waiting for their regular days. Buyers need therefore be under no apprehension *re* deficient supplies; nor in any hurry to make contracts.

The homeward bound steamer *Erl King*, which came down from Hankow on Sunday (June 6), with the first of the new season's teas, got on shore near the Hellespont wreck, but fortunately got off again and went out to sea on the 9th; the *Forward Ho* and *Titania* having both since started.

Apropos of tea, our readers have no doubt been interested in the description printed by the London *Daily News*, of a gorgeous ball lately given by the Chinese embassy, in Paris. The excellence of the wines was a theme of universal comment; but "the rarity of the evening was some tea made in the Chinese way, with cold water!" Couldn't Mr. Burlingame introduce a few more novelties?

Mr. F. P. Knight has written a valuable letter on the troublesome question of residence in the interior. Mr. Knight suggests the appointment of Foreigners—to be employés of the Chinese Government—to act as Controllers of Foreigners. Arrests of Foreigners in the interior to be at once reported to these officers, who will see that the prisoners are properly treated, forwarded to their consuls if in fault, or compensated for their annoyance if innocent.

An illustrative case of domestic slavery happened here lately, on the occasion of the failure of the large pawnbrokers' establishment in Hong-que. Two young girls were found in the house. The creditors demanded that they should be sold as assets; the magistrate, however, would not sanction the barbarity, refusing on the ground that he could not then control their future career. They did not know anything about their parents, so were given by the authorities to a respectable family in the city.

We hear that the Church Trustees have resolved to apply to the Foreign-office for a renewal of the grant in aid of the chaplain's salary, which was surrendered by their predecessors some years ago. It will be remembered that the architect promised the new church should be ready by the first Sunday in June; and we believe it was so, and might have been formally opened had no other difficulty intervened. Doubts were expressed as to whether the organ could be well heard from the place assigned it in the new church. It has been fixed, and we are glad to hear that the transmission of sound is good.

A case largely affecting Foreign interests came before the Mixed Court. An office boy in the employ of Messrs. Walsh and Co. printers, was charged with stealing a quantity of paper. He declared at first that he was incited to do so by Enam, a native stationer, but withdrew his accusation next day, and the case, as against the latter, fell to the ground. We know nothing of the merits of the present case, but we are painfully aware that thefts of type and paper are by no means uncommon, and the inference that Chinese printers benefit by the crime is difficult to avoid. There can be no other market for the stolen property, and the re-

Digitized by Google

ceivers cannot very well be ignorant that it is stolen property they are buying.

With reference to the demolishing of Mr. Jenkins' house, at Kinhwa, alluded to in our last issue, we learn it was accomplished through the influence of a combination of the literati. They first involved the landlord in their debt, and got him to make over the property to them, thinking thus to wrest it from the occupant. But this would not do; he held it by too good a title. The landlord could not make over to them what he had already transferred to another, by legal papers not easily set aside. Not to be foiled, they took the house down and removed it to a temple, where it was "deposited for safe keeping." At other places in the neighbourhood of Hangchow the missionaries have been threatened with similar proceedings. We shall look with interest to see what course the American authorities will take in the matter.

The party of gentlemen who have been exploring the Upper Yang-tsze returned to Hankow on the 30th May, having visited Chunking and confirmed the previous reports of its commercial importance. The news of the tea market is satisfactory, rates continuing much lower than last year and tending downwards.

The following letter has appeared, on the opening of the tea season:—

(To the Editor of the *North China Herald*.)

"Sir.—Will you allow me through your medium to lay a few facts before those whose fingers are again itching to open this market, in the forlorn hope that they may see that, by a little waiting, they may operate on almost whatever terms they choose to dictate to the teamen? The settlements at Hankow to 4th June amount to ten and a-half million pounds against eleven and a-half million pounds to 13th June last year, the comparative stocks at that port on above dates are 40,000 chests against 15,000 chests, and in addition to this excess we have to-day in Shanghai considerably over one hundred chops represented, against none last year, with steamers daily arriving fully laden. The Hankow settlements alone are at the rate of thirty millions of pounds per month, and we have not yet heard from Foochow. Suppose the transactions at that port are on the same scale, five months' London deliveries will have been bought in China in one month! I don't think it is necessary to be a Chaa-sze to know how to act under the above circumstances, and if Taipans would regulate their actions by facts as well as by their tea-tasters' palates, I think the Shanghai tea market would not be opened in a hurry this season. There is also another very strong reason for delay. Teas this season are notoriously badly made, so much so that in many instances the musters are already out of condition. Therefore, by letting teas remain here the Chinese will have to bear the risk of deterioration, and the exporter will know more accurately what value he is getting when he buys.—Yours faithfully, Experience."

## Imports.

Piece Goods.—No improvement can be noted in any class of manufactured goods, and the demand continues very languid. Grey Shirtings: Small sales from first and second hands are reported at a slight fall on last prices—say at Tls. 1.9.7 to Tls. 2.1 for 7 lb., and Tls. 2.1.8 to Tls. 2.2.2 for 8-4 lbs. Heavy Goods are also lower, and in very limited inquiry. The stock is to-day estimated at 1,075,000 pieces, including all recent arrivals. T-Cloths show a decline in value, but many holders refuse to entertain offers of current rates; 8 lbs. 36 in. are slightly firmer at the close, and tend upwards. In other descriptions the business is so limited as not to call for report.

Metals.—Nail Rod Iron: A large business is reported in Nail Rods during the past week, chiefly in parcels "to arrive;" some 25 to 30,000 piculs having changed hands at lower prices. Stocks are increasing, and small sizes are daily becoming more difficult to realise. Bars are in request; but for these, as well as rods, lower rates have to be accepted. Lead: Market is quiet at Hankow. Sales have been made at Tls. 6.6.5.

Coal.—Arrivals—Corona, Lady Bowen, John R. Worcester, and Gustav Adolph, all from Australia. Rates are consequently lower for Australian, and sales have been made at Tls. 5.80 for Newcastle kinds; Sydney are at little better quotations. Other kinds remain without alteration.

## Exports.

Tea.—During the past week there have been large arrivals of Black Teas from Hankow, for sale on this market. About 120 chops are now offering, and it is rumoured that several have been settled, but this requires confirmation. There is no doubt that the market will be freely opened here in a day or two, and seeing the heavy stocks it is but reasonable to expect buyers to secure Teas on terms more to their own advantage than the operations of late years have shown. The natives say they are heavy losers already. In Green Teas there is nothing to report.

Silk.—About 300 bales of the new season's Silk have arrived, chiefly 4½ to 5 "Lingho" Tsatlees. As yet no purchases have been reported, but the Chinese appear confident of obtaining Tls. 440 to 450 for this class of silk, it being said that offers of that price have been made by Foreigners. This would lay down the silk at considerably over London quotations. About 1,200 bales are expected down for the English mail of the 18th, when it is expected the market will be fairly open. The bulk of arrivals are for shipment on Native account, and a small proportion are contracts.

## Exchange and Bullion.

Business has been on very limited scale for this mail; and though the demand for Bank bills was inactive, private paper has been in great request, and found easy buyers at 6s. 1¾d. for credit, and 6s. 2d. for documentary paper. Rupees have been sold at 308. On Hong Kong 23¼ per cent. is the rate. Dollars show a great firmness at 76.40. Money tight.

Bullion.—Gold Bars: Peking, 98 touch, Tls. 171.50 per 10 Tls. Shanghai weight. Bar Silver: 111.4 Shanghai Tls., per 100 Tls. Canton weight Mexican Dollars, 76.40; Carolus Dollars, 78.45; Copper Cash, 1,510 per tael.

## HANKOW.

The following interesting memorandum regarding the lately-finished English church at Hankow is published in the *North China Herald*:—

This church, dedicated to St. John the Evangelist, was commenced in January, 1868, under the superintendence of Mr. Hugh Morrison, C.E, then resident at Hankow; but from delays in obtaining building materials the foundation stone was not formally laid until June, 1868, by W. H. Medhurst, Esq., H.B.M.'s Consul. The church is now completed, fenced in with a keeper's lodge, and the grounds very tastefully laid out; and on Thursday, the 20th May, was transferred from the building committee, Messrs. Beveridge, Ringer, and Aitken, to the church trustees, with a balance in hand of about 20 taels. The cost has been 5,700 taels, and about 500 taels in addition subscribed for pulpit, reading desk, &c., from England, including 40 taels from Mr. Gibb, for altar rail, 40 taels from H. Beveridge, Esq., for communion table, who also presented the tablets for chancel, and a very handsome surplice and scarf given by his friends in England.

The church was dedicated on the 7th of November, 1868, by the Bishop of Victoria, then visiting Hankow, and although in a very unfinished state was, by the great exertions of the committee and the superintending architect, so far prepared as to allow of the ceremony taking place, and was finally opened on Rogation Sunday by the Rev. Canon McClatchie, Consular Chaplain, assisted by the Rev. A. Hoehing, of the American Episcopalian Church, and the Rev. E. W. Syle, of Shanghai.

The church and lodge are executed from designs by Wm. Kidner, Esq., architect, Shanghai. The church up to plinth is built of lime stone, above that in brick plastered, with stone coping to gables and roof covered with American shingles. The nave, vestry, and organ chamber roofs are open timbered, seamed, and varnished. The ceiling of choir and vestry are groined; the vestry and organ chamber are divided from choir by very handsomely carved screens. The seats are open. The pulpit, reading desk, communion table and chairs are in carved wainscot, by Cox and Son, of London, who also supplied the font in Caen stone; altar rails decorated in blue and gold. The apse windows are covered by the Diaphanic process, sent out from England by Mr. Prince, of Hankow, fixed and completed by Messrs. Ringer and Cope.

The church is much admired by the residents and visitors, and reflects great credit on all who have been employed at the work, particularly W. Assiter, Esq., of the Legation and Consular Works Department, who, on his arrival in Hankow in October last, volunteered his services to the building committee to superintend the works of the church to completion, should he remain so long at Hankow. Fortunately for the community, Mr. Assiter has done so, and by his untiring zeal and active exertions the church has been so successfully completed. The building committee on Wednesday last presented Mr. Assiter with a letter of thanks, and a souvenir of the value of one hundred taels, as a mark of their regard for the very valuable assistance he has rendered them in connection with the church.

This is the second church built at a river port on the Yangtsze, and is another proof of the zeal and devotion of English Churchmen to provide Church services according to the Church of their native land.

## FOOCHOW.

Messrs. John Odell and Co.'s Circular, dated June 8, gives the following on the opening of the tea season at this port:—

Tea.—In our report dated 21st ultimo we advised that the new season's teas had commenced arriving, since when they have come to hand very freely, the total to date being 225,000 chests Congou, against 243,776 chests same time last season. The quality of the crop is, we regret to say, most indifferent. Most of the well-known chops of Kaisow have now come to hand, and though possessing real quality, cannot compare with those of last year's growth, and we are of opinion that many of the teas from this district and Sinchune have been damaged by heavy rains.

The "Ching Wo" Teas are in full supply, many parcels are really fine, but wanting in strength. The most marked depreciation in quality is in those Teas from the "Sucy Kut," "Yung How," "Kin Yong," and "Sa Yune" districts, nearly the whole of which are much mixed with old leaf.

Pakling kinds have come to hand much more freely than ever before known, and in consequence are, as a rule, very poor both in appearance and liquor. Souchongs are not expected to arrive in quantity for about a fortnight. Oolongs have not come to hand so freely as last season, but show a marked improvement in quality. Scented Teas: No fine parcels have as yet been placed on the market, the flower used in scenting being somewhat backward. Business has not yet been commenced, and we do not hear of any offers having been made. Teamen are much pressed, owing to want of funds; but there is so wide a difference between the views of buyers and sellers that, apparently, there is no immediate prospect of the market being opened.

Digitized by Google

The English mail of 23rd April was delivered yesterday (June 7), and the accounts of the state of the London market are so unsatisfactory that intending buyers are likely to act even more cautiously.

# Commercial Report.

—o—

## CHINA AND JAPAN MARKETS.

A supplement to Messrs. Olyphant and Cos'. Circular gives the following particulars of the changes that have taken place at each port during the few days that have elapsed since our last advices.

### Hong Kong.

Imports.—Since the departure of the English mail on the 9th instant transactions have been on a most limited scale. In raw cotton, Bombay staple only has been dealt in, and sales of this kind have been small, and at rates hardly up to those last advised. Cotton yarns have been very quiet, and only one small transaction has been reported; a slight enquiry exists, and holders are rather firmer at the close. In piece goods, sales from private hands have been of the most trifling nature; dealers have declined to make offers, and have supplied themselves from the public sales of damaged goods, and to effect settlements privately, holders would have to accept still lower rates.

Freights.—Tonnage is becoming more plentiful, and rates are slightly weaker. Arrivals have been principally small craft, while large vessels are still in fair demand to load from this to San Francisco. Homewards but little is doing.

Exchange.—Operations have been upon a very small scale, and with but small offerings of private paper, rates have gone slightly lower. We quote six months' sight Bank bills on London 4s. 7¼d.; private, 4s. 7⅜d. to 4s. 8d.

### Canton.

*June 15th.*—No change has taken place, and our markets remain as last advised; there are no indications of an opening of the tea market, and nothing has been done in silk.

### Amoy.

*June 12th.*—Teas come in but slowly, and arrivals foot up about 1,411 packages Scented Orange Pekoe and 3,604 packages Congo, for which no offers have as yet been made. A few hundred packages Oolongs have been received, but no musters have yet been shown, though the teas are said to contain less dust than last season's.

### Foochow.

*June 10th.*—Arrivals of new teas have continued until stocks amount to 236,000 chests of Congou and 20,000 half-chests of Oolong, and with this large quantity of tea offering our market is still unopened, and at present there are no indications when business is likely to begin. The only settlement has been the purchase of 405 chests old common siftings, taken at Tls. 9.3 to 9.6 o.b. for the flooring chop of an Australian vessel. No Souchongs have yet come to hand.

### Shanghai.

*June 10th.*—The latest dates from Hankow are to the 5th inst., up to which time settlements of tea amounted to 110,000 chests. Prices were declining, and considerable quantities of tea were being shipped to this port on native account. No business has as yet resulted at this, though reported offers will most likely lead to settlements. Our stock amounts to 40,000 chests. The departures for London with new teas have been the Erl King and Forward Ho. Raw Silk: The arrivals of new crop amount to some 500 bales, upon which stock the market was opened yesterday at Tls. 440 for red peacocks, and since then about 300 bales have been settled at prices ranging from Tls. 400 to 480 for medium chop Tsatlees. These rates show a decline from last year's opening prices of about Tls. 20 per picul.

Imports.—But very little business has been transacted in Grey Shirtings, and the speculative demand which existed for goods "to arrive," previous to the despatch of the mail of 3rd instant, seems to have entirely subsided. T-Cloths likewise meet with but little attention. Nothing whatever has been done in American Cotton Goods. In Woollens there is a slight demand for Long Ells of good assortment, at Tls. 6.50 to 6.55 per piece.

Exchange.—But little Sterling is offering, and the rate for 6 months' sight Credit Bills is at 6s. 1⅞d. to 6s. 2d. to private buyers and banks respectively. One bank is open to draw at 6s. 1¼d.

### Yokohama.

*June 7th.*—Imports.—The market has been very dull, the only inquiry in any article being in Cotton Yarns, of which stocks are very light.

Exports.—Some 1,000 piculs of new tea have come to hand from the adjacent districts, the quality of which is considered satisfactory; further increased supplies are shortly expected. Holders are asking about ten per cent. above last season's opening prices. Silk.—Settlements amount to about 60 piculs, leaving a stock of old of 200 piculs, held at previous prices. Advices from the interior continue favourable as to progress of the new crop.

# Shipping Intelligence.

## ARRIVALS.

At Tientsin.—From London, June 24, Farningham (reported by telegram).

At Shanghai.—From London, June 4, St. Andrew's Castle, Maiden Queen; June 12, Ada; from New York, June 8, Jeanie (reported by telegram previous to July 2); from London, Rolla; from Cardiff, Lord Macaulay.

At Saigon.—From Marseilles, June 4, Denis; from Bordeaux, June 6, Auguste and Gustave; from Bourbon, June 11, Rosario.

## DEPARTURES.

From Hankow and Shanghai.—For London, June 9, Erl King (str.).

From Saigon.—For Bordeaux, June 12, Chateaubriand; for London, June 14, Empress.

From Penang.—For London, July 19, Maxima (reported by telegram).

## SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—July 29, at Falmouth, from Rangoon, Richard McManus; 30, Cameo; June 12, at Callao, from Yokohama, Wrestler; July 16, at San Francisco, from Hong Kong, Parsee; 17, Mispine (?); at New York, from Amoy, Aug. Friederich; 18, at Boston from Foochow, Gabalva; August 2, at London, from Shanghai, Undine; at Deal, from Manila, Solent; 1, at Falmouth, from Rangoon, Elizabeth Ann; —, at Deal, from Foochow, Henry Grenfell; 2, from Singapore, Belle of Southesk; from Colombo, Spirit of the North; at Falmouth, from Sourabaya, Henry; 1, off Falmouth, from Akyab, for Copenhagen, Dorothea Melchior; July 28, off Scilly, from Batavia, for Rotterdam, Triton; 29, at Brouwershaven, from Pasaroeang, Susanna and Johanna; 20, at San Francisco, from Hong Kong, Japan (str.); August 3, at London, from Singapore, Argo.

Departures.—From Amsterdam, for Sourabaya, Alcyone; July 29, from Sunderland, for Shanghai, Amadine; 31, from London, for Yokohama, Napier; 29, from Cardiff, for Hong Kong, Agatha Johanna; 30, from Liverpool, for Yokohama, Finzel; 17, from San Francisco, for Hong Kong, Nicoline; 2, from Rio de Janeiro, for Java, Finella; Aug. 2, from London, for Penang, Parana.

Laid on.—At London, for Penang, Alvington; at Liverpool, for Yokohama, Caractacus; for Hong Kong, Vistula; at Glasgow, for Yokohama, St. Dunstan; for Singapore, Loch Ken.

Spoken.—John Lidgett (ship), London to Shanghai, June 13, 26 S., 24 W.; Elizabeth (Dut. ship), Amsterdam to Batavia, June 26, 7 N., 26 W.; John Peacock, Cardiff to Shanghai, July 1, 8 N., 24 W.; Peruvian, New York to Yokohama, May 27, in Gaspar Strait; Californie, Sourabaya to Amsterdam, July 14, 39 N., 35 W.; Auguste, Samarang to Amsterdam, April 24, 7 S., 104 E.; Betty, Tjilatjap to Amsterdam, May 16, 26 S., 58 E.; Krimpen aan der Lek (Dutch barque), Rotterdam to Sourabaya, June 25, 8 N., 23 W.; Evening Star, London to Hong Kong, June 13, 1 S., 27 W.; Dos Hermanos, Liverpool to Manila, May 27, 26 S., 54 E.; John Watt, Cardiff to Yokohama, June 12, 38 N., 20 W.; Ensign, Cardiff to Nagasaki, June 13, 20 S., 30 W.; Hindostan, Bordeaux to Batavia, May 30, 26 S., 28 W.; Agra, Colombo to London, April 27, 19 S., 70 E.; Acacia, Colombo to Havre, May 17, 32 S., 31 E.; Eunomia, from Colombo, June 22, off Ascension, going in; Henry Reed, Cardiff to Shahghai, July 1, 8 N., 25 W.

## LATEST TELEGRAMS.

—o—

### (Received via Galle, July 27.)

### JAPAN.

Yokohama, June 30.—The recapture of Hakodadi by the Mikado's troops is confirmed. The steamer *Hayomaro* has been totally lost near Yokohama. Several Europeans were drowned. The finances of the country are very disorganised, and paper money is being forced on the people under pain of death. Trade, both native and foreign, is paralysed.

### CHINA.

#### COMMERCIAL.

Hong Kong, July 7.—Gray Shirtings, 6½ catties, 8¼ lb., $2 83c. Water-twist, 16 24, $1 32½c. Cotton: Bengal fair medium, $1 7c. The Canton Tea-market opened 6 to 7 taels lower than last year, and the Foochow market 4 to 6 taels lower. Total export (China and Japan), 19,000,000lb. Exchange on London, bank bills, six months, 4s. 6½d.

Shanghai, July 2.—Gray Shirtings, 6½ catties, 8¼ lb., 220 taels. Cotton, Shanghai, 16 taels. Silk, quiet, but unchanged. Export to date (China and Japan, from commencement of season) 5,250 bales. Exchange on London, bank bills, six months, 6s. 0¼d. Freights: Tea, £2 10s.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

Ripley—On the 28th July, at Surbiton, the wife of John Anthony Ripley, Esq., of a daughter.

### MARRIAGES.

Batchelor—Roth.—On the 14th July, at St. Stephen's, Bayswater, Henry Crou h Batchelor to Elisabeth Ann, widow of Ernst Roth, Esq., and daughter of the late Henry Orme, Esq. No cards.

### DEATHS.

Balfour—On the 29th July, at 32, South-street, Park-lane, London, George Edmond Balfour, Esq., merchant, Manchester, of Woodhayes Hall, Cheshire, and Sidmouth, Devon, eldest son of the late Robert Balfour, Captain, R.N., of Southfield, Stirling.

Little—On the 24th July, at Guernsey, Mary, third daughter of Robert Little, Esq., M.D., Singapore, aged 13. Friends will please accept this intimation.

Souza—On the 28th July, at St. Jean-Dieu, Paris, Alfred de Souza, eldest son of M. F. de Souza, Singapore.

Steward—On the 20th June, at his residence, 2, Little Stanhope-street, May Fair, Thomas Steward, Esq., in the 76th year of his age.

# PARLIAMENT.

## HOUSE OF COMMONS.

### THE RED SEA ROUTE TO INDIA AND CHINA.

(July 26th.) Sir J. Elphinstone drew attention to the practice of sending naval officers out to India *via* the Red Sea during the summer months, when the heat was so intense that it had been determined that Her Majesty's military forces should not be subjected to it, and stated, in accordance with the recommendations of the committee which sat in 1858, a service of magnificent transports had been established for the purpose of conveying our troops to India by the Red Sea route. That sea was 1,240 miles long, was of immense depth, and throughout the greater part of its length it ran between inaccessible mountains. He need scarcely say that the heat of this trough in the summer was almost unbearable. To make matters worse, the wind for nine months in the year blew down towards the ocean, and the result was that a vessel starting from Suez keeping pace with the wind found herself in a calm without having a single breath of air to blow the smoke from her deck, while the heat on her deck was usually 100 deg. From continual evaporation the density of the water in the sea was one-fourth more than that of the ocean, and consequently the speed of the vessels was impeded to a considerable extent, while the heat of the surface water was usually 3 deg. above that of the atmosphere, varying from 80 deg. to 106 deg. of heat. As might be imagined, the mortality attending a six days' voyage along this sea was very great, especially during the months of June, July, August, and September. Any one who ordered an officer to go this voyage during those months incurred a very grave responsibility, which he should be sorry to take upon himself. An honourable member of that House, who was connected with a large commercial firm in India, had authorised him to say that no mercantile firm in India would send out an assistant in these months, except upon the greatest possible emergency. He trusted that the right hon. gentleman would take the matter into his earnest consideration, and endeavour to follow, as regarded the naval officers, the course that had been already taken with respect to the officers of the army. He had no personal acquaintance with Sir H. Kellett, and he had only brought the question forward in the general interests of the navy.

Mr. Childers said that the interesting remarks of the hon. gentleman as to the density of the water of the Red Sea should have been addressed to the Peninsular and Oriental Company rather than to any member of the Government, inasmuch as the Government had no ships in the Red Sea at present, while the Peninsular and Oriental Company had one each way in it every week. He had to inform the hon. baronet that no such practice as that of sending naval officers out to India *via* the Red Sea during the summer months prevailed at the Admiralty. The custom of the Admiralty was to send naval officers out, both in the summer and the winter months, by the long sea route. Three-fourths of the officers sent out during the last year had gone by that route. The Government transport ships between this country and India did not run in the summer months, but only in the eight cooler months, and as it was easy to manage that the reliefs should be sent out in these latter months, the Government avoided as much as possible sending out either officers or men during the four summer months. Directions had been sent to India that the authorities there should as far as possible avoid sending home men in the hot months. But when his hon. friend asked him to give a pledge that under no circumstances whatever should an officer be sent by the Red Sea in the summer months, he must decline to give any such pledge. It had been arranged that Sir Henry Kellett should go out by the Red Sea route and meet Sir Henry Keppel at Singapore. A departure from that arrangement would have led to much inconvenience. During the last twenty years it had been the invariable custom for the officer appointed to Sir H. Kellett's command to go by the Red Sea route.

### THE ROUTE TO WESTERN CHINA, &c.

(July 27th.) Mr. Baines asked the Under-Secretary for India whether he objected to lay on the table of the House papers relating to the route of Captain W. C. M'Leod from Moulmein to the frontiers of China, and to the route of Dr. Richardson on his fourth mission to the Shan provinces of Burmah, or extracts from the same.

Mr. Grant Duff: My attention having been called to the documents by the hon. member for Wakefield I found that, so far back as 1867, Colonel Yule wrote of them in the following terms:—"As the only modern records of visits to the obscure regions of which they treat, and the sole trustworthy materials for their geography, surely they ought to be published." I have little doubt that if the events of the mutiny had not called off the attention of the Indian Government from the Indo-Chinese Peninsula, Colonel Yule's suggestion would have been followed up, and now, in happier times, I am glad to be able to show my respect for the opinion of that very distinguished man by laying the papers on the table of the House.

### OFFICERS OF THE ARMY IN JAPAN.

(July 29th.) On the order of the day for going into Committee of Supply,

Colonel North, in rising to bring under the consideration of the House the present position of the officers of the army stationed in Japan as to pay and allowances, said that as the question did not involve either religion or politics it need not take up much time. Both the Secretary of State for War and the Field Marshal Commanding-in-Chief had recommended that the rates allowed for Japan should be assimilated to those granted in China. The officers originally received the same pay and allowances as those in China, but a short time ago a deduction of 25 per cent. was made from the allowances granted to the officers stationed in Japan, on the ground of certain advantages enjoyed by them, which had, however, all disappeared, while the cost of living there remained very high. The first to suffer were the officers of the second battalion of the 9th Regiment, who in October, 1867, in a memorandum which was laid before Major-General Guy, and by him transmitted to the Military Secretary of the Horse Guards, represented that the necessary expenses to which officers serving in Japan were subjected far exceeded even those which prevailed in China. Notwithstanding this they had been subjected to a reduction of one-fourth of the allowances granted in China, so that they had to meet largely increased and increasing expenditure upon reduced allowances. That letter led to a request from the War-office to Maj.-Gen. Brunker to obtain trustworthy evidence of the cost of living in China and Japan respectively. Maj.-Gen. Brunker, in a letter dated "Head-quarters, Hong Kong," stated that he had assembled boards of officers in both countries, and that the Hong Kong board reported that the cost of living at that station had increased from twenty-five to thirty per cent. during the last ten years. The report of the Yokohama Board showed that the salaries of the *employés* of the banking and mercantile houses varied from £300 to £500 per annum, exclusive of board, lodging, and medical attendance, which income they received also while on leave in England one year in six, their passage money being also paid out and home. On the 17th of June, 1868, Major-General Brunker made his report to the Horse Guards. It had been stated that the allowances granted to the officers in Hong Kong and China were necessary, because it was impossible for them to do their duty without the use of "chairs," and that the officers in Japan did not require "chairs," and were, therefore, not put to that expense. The winter, however, at Yokohama was long and very severe, and the price of coal was enormous, amounting sometimes to twenty-two dollars a ton. The officers at Yokohama were also obliged to pay for the water they used. Upon the arrival home of the 9th Regiment, at the half-yearly inspection, held at Dublin on the 6th of October, 1868, a respectful remonstrance was made to General M'Murdo, who was then the general in command, against the reduction of twenty-five per cent. from the China scale of allowances enforced against the officers serving in Japan. The officers stated that the Commission at Hong Hong had sent in its report, but that no reply had yet been received to their representations. On the 18th of November, 1868, a letter was received from Secretary Sir J. Pakington, stating that he had applied to the Lords of the Treasury for their consent to allow the rates allowed for Japan to be assimilated to those granted in China. On the 22nd of March, 1859, General Peel, the then Secretary at War, pressed, in the strongest manner, that the Indian allowances should be granted to officers of the British army in China, and on the 24th of March that request was granted. On the 12th of April Mr. Herbert expressed his opinion that the Indian allowances to those troops should be continued, and on the 7th of May that proposal was approved by the Treasury, who, however, suggested that the Indian troops should be removed from Hong Kong at the earliest opportunity. The result of the removal of the Indian troops from that station had been most disastrous to the European troops, who had then to perform escort duties themselves, hundreds of men in each battalion dying or being rendered incapable of performing their duty in consequence. On the 7th of March, 1862, the War-office forwarded the commuted allowance recommended by a committee, of which the Treasury expressed their approval in April of that year. On the 4th of September, 1862, Sir G. Lewis proposed that the Indian rate then in force should be continued as long as the exceptional high prices of provisions and lodging should continue, and on the 17th of September it was decided that the Indian allowances should be continued to the end of the financial year. In December, 1862, the Secretary for War stated that he was unable to recommend any reduction in the allowances to the British troops serving in China. On the 12th of July, 1863, the Treasury announced that they did not object to continuing those allowances for another year. The hon. and gallant member then read a number of extracts from letters from Hong Kong and Yokohama, showing the inconvenience and expense to which officers and men stationed at the latter place were put. He merely asked that the regiment stationed at Yokohama should receive the same rate of pay as that stationed at Hong Kong. The necessaries of life at the former place were at a most exorbitant price, and the troops stationed there merely asked to be placed on the same footing on which they stood before the 30th June, 1866, when their pay was equal to that of the troops at Hong Kong, it being at present about one-fourth less.

Mr. Stansfeld said the speech of his hon. and gallant friend was considerably wider than the terms of the notice which he had placed upon the paper, and it was to this only that he should attempt to offer a reply. The arrangement of which his hon. and gallant friend complained was entered into between the War-office and the Treasury in the spring of 1866. By that arrangement the allowances on the China station, as fixed in 1865, were raised, and it formed part of the proposals which led to that arrangement that the increased allowance in China could be fairly met by allowing only three-fourths of such increased allowance to the officers stationed in Japan. His hon. and gallant friend had spoken at considerable length and with very natural feeling of the sufferings to which British regiments at Hong Kong were exposed by reason of the climate. But it was precisely because of the dangers arising from the climate in China that the pay and allowances had been fixed at the generous and liberal scale at which they now stood. In Japan, on the contrary, the climate was not specially dangerous to Europeans. His hon. and gallant friend inquired why the Treasury in 1868 had refused to sanction the proposal which then came from the War-office to assimilate the allowances in Japan to those which had been sanctioned in China. That decision, which was given by the late, not by the present Treasury Board, was given on the ground that the allowances both in China and Japan had been very recently settled, after considerable inter-departmental discussion and inquiry, both in the War-office and upon the stations, and that no sufficient cause had been shown or assigned in the communications with the War-office for assimilating the allowances in Japan to those sanctioned on the China station. His right hon. friend the Secretary of State for War having enabled him to read, not only the inter-departmental correspondence, but all the minutes

Digitized by Google

of the War-office itself, and the figures bearing upon the question, he thought it only fair and candid to say, as far as his own opinion was concerned, that upon the information communicated to the late Treasury Board, or now in possession of the Secretary of State for War, no sufficient ground had been shown for assimilating these allowances. Bearing in mind the difference in point of climate between the two stations and all the other circumstances, he was very much disposed to think that if the allowances in Japan were raised, the next thing would be a demand for a further increase in China.

Colonel NORTH reminded his right hon. friend that when the arrangement was in contemplation in 1866 a rate of exchange existed in Japan which gave to the officers there an advantage equal to 25 per cent.

General HERBERT observed that an injustice done in one part of the globe was not remedied by an injustice done in another. (Hear.) A gross injustice had been done to English officers in China by calling upon them to serve at a lower rate than officers sent from India. The subject of the pay and allowances to troops in China had been considered by the committee of which he was a member, and an amendment which he moved to the report, to the effect that the troops employed in China should be placed as nearly as might be upon the same footing as those employed in the East Indies, was only rejected by the casting vote of the chairman. Under these circumstances the recommendation now made by his hon. and gallant friend was, he thought, worthy of attention. It was most undesirable that troops serving upon the same station should be in the receipt of different rates of pay and allowances, and the suggestion that Japan was not more uncomfortable than some of the stations in India was a very poor ground for refusing to do justice to officers on these Japanese stations. (Hear, hear.) He begged to draw the attention of the Secretary of State for War to this fact. The number of troops quartered in Japan was very small, and he believed that discovering the exact time for which this 25 per cent. was to be deducted in the case of troops sent from China to Japan, and restored in the case of troops sent from Japan to China, both being portions of the same command—(hear, hear)—caused as much trouble and clerical work at the War-office as would exhaust a considerable portion of the saving effected by this miserable economy. (Hear, hear.)

Colonel NORTH gave notice that when the House met again he should take the earliest opportunity of moving an address to the Crown upon this subject.

Sir J. ELPHINSTONE said it would be well if the authorities who had to decide questions of this kind were themselves to visit the colonies. (Hear.) In this case, as he understood, in consequence of a dispute as to pay and allowances some native Indian troops, who alone could do duty in a state of health in the Chinese climate, had been withdrawn from the station. The duty thus devolved upon the European troops, and entailed upon them such lamentable suffering that in eight and a half months 193 died or were invalided in one battalion, and in four and a half months 259 died or were invalided in another. (Hear, hear.) The reason why all these men died or were invalided was simply that the Indian regiments, who could perform sentry and other duties in that climate without risk to health had been withdrawn to save money to Her Majesty's Treasury. (Cheers.) As to Japan, although it had a temperate climate, it must be remembered that there was a very long winter, and the officers were obliged to keep up expensive fires. Coals often cost as much as 22 dollars a ton, and of wood there was almost none; officers, therefore, were obliged to clothe themselves much more warmly than they would otherwise do. House rent, again, and other necessaries of life were so costly that the only advantage in going to Japan lay in the exchange of an exceedingly bad climate for one that was somewhat better.

Mr. CARDWELL wished to point out the extreme importance in discussions of this kind of confining themselves as much as possible to the point really brought before the House. His hon. and gallant friend gave notice of a motion the object of which was to call attention to the inequality of the allowances in China and Japan, for the purpose of having them assimilated; but the larger portion of his speech turned upon the inadequacy of the allowances to troops in Hong Kong, as compared with those given in India. The inference which he drew from this was that in dealing with the pay and allowances at any one station they were only dealing with one portion of a very large and complicated question, and the moment that the House of Commons decided to grant an increase at any one point they must expect a fresh proposal for increase elsewhere, based upon the success of the previous application. Dr. Murray's report pointed out that Hong Kong was a peculiar station, differing from all other stations, and requiring special allowances and indulgences not needed elsewhere. The moment, therefore, that an increase was granted at Japan a further application based upon Mr. Murray's report might be expected from Hong Kong. The matter, however, was never officially dealt with by the present Government at all, but was decided before they came into office. The scales of allowance were the result of a correspondence that had taken place in 1866 between the War-office and the Treasury. In that correspondence the War-office proposed to equalise the allowances in Hong Kong and Japan, but the Treasury refused. The ground on which a larger scale was allowed in Japan was not a difference in prices, but the existence of circumstances which were detailed by Dr. Murray. For instance, in Hong Kong the climate rendered it necessary that coolies should be employed to carry chairs for the use of the officers. The difference of climate caused a different rate of expenditure.

## BASSES LIGHTS (CEYLON) BILL.

(June 29th.) Mr. AYRTON, in asking the House to read this Bill a second time, explained that an attempt was made some years ago to construct a lighthouse like that now contemplated, but owing to a want of due foresight or skill the scheme failed. A floating light was then established on the Little Basses Rock, and had been made the subject of a vote in the estimates. But it was found to be insufficient, and it was deemed necessary to have a fixed light on the Great Basses. It had, after careful consideration, been determined that the money necessary for the purpose should be advanced by the Commissioners of Loans, and that the money required for the interest and repayment of the loan should be secured upon the tolls. As the British Government was not exclusively interested in the matter the guarantee of repayment would be made by the British and the Indian Governments conjointly. The estimated cost of the new light would be about £70,000, and the fund for paying the interest and ultimately repaying the principal due in respect not only of this light but also of the floating light on the Little Basses would be amply sufficient for the purpose. (Hear, hear.)

Mr. STEVENSON asked upon what shipping the tolls would be levied.

Mr. SHAW LEFEVRE replied that the dues would be levied in the same way that the tolls were now levied in respect to the Little Basses light.

Sir J. HAY, as a naval officer, could state that no lighthouse could be erected which would be likely to be of more advantage to the country.

The Bill was then read a second time.

## CHINA.

(July 30th.) Mr. BAINES rose to call attention to memorials from several Chambers of Commerce recommending the construction of a railway from Rangoon, through British Burmah, to Western China, and to ask the Under Secretary of State for India whether the survey authorised by the Secretary of State for India, and commenced in 1867, was ordered to be completed, or what was being done for the construction of a railway or telegraph through British Burmah to the Western Provinces of China. The hon. gentleman referred to eminent authorities for the purpose of showing that the formation of the route from Rangoon to the Western Provinces of China was exceedingly desirable and perfectly practicable. In 1860 Captain Sherard Osborn pointed out the great dangers and difficulties of the navigation of the Chinese seas, and remarked that, in the event of war between France and this country, the possession by the former of the coast of Cochin China might have the effect of cutting off English commerce. The Rangoon route was as practicable as it was desirable. Captain (now Colonel) Williams, an engineer of the Indian army residing at Burmah, said that of the three routes the direct land route from Rangoon to Chian-Hung, of which he made a survey, was the best and the cheapest, upwards of 250 miles, or a moiety of the whole, being within British territory, and the remainder occupied by a people who with their chiefs were well affected to the British Government. Captain Watson, another English officer, expressed the same view. For some inexplicable reason the Indian Government set itself against the surveying of that route, although all that was asked for by the Chambers of Commerce was a single tramway; but at length Lord Salisbury, with that bold, good sense which distinguished his administration of Indian affairs, ordered that a survey should be made. Accordingly, one was made by two English engineer officers, Captains Williams and Luard, for a distance of 245 miles of British territory; and they reported that 200 miles consisted of good country for making a railway, while the difficulties of the remaining forty-five were not to be compared with those of the ghauts in India. Orders went out from Calcutta and from London that the survey should be stopped, and it was therefore abandoned; but the report to which he had just alluded was to the effect that a railway might be made at a cost which was small compared with the magnitude of the object. General Fytche, the Chief Commissioner of British Burmah, after having opposed the scheme, declared himself in favour of it, and strongly recommended Lord Lawrence to resume the survey. The noble duke who was now at the head of the India-office had taken an enlarged and just view of this subject, and in a despatch to the Governor-General, dated the 29th of April, he expressed himself in favour of prosecuting the survey provided it could be done without involving political complications or ideas of annexation, for which he (Mr. Baines) would remark, the Chambers of Commerce had not the least desire.

Mr. Serjeant SIMON said the Chambers of Commerce only asked for inquiry on the part of the Government. At present we had no other inlet into China than by the sea coast, and the consequence was that very few of our manufactures were sent there. The proposed route would have the effect of greatly facilitating our intercourse with Burmah and China. He thought it most reasonable on the part of the merchants of this country to ask for such facilities, and he contended that the new markets which would be thrown open would be most valuable to this country.

Sir S. NORTHCOTE stood before the House in the capacity of a culprit, for it was in his time that what hon. members opposite seemed to look upon as a retrograde step had been taken. But it was the duty of the Indian Government to consider not merely the interests of commerce, but the political aspects of such questions as that of making a survey through a country which did not belong to us. It must be remembered that at the time the survey was stopped the country was in a state of open rebellion against the King of Burmah, and it was for the Indian Government to judge whether it was expedient for us to continue an enterprise which must have had a tendency to embroil us in the quarrel. In fact, if we had gone into the country we must have mixed ourselves up with the quarrel between the King of Burmah and his vassals. Then there was the question of annexation. There was a great weight of opinion at the time in India in favour of the annexation of Burmah, and if the surveyors had gone into the country it would have given a colour to the prevailing rumours, and umbrage to the King of Burmah. Besides, of what use surveying for a railway unless there was a prospect of being allowed to make it? Would any company in this country have provided capital for a railway from Rangoon to the Western frontier of China without a Government guarantee? Would the House of Commons sanction such a guarantee? There was a very important line proposed—namely, the Euphrates Valley—and there would not be the slightest chance of obtaining a guarantee for that line. Then there was the Government of India, but weighted as that Government was with existing guarantees, it was not likely that it would guarantee the proposed line. This was the state of things that presented itself to

Digitized by Google

the Indian Council when the project was submitted to it. The Governor-General advised that the survey should be stopped, and he (Sir Stafford Northcote), although anticipating a good deal of obloquy from the commercial interests of this country, felt that the best thing he could do would be to stop the survey.

Mr. G. Duff knew that a great deal of interest attached to this subject in the large manufacturing towns of Lancashire and Yorkshire, but did not think that so much extravagant expectation would have been entertained if it had not been for undue reticence on the subject. The attention of the present Secretary of State had been directed to the subject for the first time by a despatch from the Governor-General of India, enclosing correspondence from the Chief Commissioner of British Burmah, who proposed a plan which found favour neither with the Government of India nor the Secretary of State in Council. If any of the Chambers of Commerce would give to the House any information whatever about the province of Yunang they would be extremely grateful, but if instead of giving them information they simply made themselves speaking trumpets, all they could do was to answer their letter with courtesy, and regret that British manufacturers and merchants should find time for so extremely vain a labour.

## LABUAN.

July 30th.) In Committee of Supply, on the vote for £68,298, for grants in aid of expenditure in certain colonies,

Sir C. Adderley wished to have some explanation on certain points in connection with this vote, which he believed would be useful and interesting to the Committee. He had no objection to make to the vote. The items in it were steadily diminishing, and he hoped soon they would cease to appear on the votes altogether. The net decrease this year was £6,000, and that decrease arose in this way. Labuan, for the first time, ceased to be a charge upon the English Treasury. The Governor, lately a member of that House, Mr. Pope Hennessy, had written to him expressing just pride in having within so short a time taken off this charge. That colony had since its first establishment been a charge of £4,800 a-year on the Imperial Treasury, and the Governor had now succeeded in removing the charge altogether. He confessed he had himself from the first doubted very much the value of the colony; but he would not revert to the causes which had induced this country to assume that settlement. We had objects in view connected with humanity and enterprise, but there was really no value in the colony except as a coal mine, and upon this point he wished to know whether the coal company was more flourishing than it had been, and whether the Admiralty had found that the coal could be used for ships on the Eastern stations instead of Welsh coal.

Mr. Monsell said he could corroborate what the right hon. gentleman had stated in regard to the entire success of Mr. Pope Hennessy in the Government of Labuan. By his energy and good sense he had been able to develop those coal mines, which were so important for the future prosperity of Labuan. He had effected this through getting a number of convicts from the Straits Settlements and employing them in the coal mines. The result had been that coal had been produced in considerable quantities, and, although it did not equal the coal of this country, it had been used in Her Majesty's ships, and had been found fitted for use in steamers.

## THE SUEZ CANAL.

(August 2nd.) Mr. Gourley asked the Under Secretary for Foreign Affairs whether he had received any official information as to the probable navigable depth of water expected in and through the Suez Canal; and when it was to be opened for general commercial purposes.

Mr. Otway would give his hon. friend all the information on the matter of which he was possessed, only premising that it was not official. Mr. Fowler, the engineer, who was in Egypt at the beginning of the present year, in an account of the canal, published in *The Times* on the 1st of February, describes its depth as 26 feet. He says:—

"With minute exceptions the whole of the canal is now being excavated, and completed according to one or other of the following sections:—The first section is 22 miles in length (the difficult part of the work), 196 feet in width at surface of the water, and 26 feet deep for 72 feet at the bottom. The second section is 77 miles in length, 327 feet in width at surface, and a similar depth of 26 feet, for a similar width of 72 feet at the bottom."

They had heard from other sources, however, that the depth did not exceed 18 feet. It had also been stated that the opening of the canal had been fixed by the company for the 17th of November next, though there was reason to doubt whether the works would be sufficiently advanced by that date to warrant the canal being then opened for general navigation.

# CHINA DESPATCHES.

(Globe.)

We have received from the Foreign-office another series of despatches and reports touching the inexhaustible subject of commercial intercourse with China. More and more the information and opinions of those practically acquainted with the conditions of that Empire, its people and Government, increase the doubts as to the success of the new reliance on the Imperial Government at Peking, if they do not render us sceptical of the wisdom of the policy inaugurated by Lord Clarendon. Mr. Burlingame prevailed upon a credulous Foreign Minister to loosen our hold upon Chinese trade by glorifying the enlightened intentions of the Celestial Government. Others, who represent English interests and are in a position to know the sympathies and action of the Chinese, make bold to declare that it is the Imperial Government and its representatives throughout the Empire that constitute the real obstacle to an extension of Foreign trade. How stands the case?

That a magnificent field for enterprise is closed to us in the interior of China every account confirms and deplores. Mr. Consul Alabaster, in an overland journey from Chef-oo to Chin-kiang, on his way south to Swatow, passed along the line of the Grand Canal from the Yellow River to the Yang-tse, and he reports to Sir R. Alcock, at Peking, an enormous commercial wealth and traffic in a succession of large cities, lying as a temptation to our merchants on the banks of the canal. A large portion of the country was cultivated, cotton and other manufactures flourished, cattle droves were wending northwards: these were some of the signs of prosperity which greeted the consul in the Shantung district, although the country was disturbed by the embers of a rebellion; but in a three-days' journey from the Yellow River to Chinkiang he saw a hundred times the number of people, and a thousand times the amount of trade, that he had witnessed in Shan-tung. At length the British consul reached Yang-chow, the salt city of China, "celebrated for its wealth, luxury, and turbulence, three times sacked by the rebels, and still considered by Foreigners one of the finest accessible towns;" and his reception was characteristic:—

I found the people more ill-disposed than anywhere I had yet visited, and was called "yang-kuei-tsze," or foreign devil, in the most offensive sense. From my start I had always been called a devil, but rarely hitherto as an insult; it is a common term for Foreigners, and I was several times on my way even spoken of by people seeking my aid under the impression that I was a doctor, as "his Excellency the Devil" ("Kuei tsz'ta jen"); but at Yangchow the people seemed to mean it as an insult, and more than one stone was thrown at me by the following crowd as I wandered through the streets. This was the only missionary station I had come across on my journey, although many places seemed adapted for mission work. I had brought a supply of books with me, and always found them gratefully received when, in return for some slight service, I presented one; nowhere had I found religious intolerance; and although in one place in Shan-hai I heard Christianity spoken of as a senseless profession, I in all other places found it spoken of as an excellent religion, leading men to do good.

Consul Markham, who made a special tour through Shantung, gives most important evidence. The only incivility that he experienced was from the local mandarins, who, he is convinced, "have their cue from the Central Government." He scarcely heard an opprobrious epithet used, although he passed through many large cities and towns never before visited by a European, and was many times among multitudes from all parts of the country. In contrast with the conduct of the mandarins, the merchants visited him, and expressed their willingness to deal with Foreigners, questioning him closely regarding steamers, railroads, and Foreign inventions generally. From his observations, Mr. Markham is "firmly of opinion, and in spite of anything that may be said to the contrary, that it is the intention of the Chinese Government to enter upon a retrograde policy, and that they wish to curtail as much as possible their relations with Foreign Powers, restricting their intercourse to within the narrowest possible limits;" and he is "perfectly certain that the introduction of Foreign inventions, conveying new systems and new ideas into China, would not tend to shock the feelings and prejudices of the people, but, on the contrary, would have a most beneficial effect on all classes."

Scarcely less significant is the report by Mr. E. L. Oxenham. In a six weeks' journey overland from Peking to his Consular post at Hankow he traversed four of the provinces lying north of the Yangtsze, having followed the great trade route from north to south for 630 miles to the Han river, and thence proceeded by boat for 520 miles to his post. Sir R. Alcock admits that such a journey must have given Mr. Oxenham an excellent opportunity of noting the extent and character of the commerce, the condition and something of the temper of the inhabitants, the physical aspect of the country and its state of cultivation after having been swept over by succeeding waves of insurrection, and the capabilities existing for Foreign modes of locomotion. And it is manifest that the opportunity was not lost, for the British Minister, in allusion to Mr. Oxenham's observations in conjunction with Mr. Alabaster's, informed Lord Clarendon that they supplied "many missing links and more recent information from personal experience than any we possessed of the state of these provinces—the re-establishment of order and industry. Both give encouraging facts as to the facilities and advantages many of the inland centres of trade offer for the extension of Foreign commerce, and, with a few exceptions, especially in Southern Honan and on the banks of the Grand Canal towards Yang-chow, the perfect security with which the country may be traversed by Foreigners, the absence of any hostile feeling in the populations, and a willingness, in most places, to see the extension of Foreign trade to their doors." But, isolated as they are, the bulk of the people in the interior districts seems to be actually ignorant of the presence of the British merchant in that empire, or of our position at Peking. They know nothing of us, except that mortal hatred which is excited by the traditions of Canton. Hence, as Sir R. Alcock points out, "the additional motive for the desire to penetrate more freely into the interior," and "the importance of greater facilities of access and means of extended intercourse."

With such facts before us, we must decline to judge the Imperial Government at Peking by its professions. It has had the opportunity of showing the beneficence of its intentions now that the Treaty of Tientsin has been under revision. Moreover, it has had our requirements distinctly placed before it, and the advantages of Foreign intercourse have been already demonstrated. Early in the present year the Chamber of Commerce at Shanghai put forth the points essential to be considered in the revision of the treaty, and that communication has elicited an important despatch from Sir R. Alcock bearing on the whole question of Foreign intercourse with China. His Excellency had urged the expediency of opening certain ports on the coast and rivers to Foreign trade, and it was believed the Chinese contemplated opening the inland waters within the limits of any customs' district to foreign vessels "not propelled by steam." This restriction the Shanghai Chamber pronounces as prohibitory, "fatal to the development of trade," and "but too suspicious a symptom of the old exclusive policy of this Government." On this point Sir R. Alcock wrote Lord Clarendon on the 23rd March last:—

The objection of the Chinese Government to steamers only applies to the inland waters not hitherto open to Foreign vessels. But, as regards inland residence, the objections appear to be inseparable in connection with extra-territorial rights. The Tsungli Yamen state they are willing that Chinese and Foreigners should be placed on an equal footing, but not that the latter should have exceptional advantages and privileges. They contend that, if the Foreign merchant claims the one he must forego the other in common justice to their own people. Thus both as regards inland steam navigation and residence, the first may be had whenever the Chinese traders

Digitized by Google

themselves employ steamers on those waters, and the latter whenever Foreign Powers are willing to place their subjects under the laws of the country and amenable to the territorial authority, as Chinese themselves would be in any Western State. Of course, the objections to any such arrangement while the Chinese laws and their administration continue what they are now must be manifold. But with these irreconcilable differences there does not seem any chance of agreement.

Sir R. Alcock disposes of the fallacious notion that the Russian treaty secures to British subjects the right of inland residence, and the French treaty a similar right to British missionaries to dwell in the interior. The Russian treaty referred to places only, as in Western Tartary north of Turkestan, which are no longer under Chinese rule; while the so-called right of the missionaries is said to be "by no means so clear and unquestionable as has been assumed." Sir R. Alcock quite agrees in the importance of railroads and telegraphs, in addition to inland steam navigation and the working of mines, as also in the necessity for the reform of abuses in the levy of transit dues at the inland barriers; but adds:—"No efforts hitherto made by me or by my colleagues in Peking, and they have been both earnest and continuous, have prevailed with the Chinese Government, or succeeded in removing their objections to initiatory steps in any of these directions, if I except coal mines, some of which they are willing to work themselves with Foreign machinery and superintendence." His Excellency concludes:—

It remains to be seen whether the recent assurances made by Her Majesty's Government, that there was, so far as Great Britain was concerned, neither a desire nor intention to apply unfriendly pressure to China to induce her Government to advance more rapidly in her intercourse with Foreign nations than was consistent with safety and with due and reasonable regard for the feelings of her subjects, will have any effect in removing this Government's disinclination to listen to any propositions for making a beginning on railroads and telegraphs. . . . . .

But, as regards the desires of the merchants and the progress of any negotiations here for the realisation of their wishes, it will be very plain to them that, when Her Majesty's Government has officially informed the Chinese envoy that they fully admitted the Chinese Government were entitled to count upon the forbearance of Foreign nations, and that no unfriendly pressure should be brought to bear by Great Britain to induce them to advance more rapidly than might be held safe and consistent with a due regard to popular feelings, it does not rest with Her Majesty's representative to adopt any course opposed to such declaration.

Thus, the onus of the consequences of the new Chinese policy is cast upon Her Majesty's Government; and, unless the future belies the past and the present, that responsibility will be heavier than their worst apprehensions have foreshadowed.

## MAJOR-GENERAL CAVENAGH AND THE VOLUNTEERS.

At the close of the annual competition of the 5th Kent Volunteer Artillery the prizes were presented to the winning competitors by Major-General Cavenagh, late Governor of the Straits Settlements, who delivered the following interesting address. The ceremony took place at Sydenham, on the 24th instant:—

"Associated as I have been from boyhood with your beautiful county, I esteem it a great honour to have been allowed the gratification of presenting your prizes; indeed, it is a source of sincere pleasure to me to be identified in any way with that fine force, the formation of which, no one can doubt, has mainly contributed to enable our country to retain its proper place in the roll of nations. Not only is our regular army small as compared with the armed forces of Continental Powers, but called upon as it is to guard the largest Colonial Empire in the world, the actual number available for the protection of the mother country must necessarily be but a mere handful; and, gallant and devoted as our soldiers have ever proved themselves, were our coast menaced with invasion, that handful, unaided, could hardly be expected to contend successfully with the thousands that might be hurled against them. Hence arose the opinion, at one time very prevalent in Europe, that the power of Great Britain was on the wane; that her sons cared little for the national honour, and thought only of their commercial profits; and that, in fact, the national cry being peace at any price, she might almost submit to be insulted with impunity. Suddenly, and I may say spontaneously, the Volunteer force sprung into existence, and it was at once felt that the lion was only sleeping, and that, anxious as we are to live on terms of peace and amity with the whole world, should occasion demand, putting aside all party differences—all private interests—Englishmen of all ranks and classes, from the peasant to the peer, were prepared to make the requisite sacrifice, and to relinquish their peaceful pursuits for the purpose of acquiring a sufficient degree of military knowledge to admit of their affording support to their brethren of the line, and, if necessary, sharing with them the dangers and glories of the battle field, that truly, as of yore, there was no want of strong arms and willing hearts to defend our shores in the event of their being sullied by the footprint of a foreign invader. From that date all rumours of invasion ceased, and the name of Great Britain became again respected. There is little prospect of our relapsing into our former state of lethargy; at the same time, we should not remit our exertions to place all the branches of our national forces, Regulars, Militia, and Volunteers, in the highest state of efficiency, satisfied that by so doing we shall continue to preserve our country from those scenes of rapine and bloodshed incidental to war in all its phases, from which, whilst other countries have suffered, under Providence, our more favoured land has been for so many years happily spared.

"But it is not only at home that the Volunteers have been ready to maintain the national interests. At present there are corps in almost all our colonies; and the Volunteer movement has spread everywhere where Englishmen are located, so that drill has become the interlude to our national pastime, cricket, and skill in the use of the rifle almost as common as proficiency in handling the bat. I have myself had the honour of commanding two Volunteer corps, the Calcutta Volunteer Guards and the Singapore Rifles, both raised in times of emergency, the former during the Mutiny, and the latter on the occasion of serious disturbances amongst the Chinese. I have consequently had an opportunity of testing the worth of Volunteers. Indeed, to the Calcutta Volunteers I was greatly indebted for the successful result of my endeavours to preserve the peace of the metropolis of India throughout the struggle for empire that was so long raging around it. I may mention an incident that all must acknowledge to be most creditable to men and officers. On one occasion I received at midnight a communication to the effect that it was believed that a large body of native troops were about to mutiny and advance upon the capital, from which they were only sixteen miles distant, and I was requested, if possible, to despatch some cavalry to patrol the road by which the mutineers might be expected. The sole cavalry under my orders was a Volunteer troop that had only been formed the preceding day, and although armed and otherwise equipped, was still without uniform. I forwarded the necessary order to the captain, and, notwithstanding the lateness of the hour and the fact that the men were dispersed at their homes, in an incredibly short time they were all mounted, and the troop started in the required direction, prepared, if desired, to attempt, at all hazards, to bar the progress of a disciplined force composed of troops that, under British leaders, had often proved themselves good soldiers in many a hard-fought campaign.

"After the satisfactory report of your inspection which I have just read, advice may perhaps almost seem out of place, but, as a soldier, I hope I may be pardoned saying a few words to impress upon you the necessity of paying due attention to drill, and practising, when on duty, strict subordination. The goose step, I grant, is neither a pleasing nor a graceful motion, and it may appear irksome to be required to obey the orders of one's next door neighbour, who may be a sergeant or a corporal; but drill and discipline are simply the means to an end—that end, the power of acting in concert, and affording mutual support. Without that power no armed body can be efficient; and the individual gallantry and intelligence of its members can prove but of little avail in the day of need.

"As you must be wearied after your long march, I will not trespass further on your patience, but conclude by expressing my conviction that should that day of need ever come, the Volunteers of the 5th Corps of Kent Artillery, whether 'men of Kent or Kentish men, will all show themselves worthy to bear the emblem of the White Horse, and manfully strive to do their duty to their Queen and country.

# LEGAL.

—o—

## COURT OF CHANCERY—July 26.

(Before Lord Justice Giffard.)

IN RE THE CHINA STEAM SHIP AND LABUAN COAL COMPANY (LIMITED). DRUMMOND'S CASE.

This was an appeal from the Master of the Rolls. The question was whether the Hon. F. C. Drummond was to be included in the list of contributories of the company for 25 shares for which he had subscribed the memorandum of association. Mr. Drummond was a director of the company, which was formed in 1865 to purchase the business of the Labuan Coal Company and another company. Mr. Drummond was a shareholder in the Labuan Coal Company, and the business of that company was sold to the new company for shares in the new company. In respect of his interest in the Labuan Company, 479 shares in the new company were allotted to Mr. Drummond, 478 being fully paid up and one partly paid up. The question was whether the contract to take 25 shares, into which Mr. Drummond had entered by signing the memorandum of association, was fulfilled by the allotment of the 479 shares. The Master of the Rolls held that it was not, and Mr. Drummond appealed.

Mr. Jessel, Q.C., and Mr. Speed were for Mr. Drummond; Mr. Roxburgh Q.C., and Mr. Wickens were for the official liquidator.

Lord Justice Giffard was of opinion that Mr. Drummond was in the same position as if, after singing the memorandum of association, he had had 479 unpaid shares allotted to him, and had then paid them up in full. In such a case the obligation to take 25 shares would have been satisfied by the allotment of the 479 shares, and this was really the same case. The order of the Master of the Rolls must be reversed, and Mr. Drummond must be omitted from the list of contributories as to the 25 shares.

## COURT OF BANKRUPTCY.—July 28.

(Before Mr. Commissioner Holroyd)

IN RE GEORGE MELBOURNE.

The bankrupt was a merchant of 117, Leadenhall-street, and of the firm of Morgan, Melbourne and Co., Batavia. This was an adjourned sitting for examination and discharge.

Mr. Bagley, for the assignees, said that the bankrupt's transactions had been of considerable magnitude, and his liabilities amounted to at least £500,000. Although he suspended payment in January last, the creditors complained that they still remained in ignorance of the position of the bankrupt's affairs. He had traded jointly with Mr. Lichtenberg, who had absconded to California; and with Mr. Tolson, who, however, repudiated the alleged partnership, and was now living in Ostend. The bankrupt had lived in good style in Holland-park, and the furniture at his residence had realised £4,000. The assignees were very desirous that proper accounts should be prepared, and had consented to the appointment of an accountant to assist the bankrupt in the preparation of the accounts.

Mr. Atlee, who supported the bankrupt, said that he had been suffering from illness, but was desirous of giving all necessary information. It was true that he had lived in style, but the business had for a time been sufficiently profitable to justify his expenditure.

The further hearing was adjourned until November.

# The London & China Telegraph.

*LONDON, TUESDAY, AUG. 3.*

## DUTCH RULE IN JAVA.

For a long time our Rotterdam Correspondent has continued to report the recurrence of agitation in favour of a more liberal colonial policy on the part of the Dutch Government. The narrow view taken of all commercial questions, the blind adherence to the system of forced labour, the chronic mismanagement of the Indian army, and the obstinate resistance to the granting of any encouragement towards the extension of railways, telegraphs, and other improvements, seem to be fixed articles of faith with the Conservative party in Holland, although far more suitable to the Middle Ages than to the quick-moving and progress-loving spirit of the nineteenth century. Indeed, as regards the last-named question, the Liberals seem to have been until very lately almost as obstructive as their opponents, and in fact on almost all questions of Indian policy it has been remarked that the difference between the ideas of Liberals and Conservatives is so small that both seem to agree in thinking that the Dutch possessions in the East are only to be looked on as a source from which a heavy annual contribution is to be drawn, with as little trouble as possible, and without the necessity of making any return whatever. Java, in fact, is a sort of milch cow to Holland, as Cuba is to Spain. But these benighted views are clearly not destined to last long. A party of progress has arisen, whose spokesmen do not scruple to declare that unless very liberal reforms are speedily carried out the integrity of the Dutch possessions in the Far East will be seriously endangered. A well-written pamphlet by M. Des Amorie van der Hoeven — a name well known in the East— inculcating strong views on this point, happened, by a curious coincidence, to appear just as the first intimation was received of the recent disturbances in Java, and created no little sensation. The announcement that a revolution had broken out was soon found to be an exaggeration; but a straw will show which way the wind blows, and a feeling of uneasiness has been aroused that will not readily subside. The *Handelsblad* and other Liberal organs have at last taken up the question, and denounce the cultivation system as a blot on the national fame. A new Agrarian Law for India is now under discussion, but the opinions of public men on the subject are so widely divergent that many months must elapse before it can assume any defined shape. Since the recent change in the position of parties many wholesome reforms have been inaugurated at home, yet, strange to say, the opposition to these much needed colonial measures seems to be almost as strong as ever.

The letters from Java, addressed to the *London and China Telegraph*, and recently published in this journal have been largely quoted in the Dutch papers, and we are told have created a good deal of sensation, as they tend to open the eyes of the people to the fact that it will not do to perpetuate the system of "squeezing" Java that has been in vogue ever since it came into the possession of Holland. Discontent has long been rife among the colonists, and is on the increase. The voices raised against the policy of the Government are not simply those of a few English or other Foreigners, but proceed from the Dutch themselves in every part of the island. They feel daily that they suffer from the want of development of the land and general resources of the country. The tracts of land unimproved are immense, and the Government will neither sell nor improve it. The estates which are leased out are only for ten years, and as the occupier has to run the risk of getting a renewal, what outlay will he make on such a holding? The coffee crop has been a failure for two years, and now the Home Government has sent out orders that the native producers are to be made to suffer for the inferior quality of the coffee. The price paid to the natives for all coffee brought in has hitherto been thirteen guilders per picul, irrespective of the quality, but now they are to be paid only *one half* that amount for inferior descriptions. On what legal or equitable grounds this can be done is not easily seen, and the course is universally condemned. The system which the Government pursue in the cultivation of coffee has left it far behind the produce of Ceylon.

Until the policy of the Government is changed, and more liberal principles prevail, the commerce of the island cannot increase. Forced labour must be abolished and the soil let out to the enterprise of individuals. The institution of such a policy would be more calculated to develop the resources of the country, and would prove more lucrative to the Government than the present system of "squeezing," which is simply killing the goose that lays the golden eggs. Sooner or later a change must come, including, perhaps, a change of masters. The lords of this fertile soil must be sadly blind and unpractised not to be able to read the signs of the times. The injustice of this system, although the foremost, is only one among many grounds of complaint. Notwithstanding that the country possesses the finest facilities for railways, there is now only a small section, under fifty miles in length, in the vicinity of Samarang. The line from Batavia to Buitenzorg, the seat of the Governor-General, about forty miles in extent, is not yet commenced, although it would, by the sale of lands in the vicinity, be a source of considerable profit. Considering how few engineering difficulties there are in the way, and the comparative cheapness of labour in Java, railways should have been brought into use years ago, to give those facilities for the transport of goods which are the greatest stimulants to trade. Banking facilities, again, are studiously limited, the Java Bank being the only one allowed to issue notes, though several other banks of good repute are established there. The unreasonable delays and maladministration of the law form another grave source of dissatisfaction; common police cases, that ought to be summarily dealt with, sometimes taking four or five months to settle.

It is a grievous pity that a country possessing such unbounded wealth, and so many natural advantages, should be reduced to such a miserable condition by the blind, selfish, narrow policy of those who rule, or rather misgovern it. It is high time that the Dutch took a lesson from our own system, under which British India enjoys all the blessings of free trade, an enlightened legal code, and State aid to railway and other beneficial enterprise. Some of our smaller colonies certainly have many causes for complaint with regard to the details of local government, such as the defective constitution of Legislative Councils; but these are paltry inconveniences compared with the weight of oppression under which Java is doomed to suffer.

---

The notion of a "Pacific Cable" to connect California with Japan and China was started some months since in America, but laughed at on this side as altogether chimerical. However, if the *Moscow Gazette* is to be believed, something of the sort is to be attempted. That journal states that Mr. Perry Collins, formerly agent for the United States Government for the Amoor district, has left Washington for London and St. Petersburg, in order to make preparations for laying down a telegraphic cable between Russia and America. His plan is "to immerse a series of cables in the Pacific, starting "from the western coast of America, and proceeding by the "Aleutian and Kurile Islands and Japan to China and "Siberia." It is added that "several capitalists have offered considerable sums for this great work."

---

Mr. Burlingame is still in Paris. It is whispered that he has got "snubbed" by Prussia and Russia, and that the Embassy will therefore not go either to Berlin or St. Petersburg. We are assured that there is no foundation for the report to which a contemporary has given currency, that a young Parisian lady of good position and fortune is about to marry one of the Chinese attachés, much against the wishes of her family.

## THE TELEGRAPH TO INDIA AND CHINA.

The complete success that has attended the submergence of the French Atlantic Cable has given a fresh stimulus to telegraphic enterprise; and the promoters of the plan for a direct submarine line from England to Egypt, without touching the Continent of Europe, have wisely taken advantage of the favourable opportunity for bringing their undertaking before the public. This, which will form the last link in the chain of electric communication with India, is called the Falmouth, Gibraltar, and Malta Telegraph Company (Limited). As the name implies, its object is to connect Falmouth (and through that port the whole telegraph system of the United Kingdom) with Gibralta and Malta, with a station also at some point on the coast of Portugal. The approximate length of cable required from Falmouth to Gibraltar is 1,431 nautical miles, and from Gibraltar to Malta, 1,025 miles—total, 2,456 miles, or nearly one thousand miles less than the cable just completed by the *Great Eastern* and her consorts. The lines of the Anglo-Mediterranean Telegraph Company already unite Malta to Egypt, and the cables of the British-Indian Submarine Telegraph Company are to be laid between Egypt and Bombay by the end of April next. It only remains to connect England with Malta in a similar manner, and this the present company expects to accomplish by the 31st of May, 1870, after which date, if all goes well, telegrams will pass direct between England and Bombay through a single wire, under English control throughout, and communication will be almost instantaneous. The present undertaking is ported by the Anglo-Mediterranean and British-Indian Submarine Telegraph Companies, and an agreement has been made with them for twenty-one years for co-operation in working and division of through rates. The cost of the section between Falmouth and Malta is fixed at £660,000, and it will be made by the Telegraph Construction and Maintenance Company. The *Great Eastern* cannot lay it, for she will at the time of its completion be laying the main cable of the British Indian Company between Aden and Bombay. This vessel is now at Sheerness, preparing to receive the British Indian cable, of which nearly 400 miles are already manufactured; this section will be on board by the end of November, when she will proceed to her destination *via* the Cape. The remainder of that line—the Red Sea sections—will be laid by the *Chiltern* and the *Scanderia*, and the former vessel will probably be retained in the Red Sea as a repairing ship, as the *Hawk* is in the Mediterranean.

All this promises well for the early extension of the line to China; indeed, the prospectus of the Falmouth company distinctly states that arrangements for the construction of extension lines to China and Australia are now pending, and as the investing public seems to have at last awoke to the remunerative character of these undertakings, the sooner they are brought forward the better. We have often pointed out the ease with which a cable might be submerged between Ceylon and the Straits; in corroboration of which Commander Bullock, of H.M.'s surveying ship *Serpent*, reports that he steamed from Penang to Galle, taking soundings, and found a flat bottom, all the way across, at a depth of 2,200 fathoms. This is an extension that cannot be much longer neglected.

---

A further improvement has been made in the means of communication with the East by way of Brindisi, and the Foreign-office has caused the following particulars to be printed for the information of the public:—"In order to "ensure with greater certainty the connection of the trains "between Susa and Brindisi with those of the railways be- "yond the Alps and the Italian steamers to the East, it "has been decided that from the 1st of next August there "shall be—1st. Every Sunday a special train from Susa to "Brindisi, which, leaving Turin at about midnight, shall "take passengers to Brindisi, so that they may meet the "steamer for Alexandria at one o'clock in the morning, in "case, by a delay in the arrival of the international train at "Susa, the journey cannot be effected by the ordinary train "leaving Turin at forty minutes past nine. 2nd. On the "return journey, if the steamer from Alexandria should not "arrive at Brindisi on Wednesday before the departure for "Susa of the train at ten o'clock at night, there will be, at "about four o'clock on Thursday morning, a special train "which will take passengers to Turin and Susa in time "to leave by the international train from Susa to Saint "Michel."

## THE SUEZ CANAL.

It is authoritatively announced that the Suez Canal is now so far completed as to leave no doubt that it will be opened for traffic on the 17th of next November. The passenger dues will be at the rate of ten francs for each passenger; and the rules of navigation, and the tariff charges for pilotage, anchorage, and tonnage will be published very shortly. We hear that at Marseilles, Trieste, Venice, and other Mediterranean ports preparations are being made to send steamers through to India, as soon as the Canal opens, and even in New York a company is said to be in course of formation for establishing direct communication, *via* the Canal, between the United States, India, and China. We are not aware that any steps have yet been taken by any of the English companies in the same direction. Here it is generally felt that to undertake any preparations of a costly nature would be premature until it is proved to demonstration not only that the Canal can be opened, but that it can be kept open. It would be extremely unwise, for instance, for the P. and O. Company to make any change in its service on the strength of the announcement above quoted. Doubtless the waters of the two seas will mingle before November, but that is a totally different thing from the completion of the Canal to its full width and depth. Another difficulty to be taken into consideration is the difference of climate between the two seas, and the consequent wide difference in the organisation of the services on either side of the Isthmus. The Lascar crews, that are alone fit for the Indian side, would during the greater part of the year be useless on the passage to Southampton *via* the Bay of Biscay; and, on the other side, no European "hands"—especially stokers, &c.—could stand the summer heat in the Red Sea. To meet these and other difficulties a total revolution in the system of the mail service would be necessary, and it would be rash to attempt this until the advantages to be derived from it are made somewhat clearer than they seem at present. Whether used for the mail service or not, it will probably not be many months before the Canal is available, at any rate, for ordinary steamers of moderate draught.

---

When civil war or rebellion breaks out in China or Japan the British Minister is always prompt in issuing a "neutrality proclamation," warning British subjects to take no part in the hostilities, and to abstain from supplying munitions of war to either party. The French manage things differently. Enomoto, the rebel or pirate who has so long held Hakodadi against the Mikado's forces (our latest telegrams announce the recapture of the place, but give no particulars), has been from the first assisted by a number of French officers; and so far from taking any steps to prevent French subjects from thus making war on a friendly Sovereign, M. Outrey continued, even to the date of our last advices, to allow Frenchmen openly to leave Yokohama to join the rebels. The capture of Hakodadi has of course put an end to this anomalous state of things, but it could hardly have continued much longer without an awkward collision. As it is, we fear the Mikado's Government cannot have been highly impressed with the good faith of the Western Powers, and we hope Sir Harry Parkes has not failed to assure them that England does not favour such practices as those at which M. Outrey, for reasons best known to himself, has connived.

---

A movement is on foot for the introduction of Chinese labourers into the Southern States of America. A number of these labourers are already employed there, and the planters are said to be exceedingly well pleased with them. The *New York Times* says they are not only patient and faithful workers, but seem well adapted to the climate and industries of the South. The Mississippi Valley, it adds, would feed and pay a hundred millions of these Mongolians, and China has a hundred millions she could easily spare. The whole question of Chinese immigration is at last attracting the serious attention of the American press, and the balance of opinion seems to be decidedly in favour of encouraging the movement.

---

Major-General Cavenagh, late Governor of the Straits Settlements, distributed the prizes after the meeting of the 5th Kent Volunteer Artillery. The ex-Governor made a very interesting speech, of which we give the text in another part of our paper.

Digitized by Google

One Herr Wirckman recently published at Hamburg a curious pamphlet to prove that those nations which succeed best in extending their commercial relation with foreign countries are those that possess no naval forces, no foreign Consuls-general, and aim at no political influence; in support of which ingenious theory the author instances the success of the Swiss, Germans, and Belgians, who, he points out, can get no real support from their Consuls or navy, and who prosper, he infers, by virtue of their superior honesty and abstinence from all interference with the natives. This is a delightful picture, and would no doubt have special charms for Lord Clarendon and Mr. Bright. But the vision is somewhat rudely dispelled by a China correspondent of the *Pall Mall Gazette*, whose letter we reprint in another column, and who very justly shows that although the subjects of Hamburg, Switzerland, and other small States undoubtedly do prosper and make money in China and Japan, it is by no means owing to their entire want of political support and influence, but rather to the shrewdness with which they have availed themselves of the advantages conquered by the armaments, and maintained by the political influence of the greater Powers. The letter is well worth reading.

---

Apropos of the departure of Sir Henry Kellett for China' Sir James Elphinstone raised a small discussion in the House of Commons on the inhumanity of the practice of sending officers out to the Eastern stations by the Red Sea route during the summer months, accompanying his remarks with some statistics as to the heat and oppressiveness of the climate, temperature and density of the water, &c. In reply, Mr. Childers humorously observed that, as the Government had no ships in the Red Sea just now, the hon. member should have addressed his valuable remarks on it to the P. and O. Company, who ran one steamer each way in it every week. This is stupid as well as flippant. Do not the P. and O. Company work under a Government contract, which compels them to run steamers in the Red Sea at all seasons? Besides, a member of the Cabinet ought to know that, under the contract alluded to, the company has to run *two* vessels each way every alternate week.

---

Mr. Bowring lately asked the Under Secretary for the Colonies whether his department had last year issued a circular to Colonial Governors, defining the duties and responsibilities of *ex officio* members of Legislative Councils; and whether any intimation had been received from the Governor of Hong Kong that he had communicated the same to the *ex officio* members of his Council. Mr. Monsell replied that such a circular had been issued, but that no information had been received from the Governor of Hong Kong as to whether its contents had been communicated to the members. The inward mail, received on the 30th May last, brought news of the circular having been received and published in Hong Kong in April, 1869; so that, if issued "last year" it must have been a long time in reaching its destination.

---

It is now settled that Sir Henry Kellett, the new Commander-in-Chief for the China station, will proceed by the Overland route some time this month. We understand the *Narcissus* has been decided on for his flagship; she is a screw frigate carrying 35 guns, and recently bore the flag of Admiral Ramsay, on the South American station. The appointment is gazetted of Mr. James W. Lishman, paymaster, to be secretary to Vice-Admiral Sir Henry Kellett.

---

The *Drio-joh*, a fine armour-plated steam corvette, built at Aberdeen for the Prince of Higo, sails this week for her destination. If the course lately taken by Japanese politics be not interrupted, it seems probable that the Prince of Higo, by the time this vessel arrives, will have no use for her, in which case we presume she will become the property of the Mikado. Mr. Edward Harrison, late of Nagasaki, is a passenger by her.

---

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered i a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

# Foreign Intelligence.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, July 27.

In the absence of any political events of importance in Germany, it being the *saison morte* when Sovereigns and their Ministers are at the bathing places and their country seats, I cannot do better than give you some extracts from the valuable statistical returns of the commerce of this city last year, just published by the Board of Trade here; and I am enabled to add, that at the instance of the statistical department of the Zollverein, arrangements may perhaps be made for extending these returns in future to the exports, so that it may be possible to see how the goods imported are disposed of, and where they are sent for final use and consumption.

Hamburg Trade Returns for 1868.

The number and tonnage of vessels that arrived at Hamburg in 1868 from the Far East were as follows:—

| From | Vessels. | Commercial Lasts.* |
|---|---|---|
| China | 18 | 2,668 |
| Philippine Islands | 1 | 117 |
| Dutch India | 5 | 976 |

N.B. Those articles marked with an asterisk were larger both in quantity and value in 1867.

The net weight of the goods imported in 1868 was 52,934,928 centners (against 50,637,887 centners in 1867), of which 27,421,121 (or 52 per cent.) was by sea and 25,513,807 (or 48 per cent.) by land carriage. The value of the goods imported was 473,633,720 marks banco by sea, and 344,410,550 marks banco by land—together, 818,040,270 marks banco, or about £60,600,000.

The total number of sea-going vessels that arrived at Hamburg in 1868 was 5,297 (against 5,055 of 636,037 lasts in 1867), their tonnage 681,185 lasts, or 2,043,555 tons, and their crews amounted to 67,351 men. During the same year the number of vessels that sailed from Hamburg for foreign countries was 5,287, of 679,486 lasts, or 2,038,458 tons, and 67,430 men (against 5,071 vessels of 637,583 lasts in 1867.

It is interesting to notice the great increase of late years in the number of steamers that took part in the navigation of this port, and their tonnage. Last year there arrived here 2,150 steamers from abroad, of the aggregate tonnage of 1,400,980 tons (average 652 tons), whilst ten years ago the number was only 1,133 of 516,366 tons (average 466 tons); so that the increase in the number is nearly double, three times the tonnage, and 40 per cent. in the average size of each steamer. It further appears from the above returns that the 2,150 steamers took part in the navigation last year to the extent of 1,400,900 tons, whilst the 3,147 sailing vessels could only carry 642,575 tons; so that virtually more than two-thirds of the trade last year was carried on by means of steamers (68½ per cent.), and less than one-third (31½ per cent.) by sailing vessels.

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 30.

"La politique chaume" is at present the watchword of "Own Correspondents," as is customary when we are on the eve of the dog days, and members of Parliament are so utterly overcome by the temperature as to think the mere sitting in their fauteuils an unbearable exertion. With a haste which could only be justified by the overwhelming heat the First Chamber has disposed of the business before them; it was hot, very hot, too hot for the discussion which some of the measures required. The M.P.'s, the Royal family, and some members of the Cabinet are enjoying their summer's holiday at their country seats. In the meantime the papers are discussing the several Bills which have been laid before the members, but which will not be debated until the opening of the new session in September. The principal measure is the Agrarian Law for India, with reference to which opinions are so different that it is utterly impossible to discover the "thread of Ariadne" among the chaos of demonstrations and reasonings. But this much is certain—not one paper approves entirely of the Bill. For the Conservative papers it is too Radical, and the Liberal journals are demonstrating that it is too irresolute. But before the Chambers can deal with this subject many months must pass away. The only article worth calling your readers' attention to appears in the last number of the *Tydschrift voor Nederlands Indie*, which criticises the Agrarian Bill in a style which is a convincing proof that the old divergence between Van de Putte and Thorbecke still exists, and perhaps may lead to the rejection of the Bill and the resignation of Mr. de Waal. Moreover, the Conservative papers continue to publish rumours respecting alterations in the Cabinet, and they assert most positively that the present Minister of Foreign Affairs, Mr. Roest Van Limburg, will accept the post of Minister at the Court of Florence. But, at the same time, it is said that it is impossible to find a successor. Some of the papers, however, think that the ex-Minister Cremers would accept the portfolio. There is also a widely-spread *on dit* to the effect that Mr. van Mulken will resign the portfolio of the War Department; but I need not say that I give you these rumours for what they are worth, although they are to some extent supported by the fact that neither of these Ministers assisted at the opening of the International Exhibition at Amsterdam.

The letters from Java addressed to *The London and China Telegraph* have created considerable sensation in Holland, and they are now making the round of the Dutch papers. They will tend in my opinion to open the eyes of the Dutch to the fact that it will not do to go on "squeezing" Java as we have been accustomed to do for a series of years. The *Staats Courant* published to-day favourable news about that portion of the crew of H.M.S. *Amstel*, who, as I told you in a former letter, were thought to have been murdered by the natives of Commendah (coast of Africa). It is now ascertained that one of the officers, Mr. Drabbe, and six soldiers were drowned, by the capsizing of the boat, and that the other officer, Mr. Zeegers Veeckens, who was made prisoner with the rest of the crew, has been set at liberty on payment of a ransom amounting to £1,000. This favourable issue is principally due to the mediation of the Governor of the English colony at the Cape Coast.

In a former letter I told you that Mr. Van Reenen had declined re-election as President of the Second Chamber. A rumour now states that he will also resign his seat in Parliament, in order to give a better chance to Mr. Pynappel of being elected at Amsterdam. It is also said that Mr. Philipse has resigned the Presidency of the First Chamber. He has already given up his post as President of the Provincial Court of South Holland. His Majesty has approved of the appointment of Mr. H. P. J. van den Berg as Consul for Wurtemberg at Samarang. The Town Council of Delft has appointed Mr. J. Spanjaard, of Amsterdam, teacher at the institution for East Indian functionaries at Delft, in the place of the late Mr. D. Koordars. His Majesty has appointed the following gentlemen as Dutch ministers of Protestant congregations in the East Indies:—Messrs. J. Faber Djz, of Ossendrecht; Y. Radersma, of Britsum; J. de Jong, of Nieuwe Niedorp; S. H. A. Begeman, of Ankeveen; W. P. M. Moulyn, of Schoonoord.

### THE INTERNATIONAL EXHIBITION AT AMSTERDAM.

The International Exhibition of articles of domestic and mechanical utility was opened at Amsterdam on Thursday the 15th without any pompous ceremony. His Royal Highness Prince Henry, on his arrival at the "Palace of Industry," was received in the hall by Baron Mackay and the committee, the Ministers, the Corps Diplomatique, the civic authorities, and a large number of distinguished foreign visitors, who had been invited to take part in the ceremony. An address was delivered by Baron Mackay, president of the Central Committee at the Hague, explanatory of the origin and progress of the Exhibition, and the satisfactory manner in which it had been supported by foreign countries. The Prince graciously replied, congratulating the various commissions upon the success of their several sections. Thereupon the Prince was conducted through each section and received an explanation from his guides. In the evening a grand banquet was given in the Park *locale*, at which the Prince presided, supported by the same distinguished company which had been present at the opening Covers were laid for 250 guests. The usual loyal and patriotic toasts were drunk, and speeches were made by several gentlemen, with one or two exceptions, in French; everybody complimented everybody else and the working classes, who had produced all the wonderful things which may be seen at the Exhibition. The proceedings of the day terminated with a brilliant display of fireworks. There are fourteen countries exhibiting; the Netherlands numbering 928, Belgium 338, France 308, Great Britain 201, Austria 144, North Germany 129, out of a total of 2,325 exhibitors. The Dutch occupy the central space, and the rest is divided principally between the other-named countries, of which France, owing to some misunderstanding as to the day of opening, had hardly a single case unpacked in the extensive

Digitized by Google

space marked out for her. There is little or nothing from the United States. To a certain extent the Exhibition must be regarded as a failure. The original idea of the promoters was to confine it to the display of articles of domestic economy, in order to teach the poor how to improve their condition, but finding some difficulty in getting a sufficiency of such articles to fill the space at their command, the plan was changed, and the result is that there is little, if anything, to distinguish the Amsterdam Exhibition from others of a similar character which have been held before. The most successful exhibitor was undoubtedly an Austrian, who exhibits good Vienna beer in glass mugs in a temple near the principal entrance to the grounds. This gentlemen allows everybody to taste for themselves as often as they please, at 20 cents the glass. He did an enormous trade, and it was fortunate for the Amsterdam breweries that his stock was exhausted in a few days.

COMMERCIAL.

The Money and Stock Markets remain dull, there having been no transactions of any importance. The rate of discount remains unaltered, money being very abundant. Dutch Two-and-a-Half per Cents., 56½; Three per Cents., 66¾; Four per Cents., 86½; Trading Company, 115¼; Netherlands Bank, 231; E.I. Railway, 93½.

PRODUCE MARKETS.

Coffee.—The market is very dull, the demand for consumption being unimportant. Good ordinary Java from the last auction has been offered in large quantities at 35½c. to 36c. The transactions only comprise 628 b. Java, ex Doelwyk, at 34c. to 39¾c., and 358 casks Ceylon.

Raw Sugar.—The Trading Company offered 47,755 mats on the 22nd inst. in public auction. The whole quantity was sold at and above the valuation, brown and yellow realising ¼f. and white ¾f. under May prices. 18,000 mats were sold for export and speculation, and the rest was bought by refiners. Before the auction 2,500 mats Java changed hands at ¼f. to ¾f. under May prices, and 913 mats Cheribon ex Dunedin, at secret prices. The stock on the 15th inst. was 55,049,585 kilo. The prices paid in auction are as follows:—No. 5, 31¼f.; No. 6, 32f.; No. 7, 32½f.; No. 8, 32¾f.; No. 9, 34½f.; No. 10, 34f.; No. 11, 34½f.; No. 12, 35f.; No. 13, 35¾f.; No. 14, 36f.; No. 15, 35¾f.; No. 16, 36f.; No. 17, 36f.; No. 18, 36¼f.; No. 19, 36¼f.; No. 20, 36¾f.

Rice.—There is a good demand, and the market is animated. The following parcels have been sold:—1,273 b. Java, ex Rotterdam, at 7¼f.; 422 b. do., ex Petronella, at 7¼f. to 8¼f.; 1,274 b. Java, damaged, ex North American, at 2¾f. to 3f.; 4,400 b. Java, ex Kinderdyk.

Tea.—The private auction, at which 4033/4, 21/8, and 70/12 chests Java were offered, went off as follows:—

| | | | |
|---|---|---|---|
| Boey ... ... | 61c. to 88c. | Pekoe ... ... | 291c. to 349c. |
| Congou Boey ... | 86 to 99 | Orange Pekoe ... | 81 to 127 |
| Congou ... | 85 to 122 | Tonkay ... | 77 to 132 |
| Kempoey ... | 97 to 104 | Schin ... ... | 63 to 95 |
| Soepoey Pekoe | 114 to 204 | Hysant ... ... | 83 to 146 |
| Souchong ... | 85 to 146 | Uxim ... ... | 137 to 151 |
| Pekoe Souchong | 150 to 202 | Joosjes ... ... | 113 to 143 |

The prices paid are very high, and the general opinion is that the result of the forthcoming auction on the 28th, when a cargo of China will be offered, will be very favourable.

The following is the result of the Dutch Tea Sale on the 28th inst. of 1521/4, 1997/12, and 100/16 China Teas imported from Foo-Chow-Foo, per *Victoria*:—198/4, 154/12 kisten fine new season's Kaisow Congou, 80 to 82 cents; 428/4 finest new season's Kaisow Congou, 85 to 92; 109/12 choice new season's Kaisow Congou, 92 to 93; 130/12 finest new season's Kaisow Congon, 85; 138/4, 175/12 extra finest new season's Kaisow Congou, 87 to 99; 95/4, 118/12 superfine new season's Kaisow Congou, 92 to 93; 258/12 extra finest new season's Lapseng Souchong, 105 to 106; 244/4, 711/12 superfine new season's Lapseng Souchong, 111 to 220; 192/12, 100/16 extra superfine new season's Lapseng Souchong, 130 to 144; 318/4 extra superfine new season's Kaisow Congou, 97 to 101; 100/4 superfine new season's Kaisow Congou, 97 to 98 150/12; extra superfine new season's Kaisow Congou, 101 to 107. 282 lots sold, 36 bought in.

Java Tobacco. — Dull, without business of importance. Stock, 16,655 b. Java.

Camphor.—190 chests floating from China sold at prices that did not transpire.

Arrack. - 104 casks Sourabaya, ex Spanker, sold at secret prices.

Indigo.—The good result of the London auctions greatly influenced our market. The stock is small, and holders decline to operate, in waiting for higher prices.

Java Curcuma.—A parcel of 477 bales very good quality will shortly be offered in auction. Ordinary quality is worth 9¼f. to 9½f.

Tin is again somewhat firmer. Some thousands of slabs Banca have changed hands at 79f. to 79½f. 300 slabs Billiton sold at 77f.

Rattans.—The Trading Company will offer in auction 35,100 bundles. The market is firm; the transactions include the following parcels:—150 pic., ex Rotterdam; 164 pic., ex Cheribon; 200 pic., ex County of Elgin; 450 pic., ex Burmah; 87 pic., ex Nyverbeid; and 46,000 kilo., ex North American.

Hides.—The market is animated. 68 p. Batavia buffalo, ex Noach II.; 1,450 p. Samarang do.; and 863 do. rinder, ex Twee Gezusters, have been sold.

SHIPPING INTELLIGENCE.

Arrivals.—July 14, at Texel, from Batavia, Daimio; 16, at Brouwershaven, from Rangoon, Bonniton, Tinnevelly; at Hellevoet, from Batavia, Waterloo; 19, at Brouwershaven, from Batavia, Jacoba Cornelia; 21, at Flushing, from Akyab, Jurgen Bruhn; 25, at Brouwershaven from Batavia, Cornelis Gips.

Freights.—For Batavia, 18f. to 25f.; for Samarang, 25f. to 30f.; for Sourabaya, 30f; for Padang, 35f. to 40f., per last of 2,000 kilo., with 15 per cent. premium; for Singapore, 30s. to 35s.; for Hong Kong, 35s. to 40s.; for Melbourne, 40s., per ton of 1,015 kilo. dead weight—per ton of 40 feet 5s. higher. For Singapore and Hong Kong with 15 per cent. premium, and Melbourne with 5 per cent.

# Monetary and Commercial.

The Lord Chancellor has ruled that the estate of the late Mr. Gibb, a deceased director of Overend, Gurney, and Co., cannot be held liable in the liquidation of that concern; a decision which has been received with satisfaction by the mercantile community. Mr. Gibb could neither be charged with neglect of duty nor with bringing other people into losses which he himself avoided. His attention to the business was constant, and notwithstanding his long and acute mercantile experience, such was his confidence in the inherent stability of the company that at the hour of the closing of its doors he was not only one of the largest shareholders, but also among the largest creditors as a depositor.

A bill having been filed on behalf of the shareholders in Overend, Gurney, and Co. (Limited), to make the directors responsible to the shareholders for the losses they have sustained by reason of the directors having purchased the business of the old firm, though it was insolvent to the extent of £2,000,000, the directors demurred to the bill, but Vice-Chancellor Malins overruled their demurrer. They have now appealed to the Lord Chancellor, who has decided that the demurrer lodged on behalf of the directors ought to have been allowed by the Vice-Chancellor. His lordship remarked that fraud was not alleged in the bill against the directors, and he said that though they might have acted imprudently, power had been given them to purchase the business on such terms as they might see fit. This decision affords another illustration of the risks to which the subscribers for shares in joint-stock companies are exposed. In this instance no such power was voted by the shareholders to the Board, for no meeting of shareholders was held. The Lord Chancellor is reported to have said, "No doubt the speculation into which they (the shareholders) entered was hazardous, but that was the characteristic of all trades, and especially of bill-broking." His lordship appears to be much more learned in the law than in the usages of commerce. Hazard is not the characteristic of "all trades;" and, of all trades, there are few that, under legitimate conditions, are less hazardous than that of a bill broker. In fact, a bill broker, *i.e.*, a person who acts strictly as broker between the man who has money to employ and the man who has bills for discount—is absolutely free from all risk. But Overend, Gurney and Co., instead of being simple bill brokers, were gigantic money dealers and speculators.

Mr. Pender, having accepted the chairmanship of the new company for laying the submarine telegraph cable between Falmouth and Malta, with a view to complete the system of submarine telegraphy to India, has retired from the direction of the Telegraph Construction and Maintenance Company, who are to be the contractors for making and laying the line.

The shares of the Falmouth and Malta Telegraph Company have risen ⅛ to ⅜ premium.

At the meeting of the London and Westminster Bank, on the 21st inst., Mr. Bonamy Dobree in the chair, the report showed an available total of £161,285, after setting apart £2,000 towards the buildings of the bank, and including a previous balance of £4,320. A dividend was declared at the rate of 6 per cent. per annum, and a bonus of 5 per cent. upon the paid-up capital of £2,000,000, leaving £1,285 to be carried forward. The deposits held are £19,860,660, being within £55,290 of the total at the corresponding date of last year, and the reserve stands at one million.

The ordinary general meeting of the proprietors of the City Bank has been held at the London Tavern, Mr. J. Jones in the chair. The report, which was unanimously adopted, stated that, after payment of interest on current and deposit accounts, and providing for bad and doubtful debts, there remained a gross profit of £47,488; from which the directors, after making provision for current expenses, and for rebate of interest on bills discounted but not yet due, placed £5,000 to the reserve fund, and declared a dividend at the rate of 7 per cent. per annum free of income-tax, leaving £271 to be carried forward.

The directors of the National Bank have announced that the profit and loss account for the half-year, including £18,161 brought from last account, shows an available total of £45,202 from which they have declared a dividend absorbing £37,500, being at the rate of 5 per cent. per annum, or 15s. per share on the 50,000 shares forming the capital of the Bank.

The directors of the London and County Bank have decided on paying the usual dividend of 6 per cent., with a bonus of 2½ per cent., being together 8½ per cent., or £1 14s. per share for the half-year ended June last, carrying forward £6,000.

The discussion raised by Mr. Graves in the House of Commons regarding the Board of Trade Returns seemed to demonstrate their worthlessness for any practical business purposes, although their cost is stated to be not less than £50,000 a-year. An opinion was expressed that the annual tables are less unreliable than the monthly ones; but as it is said that some inquiries recently instituted by parties interested in the cotton trade have resulted in showing that the aggregate value of the cotton manufactures exported during the past year was in the official account fully twenty millions sterling in excess of the correct sum, it is evident that in neither case can any confidence be placed in them. The Board of Trade have hitherto had the discredit of the matter, but it appears that the returns mainly proceed from the Statistical Department of the Customs, in relation to whom they have not had power of adopting any corrective measures. It may be hoped that the inquiry now ordered by the Treasury will lead to the establishment of an efficient organisation, and that toward that end some experienced official of the Board of Trade will be associated with the investigation.

## THE SILK MARKETS OF FRANCE.

It is beyond doubt now that the quantity of silk produced this year in France is very much larger than it was last year; the cocoons are nearly all sold, and quotations are on the rise.

The quantity of silk conditioned at Lyons during the last week of June amounted to forty-five tons, and in the first week of July very nearly the same quantity; the returns for last week have not reached us. At Marseilles there can scarcely be said to be any business doing at all; the only goods registered as entered this month are 26 bales, weighing in all less than a ton and a-half; of these, fourteen bales were from China. The last quotations we have from this port are three weeks old—namely, 1 bale of Syrian silk at 105f., and 24 bales of Haisson at 75f.

## NEW YORK TEA MARKET.

The following is from Messrs. Beebe's Circular, dated 16th inst.:—The demand for all descriptions of tea has been very moderate during the past fortnight, and sales from first hands are limited to 4,600 half-chests Green, 4,300 half-chests Japan, and 1,100 half-chests Oolong. No material change in values has thus far been realised, though at the close Oolongs and finest Greens are held at higher figures. We have no further arrivals to report by this mail.

TYCHO BRAHE, (str.) Liverpool to Mauritius, Singapore, &c., steering S., July 19, 38 N., 13 W.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports continue dull, and the demand for tonnage is very slack. Coal freights from the Northern outports are not quite so firm, and rates have slightly declined.

Current rates of freight for vessels on the berth:—Per steamer to Japan, 100s. meast. Per sailing vessel to Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast; per steamer, 80s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £44. For Hong Kong: £33. For Singapore: £24. For Galle: £25. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £1 19s. For Shanghai: £2 2s. For Hong Kong: £1 15s. For Singapore: £1 5s. For Galle: £1 5s.

## MISCELLANEOUS.

At ST. HELENA.—June 14, Brilliant, Warren, from Yokohama, and sailed for Boston; 16, Henry Grenfell, Shiell, from Foochow, and sailed for London; Triton, Schey, from Batavia, and sailed 17 for Rotterdam; Ilmari, Niska, from Penang, and sailed 18 for Falmouth; 19, Hydra, Bockwoldt, from Bangkok; Lota, Barber, from Bangkok, and both sailed for Falmouth; Salvadora, Virutia, from Zebu, and sailed 21 for Santander; Alpha, Nielson, from Singapore; Italia, Zulueta, from Macao, and sailed 21 for Havana; 20, Aldsurie, Menzies, from Penang, and sailed 21 for London; Staatsraad van Ewyck, Ham, from Batavia, and sailed 21 for Amsterdam; Sarah Scott, Riches, from Manila, and sailed 28 for London; 21, Cornelis Wernard Eduard, Swart, from Batavia, and sailed 22 for Rotterdam; Mary Ann Wilson, Ritson, from Yloilo, and sailed 22 for London; 22, Queen of the Sea, Tomlinson, from Colombo, and sailed for London; Persian Empire, Murray, from Colombo, and sailed 23 for London; Red Deer, Spence, from Bangkok, and sailed for Falmouth; Gerard Pieter Servatius, De Goode, from Batavia, and sailed 23 for Amsterdam; 23, Nieuwe Waterweg II., Zwart, from Sourabaya, and sailed 24 for Amsterdam; Sarepta, Greig, from Colombo, and sailed for Havre; Haamsteal, Geerling, from Batavia, and sailed 26 for Rotterdam; 24, Bezoekie, Reckers, from Batavia, and sailed 25 for Rotterdam; 26, Yokohama, Blouet, from Bangkok, and sailed for Falmouth; Chinaman, Fentie, from Shanghai, and sailed 28 for New York; Webfoot, Slurrock, from Saigon, and sailed for Falmouth; Aria and Betsy, Ran, from Batavia, and sailed 29 for Amsterdam; 29, Liberator, Robertson, from Colombo, and sailed for London; 30, Oceaan, Smit, from Batavia; 19, Elshout, Akkerman, from Batavia, making a little water in her topsides, repaired and sailed for Amsterdam.

## ARTICLES OF IMPORT.

—o—

### TEA.

The market during the fortnight has been very firm. The telegrams from China of the moderate exports have induced holders to be very strong, whilst the trade, being light in stock, have been compelled to purchase to a moderate extent for immediate wants. Although there has not been the least excitement, or even much activity prevailing, the result has been an advance of fully ½d. per lb. in common Congous, and about 1d. per lb. in medium black-leaf kinds, other descriptions showing no material alteration. Congous: Siftings and broken-leaf kinds have met with a fair inquiry, and prices are a shade dearer. Fair to good common have been in demand, and the quotation has advanced to 1s. 1¼d. to 1s. 1½d., and there being but little now to be had at the former figure. Fair to good flavoury kinds have been wanted at from 1s. 2d. to 1s. 3d. per lb. Good to fine Kaisows have been difficult of sale; finest show no alteration. Pak Lins have been sold at about previous prices. Amoy kinds show an advance of ½d. per lb. Common to fair black-leaf kinds have been taken at rather higher prices; fair to good medium have been more saleable, and about 1d. per lb. advance has been established for them; fine to finest show no quotable alteration. In new-make Congous there has been more doing, and prices 1d. per lb. above those recently current are now obtainable. Oolongs remain without improvement. Common Souchongs continue in fair request, but the finer kinds are difficult of sale. In Flowery Pekoes there has been but little done. Scented Capers have been rather more saleable at somewhat improved prices. Scented Orange Pekoes—the Foochow kinds have been in request at the low prices ruling. Canton kinds have been rather more in demand at slightly better rates. Uncoloured Japans remain quiet in the absence of fresh supplies. Green Teas: There have been no fresh arrivals, and the amount of business has been consequently limited to a few sales out of old stocks, at about previous prices.

### SILK.

There is no improvement in the market; the same wave of life exists, and daily business is of the most limited kind. Importers and holders generally show much firmness with good silk, and will not accept low rates which are made to them; while common and undesirable silk is continually being offered without meeting with response from the trade; it just amounts to this, that the only buyers are consumers, who will not be tempted to buy a bale more than they want, and then only of the description they want; and there being no disposition among dealers to look forward, there is no speculation, and consequently a dull, dragging market. Quotations are unaltered for Asiatic Silk generally since departure of last China mail. The telegrams from China to 8th July have had no appreciable effect upon the market, although in themselves strengthening to holders.

Coffee.—There is but little alteration to report, Ceylon being still only in moderate request, and prices are in consequence slightly lower. The following are the latest rates paid at the public sales:—Plantation Ceylon, triage, &c., 40s. to 56s. 6d.; gray, 60s. to 66s.; coloury, 66s. 6d. to 80s.; peaberry, 74s. to 82s. 6d.; native Ceylon, good ordinary, 51s. to 51s. 6d.: garblings, 25s.

Cotton.—On the 24th inst., owing to an improvement in the Manchester market, the Liverpool market exhibited an accession of activity, and prices rose ⅛d. to ¼d. per lb. A quieter tone has since been established, and the advance has been lost, so that prices are about on a par with those current at the date of our last. During the past few days great steadiness has prevailed. The current quotations are as follows:—Surat, 8½d. to 11¾d.; Madras, 9½d.; Bengal, Scinde, &c., 8¾d. to 8¾d.; fair Dhollerah, 10⅜d.; fair Oomrawuttee, 10½d.; fair Broach, 10½d.; fair Bengal, 9d.; fair Egyptian, 13¾d.; fair Pernam., 13⅛d.; middling Boweds, 12⅝d. to 12¾d.; middling Orleans, 12⅞d. In the London market a steady business has been done throughout the interval, prices showing no material variation from those of our last report.

Camphor.—There is little inquiry for China and Japan at the current rates, but holders are firm.

Cocoa-Nut Oil.—There has been a moderate business in Ceylon at £43.

Gums.—Benjamin: Steady; of 108 cases Sumatra at auction, two-thirds sold at £8 to £9 12s. 6d. per cwt. for middling to fine 2nd quality, and £5 middling 3rd. Copal: Nothing of any consequence doing. Damar: Scarce, firm, and wanted; no business. Gamboge: Some little inquiry; not any offered at auction.

Galls.—Prices for Japan are lower, 306 packages having been sold at auction at 42s. to 45s. per cwt. for ordinary to good qualities. There is some inquiry for China, but also at lower rates.

India-rubber.—The market is dull, and the sales since our last have been confined to about 40 packages Assam at 9¼d. per lb. for ordinary.

Japan Wax.—The market is steady; there have been no public sales, but there is some inquiry privately at previous rates.

Manila Hemp.—Prices have slightly advanced, a moderate private trade having been effected at £50 to £51 per ton for fair to good roping. At the public sales 937 bales were withdrawn.

Plumbago.—The market for Ceylon is still unchanged, prices being maintained at the decline recently established. Of 911 barrels offered at the auctions, one-half sold, realising 11s. to 25s. per cwt. for ordinary to fine lump, 10s. for chips, and 7s. to 11s. 6d. for dust.

Pepper.—Black: Firm, with inquiry, but only moderate business. 652 bags Penang at auction, retired; 50 bags Tellicherry sold at 4¼d. to 5d. per lb. White: Shows some little recovery, 582 bags Singapore at auction, sold at 5⅞d. to 5⅞d. per lb., with a few lots fine at 6d. to 6⅛d.; 73 packages Tellicherry sold at 6¾d. to 1s. 4¾d. Limited trade privately.

Rice.—The demand is very slow, and transactions are within a narrow compass at the low rates previously established, viz., 6,000 bags good old Rangoon at 8s. 6d.; 9,500 bags Moulmein at 9s. 9d.; 100 tons garden Siam at 8s. 1½d., and 100 tons Askoolic at 9s. An arrived cargo of 1,700 tons Rangoon has been taken at a comparatively high price for London, namely, 9s. 1½d. ex ship, and a cargo of Saigon has been sold on secret terms.

Rattans.—Stout canes neglected, and only saleable at very low comparative rates; 3443 bundles Penang sold at auction at 2s. 5d. to 4s. 2d. per 100.

Rhubarb.—China has sold irregularly but generally at somewhat improved prices; of 194 chests at auction, three-fourths sold at 4s. to 6s. 3d. per lb. for fair to good, and 1s. 6d. to 2s. 11d. ordinary middling.

Shells.—Mother-o'-Pearl: Singapore, not in any supply: Manila rather better; of 510 cases at auction, about half sold at £6 10s. to £7 5s. per cwt. Tortoise, &c.: Steady; of 13 cases Singapore at auction, 6 sold at 13s. 6d. to 14s. 6d. per lb. for good to fine, in sorts, and 9s. to 11s., low to ordinary, 2 cases Manila retired; 4 cases Manila Turtle Shell sold at 1s. 6d. to 1s. 10d.

Sapanwood.—The market is dull; 43 tons Siam in public sale were withdrawn, and of 39 tons Ceylon offered a small portion only sold at £9 10s. per ton.

Sugar.—The steady tone of the market reported in our last has been maintained. Middling useful qualities continue in request and command full prices, while such common kinds as Clayed Manila have again been rather more looked after, and are saleable on better terms than they have been for some time past. Penang: About 2,000 bags have been sold at 31s. to 32s. 9d. for middling to good brown. Manila: 7,000 bags clayed sold, duty 8s., at 29s. 6d. to 30s. 3d.; duty 9s. 7d., at 32s. 6d.; and 10,000 bags common Cebu and Ilo Ilo sold at 27s. to 27s. 6d. Java: 746 baskets from Holland were nearly all bought in—yellow at 38s. to 40s., white (duty 11s. 3d.) at 40s. 6d. to 41s. 6d., rather below which prices two-thirds were afterwards sold. China: 753 bags, of low brown quality (from Swatow), realised 26s. 6d. to 27s. per cwt.

Spices.—Cassia Lignea: Firm, with limited private trade at full prices. Buds, limited business upon former terms. Cinnamon: We quote 1st sort 1s. 8d. to 3s. 6d. per lb., 2nd 1s. 6d. to 3s. 5d., 3rd 1s. 4d. to 3s. 2d., 4th, 5th and Jungle 10d. to 2s. 5d., market steady. 141 bales at auction sold; Chips without material change. 1,302 packages mostly sold at 2d. to 3½d. for low and ordinary. Cloves: Penang quiet; of 30 cases at auction, two sold at 10¾d. per lb. for good. Zanzibar have proved in admirable demand, and are ½d. per lb. dearer. 5,547 bags sold at auction at 2⅝d. to 3d. for middling to fair, with a few lots of good at 3⅛d. to 3¼d. per lb. Mace: Firm; 4 cases Penang at auction sold at 2s. 8d. to 2s. 9d. per lb. for fair reddish, and one case low Java at 1s. 11d. Nutmegs: Generally 1d. to 2d. per lb. dearer, with good business privately. 5 cases Penang at auction sold at 1s. 4d. to 1s. 5d. per lb. for low small.

Terra Japonica.—Cutch: Continues very flat, and of 249 packages at auction a few only sold at 26s. 6d. per cwt. for fine Pegue. Gambier: Cubes in very moderate demand, and of 2,828 packages at auction one-fourth sold at 19s. 6d. to 21s. 3d. per cwt. for ordinary to fair. Block has not sustained the improvement indicated in our last; business has been done at 17s. to 17s. 3d.: 455 bales at auction retired.

Tin.—The market for Straits is firmer, the current quotations being £132 to £132 10s., showing an advance of £2 per ton, at which price business has been transacted to some extent. Banca is quiet at £136 per ton.

## ARTICLES OF EXPORT.

—o—

### MANCHESTER GOODS.

From the departure of last mail up to the 21st inst. the market was quiet but steady. After the 21st there was an improvement in the demand for both yarns and goods, but especially for the latter, and a slight advance was established. During the last few days, however, there has been little disposition to purchase at the advanced rates which, notwithstanding, continue to be firmly maintained. Sellers who hold stocks can now dispose of stock at slightly under the prices asked by manufacturers, and yet realise as much as 2d. per lb. more than they could a month ago, and in some cases are availing themselves of the opportunity.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: Iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, ontaining a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c, &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## HOLLOWAY'S PILLS. — WEAKENING WEATHER.

—The sultry summer days strain the nerves of the feeble and decrepid, and this state eventuates in disease, unless some restorative such as these purifying Pills be found to correct the disordering tendency. Holloway's medicine gives tone to the nervous system, which is the source of all vital movements, and presides over every action which maintains the growth and well-being of the body. No one, therefore, can over estimate the necessity of keeping the nerves well strung, and the ease with which these Pills accomplish that end. They are the most unfailing antidotes to indigestion, irregular habits, palpitation, sick headache, and costiveness, that were ever invented, and in consequence of which attained the largest sale and highest reputation.

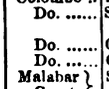
| Do. ..... | Q of Ceylon | 422 | A1 10 yr. | W.I.D. | Oct. 20 |
| Malabar Coast | Star of Jamaica ... | — | A1 9 yr. | W.I.D. | Aug. 4 |

No. 22, Great St. Helen's, E.C.

---

To follow the Ocean Beauty. Will be despatched about the 10th Aug.

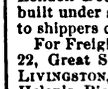


DIRECT for COLOMBO, the beautiful teak built clipper ship PALMERSTON, A1 15 years, 894 tons register; J. N. SEAGROVE, Commander; London Docks. This magnificent high-classed clipper, built under special survey, offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

Malabar Coast. Will meet with the usual quick despatch.



DIRECT for COCHIN, CALICUT, TELLICHERRY, CANNANORE, and MANGALORE, the beautiful clipper ship STAR OF JAMAICA, A1, 9 years; 306 tons register; A. SACK, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

To follow the "Palmerston." With immediate despatch

DIRECT for COLOMBO, the favourite China Clipper Ship SPIRIT OF THE NORTH, A1 10 years; 571 tons register, A. MATHEW, Commander; West India Docks. This magnificent clipper is well-known in the Ceylon trade for her rapid passages, and for the good order in which she always delivers her cargo.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

---

With immediate despatch. Having a considerable portion of her cargo engaged.

FOR SHANGHAI, direct, the favourite and powerful clipper ship SIR WILLIAM WALLACE, A1, coppered and copper-fastened, 967 tons register; A. H. TAYLOR Commander; loading in the East India Docks. This magnificent vessel, built under special survey in 1866 by Messrs John Duthie, Sons and Co., of Aberdeen, for the China trade, has proved herself thoroughly adapted for it by smart passages and sound delivery of cargo.

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

---

With immediate despatch.

FOR YOKOHAMA (KANAGAWA) DIRECT, the well-known clipper MOUNTAIN ASH, A1 10 years, 437 tons register; JACOB CARE, Commander. Loading in the East India Docks. This splendid vessel is noted for her rapid passages in the China and Japan trade, and sound delivery of cargo.

For Freight or Passage apply to Messrs. RUCKER, OFFOR, and Co., 115, Leadenhall-street, E.C.; or to NORRIS and JOYNER, 60, Cornhill, E.C.

---

FOR SHANGHAI, the celebrated Clipper Ship, LAUDERDALE, A1 15 years; 851 tons register; J. J. SMITH, Commander, East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

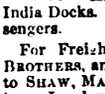
Regular line of Packet Ship.

FOR HONG KONG, the splendid composite clipper, CLETA, A1 16 years, 519 tons register; C. H. MIDDLETON, Commander; East India Docks. This ship sails very fast, and presents a favourable opportunity to shippers of fine goods.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

Regular line of packet ship.



FOR HONG KONG, the splendid new composite clipper, NORMAN COURT, A1 16 years, 800 tons register; ANDREW SHEWAN, commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage apply to Messrs. BARING, BROTHERS, and Co., 8, Bishopsgate-street Within; or to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

### THE MAILS, &c.

The present mail is delivered on its due date. We received some portion of our despatches on Saturday, *via* Brindisi, but too late to enable us to publish on that day. By the Pacific line, *via* San Francisco, we have later advices from Yokohama than those above quoted, namely, to June 30; but there is no news of importance beyond what we publish below.

The next inward mail, due here on the 23rd inst., will bring advices from Yokohama to June 30; Shanghai, July 2; Hong Kong, July 8; Singapore, July 16; Galle, July 25.

Telegrams have been received, *via* Galle, from Hong Kong, to July 16; and *via* Kiachta, from Shanghai, to July 15. The next outward mail closes on Friday next.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Massilia*, arrived Aug. 6.—From Shanghai: Mrs. Pickwoad and two daughters, Mr. B. G. Kinnear. From Hong Kong: Examiners Signor Gregorio, Rev. P. F. Martinez, Mr. P. Solares. From Singapore: Major Suttle, Mr. A. Velge, ex-Governor F. de Sibra. From Ceylon: Mr. Hudson.

To Southampton, per P. and O. steamer *Poonah*, expected to arrive Aug. 13. List not to hand.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Delhi*, from Southampton, August 7.—To Hong Kong: Dr. C. A. Lees, R.N., Mr. F. J. A. Waring, R.N., Dr. C. Wheeler, R.N., Mr. R. C. McClement, R.N. To Ceylon: Lieut. D. Monro, Capt. Maule.

Per P. and O. steamer from Suez, August 22.—To Yokohama: Mr. Heinrich Von Siebold.

Per P. and O. steamer *Syria*, from Southampton, August 21.—To Hong Kong: Dr. L. H. Franklyn, Mr. Marcus Wolff. To Ceylon: Mr. W. Raikes, Miss A. Walker, Miss Crowe.

Per P. and O. steamer *Bangalore*, from Marseilles, August 29.—To Shanghai: Mr. J. J. Tucker, Mr. Douglas Jones. To Singapore: Mr E. J. Tolson. To Batavia: Mr. T. Van der Chijs, Mrs. Van Haeften.

Per P. and O. steamer from Suez, Sept. 5.—To Hong Kong: Mr. and Mrs. C. C. Smith.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 4.—To Hong Kong: Mrs. Hackin. To Ceylon: Mr. and Mrs. G. W. R. Campbell.

Per P. and O. steamer *Delhi*, from Marseilles, Sept. 12.—To Shanghai: Mr. Russell.

Per P. and O. steamer *Ceylon*, from Southampton, Sept. 18.—To Hong Kong: Mr. J. Y. V Shaw. To Ceylon: Mr. M. Finch.

Per P. and O. steamer *Syria*, from Marseilles, Sept. 26.—To Penang: Mr. and Mrs. H. Frohlich.

Per P. and O. steamer from Southampton, Oct. 2.—To Hong Kong: Mrs. E. Arthur. To Ceylon: Mr. E. Buchanan, Miss Macartney, Mr. J. Duncan's two children.

Per P. and O. steamer from Marseilles, Oct. 10.—To Ceylon: Mr. and Mrs. M. H. Thomas, Miss Creswell, Mr. J. W. Gossett, Mr. Stanley Daniell, Miss Sconce.

Per P. and O. steamer, from Suez, Oct. 17.—To Ceylon: Mr. Duncan Davidson.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The latest advices from Yokohama by the mail received to-day are to the 13th June. The outward mails from this of the 9th, 17th, and 23rd April were received on the 31st May, 4th, and 11th June respectively. The *Japan Herald* gives the following summary of news:—

The most interesting news we have to give relates to the commencement of operations against the pirates in Yedo. After the attempt to cut out the *Stonewall* on May 5th, the Mikado's fleet assembled in Awamori Bay, and thence proceeded to Esashi, the farthest point from Hakodadi which the enemy had reached. Esashi was taken without difficulty on the 22nd, and arrangements were then made to move against Matsmai. A body of troops was sent overland, while the bulk of the force, on board the fleet, proceeded to the attack by sea. The land detachment was met withal, however, in the mountains by Enomoto's men, and, taken at some disadvantage, suffered a repulse, with a loss of about sixty killed and wounded. Meanwhile the fleet reached Matsmai, and on the 28th, after an hour's bombardment, stormed it, the garrison being pursued to some distance. Matsmai is about sixty miles from Hakodadi, and as the Japanese appear to be still ignorant of the importance of rapidity of action in war, we have not yet heard of the assault on the latter place, but it was expected to take place on the 4th inst. The *Albion* steamer was sent up from Awamori Bay, by orders of the Government, with a request that all Foreign residents would leave the port for a time, some few days before the attack on Esashi, and the majority did so. About fourteen remained behind, however, and having hoisted the flags of their respective nationalities upon their houses and godowns, were in hopes of being spared in the bombardment. No doubt proper compensation will be given for any loss of Foreign property, but the experience of Canton has taught merchants that it is better to save, if possible, than to claim. The rest, with the women and children, were in Awamori Bay when last heard of, some on board the *Albion* and others on board the English, French, and American men-of-war. The gunboat *Dove* went up a few days ago to Hakodadi, so that we are in hourly expectation of getting reliable information of the further progress of the Imperial forces. Of the rumours of news said to have come down overland it is, of course, not necessary for us to take any notice. There seems no reason whatever to doubt of the ultimate success of the Mikado's troops. They are in great, in overwhelming force, and as the behaviour of the pirates during their short occupation of Hakodadi and Matsmai has not been such as to ingratiate them with the people, they have no hold on the island of Yedo whatever, and with the fall of Hakodadi the whole trouble will cease, and peace be universal in Japan.

While on the subject of the restoration of peace, we may mention a curious proof which has come to our knowledge of the truth that few people are better fitted, apparently, to bear with equanimity the vicissitudes of fortune than the Japanese.

We have lately heard of three instances of adherents to the Tokugawa clan, one a small Daimio, the other two Hatamotos, who, instead of committing such an absurdity as harakiri, have bent to the blast of evil fortune, and, having lost all their possessions, are content to seek a livelihood among the lower ranks of the people. One, who had saved a little money from the wreck of his fortune, is a pawnbroker in Yokohama, another is a sweetmeat maker in Yedo, and possessing a wife or concubine of great talent in arranging evening entertainments, has established a corps of singing girls and posturers which is rising rapidly in public favour. A third is a servant in a Foreign store in the Foreign concession at Yedo. How are the mighty fallen!

We are glad to be able to state that ample apology was given

Digitized by Google

by the highest personage in the State himself for the insults suffered by Captain Stanhope and Mr. Consul Robertson on the Tokaido. As it proved that the train which met them was in attendance upon the ladies of the Mikado's Court, nothing more could be demanded beyond the apology, but the terms of this were most full, and, as we said in our last, such precautions have been taken against a repetition of outrage against Foreigners, that the Tokaido is as safe as the New Road.

We regret that we are unable to announce, at the same time, the detection and punishment of the men who have lately attacked Frenchmen in the streets, nor of the incendiaries who attempted to fire the French Legation. These outrages were, doubtless, the work of isolated fanatics, whom it is very difficult, if not impossible, to discover, particularly in the absence of any, even the faintest, clue. We have recently pointed out the extreme danger to Japan of a collision, or even of the threat of a collision, with France, and there is no doubt that the Mikado's Government would very severely punish the perpetrators of these outrages if they could be caught.

The important question of the currency is still occupying the attention of the Foreign and native authorities. Having established the Mint at Osaka, built premises, and erected machinery, the Government naturally objects to its removal to Yedo; but, on the other side, it is considered of such paramount importance that it should be here, where it can be under the immediate control of the Imperial Treasury, instead of being left to the care of subordinate officers at a distance, that we may consider it certain that this difficulty will be overcome. With regard to the other demands of the Chamber of Commerce, no change has taken place in the intentions of the Government since we last wrote on the subject.

The Committee in charge of the Municipal Reform question met the Foreign Ministers last week, and are believed to be satisfied with their reception; but they await now a written reply to their memorial.

We hear from Hiogo that on June 1st another sale of land on the Foreign concession took place. We see, and with pleasure, that only in very few instances did the lots go for much above the upset price of eight boos per tsubo. The exorbitant price of the land allotted to us for our residence in this country is one of the best founded and heaviest grievances we have to allege against the Japanese.

Mr. James Sinclair Downie, of Yokohama, has been charged before this Court, for having, contrary to the Treaty, proceeded into the country beyond the limits, without the necessary permission, and assaulted the Japanese officials when in the execution of their duty. The case was heard before Mr. Robertson, and the sentence was stoppage of permission to proceed beyond Treaty limits for a month.

On the 7th instant (says the *Japan Herald*) the smartest shock of earthquake that has been felt in Yokohama for some years startled our worthy citizens. The vibration was so great as to set chandeliers, &c., swinging at a sharp pace for some minutes, and we have even heard that the movement of clocks was arrested by the motion. We are informed that portions of one or two scaffoldings or sheds were thrown down, but believe that no accident has resulted. It would be interesting to know the extent of the shock.

From Hiogo we learn that the P. and O. steamer *Sultan* has been sold for the sum of 70,000 dollars. The purchasers are Messrs. Aspinall, Cornes, and Co., the enterprising agents of the P. and O. Company at this port.

A Nagasaki correspondent, writing under date of the 4th June, states that the great bridge between Desima and the Foreign settlement has been washed away by a heavy rain storm, and one Japanese drowned.

### THE LOSS OF THE "HAYA-MARO."

The *Japan Gazette* gives the following account of the loss of the steamer *Haya-Maro*, between Hiogo and Yokohama:—

The *Haya-maro* was steaming at a speed of about fourteen knots, and when two hundred yards to the eastward of Plymouth Rocks she struck violently on a sunken rock. After striking, the vessel grated, surged to and fro, and suddenly stopped—but for an instant—from the shock. Captain Hill then gave orders to run her in shore, but the moment she was clear of the rock, or three revolutions afterwards, the stem took the water and she went down bodily in about forty fathoms. At the moment she struck nearly all hands were on deck, but perfect discipline and coolness were maintained, there being only a rush to the boats on the part of the Chinese. Captain Hill was calmly giving further orders in the hope of saving his passengers and cargo, when he was accosted by the chief officer, who said:—"You had better look after yourself, Captain Hill; it is all over with the vessel." To which the brave man replied, "Never mind me; look after yourself"—and a few moments later was engulphed with his ship. One boat was lowered, and got away in safety from the wreck, picking up those of the survivors whom they could find and then making for the shore, their progress being, however, slow, as they were pulling but two oars.

Some went overboard with the violence of the shock; one of the survivors was seated on the deck with Mr. Wainwright, and went down with the vessel, but fortunately came up again unharmed, and managed to swim clear of the wreck. He then endeavoured to make for the shore, but the current setting out rendered this apparently impossible; so, reserving his strength, he kept himself afloat for some time on an oar that had been given him in the water by one of the officers. At one time he was pulled under the water by some poor soul struggling for life. The other passenger who was saved was also pulled under water in the same manner, and twice nearly drowned. They remained in the water upwards of an hour, and at the moment when exhaustion was overpowering them, were picked up by the boat which had put off again from the shore to the rescue.

To resume our own account, the survivors being now all afloat, search was made on the beach for anything that might have washed up from the wreck, but nothing was found except a bale of cotton yarn, by means of which the chief officer had floated for a considerable time towards the shore, when he also was picked up. Two large native boats were procured, and the coast for three or four miles on either side of the bay was carefully explored, but without any result. A landing was not made, as the sendoes did not like to take their boat into the surf; but a yaconin, who was despatched to make inquiries, reported that the villagers knew nothing whatever of the wreck, nor had they seen anything wash up on the beach. About four o'clock the *Otago* weighed anchor, and being joined by those who had been engaged in the search along the coast, headed for Yokohama, where, with colours half-mast, she arrived about six o'clock.

The rock on which the vessel struck was found to be about six feet below water, and about two hundred yards to the eastward of the Plymouth Rocks, with deep soundings all round it; the same account is given of it by the native fishermen, who added that at high tide it is covered by twelve feet of water. It is supposed to be the spot where the *Nepaul* struck, two or three years ago. We believe its position is not defined on the chart, there being merely "shoal" marked in the vicinity of the Plymouth Rocks. When examined there were marks where the steamer had struck and shattered the rock.

## CHINA.

—o—

### PEKING.

Dates from Peking are to the 8th June, and furnish the following intelligence:—

The great North and South gates of the Inner or Prohibited city (in which is situated the Imperial residence) are undergoing extensive repairs. There were several slight falls of rain during the latter part of May, but the showers have not been sufficiently copious to much improve the now almost desperate condition of the crops. The weather is becoming hot, the thermometer having been up to 94 degrees.

It is understood that a gentleman competent for the task is busily engaged in the preparation of a pamphlet on the Burlingame Mission. Some interesting developments, not calculated to place that Mission in a very favourable light, are confidently looked for.

The Gas Works have come into operation at last. This event took place on the 17th. At present, Mr. Commissioner Hart and the attachés of the Customs are alone favoured with this western method of illumination; it is to be hoped that the pipes may be speedily extended, not only to the various Legations, but to the houses of the native aristocracy, and the Imperial palace itself. As might have been expected, the erection of so conspicuous and singular an object as the chimney created considerable alarm among the Chinese living in the neighbourhood, causing them to fear a serious disturbance of the *fend shui*.

The Peking College is a failure. Prince Kung was in favour of it, but it appears that other and powerful mandarins have succeeded in literally asphyxiating it. It is almost likely, too, that its untimely fate may have a deleterious effect upon the Anglo-Chinese schools established by Government in other places.

A Tientsing letter of June 12th says:—About three hundred river junks have been built here to carry the tribute of rice to Peking. They are all of the same pattern, and neatly built. Hitherto it has been usual to press boats into this service, and these new government vessels will be a great relief to the poor boat owners. It is not likely, however, that many will be able to get up the Peiho for some time to come, from the want of water in the river. The harbour of Tientsin is blocked with vessels from the same cause.

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

Shanghai, June 17, 1869.

The P. and O. steamer *Ottawa* arrived on the 7th inst. with the English mail of the 23rd April, and telegrams to the 15th May. Yesterday (16th) the Chamber of Commerce received *via* Kiachta a London telegram to the 25th ult.

The docks here have had a busy time of it for the last fortnight. Muirhead's dock was fully engaged by a Russian corvette; the old dock had the *Niger* and a large ship; Boyd and Co.'s dock was occupied by a steamer and a barque; and Farnham's dock had another vessel. These, all at the same time, have kept the local engineers and artisans hard at work. On the 12th the steamer *Niger* came out of dock, where she has replaced her two-bladed propeller, broken in the Yangtsze, by a three-bladed one supplied by the steamer *Nile*.

Digitized by Google

In my last letter I told you that the P. and O. Company had reserved 300 tons of space in the *Malacca* for new teas. None of our shippers, however, availed of the opportunity, and a few muster chests alone went forward.

At Hankow, up to the 1st June, the settlements were about 75,000 chests, a half of the arrivals. The finest chops for the Russian market fetched extreme rates, but on the whole prices were ten taels lower than last year. The Chinese are very anxious to sell, but I am happy to say that Foreigners, although anxious enough to buy, have not made fools of themselves. On the 7th the *Fire Queen* and *Rona* arrived, the former bringing 19,050, and the latter 10,500 chests, followed next day by the *Plymouth Rock* with 13,500 chests. On the 8th the *Erl King*, which had loaded at Hankow for London direct, arrived at Wusung, and attempted to leave on the following morning. Her cargo was 1,223,000 lbs., and as she was to have been the first to leave, and as her backers were confident that she would make the run home in 70 days, it was thought that she would land the first of the new season's teas. However, after leaving Wusung she went ashore on the south side of the river, near the wreck of the *Hellespont*. Tug boats and lighters were at once sent down, but the latter were fortunately unnecessary, as with the assistance of the *Sampson* tug she got off at high water, and steamed away on the morning of the 10th. Beside her cargo she had on board the first batch of Chefoo gold miners, deported for the piratical attack on the Russian barque *Amur*.

The ship *Forward Ho* left Shanghai on the 10th inst., with the first cargo from here, and I believe the first from China. She was followed on the morning of the 12th by the *Eliza Shaw*, which was towed from Hankow by the *Tunsin*.

The *Huntley Castle* was towed down by the *Moyune* on her last trip, and was left on the 13th outside Wusung. The race between her and the *Forward Ho* will therefore probably be a close one. The steamer *Agamemnon* left Wusung on the 15th with 3,500 tons of tea, the largest cargo that ever left China in one bottom. The *Titania* left on the 16th, the second of the clippers from Shanghai.

The S.S.N. Company's steamer *Hangchow* brought down 23,000 packages of tea on the 12th instant, from Hankow, and on the 14th the *Fusiyama* arrived with 16,000 packages, followed on the 16th by the *Fire Queen*, with close on 24,000 packages.

The silk market opened on the 9th inst. at Tls. 440 for Red Peacock, or 23s. 9d. to 26s. 2d. Last telegraphic quotations were 23s. 6d.

At the first meeting of the French Municipal Council for the ensuing year, held on the 4th inst. Mr. E. Bonneville was elected president, and Mr. F. B. Forbes, vice-president.

A meeting of the members and shareholders in the Club was held on the 11th inst. to consider the difficulties into which the institution has fallen. Nothing however was done beyond appointing a committee to consider all questions relating to the Club that may be submitted to them.

A meeting of the Sailors' Home Committee was held on the 7th inst. The business was of a purely formal character. The working of the institution for the year past showed a profit of Tls. 7.88.

Serious disturbances have taken place in the north-western districts of this province. Several rebel spies have been seized at Soochow, and the existence of a powerful and wide spread anti-Government league is more than suspected.

The following is from the *Evening Courier*:—

"It is very difficult to get to the bottom of the massacre of Christians which took place some time ago at Yu-yang (chow)—not Yun-yang (hien), as some of the papers had it, which is a town on the Yangtsze, some twenty miles above Kwei-chow foo. Yu-yang is in the south-eastern part of Szechuen, close to the borders of Kwei-chow and Hunan provinces. Ill blood had been stirred between the native Christians and the authorities, and quarrels had been brewing for three years at least. The mandarins were jealous of the influence of the Christians, and professed to regard them as disaffected subjects. Some disputes about money or property arose, to which some of the Christians were parties, and the mandarins failing to do them justice, the matter seems to have been taken up by the whole body, with a Foreign priest for their advocate; but no progress was made towards a settlement; on the contrary, the parties only became more irreconcilable, until about the end of last year violence was threatened by the party opposed to the Christians, who appealed for protection to the mandarins, and on being pooh-poohed by them, afterwards united for self-defence and armed themselves On this the mandarins announced to them that since they had chosen to take the law into their own hands they must not look for protection from the authorities, who thereupon washed their hands of the business. On hearing this the Christians disarmed, and again threw themselves on the protection of the mandarins, but the latter, only desirous of embarrassing the Christians, would take no further notice of the affair, and indeed were supposed to be the real instigators of the whole business. But however that may be, the house which was used as a church, and in which many of the Christians were, was attacked by night by their enemies and burnt. Thirty-nine bodies were got out of the ruins, that of M. Rigault (?) being found without head or limbs. This was in January last, since which time the feud has raged with little intermission, and with considerable slaughter on both sides. The Taoutai of Chunking was sent to the scene, which is ten days' journey from Chunking, by the city of Fu, and up the river Keen-keang, or Kungtan; but he had returned without having done anything apparently, and another massacre of fifty Christians—or a fight in which fifty were killed—had taken place since the Taoutai's visit. The French Bishop of Eastern Szechuen and the Taoutai of Chunking are now at Chingtu conferring with the Viceroy on these affairs.

"It is evident that there remains a great deal unexplained in the above account, which is *exparte* to a great extent, and it is a fact of grave significance that during these troubles, or at all events very recently, 10,000 new converts are said to have been enrolled by the missionaries in the district, avowedly to benefit by the protection afforded by the Christian society. If that is true, the jealousy, and even alarm of the mandarins are not so unpardonable.

"The Chinese have it that public opinion is against the Christians; that they are overbearing, and assume exceptional privileges on account of their being under the quasi protection of Foreign governments; that in the particular dispute which occasioned the recent outbreak the Christian party were in the wrong, and that they shed the first blood. The natives, however, have great faith in the influence of the French bishop, who is regarded as a mandarian of very high rank, and is always styled Ta-jin. From what quarter soever the notion comes, it undoubtedly exists that the Bishops in the interior of China are in some way the representatives of the French Emperor, and that it is very inconvenient to quarrel with them."

*Apropos* of this, M. Dabry, acting French Consul-General, has protested against Romish missionaries being represented as political agents; but it is almost needless to say that his protestations have not altered public opinion on the subject.

The members of the Yangtsze exploring party reached Hankow on the 30th ult., and Shanghai on the 12th inst. They report very favourably of their reception everywhere, and upon the probable demand for larger supplies of Foreign goods than at present reach Chunkang.

The *Evening Courier* mentions a report that Mr. Taylor, of the Chinese Inland Mission, has been attempting to proselytise in Pootoo, and has been very rightly inhibited by H.B.M. Consul. This island, as is well known, is exclusively inhabited by Bhuddhist priests. Such an injudicious step would go far to justify the strictures on Mr. Taylor's Mission that have been lately passed at home.

At Peking and Tientsin (says the *Courier*) the common people talk openly of the time when Foreigners shall be expelled from the country, and there is evidently an impression among them that a real blow is shortly to be dealt. The strengthening of the Takoo forts, which are only useful against Foreigners, no doubt leads to this idea. As for rebels, nothing has been heard of them in these regions since the celebrated escapade of Mr. Burlingame, who, it will be recollected, came, and conquered, but did *not* see the rebels.

It is announced that the Pacific Mail Company intend to push their Japan line, now that the P. and O. Company and Messageries Imperiales are apparently abandoning it. Another steamer, the *Oregonio*, bought up from the opposition company in San Francisco, is to be sent over here at once, to take her place in alternate trips with the *New York* and *Costa Rica*; so we shall, after her arrival, have a regular communication with Yokohama, *via* Nagasaki and the ports of the Inland Sea, three times a month.

## HONG KONG.

The outward P. and O. mail of May 7 was delivered in Hong Kong on the 17th June; and the French mail of May 15 (with London telegrams to the 23rd) on June 23. The present homeward mail left on the 24th June.

The *Daily Press* says:—"Very little has occurred in this colony since the departure of last mail. The unfortunate *Min* case has again come forward, application having been made here for an order for the refund of the amount, according to the decision of the Privy Council, together with the costs and interest. The claim for interest was not allowed, on the grounds that it should have been applied for to the Privy Council. The money is in the hands of the official assignee of Lyall, Still and Co.'s estate, and judgment is reserved in the application for its refund from them.

"The Chamber of Commerce has not yet expressed any opinion regarding the question of transit dues, concerning which Sir Rutherford Alcock recently sent them a despatch. This has resulted in a measure from the indisposition of Mr. Bryans, the chairman, who has recently resigned and gone north."

The following ominous announcement is from the *Daily Press*:—"It is stated that an impression is gaining ground among the Chinese that they are on the eve of some serious demonstration with respect to Foreigners in the country. Rumours, it appears, have got abroad that the Emperor of China has issued orders to the effect that 'all the English' shall be expelled from the kingdom. The Chinese who come in contact with Foreigners merely mention the circumstance as a rumour; but the fact that any importance is attached by well-informed Chinese to a statement which in former years would have been considered preposterous, is not without its significance. It seems that the unsatisfactory news with regard to the *Alabama* question has something to do with

Digitized by Google

the reports that have gained currency; the Chinese mixing up the relations between America and England, the Burlingame mission, Tseng-kwo-fan's memorial, the recent Admiralty orders with respect to gunboats, and the apology that is to be tendered, into a grand jumble, in which they trace a concatenation of events indicative of the weakness of England. From this point it is easy to understand that the argument may be readily carried by the native mind to the conclusion that Englishmen will be expelled from the country."

On this the *China Mail* has the following remarks:—"Our morning contemporary gives currency to a rumour, which is by no means strange, that the Chinese generally believe they are on the eve of serious difficulties with Foreigners in China. The rumour is not strange, because Foreign presses have been availed of to expose to the natives the humiliating course of policy which our Government seems bent upon adopting. Now we are sincere advocates of a 'free press,' whether in Chinese or any other language; but we decidedly object to parliamentary discussions, summaries of home news, and telegrams being placed, by the aid of native type, in the hands of half-educated Chinese just as they appear in home papers, or even condensed, and hence garbled. To the Chinaman brought up under a despotic Government, whose intentions are only promulgated when finally decided upon, by whom public debate and what we term 'an opposition' is unknown, the bold announcement of Earl Clarendon's intentions as to recalling Mr. Gibson and apologising to the Chinese cannot but have an effect most injurious to Foreign interests. The stock adage about telling the truth may be carried out too far. We do not, for instance, confide to our young children all the passing events in a family, although the future interests of the children may be powerfully affected thereby; the doctor does not explain his practice to his patient. Neither should we furnish political news to the Chinese public at large, who are politically children, and we are surprised that greater care is not exercised. It is extremely injudicious, not to say disloyal to one's country, to hold it up to native contempt when it is well known that it is impossible to balance the indiscretion by affording a perusal of the articles in British papers and magazines which so essentially modify individual opinion amongst Foreigners."

The following items are also from the *Mail*:—

Some curious news reaches us from Canton. As our readers are aware, the 14th was the anniversary of the celebrated Dragon Boat Feast, which is usually observed as a carnival by the lower class of Chinese. Hitherto the day has passed over without annoyance to Foreigners, but on the arrival of the S.S. *Poyang* a mob was found to be besieging the wharf with brick-bats and stones. The following account of the disturbance is furnished by a correspondent:—

"A mob of the lower class of Chinese attacked the H. K. C. and M. S. B. Company's Wharf at Canton on Monday afternoon with stones and brickbats, and demolished the windows and doors of the engine-house on the wharf, besides damaging the steamer *Poyang*, which was lying alongside the wharf at the time, some of her windows and shutters being broken. Mr. Mayers, H.M. Vice-Consul, was immediately sent to, and at once despatched the Consular constable with six Chinese soldiers to quiet the mob. They, however, were unable to do anything, the mob stoning them away. Shortly afterwards Mr. Mayers himself, with some fifty Chinese soldiers, appeared on the spot, but the mob was too strong even for them. More soldiers were sent for, and very fortunately the *Chen-to*, Captain Edwards, came up the river at the time, and a reinforcement of fifty sailors from her was sent to the support of these soldiers. The mob seemed in no way inclined to give way, but stoned the last comers as readily as the others. Finding that peaceful action was useless, Captain Edwards, well supported by his lieutenant, Mr. Robertson, gave orders to charge with fixed bayonets, and before this movement, executed with unmistakable vigour, the mob dispersed. Two were captured, and it is said that one or two were drowned, besides others receiving some severe bruises, &c. A guard was then placed on board the *Poyang* for the night, and no further disturbance occurred."

Mr. Mayers will doubtless receive orders to apologise to the Chinese for declining to be stoned. Captain Edwards will of course be hanged.

## BORNEO.

### LABUAN.

We learn from this colony that Governor Henessy, of Labuan, had visited Sarawak in H.M. gunboat *Slaney*. He inspected the antimony and cinnabar mines there, and after a stay of a week proceeded on to Pontianak.

Labuan has been recently visited by an unusual number of ships of war, and the result has been a steady demand for the coal, which continues to give satisfaction. A good proof of the progress of the colony is furnished by the rise in the price of land. A public auction of Government land had been lately held, and the lots sold realised a far higher price than land had ever fetched in Labuan before—the towns lots especially. There was an eager competition among purchasers, and although a very large quantity of land was sold, when the auction was declared to be closed numbers asked to have more lots put up for sale. This proves that the inhabitants have great confidence in the future of Labuan.

H.M.'s ships *Rifleman* and *Starling* were coaling in Labuan when the mail left.

## JAVA.

### BATAVIA.

The festivities in commemoration of the two hundred and fiftieth anniversary of the foundation of Batavia passed off remarkably well. No disturbances took place, although there were not wanting alarming and disagreeable rumours, among both Europeans and natives. These latter were no doubt set on foot and promoted by parties concerned either directly or indirectly in the Bakassie riots; but the Government was well prepared, and the disaffected gained no advantages, save the creation of alarm and annoyance, which prevailed more or less both previous and subsequent to the festivities.

Bapa Rama, the head centre of the late disturbances in Java, has at last been taken; he was seized on the borders of the Tangerang division, near the post station of Pesing. If he escapes now it will be miraculous indeed.

On the 14th June his Excellancy Major-General Ord, Governor of the Straits Settlements, accompanied by his lady, a secretary, and an adjutant, arrived in the Roads here, by the *Peiho*, Captain Fox. The British Governor was greeted by a salute of seventeen guns, as also by H. N. M. guardship on service and by the Welkomst battery; and his Excellency and suite were accompanied from the landing place, the Government Hotel, by a commission, consisting of the Resident of Batavia, the local military commander, a secretary of the Government, and the Harbour Master; as also by Colonel J. C. Rappard, adjutant of H. E. the Governor.

From Anjer we hear that the English ship *Miss Preston*, Captain Davies, which sailed on the 20th February from Sunderland, laden with coals, destined for Singapore, had sunk on the 12th inst. at Tanjong Silowang Cheringin district.

## STRAITS SETTLEMENTS.

### SINGAPORE.

From this port we have advices to the 2nd July. The outward mail of May 21 was received on the 23rd June, with London telegrams to June 18. The following summary of news is from the *Straits Times*:—

Politically speaking, the fortnight has been very nearly a blank. There has been no meeting of the Legislative Council, his Excellency the Governor being still in Java, where, according to all reports, he is receiving a right royal reception. Whatever shortcomings may have to be charged against our Dutch neighbours, that of want of hospitality is not one of them, and the manner in which Governor Ord is being entertained there makes us recall with some self-reproach the rather niggardly welcome which it has been customary to accord to Foreign potentiaries visiting or passing through this place. What progress his Excellency is making with the business part of his visit we cannot gather from any of our Java contemporaries, who seem to be ignorant that any political object is involved. We must hope, however, that the vexed question of Dutch aggression on the North-east coast of Sumatra will be for ever set at rest, and that the mutual recriminations on the subject which have heretofore so plentifully adorned the newspaper writings here and in Java will have no existence in time to come.

The only public measure which appears to be pressed on at present is the Contagious Diseases Bill, which, being in Committee, has received the evidence of the chief medical authorities of the place; but how far the measure may be modified by that evidence has yet to be seen. The question of a reconstitution of the Legislative Council of the Settlements, as brought before Earl Granville by the Straits Association in London, still occupies attention here, but there has, as yet, been no opportunity for a public expression of opinion on the subject. A good many considerations must be carefully weighed before the community here commits itself to a recommendation; but, no doubt, the Straits Association of this place will be able to enunciate ere long its views on the question. A meeting of the inhabitants, which had been called at an early part of the fortnight, was held in the town hall on the 28th ultimo, to devise measures for a popular reception of Prince Alfred (the Duke of Edinburgh) when he visits this place in autumn, on a scale befitting the loyal sentiments of Her Majesty's subjects in these Settlements.

The *Straits Observer* says that the railway to New Harbour is shortly to be commenced, an undertaking the public will be very glad to see carried through to completion as early as possible. Neotic has been issued to the Malay squatters along the projected route to remove.

## CEYLON.

### COLOMBO.

The present mails left Colombo on the 11th July, and Galle on the 13th, per *Simla*. The following summary of the fortnight's news is from the *Colombo Observer*:—

Since we last wrote for readers abroad Mr. Irving has assumed

Digitized by Google

the office of Colonial Secretary. Mr. Rennie, however, has suffered so much in health that it is doubtful when, if ever, he will be able to take up his post of Auditor-General. Such being the case, Mr. Stephen continues to act as Auditor-General, while Messrs. Parsons and Steele revert to their former positions as Acting Principal Collector of Customs and Assistant Government Agent of Hambantota, respectively. Other changes will be found noticed in our columns. Amongst the rest we are glad to report the promotion of Mr. H. Pole.

The Customs accounts for the past year showed a considerable increase in the export of most of our staple articles of produce, notably in coffee, cinnamon, coir, and plumbago, an increase which, we believe, will be again largely improved upon this year.

The local journals, in discussing this subject from various points of view, indicate, probably on good information, that it is intended to take a vote of £12,000 from the revenues of this year, and an equal sum from those of 1870, to cover the expenditure necessary to give a fitting reception to the first British Prince who has ever visited our shores. Balls and dinners, with levees for the reception of the various races there must, of course, be; but such things as these will be subsidiary to those entertainments which are characteristic of the island. An elephant kraal on a grand scale, into which no element of Rajekaria will enter; elephant shooting, elk and perhaps alligator hunts, with visits to tanks and temples and coffee estates, will doubtless be got up to contribute to the enjoyment of the young prince.

Colombo being an open roadstead, we cannot hope to have our mails landed here, not at least until that distant era when we can afford to spend a million sterling on a first-class breakwater. To have them landed at Trincomalie, distant three days by steamer, and with which there is very imperfect communication by land, would be most inconvenient, and involve great expense to the island. Such being the case, we felt and expressed ourselves naturally pleased that the Imperial Government, though it will not directly incur the expense of the works necessary for improving Galle Harbour, is yet willing to lend the money on easy terms to the colony, authorising this Government at the same time to levy such a due on shipping resorting to the port as will fully make up the annual sum necessary for payment of interest and to form a inking fund for paying off the debt in thirty-five years.

The Secretary of State having decided the cases of the European gentlemen removed from Kornegalle during General Hodgson's administration, their cases were not open to reconsideration by Sir Hercules Robinson; but his Excellency lost no time in doing justice to Mr. Jayetilleke. Although his successor had been appointed he was at once restored to his office. There was, in truth, no specific charge ever preferred against him.

Major-General Renny has got fairly into harness, and after inspecting the troops at Colombo did the same at Galle. The inspection there finished, Colonel Gawlor is to come to Colombo, to take command of the head-quarters of his Regiment, vice Colonel Burne, gone to Europe.

It seems to be now certain that from the 1st of January, 1870, the accounts of Ceylon are to be kept, like those of India, in rupees, annas and pice.

## GALLE.

GALLE, July 14.

The steamer *Columbian* arrived from Singapore and China on the 12th inst., experiencing a strong S.W. monsoon. The steamer *Simla* left for Suez on the 13th. The steamer *China* arrived from Suez, with the London mail of June 18, on the 11th inst., and the *Avoca* from Australia on the 13th.

Sir Hercules Robinson, the Governor, who lately returned from England, will start the preliminaries for the construction of a breakwater for Galle very shortly.

The scheme to be adopted is that of Major Clarke, of the Admiralty. Already there are schemes afloat for building wharves, &c., and no doubt a railway from Galle to Colombo will soon follow.

The new steamer *Hindostan*, Capt. Durham, of Messrs. Apcar and Co.'s line, intended for the Calcutta and China service, arrived from England and the Cape on the 5th instant, and left for Calcutta on the 7th. The *Hindostan* is a handsome looking yacht-like steamer; she made the passage to the Cape in thirty-five days, calling at Madeira, and from the Cape to Galle in twenty-three. The machinery and general qualities of the vessel are not well spoken of. She was detained a week at the Cape, repairing machinery.

Colombo is only now about to have gas works. £12,000 is to be voted for entertaining the Duke of Edinburgh. The old fort walls in Colombo are to be demolished.

Business in charters has been very small, there are orders for vessels to load at Java for Europe at 60s. to 65s. Freight to London for Coffee, in casks, 50s. Exchange on London Bank 1 to 1½ per cent. premium. The *Arabella* fixed to load cotton at Tuticorin at Rs. 5 per bale.

The Pacific Mail Company's steamer *America* was expected here from New York, for Hong Kong, but has been countermanded.

The heat in the Red Sea has been excessive, and a passenger for Manila *via* Hong Kong, Mr. W. S. McLeod, died from heat apoplexy.

The P. and O. Company's steamer *China*, which was temporarily put on the Suez line, proceeds from Calcutta to Hong Kong. It is expected that the *China* will take silk-worms' eggs from Japan to Suez.

# Commercial Report.

## STRAITS, JAVA, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The business done during the fortnight had been of a most trifling hand-to-mouth character, and deliveries had been on a very low scale. Hardly anything had been done in either Yarns or Grey Shirtings, but holders were firm, and we have no fall in prices to report. There had been slight occasional inquiry for Velvets, but without business; in White Shirtings and Turkey Red Cambrics something had been done. In Woollens we have to note a slight inquiry for S S Camlets, which had been sold in small quantities at our quotations; Scarlets were asked for at $17 to 17½, and Black at $13¾ to 14. A few small sales had been made of Blankets; in other Woollens nothing doing. The Ocean Queen (str.), from Glasgow, and the Mary Lee, from Liverpool, 209 days out, were the only arrivals affecting the market. In Metals everything was dull and neglected, except Nail Rod Iron, for which there was a good demand. Rice, consequent on heavy fresh arrivals and forced sales by Chinamen, had declined, and was dull of sale. The following were the current quotations:—Cotton Yarn: Nos. 16-24, per picul, $48 to 49; 28-32, $48 to 49; 38-42, $50 to 51. Gray Shirtings, 7 lbs., per piece, $2.40 to 2.45; 8¼ to 8½ lbs., $2.80 to 2.85; White Shirtings, $2.80 to 3.60; T-Cloths, $1.80 to 1.90; Camlets, S, per piece, $13.50 to 14.50; SS, $13 to 14; BB, $13.50 to $14; Long Ells, $8 to 9.50; Lastings, $13 to 16; Cloth, broad, per yard, $1.50 to 2; medium, $1 to 1.75; Blankets, per lb., $0.40 to 0.45. Iron, nail rod, per picul, $3.30 to 3.60; hoop, $3.10 to 3.40; bars, $3.30 to 3.60; pig, $1.05 to 1.15; wire, $6.50 to 7; Lead, $7.50 to 7.

TIENTSIN.—There had been more business doing, but at low prices. 8¼ lb. Gray Shirtings were quoted Tls. 2.1.0 to 2.1.2. 7 lb. T-Cloths, of ordinary makes, Tls. 1.7.0 to 1.8.3, and best, Tls. 1.9.0; 36-in. goods, of best quality, Tls. 2.1.8 to 2.2.0. White Shirtings, 56 reed, Tls. 2.2.4; 66 reed, Tls. 2.5.6.

SHANGHAI.—Cottons: 8¼ lb. Gray Shirtings had declined in value 2 to 3 candareens; 7lbs. were quoted 1 candareen lower, and heavy goods without change. The market was dull for all kinds, and sales during the fortnight had been effected to a very small extent, T-Cloths being taken in preference for the northern markets. About half the reported sales were of goods to arrive. White Shirtings had been sold to a limited extent at former rates. American Drills were quoted the same as before, but the inquiry for these goods was slight; the stocks had been increased by two arrivals. English Drills were almost entirely neglected, and the market may be considered easier. Coal: The market had been unsettled, arrivals had been free, and cargoes may be noted from Australia, Wales, United States, Japan, &c., increasing largely the stocks and depressing the prices. Cardiff, "to arrive," Tls. 8 to 8.25; English, nothing doing; American, small lots afloat at Tls. 11. The current quotations were as follows:—Gray Shirtings, 7lbs., per piece, Tls. 1.9.6 to 1.9.9; 8.4 to 8.6 lbs., Tls. 2.1.7 to 2.2.1; 9 to 9.12 lbs., Tls. 2.7.0 to 3.1.5. White Shirtings, Tls. 2.1.5 to 3.0.0. T-Cloths, 6 lbs., Tls. 1.4.0 to 1.7.0; 7 lbs., Tls. 1.6.0 to 1.9.3; 8 to 8.4 lbs., Tls. 2.0 to 2.5.5. American Drills, 40 yards, Tls. 4.1.5. to 4.3.5. American Jeans, 30 yards, Tls. 3.7.0 to 3.7.5. American Sheetings, 40 yards, Tls. 3.7.5 to 3.8.3. English Drills, 40 yards, Tls. 3.9.0 to 4.1.0. Dutch Drills, 40 yards, Tls. 3.8.5 to 4.0.0. Camlets, English, SS, per piece, Tls. 12.0 to 12.5. Medium Broad and Habit Cloth, per yard, Tls. 1.0 to 1.6. Long Ells, Scarlet, per piece, Tls. 6.4.5; Assorted, Tls. 6.5.0. Iron, Nail Rod, small size, per picul, Tls. 2.1.5 to 2.1.8; fair to good assorted, Tls. 2.2 to 2.3; Hoop, Tls. 1.8 to 1.9; Flat and Round, Tls. 2.3.5 to 2.4. Lead, Tls. 5.7.5 to 6.1. Tin Plates, per box, Tls. 4.5 to 4.8. Steel, per tub, Tls. 3.5 to 3.6.

HANKOW.—Cotton Goods—Gray Shirtings: Owing to the greater anxiety to effect sales shown by some holders, a further decline in quotations must be noted. The demand continued very languid, and there were few buyers in the market. Closing quotations were Tls. 1.98 to 2.00 for 7 lbs., Tls. 2.15 to 2.20 for 8¼lbs., and Tls. 3.05 to 3.15 per piece for 9¾lbs. goods. White Shirtings had met with little inquiry. T-Cloths: Little business had been done in these goods during the fortnight, no improvement in the demand having appeared; prices of 8 to 8½ lbs. goods were 5 candareens lower. Drills had been in fair inquiry, and for good makes prices were rather firmer. Fancy Cottons: Stocks were in small compass, and for Dyed goods there was a moderate inquiry. Woollens and Worsteds.—Camlets: The demand had not been active, but there was no change in prices. Lastings had been dull of sale. Long Ells were more inquired for, and prices were rather firmer. Spanish Stripes and Medium Cloths had not been wanted. Figured Orleans: Nothing of importance had been done in these goods. Metals.—Lead: There was a very trifling inquiry and the prices were much the same as given last mail. Quicksilver was quoted Tls. 51 per picul nominal, and there was a large stock unsold. Tin: Small sales continued to be made at Tls. 26.50 to 27 per picul.

FOOCHOW.—The business of the fortnight had comprised the following transactions:—Grey Shirtings, 8¼ lbs., 1,000 pieces, at $3.10 per piece; Ditto, 7 lbs., 500 pieces, at $2.85 per piece; T-Cloths, 8¼ lbs., 600 pieces, at $3.10 per piece; ditto, 7 lbs, 800 pieces, at $2.60 per piece; ditto, 6½ lbs., 400 pieces, at $2.45 per piece: ditto, 6 lbs., 400 pieces, at $2.25 per piece. Lead: 250 piculs, at $8.50 per picul; 260 piculs, at $8.25 to 8.50 per picul; 188 piculs, at $8.75 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 23rd June:—We have again to report an interval of dullness in all branches of trade at this, occasioned in a great measure by the scarcity of money among the Chinese. Cotton Yarn: Prices are unaltered, and holders are unwilling to accept cheaper rates; the demand is slight and principally for 16 to 24, which have found buyers to a very moderate extent at $134 per bale. Piece Goods: Sales by private contract have been very trifling, almost the entire business having again been done at public auction; Chinese have continued to supply themselves through this channel, and without offers for sound goods quotations are again weaker. In Gray Shirtings 7 to 8.4lb. are in increased supply, and have declined 2 to 3 cents per piece, while the heavier weights are in small stock and prices are nominally unchanged. White Shirtings, 54 to 60 reed, of common make, are in fair demand at former figures, while 64 to 66 and 68 to 72 reed are not wanted. 600 pieces of Fine White have been sold at a decline of 5 to 10 cents. T-Cloths, 6 to 7 lbs. are 5 cents lower; 6lb. in slight

Digitized by Google

enquiry, 7lb. Mexican, are saleable at the reduction: rates for 7.2 to 10lb. are unaltered. White Spotted Shirtings and Turkey Reds are 5 cents lower. 40 yards English Drills are in full supply and down 5 cents, 30 yards are wanted. No sales of American Cotton Goods have been made, and quotations for all are 5 to 10 cents lower. Dutch Drills share in the depression. Woollens: Rates are as last advised, but an improvement is looked for shortly. For Scarlet Long Ells there is a slight demand, and good assortments are saleable at quotations. Blankets are wanted, and prices are fully maintained. Holders of Lastings and Camlets of best makes are firm, expecting a better market later on. Metals: For suitable assortments of Nail Rod Iron rates are rather dearer, with a fair inquiry; Soft Bar has advanced 10 cents; Hoop is firm, as last advised; Lead and Steel are unaltered, while stocks of the former are smaller; Tin has further receded in value 50 cents per picul. Quicksilver shows no material change. Coal: Sydney has become comparatively scarce, and the quotation has slightly improved. Arrivals have been 6,586 tons Welsh, 1,800 tons English, and 1,100 tons Sydney. Sales have been 1,800 tons English, on credit, at $9.50, and 793 tons Welsh at $10 25, ex ship.

Batavia.—Dutch White: Very little demand, and hardly any transactions, with ample stocks. Unbleached not in much inquiry, sales very trifling; English White somewhat neglected; Unbleached in no demand. Shirtings: Dutch White only saleable in small quantities; Unbleached saleable; English White, some qualities inquired for; Unbleached, trifling transactions. Cambrics: large stocks, and dealers well provided; prices not well maintained. Drills: Dutch quiet, on the coast in better request; English in some demand, blue neglected. Jaconets: Plain, nothing doing; Printed, fine patterns saleable. T. R. Cloth still without inquiry; Dyed Cloth saleable; Prints in limited inquiry, only suitable styles saleable; Mule Twist, very small demand; Turkey Red, transactions still limited; Green and Orange, in little request; Sewing Thread, saleable; Batticks, stocks still ample, and only saleable at low rates. Blankets: Woollen, limited inquiry; Molton, no demand. Iron: Swedish slow of sale; English, unsaleable; large sales of damaged by auction. Steel: Market supplied. Sheet Copper not in much request. Zinc: sheet and Spelter, little demand, prices unaltered. Lead: sheet unsaleable; Pig wanted. Iron Nails: Good assortments find ready buyers. Copper Nails: No transactions. Tin Plates, trifling inquiry. Coals: English and Australian, ample supplies. Flour: American, no demand; Dutch, stocks and dull of sale.

Singapore.—The business done in nearly all imports during the fortnight had been small. Buyers were holding off in prospect of lower rates, to which holders were disinclined to submit. Gray Shirtings had been placed to a small extent, at a little under the rates of last mail for some weights, 8¼ lbs. at $2.80 to 2.75; 7 lb. at $2.45 to 2.42½; 6 lb. at $2.10. A conditional sale of 8,000 pieces, 8¼ lbs., to be brought from Java, at $2.50 per piece cash, had somewhat discouraged buyers; but sales were still made at quotations. Madapollams remained without much alteration; sales of 8 lbs. goods at $22 to 21.50. In T-Cloths business limited, but rates pretty well maintained; 4¼ lbs. $1.50 to 1.47½; 5 lbs. $1.60 to 1.57½; 6 lbs. $1.80 to 1.75; 7 lbs. $2.12½ to 2.10. Drills still in request, sales of 12 lbs. English $85¼ to 86 per corge, and of 14 lbs. at $93¼. White Shirtings neglected, and sales small at a decline of 5 to 7 cents per piece on fine goods. Imitation Irish Linens in less demand; sales at $2.17½. Cambrics in moderate inquiry. White Figured Shirtings in more request; sales of Spots at $2.85 to 2.90 In Dyed Goods the business done had been limited. T. Red Cambrics in less inquiry. Coloured Yarns had been sold to some extent; and for Green, Yellow, and Imperial Red rather better rates had been obtained. Grey Twist maintained its value; sales considerable; 18s. to 22s. at $115; 24s. at $120 to 122½; 30s. at $119 to 122½; and 40s. at $128 to 131 per bale. T. R. Yarns had been placed to a moderate extent, at previous rates. Metals quieter. No sales of Scotch Iron reported, but a small sale of Swedish had been made at $3.40. Rose Nails had been placed to some extent at $3.65 to 3.70 per cask; Pig Lead L B at $6.55 per picul; Swedish Steel at $3.70 to 3.90 per picul. For Yellow Metal lower rates had been accepted—sales at $22½ to 23. Coals had continued to arrive in large quantities.

## STRAITS, JAVA, CHINA AND JAPAN EXPORTS.

### TEA.

Yokohama.—About two thousand piculs of the new season's Teas had arrived, and were offered on the market; but the high prices asked preclude the possibility of business being done in the face of continued unfavourable advices from America, and it cannot as yet be said that the market has been opened. A few small parcels of Good Medium grades had been settled for the Californian market at $33 to 34 per picul; beyond this there is nothing to report. In the absence of any business of importance quotations remain quite nominal.

Shanghai.—Black: Musters of the new crop Congous began to be offered freely on the 6th June, but no disposition to open the market was shown till the 11th, when business was commenced by the settlement of one chop at Tls. 26; a second chop at the same price completed the transactions for the day; but subsequently a steady business had been done at irregular prices. Fully 20,000 chests had found buyers, though the market book, from which the statistics are taken, only shows settlements to the amount of 13,540 chests. Settlements for the fortnight, 13,540 chests. Re-shipments on owners' account new Tea, 22,033. Stock, 180 chops, or 84,538 packages. Quotations (duty paid, Exchange for Credits, 6 months' sight, at 6s. 1⅞d. per tael, and Freight at £4 per ton):—Ningchow, fair to good, 1s. 6d. to 1s. 8½d. Oopack, 1s. 6d. to 1s. 9d. Green: The market for New Pingsuey Teas was opened on the 12th June by the settlement of one chop at Tls. 36 per picul, but no further business in new Teas had been reported. The stock consisted of 4 chops or 2883 ½-chests Pingsuey (new Tea) and 3500 ½-chests Shanghai-packed (old.)

Hankow.—The following is from Messrs. Drysdale, Ringer and Co.'s Report, dated June 12:—Throughout the past fortnight a steady business has been done, settlements reaching 63,000 chests, and 10,000 half-chests. For a few days after date of our last, attention was directed to the finest Teas, which found ready buyers at from 27 to 30 taels, one or two crack chops realising from 32 to 35 taels, and as these grades became scarce, buying commenced in medium to fine kinds, and Oanfas, which having been previously neglected could be bought from 4 to 5 taels reduction on opening rates; it is in these classes that the bulk of the business has been done. Common kinds of Oopack, although offered at low prices, have been much neglected, as also Shuntam Teas, which have been offered at taels 13 per picul without finding buyers. Teamen, although anxious sellers, and willing to make considerable concession in price, have, during the last week, shipped heavily to Shanghai for sale, rather than submit to the heavy loss involved by accepting current rates; their shipments are now 55,500 chests, the first shipment made by them last year being on June 23. The quantity of fine Tea which has come forward is much smaller than last year, and is now almost all gone. The first chops of Oanfas have improved considerably, and although still inferior to last year, we think many of them will rank at home with the finest Teas of the season. It is in these Teas that the best value has been obtained during the past week. The chops now arriving from this district are much mixed with inferior leaf. We would mention that the chests are on an average 10 per cent. to 12 per cent. smaller than they were last season. Prices have been very irregular, which has in a great measure been caused by the unusually large number of needy sellers amongst the natives. We quote good medium to fine, 23 to 26; medium to good medium, 18 to 22; common Oonam and Shuntam Teas, 13 to 18 taels per picul. Settlements from 28th May to date:—8,500 chests, 1,000 half-chests, at (Ex. 6s. 2d. and £4 Frt.) 1s. 4d. to 1s. 6d. per lb.; 13,100 chests, 420 half-chests, at 1s. 6½d. to 1s. 7¾d. per lb.; 24,800 chests, 2,200 half-chests, as 1s. 8d. to 1s. 9¾d. per lb.; 11,700 chests, 3,300 half-chests, at 1s. 10d. to 1s. 11½d. per lb.; 5,500 chests, 3,100 half-chests, at 1s. 11¾d. to 2s. 2¼d. per lb.

Foochow.—Messrs. Kinnear, Larken, and Co.'s Report, dated June 19, is as follows:—The arrivals of new season's Teas to date amount to a very considerable quantity, but as yet no purchases have been made beyond a few parcels of dust and siftings for "flooring chops." The quality of the crop of Congou is undoubtedly inferior to the average of former seasons, the bulk of the Teas being much mixed with old leaf, and consequently deficient in character and briskness. This applies to the Kaisow, Sew Moo, Sinchune, and other high country Teas, as well as to those from the lower districts, and the half-dozen "crack" or "curio fine" chops of previous seasons scarcely reach the standard of "first-class Kaisow," while the proportion of fine and finest grades is equally limited. The Chingwoe and other light Pekoe flavoured kinds are comparatively free from admixture with old leaf, but lack the strength which is essential in high class Teas, and are likely to lose on the voyage the fine and delicate flavour which they possess at the present time, although they are better made and have a handsomer and more closely-twisted leaf than the Teas from other districts. Of true Pak Lings, there are few or none beyond those prepared under contract, the bulk being mixed with Pak Lum and other inferior leaf. Sar Yunes with few exceptions are much mixed with old leaf, and are consequently inferior in quality. Upon the whole the crop of Congou is less dusty than last season, but the Teas are badly made, and having an open and insufficiently twisted leaf are liable to ripen too quickly, and to a consequent depreciation in quality on the voyage. Souchongs: Supplies have not yet come to hand from the districts where the true kinds of this description are produced, and we are consequently unable to report upon the quality of the crop. Oolongs: Arrivals have taken place to a considerable amount. The Teas are less dusty, but are rather deficient in strength and pungency, although comparing favourably with the crop of last season. Scented Teas: A considerable number of samples have been shown, but we refrain from giving an opinion upon the general quality of the Teas until we have seen more of the crop. Flowery Pekoes: Arrivals so far are not of desirable quality. Up to the present time a wide difference has existed between the respective ideas of buyers and sellers, the Teas, as a rule, costing so much in excess of the prices which most people can afford to pay for shipment to England.

Amoy.—No business had been done, and no disposition had been shown to begin operations in new Teas. Arrivals had been about 6,500 packages Congou, 1,500 packages Orange Pekoe, and 850 packages Ooloongs. The qulity of the Congou was thought about equal to that of last season, and the Tea is reported to have been bought in the country at reasonable rates, though the teamen were demanding prices much in excess of foreigners' ideas. From the Ooloongs to hand no opinion could be formed of the crop.

Canton.—Teamen were still holding out for high prices, though stocks were accumulating, and heavy advances against same would shortly have to be met by them. Foreigners were firmly and steadily refusing to operate, or even make offers for any parcels at all. Added to the heavy stocks considerable quantities of second-crop leaf were stored in the pack houses not made up. Some lots of old Teas had been taken, intended, it was thought, as flooring chops for vessels on the berth for London; these settlements comprised 2,500 half-chests and 1,000 boxes Canton-packed Congous at Tls. 14 to 16, 3,000 boxes Gunpowder at Tls. 12 to 17, and 300 boxes Imperial at Tls. 18.

### SILK.

Yokohama.—Influenced by a desire to clear out before the new season, dealers had accepted easier terms for their remnants of hanks, and the whole of these had been cleared from the market. The remaining stock, almost exclusively Oshu, was still held firmly. Settlements, 250 bales; stocks reduced to 300 bales. The weather continued favourable, and a few bales of new Silk were expected by the end of June.

Shanghai.—The following is from Messrs. C. J. Skeggs and Co.'s Report, dated 17th June:—The new season was opened on the 9th instant by the purchase of a few bales Red Peacocks at Tls. 440, and No. 2 Fatmow Hainins at Tls. 480, there being only about 400 bales on the market. Since then about 1,500 bales have arrived from the country, but until yesterday buyers showed very little disposition to operate. Then, however, Chooping's chop was taken at Tls. 555, the equivalent of 29s. 7d. laid down in London, and a considerable business ensued at very irregular prices for ordinary Silks, of which the settlements are chiefly composed. A few of the more notable chops are reported to have been placed as follows:—Choopings, No. 3, Tls. 555; Dragon and Ya-kee, Tls. 545 to 550; "Donkey" and "Sun-E-Tah," Tls. 540; and Blue Flag, Tls. 520. In Hainins No. 2, "Fatmow," at Tls. 480, and an extra fine parcel of Yuenfaas at ten taels higher. There are no Taysaams down

Digitized by Google

yet, but a few very common Skeins are said to have fetched Tls. 360. The Silk all round is decidedly inferior to last year's. The settlements are estimated at 1,000 bales.

## JAVA PRODUCE.

BATAVIA.—Arrack, f.120 per leaguer, sales; Cloves, f.18 to f.20 per picul, dull; Coffee, Java, f.36.50 per picul, sales; Cubebs, f.18 to f.20 per picul, none; Gutta Percha, f.60 to f.120 per picul, according to quality, market bare; Gum Dammar, f.48 per picul, sales, small supplies; Hides, Cow, f.35 to f.45, Buffalo, f.22 to f.27 per lb., according to quality; India-rubber, f.90 to f.95 per picul, sales and scarce; Indigo, sales at Samarang, f.5.25 to f.5.85 per lb. for first quality; Mace, f.65 per picul, wanted; Nutmegs, f.80 to f.90 per picul, sales; Pepper, Black, f.17, White, f.30 per picul, no stocks; Rice, first quality, f.150 to f.160 per Coyang, dull and little doing—second quality, f.120 to f.130 per Coyang, dull—cargo, f.95 to f.100 per Coyang, dull; Rattans, Borneo, f.10 50 to f.13 per picul, and Padang, f·6 to f.7 per picul, sales; Sapan Wood, Manila in bond, f.5, none—Java, f.8 to f.8.50 per picul, sales; Sugar, No. 14. 15.50 per picul, sales—crops of Tjomal and Bandjardawa, about 30/m. piculs, sold by auction, fetched f.15.60 per picul for No. 14; Tin, Billiton, none in the market—last average price was f.75.90 per picul.

## STRAITS PRODUCE.

SINGAPORE.—Malacca Tin: Purchases of this article had been made at $29⅜ to 29½, but telegrams from London quoting rather lower prices there was a somewhat downward tendency. Gambier: About 1,100 tons had been contracted for at $3.10, dealers being very firm. Black Pepper in demand for Saigon for transhipment to France, and supplies readily taken up at $6.80. White Pepper scarce, some small purchases at $10 to 10½. Pearl Sago: No transactions; dealers being engaged in executing former contracts, price nominally $3.20. Sago Flour: Contracts for Singapore manufacture at $2.55. Sales of 1,500 piculs Sarawak at $2.56, and of 8,000 piculs Borneo at $2.42½ to 52½. Tapioca in good demand; sales of Flake at $4.65 to 80, and of Pearl at $4.50 to 75. Buffalo Hides in good inquiry at $10.50 to 60. Cow Hides had been taken at $14 to 14½, and were much wanted. Gutta-Percha rather lower, but strictly No. 1 quality very scarce, and worth $70; ordinary quality, $60 to 65. India-Rubber: An arrival of 60 parcels Palembang brought $38¼. Buffalo Horns arrive in small quantities only, and were taken at $9. Gum Damar had been sold at $17. Rattans of good quality unusually scarce. Camphor: Arrivals of 400 piculs, for which $20 was asked, without buyers. Cassia Lignea out of inquiry; 250 boxes on the market unsold. Cubebs: Arrivals offered at $8½, but in very little inquiry. Coffee: No arrivals and no stock. Nutmegs: A small arrival brought $49. Mace had been sold at $55 for a few piculs only.

## COLOMBO IN 1869.

It appears that thriftiness and godliness go together in Colombo, for the Savings' Bank occupies a part of the building denominated St. Peter's, which is the English church in the port. The building, which in outward appearance resembles a barrack or store, was built by the Dutch, and the English have contented themselves with it. Now if there is anything the English, as a rule, pride themselves on, it is a sightly building standing on a clear space, which can be pointed to as the Church of England. At Penang, Singapore, and Hong Kong this has been attended to, and the indifference shown to this important consideration in Colombo is not creditable either to the Governors or the community. At present this godown-church is under repair; indeed, it is tumbling down, and service is held in a barrack—this in 1869! Outside the town there are some pretty little Mission churches, and one built for the Cingalese converts, which resembles one of our suburban churches in the vicinity of London, and is a credit to those who designed and built it. The cemetery on Galle Face is in a forlorn and neglected condition, notwithstanding that it contains the remains of English people who have died here during the past fifty years. It has not a path one can walk on, but grass runs wild over all. The gate is a tottering wooden affair, lashed with rope, and the railing of canes. A neat iron railing with gates would not cost much, and the sooner it is provided the better for the credit of the town. Mr. Brooke Bailey, the chaplain, has charge of the place, but we presume the negligence does not lie at his door. The community have long complained of the old walls of the fort (built by the Dutch), which confines them and raises the temperature; but the fiat has not yet gone forth for their destruction. As a means of defence they are useless, and why they are allowed to occupy ground which is much required for building purposes, and might be made a source of profit to the Government, is unaccountable. In Bombay they have been down long since. It would appear, judging from the general condition of the town, that the same policy we so much condemn in the Dutch rule reigns supreme with the various Governors who have been in Ceylon for the past fifty years. The whole town wants renovation. Look at the building containing the Custom-house and searchers' offices or shanties; look at the landing-place, and the yard adjoining the Customs; are they what one expects to see in an English colony of seventy years' standing? Let the Collector of the Customs and the Master-Attendant see to it, and never cease to agitate until these departments are renovated. At present a visitor can only exclaim, Is it possible that these broken down filthy places are under the charge of Englishmen? There is no gas or water supply, no town hall or club, no market or seamen's home. Hong Kong and Singapore had all these years ago—why is Colombo so far behind? It is to be hoped that when these improvements are carried out they will be done in a more creditable manner than the buildings erected for the Supreme Court, which are mean and unsightly, the Court-room itself being the poorest thing of its kind in all the East. Even in Penang the Court-room is far superior. The site is good, and the building might have been an ornament to Colombo. It is a relief, amid all this chaos, to find that the barracks and officers' quarters are much better than in many other places.

We cannot lay all the blame of all these shortcomings on the Governor. He cannot be insensible to these things, but he is of course hampered in a thousand ways, and needs the assistance of others to urge on improvements. If he obstructs, then be it on his head; but we fancy Sir Hercules Robinson is not likely to adopt that attitude. The unofficial members of the Council would more fully discharge their duty towards the community they represent by attending to these things. Let them, moreover, never cease to urge on the Government the injustice done to the colony by the imposition of such an enormous military contribution as £160,000 per annum, which at the present moment is said to be in excess of the actual cost of the whole military force on the island. Why should Ceylon be so imposed on, whilst other colonies do not pay one-half the cost? When the measure was proposed by the Home Government (Gladstone was the propounder of the scheme) it was never intended to be more than a *contribution* towards the expense. If the colonies are to pay the whole cost, then they must be allowed to say what their requirements are, and not be forced to have a larger strength than they wish. The payment of £160,000 out of the small revenue of Ceylon is so preposterous that we cannot understand how the community sit under the injustice. It is a question for every tax-payer in the place, and it should be treated as a distinct matter. A cause is often lost by being coupled with other things. General charges against Governments are of no use, and seldom succeed. A memorial ought to be drawn up on this subject alone, and presented by members of the House of Commons who have some knowledge of Ceylon affairs, assisted by late residents who may be in England.

## THE STRAITS POLICE.

Among our items of intelligence by last mail from Singapore it is reported that Mr. Thomas Dunman, who has been so long Commissioner of Police for the Straits Settlements, is about to return to England on leave of absence, and much interest is felt as to who is to take the place of that highly valuable and efficient officer. It is not expected that Mr. Dunman will return to the colony, although professedly coming home on leave, and this gives additional interest to the nomination of the Acting Commissioner, it being supposed that, whoever he may be, he will have the benefit of the Governor's support with the Colonial-office; and there are whispers that his Excellency intends the appointment to go to a near relative of his own. We hope that this is not the case, as it is quite impossible that Captain Ord—who, during his brief residence in the Straits, has been doing duty at Malacca—can have acquired the necessary experience for the due discharge of the important duties of Commissioner of Police for the Settlements. From all we can learn the appointment that would give most satisfaction to the community would be that of the Hon. Charles Bushe Plunket, who was Deputy Commissioner of Police both in Singapore and Penang for several years, and successfully discharged the duties of the office until he was appointed, in 1864, to be Magistrate and Commissioner of the Court of Requests in Penang. He acted in the discharge of these duties until the latter part of 1868, when he was appointed Acting Registrar of the Court in that Settlement; but, instead of being confirmed in that appointment, he was superseded by a gentleman from Mauritius, nominated by the Colonial-office. Mr. Plunket has proved himself a useful public servant, and it is evident that his *forte* lies in the police duty; and it is to be hoped that the circumstance of his belonging to a Conservative family will not prevent Lord Granville from giving due consideration to his claims.

Representatives of the Egyptian Steam Navigation Company, the Azizieh, have just arrived in Florence to treat with the Government about starting a line of steamers between Alexandria, Brindisi, Venice, and Trieste. The company, it is said, are prepared to adopt a tariff 20 per cent. lower than that of the Austrian Lloyd's. The opening of the Suez Canal is rousing commercial men in Italy to the necessity of multiplying points of contact with the East, and thus securing a due share of the benefits which cannot but result from it to Western Europe.

We learn that Mr. Wade intends leaving this country to resume his post at Peking on the 17th of August. He will proceed *via* Panama.

## GALLE HARBOUR.

We observe with no little satisfaction that the repeated attempts to induce the home Government to grant some aid to the plan for improving Galle Harbour have at last been crowned with success. An Appropriation Bill has been introduced into the House of Commons, and was read a second time on the 2nd instant; and, close as we are on the end of the Session, we hope to see it carried through all its stages before the prorogation of Parliament takes place, as it is anxiously waited for in Ceylon, where Sir H. Robinson is prepared to commence operations as soon as he gets this formal sanction for them. The measure has been prepared by Mr. Dodson, Mr. Grant Duff, and Mr. Stansfeld; it empowers the Public Works Loan Commissioners to advance a quarter of a million on interest at the rate of 3½ per cent. per annum, and the principal is to be replaced by thirty-five equal annual instalments. No money is to be advanced until the Government and Council of Ceylon shall have made an ordinance, providing that the principal and interest of the money so advanced shall be charged on the general revenue of the colony; and that the Governor may, if necessary, raise further additional sums by taxation; and also that the money advanced shall exclusively be used for improving the harbour of Galle. We presume that before the Bill was drawn it was ascertained that these conditions would be acceptable to the colonists, and in that case the required local ordinance will soon be passed. The breakwater will, we understand, be built on the plans of Captain Clarke, of the Admiralty. The dangerous nature of the anchorage at Galle renders it advisable to proceed with the work as rapidly as possible; that it should have been so long neglected is a serious reproach to the Government.

---

In the House of Commons, on Monday last, the Under Secretary for Foreign Affairs was questioned as to the probable opening of the Suez Canal in November. Mr. Otway said he had no official information, but "there was reason to doubt whether the works would be sufficiently advanced to warrant the canal being opened for general navigation on the 17th November." The Empress, it is stated, will reach Constantinople from Marseilles on the 20th of September. From Constantinople she will proceed to Smyrna to pass a day or two *en route* to the coast of Syria, and will spend a fortnight at Jerusalem or in visiting the holy places in the neighbourhood. This programme would make the date of her arrival at Alexandria about the 20th of October, and, as the opening of the Suez Canal does not take place till the middle of November, the intervening time will most likely be passed in an excursion up the Nile. The Empress will be accompanied by Prince and Princess Achille Murat and by General Fleury. The screw frigate *Ariadne* was recently ordered to be kept in readiness to convey a member of our Royal family to Port Said, but it is rumoured that the order has been countermanded.

---

The Liverpool Chamber of Commerce, in its report prepared for presentation at the general meeting to be held this month, devotes a section to the question of trade with the Shan States and Western China. The Council announce that they have now, for the eighth time, memorialised the Government in favour of the opening up of the Rangoon-Kianhung route, and praying more especially that the survey left incomplete in 1867 may be resumed under the direction of an experienced English railway engineer; that proper assurances be conveyed to the King of Burmah, by an Envoy of suitable rank, as to the peaceful nature of the motives by which the operation is prompted; and that the Indian Government be instructed to aid, instead of obstructing, the operations. The question was brought under discussion lately by Mr. Baines in the House of Commons, but, as usual, failed to procure fair consideration. Mr. Grant Duff of course took the Indian-official view, and there was no one there able to controvert his statements, so he had it all his own way.

---

Her Majesty's ship *Ocean* has been more than three years in commission, but she will not leave China until relieved by an ironclad—probably, it is now said, by the *Penelope*, a vessel pronounced by competent authorities to be better adapted for the station than any other ship in the navy.

---

The underground works of Mont Cenis are carried on with increasing spirit and energy. The opening of the great tunnel for the locomotive before July, 1871, is confidently predicted. The Italian Minister of Public Works is hastening the construction of the railway from Susa to Bardonnêche, the southern opening of the tunnel; a guarantee, it is understood, being given that the grand opening will be completed and the whole properly walled and strengthened by the time this railway is finished. The French Government has given similar pledges as to the northern opening at Modâne.

---

## ROMANISM IN SZECHUEN.

Some further particulars have lately been received of the recent massacre of the native Christians in Western China, and form the subject of an article in the *Globe* of yesterday. It seems that for a long time a good deal of ill-feeling has existed between the native Christians and the mandarins, having its rise in the very natural jealousy felt by the latter at the great power and influence possessed by the Christians, whom they accuse of being virtually rebels against the Government. Some trifling matter of dispute between the Christians and their unconverted countrymen fanned the smouldering quarrel into a flame. A Foreign priest, with more zeal than discretion, undertook to advocate the Christians' part before the mandarins, and not getting the assistance he expected, armed his converts; upon which the mandarin washed his hands of the whole affair, telling them that as they had taken the law into their own hands they must not look for protection from the authorities. The Christians, perceiving the mistake they had made, immediately disarmed, and again threw themselves on the protection of the magistrate. But it was too late—the ball had been set rolling. Suddenly one night the church, in which were some of the Christians, was attacked, and burnt to the ground. Thirty-nine dead bodies were taken from amidst the ruins, amongst them that of M. Rigault, fearfully mutilated, and without head or limbs. This occurred in January, and since that time a constant warfare has been kept up between the two parties. And as yet all efforts to establish peace have failed. There is no doubt that the native Christians do in a great measure bring these evils upon themselves, by their overbearing and insolent behaviour to their fellow-countrymen and mandarins. And there is much reason to believe that many profess Christianity with the idea that by so doing they transfer their allegiance from the native authorities to a foreign Power which is both able and willing to protect them against the exactions of their legitimate rulers. It is even said that lately, in Szechuen, ten thousand Chinamen have, with unquestionable loyalty, declared themselves converts to the Roman Catholic faith, with the avowed purpose of thereby purchasing the protection afforded by the Christian society. It is impossible to speak too highly of the devotion and zeal of the Roman Catholic missionaries in China, and great allowances are to be made for the difficulties of their position. Yet it must be confessed that, in a great many instances, they help to foster in the minds of the natives the idea that they hold powers beyond those of teachers of the Gospel. As long as their bishops and dignitaries assume to themselves the titles and paraphernalia of temporal authority, so long will discontented and unruly Chinamen flock to their standard to rid themselves as they believe of their obligations to the Emperor's Government, and so long will the mandarins entertain a deep and not unnatural jealousy of the missionaries and their converts.

## TREATY REVISION.

(STANDARD.)

The Shanghai Chamber of Commerce does itself much credit by a temperate but powerful despatch to Sir Rutherford Alcock, our minister at Peking, in reference to the revision of the Tientsin Treaty. Sir Rutherford has been more remarkable for the great cleverness with which he has avoided any trouble with the Chinese authorities during his tenure of office than for energetic attempts to procure fresh facilities for Foreign commerce; but within the last year or two public opinion among the European residents in China has been a more active force than formerly, and Sir Rutherford has been so far stimulated by its influence that he has at all events shown great diligence in writing despatches to explain why various objects which the Europeans had in view could not be accomplished. For the last few years there have been streams of despatches from Peking, more or less susceptible of this description, addressed to local consuls for promulgation amongst the communities over which they rule, or to the Chambers of Commerce at Hong Kong and Shanghai. In the present case, however, it is only fair to explain that the document emanating from the Shanghai Chamber (published within the last few days as a Parliamentary paper, together with Sir Rutherford's reply) appears to have been written in answer to a request from the Minister that the Chamber would expound its views on certain points likely to be raised in the revision of the Tientsin Treaty. That Sir Rutherford in his answer should once more subside, as he does, into his old tone, and explain how the objection of the Chinese authorities to the

Digitized by Google

measures proposed is insuperable, so that the wise course is to give up all attempts to press them, is only natural. At all events, he has elicited a good review of the existing situation in China, where capital, civilisation and intelligence are waiting for permission to enter a country in which undeveloped resources and a teeming population are eagerly craving their advent, but where the pragmatic prohibitions of Asiatic officials keep back progress and maintain a deadlock. Sir Rutherford has elicited this review of affairs, even if he has failed, as usual, to justify a policy of inaction.

The Chamber first devotes itself, in answer to definite inquiries from the legation, to a consideration of various subsidiary ports along the course of the Yangtzse which might be opened to European trade in addition to those named in 1858. The authors of the despatch, however, go beyond the limits of this subject, and reiterate various demands very familiar to all who have observed the progress of British relations in China. They dwell particularly on the small steamer grievance. The existing treaty entitles Foreigners to travel for the purposes of trade to all parts of the interior along the inland waters; but since the overthrow of the Taepings the Imperial Government has refused to permit Foreigners to travel under this clause in boats propelled by steam. This is a frivolous and vexatious objection, which greatly impedes the development of trade, and which, it will be observed, was never thought of while the rebellion lasted. At that time the Peking Government found the small steamers of Europeans very useful, owing to the manner in which our Government sided with the Manchoo Tartar dynasty during the great struggle, but when the civil war was over the Chinese authorities, with the arrogance of a semi-civilised race relieved of its momentary difficulties, put down their foot upon the small steamers. Sir Rutherford either never fought the battle of the merchants or fought it so weakly that he never did any good. The steamers were driven off the inland waters and have never made their way back again, many small boats which were especially built for the service lying useless on their owners' hands. After noticing this matter the Shanghai Chamber proceeds to enlarge upon the importance of throwing open the resources, particularly the mineral resources, of the Empire, to the capital and skill of Europe, pointing out with patience various plain truisms in reference to the good effect which such a measure of progress must have upon all persons concerned. This is the keynote of the China question which we have often sounded already. Every concession which can be obtained for trade is a good thing in its way—good for the Chinaman, for the merchant, and the British manufacturer at home; but a far larger good lies behind. An enterprise immeasurably more glorious and interesting may be carried out whenever the British Government wakes up to a comprehension of the work before it, and begins to see what may be done with a country of infinite natural resources, inhabited by a docile and industrious, though a backward race, capable of providing an equally infinite supply of unskilled labour. Sir Rutherford, however, who, in the seclusion of his yamun at Peking, appears to forget the interests of China as completely as those of Europe, writes that in reference to all the projects named the objection of the authorities is insuperable.

## COMMUNICATION BETWEEN INDIA AND WESTERN CHINA.

(GLOBE.)

If the Chinese do not reap the full benefits to be derived from unrestricted intercourse with foreign nations it is not the fault of British merchants. With untiring energy and indefatigable zeal they have advocated for adoption by turn every project that has been set on foot for opening up the hitherto impervious empire of China. To their eyes the trade of that country has been a mine of wealth in reserve, which, when the people of all other civilised nations have been surfeited with Manchester goods and Birmingham wares, may afford yet another field for their enterprise. That time has now come. The growing competition of other nations with British manufactures and trade in foreign markets is beginning to lessen the demand for English goods abroad, and hence is manifested a desire for a further extension of commercial enterprise. Naturally, then, their thoughts turn to China, the only wealthy and civilised country remaining through whose length and breadth our manufactures have not found their way. For though almost the whole seaboard is open to trade it is well known that foreign goods circulate only through the Eastern province, and do not by any means permeate freely through the country, and that the inhabitants of the provinces of Yunnan and Szechuen know as little by experience of our imports as we do of their products. That a vast trade has at various times been carried on in both provinces we are perfectly aware, and that it is capable, under circumstances other than those at present existing, of being developed to an almost unbounded extent, we have little doubt. The question then is, how are we to reach these rich fields, that we may draw from them their superfluous wealth in exchange for our manufactured goods? A glance at the map at once suggests the idea of opening a direct communication through Burmah to Western China. Such a route would have apparently many advantages. In the first place the distance being so much shorter, a vast amount of time and money would be saved in the transit; and next, the perils of navigating the notoriously dangerous China Sea would be avoided.

These seeming advantages have long been recognised by the various Chambers of Commerce, at whose instigations partial surveys have been made and projects have been set on foot for the construction of railways and telegraphs along several routes, connecting Yunnan with our Indian provinces. Two may be mentioned here as being the only ones that under any circumstances could be made available. The first, and this the one brought under the notice of the House of Commons by Mr. Baines on Friday evening, is one which would connect in a straight line Rangoon and Kiang-hung, a Shan city close to the frontier of China, a distance of about 500 or 600 miles, the first half of which would be through our own territory. The other is the old caravan route from Talifoo to Bhamo and so down 800 miles of the Irrawaddy to Rangoon.

The engineering difficulties in the way of constructing a railway along the first of these proposed routes, although considerable, have been deemed to be not insuperable. It is on far other and more important grounds that successive Governments have refused to commit themselves to any action in the matter. They have even been unwilling to sanction a survey, forseeing clearly that no immediate beneficial result could possibly follow therefrom, and that the extreme jealousy with which the King of Burmah watches all signs of encroachment on the part of the Indian Government would at once suggest to him that our object was rather to spy out the land than the opening of a commercial route. But supposing for an instant that the survey could be satisfactorily finished, from whence are to come the funds for the reconstruction of the line? It is impossible to suppose that any company could be formed to undertake the work without first receiving a guarantee from the Indian Government, and it could not be expected that at this time, when the Indian Government has great difficulty in supplying the aid necessary for the support of the more important lines within its own territories, it would be able to lend assistance to this undertaking. Again, the political condition of the countries through which the line would pass are so disturbed and unsettled that the trade must necessarily be infinitesimally small, and the communications, unless kept open by an armed force, would constantly be liable to be interrupted by contending clans and mountain robbers. And, lastly, the state of affairs in Yunnan precludes the possibility of the existence of any large trade for years to come. Since 1855, when the Mahomedan rebels gained possession of the province, it has been in a state of siege. Thus isolated from the rest of the Empire, and devastated by war, its trade has been destroyed, its people impoverished, and its cities laid waste. Nor does there seem to be any probability of the speedy termination of this disorder. Of course with time these obstacles may disappear, the Mahomedan rebellion may be crushed, the independent Shan States may again acknowledge the rule of the Chinese and Burmese Governments, and in these latter we may find allies able and willing to grant support for the construction and preservation of a line. But looking at the present position of affairs, we cannot but agree with the Government of India in thinking that the scheme has been brought forward a generation too soon.

While, however, we discard the idea of a railway as being at present impracticable, we believe that by the opening up of the old caravan route from Talifoo to Bhamo the trade with Western China may be developed to the full extent of which it is now capable. If this plan were carried out there would be no railway to make, and there would be, therefore, none to maintain. Consequently, the cost it would entail would be very trifling; and it has the distinct advantage that, while it secures the desired end as far as it is now possible, it is free from almost all the difficulties surrounding the railway project.

## FOREIGNERS IN CHINA.

The Foreign-office has issued a fresh batch of reports of the present year from the British Consuls in China. Their interest is chiefly commercial, but one or two of the reports refer to the position of Foreigners in the Chinese Empire, and particularly to the labours of the missionaries. Mr. Alabaster, reporting from Swatow (dated Marc 31st), says:—

"In communication with the interior great progress has already been made; eight years ago Foreigners were cooped up at Double Island and unable to land at Swatow even with safety, the mandarins and compradores combining to excite angry mobs to check every attempt to penetrate into the country. By degrees, chiefly owing to the energy of one of the merchants, a footing was obtained at Swatow, and the whole Foreign community is now settled there. In the course of years, and as the result of various gunboat expeditions, it became safe for Foreigners to go wherever it was apparent that a vessel of war could come within a couple of thousand yards, and this year Foreigners have been able to go as far as Kia-ying-chow, some eighty miles in the interior. Missionaries go freely to all the cities in the neighbourhood except Tinghai or Chenhai, in the immediate vicinity, where persistent hostility is still manifested; and shooting, picnic, and exploring parties are treated with courtesy where a few years ago it was unsafe for them to pass. A few piratical villages remain to be brought to terms, and then the country will be as thoroughly open as any of the northern provinces. The opening of Chao-chow-foo has in a great measure contributed to this; for although the notification of its being open to Foreign trade and residence appeared only in December, it was practically open by the establishment of a consulate and an agency of an English firm there many months before, and mandarins seeing that we were determined to go, and the people seeing that going we did them no hurt, the opposition to Foreigners in the department has almost ceased."

On the subject of missions Mr. Alabaster writes:—

"I have a word to say regarding the English, or rather Scotch, mission established here, as its progress and prosperity are largely, although indirectly, bound up with our commercial interests. Established some ten years ago, its agent, Mr. Smith, even then, notwithstanding the irritation against Foreigners, maintained his position at Swatow, and the mission stations have since spread to all the districts round, and at great personal risk the footing of the mission has gradually been made good. Nor has this been done by constant appeal to a protecting gunboat; the Consul and authorities have from time to time been called on to extend protection, but it has ever been rather to prevent recurrence of violence than to obtain redress—the missionaries seeking but the opportunity of being heard rather than of obtaining the punishment of those who, rather from ignorance than anything else, had offered them insult or injury. By these means they have in many places obtained the good feeling of the people, who, led away by inconsiderate excitement, naturally expected to suffer the consequences of their violence, and in many of their chapels they are far more secure

Digitized by Google

than they would have been had an army marched in to exact satisfaction for the opposition offered to their entry. And in another way they have obtained powerful support, in their careful abstaining from interference in the temporal concerns of their converts; for although, had they always been ready to take up the case of a professing Christian with the Consuls and authorities, they would probably have numbered many more nominal converts, they would have had no security for the sincerity of their followers, and would have been regarded with jealousy and resentment by the mandarins, instead of, as at present, with toleration and even friendship. From two labourers their number has been increased to four, and while one is always present at the hospital and headquarters in Swatow, the others visit the out-stations and make tours through the country, preaching and distributing Bibles and tracts; and, although it is impossible to rightly estimate the extent of their work by a statement of the number of their chapels and congregations, its effects can be and are felt by the community generally in the spread of the good report of Foreigners, and the accustoming of the people to them in a favourable light in places heretofore inaccessible to us, and which, had less judicious agents visited them first, might still have remained closed to us. So long as the missionaries devote themselves to the preaching of the Gospel they must succeed, and the merchant, the traveller, and the official will always find the way smoother before him where an honest missionary has gone before."

# Foreign Intelligence.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Aug. 6.

We are now in the midst of the holiday season, and as usual under such circumstances there is an absolute dearth of any interesting political news. All who can afford it go out of town, and even leave the country for Germany or Switzerland. The railway stations are more busy than ever, and the solitude of the watering places, Scheveningen, Zandvoort, and even Domburg is disturbed by a welcome invasion of compatriots and foreigners. The papers are filled up with reports about shooting matches of our volunteers and riflemen, athletic sports, races, concerts, &c. In vain we seek for any interesting item whilst we yawn over our newspapers. The great object of the public now is to procure health, rest, change and amusement. The only item worth being mentioned is, that the Opposition papers spread the rumour that a large number of first rate Amsterdam and Rotterdam trading houses have requested the Minister of the Colonial Department to order that the announced auction of coffee which will be held this month by the Trading Company shall be delayed till September or October, because the stock is too large now for the August sale to give a good result. It is also ascertained that the Minister has declined to grant this request.

### COMMERCIAL.

COFFEE.—The market is calm, while green Java is quoted 35½c. The transactions since my last report include 320 b. Java, ex Wilhelmina; 400 b. Java, ex Doelwyk; 1,000 b., ex Waterloo. The total stock of Coffee in Holland is 725,500 b., of which 414,700 b. unsold of the Trading Company.

SUGAR.—The market is firm for Raw Sugar. The following lots changed hands:—582 b. Samarang, floating per Aria and Betsij, at secret prices; 881 Sourabaya, ex Cheribon, No. 15¾, at 31f.; 667 mats do., ex Wilhelmina, No. 8¼, at 31f.

RICE.—6,870 b. Rangoon, floating per Blair Athol, were sold at 5¼f., and likewise the half of the cargo of Saigon (22,700 mats), ex Ocean Empress.

SPICES.—Fine qualities are firm, but the quotation is rather nominal. Nutmegs: No. 1, 98c.; No. 2, 90c. Mace: E cannot be bought at 150c. The unsold stock is—Nutmegs, 1,041 casks; Mace, 379 casks; Cloves, 390 casks; and the stock on warrants—Nutmegs, 3,610 casks; Mace, 267 casks; Cloves, 2,699 casks; Cinnamon, 103 mats.

TEA.—The market is firm since the auction of the cargo ex Victoria. The lots bought in at that auction were sold since, viz., 20 lots Lapseng Souchong, and 16 lots Kaisow Congou, at 115c. and 99c. 11 lots Souchong were sold at prices that did not transpire.

TIN.—Banca somewhat lower in price; 1,500 slabs were sold at 80f., 79¾f., and 79½f. To deliver out of the forthcoming autumn auction was engaged at 77f. In Billiton transactions have taken place at 76½f. to 75½f. The unsold stock of Banca is 40,202 slabs, and the stock on warrants 89,247 slabs. The unsold stock of Billiton is 5,850 slabs, and the stock on warrants 1,064 slabs.

JAVA TOBACCO.—Important public auctions will take place on the 2nd of September, including about 15,000 bales.

RATTANS.—174 pic. ex Dunedin and 100 pic. ex Neerlands vlag were sold.

ARRACK.—25 casks Sourabaya alcohol ex Rotterdam changed hands at prices that did not transpire.

INDIGO firm, but a small business doing; only 31 chests were sold.

MISCELLANEOUS.—Curcuma: 477 b. Java was sold at about 9f. Kapoa: 46 b. half-cleaned were transacted at 25c. per half-kilo.

### SHIPPING.

ARRIVALS.—July 27, at Brouwershaven, from Akyab, Maasnymph; 29, at Brouwershaven, from Passaroeang, Susanna Johanna; at Texel, from Java, Californie; 30, at Brouwershaven, from Saigon, Shakespeare; at Texel, from Banjoewangie, Petronella; 31, at Brouwershaven, from Batavia, Triton; Aug. 2, at Brouwershaven, from Batavia, Cornelis Wernard Eduard.

DEPARTURES.—None.

# Shipping Intelligence.

### ARRIVALS.

At YOKOHAMA.—From Liverpool, June 8, Mary Lee; from Cardiff, 6, Alexander; from Marseilles, May 27, Assurance; June 9, Vampyre; from Amsterdam, June 3, Vondeb.

At SHANGHAI.—From Cardiff, June 11, Mary, Edie; from Boston, 11, Jewess.

At HONG KONG and CANTON.—From London, June 11, Chusan; from Liverpool, 11, Parejero; 16, Ajax (str.); from Cardiff, 8, Cleopatra; 11, Peter Rickmers, Stephanie, Hermann Doctor; 14, Ernst and Maria; 16, Thetis; 20, Sea Flower; from Newport, 20, Preciosa; from Sunderland, 11, Maitland, Deerhound; from Bordeaux, 11, St. Germaine; from Hamburg, 11, Falke; from Bremen, 14, Orient; from New York, 11, Samuel Russell; 21, Nautilus (str.), Walrus (str.).

At MANILA.—From London, June 17, Pepita; from Cadiz, 9, Maria Fidelia; 10, Encarnacion.

At SINGAPORE.—From London, June 18, Wave Queen; 26, Jungfrau; from Portsmouth, 12, H.M.S. Hornet; from Shields, 18, Vanguard; 30, Choice; from Cardiff, 22, Canvass Back; 23, Schoonderloo; 26, Benares; 27, Aunt Lizzie; from Newcastle, 23, Tasmania; 26, Sultan; from Glasgow, 24, Blenheim; from Liverpool, 26, Duncairn; from Bourbon, 22, Nouville Antoinette; from Rotterdam; 23, Ellina Van Aalst; 27, Maria Elizabeth.

# Monetary and Commercial.

—o—

It is announced that the final dividend of 7s. in the pound (making with the previous dividend 17s. in the pound) is in course of payment to the creditors of the Commercial Bank Corporation of India and the East, at the offices of the official liquidator, 13, Gresham-street.

In the Rolls Court, last week, a compromise was sanctioned by Mr. Church between the liquidators of the Commercial Bank Corporation and Mr. E. M. Smith. Mr. Smith was indebted to the bank in the sum of £7,922, and as security a lien was held on land at Shanghai, which a short time ago was valuable, but which had greatly depreciated, and which was said to be now only worth about £5,000. Mr. Smith now gave power to sell the land, and it was arranged that on the payment of £300 at Shanghai on the 31st of December next he and his sureties should be discharged from all further liability.

At the general meeting of the Credit Foncier, held last week, the shareholders learned for the first time the agreeable intelligence that some of the old directors had agreed to pay £50,500, with £1,500 costs, as a compromise for the demands upon them. The chairman further announced that he hoped to recover the best part of £20,000 more from other directors. The directors with whom the agreement has been concluded are the Right Hon. J. Stuart Wortley, and Messrs. Albert Grant, Edward Warner, William Harrison, W. Dent, and Henry Pownall. A resolution was passed empowering the directors to divide £30,000 of the money so obtained amongst the shareholders as a bonus, being at the rate of 3 per cent. per annum. The meeting was subsequently made special, when the arrangements between the directors and the ex-directors were agreed to.

It is announced that the French Atlantic Cable will be open to the public for the transmission of despatches on the 15th instant. The rate is to be forty francs for ten words, and four francs for each additional word. Numbers may be expressed by figures, and, in accordance with the dispositions of the Vienna Telegraphic Convention, five figures will count as one word.

The tenders for £325,000 in bills on India were received yesterday at the Bank of England, when the amounts allotted were —to Calcutta, £224,800, and to Madras £100,200. The minimum price was fixed, as before, at 1s. 10⅞d. on Calcutta and Madras, and tenders on those Presidencies at 1s. 11⅛d. will receive about 52 per cent., and all above that price in full. These results show a slight diminution in the demand for means of remittance to the East.

A portion of the Mexican dollars brought by the West Indian steamer, and also of those reserved from the previous large arrival, have been sold at 59¾d. per ounce, showing a decline of ¼d.

The failure is announced of Messrs. Franghiadi and Rodocanachi, Greek merchants, of New Broad-street, with liabilities to the amount of about £250,000. In the circular issued to the creditors it is stated that the stoppage has arisen solely in consequence of the inexplicable conduct of Mr. B. M. Rodocanachi, the partner at Rio, who has represented the firm there since 1847. It appears that he has drawn upon the house here to the extent of about £150,000, including a considerable amount of paper which has just come to hand by the Brazilian packet, *La Plata*, while the promised large remittances have not arrived, although fully £40,000 in specie was expected by that vessel, having been insured here a short time ago by direction of Mr. B. M. Rodocanachi. Pending the receipt of explanations from Rio, no reliable estimate can be formed of the probable result of the liquidation, but it is expected to prove favourable, owing to the large means of the partners in England. The firm has been established upwards of fifty years. Its chief trade is with Brazil, but we believe there were connections in China also.

The amount of bullion by the P. and O. Company's steamer *Delhi* from Southampton on the 7th inst., was in gold, to Madras, £1,464 ; in silver, to Hong Kong, £25,105.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

---

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: Iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

---

DOUBLE YOUR INCOME; or, RESOURCES OF THE MONEY MARKET. Just published, price 1s. Can be ordered through any Bookseller, or post free for twelve stamps, from E. HAY, 83, Lombard-street, London.

---

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

---

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

---

HOLLOWAY'S PILLS.—LIVER COMPLAINTS AND DISORDERS OF THE BOWELS.—Incautious diet or heedless living, as regards quality or quantity of food and beverage or unavoidable exposure to changing temperatures, are ever present to undermine the constitution. It is impossible to exaggerate the extraordinary virtue of this medicine in the treatment of all affections of the liver or irregularities of the bowels. For curing bowel complaints they should be taken rather more sparingly, for every medicine in the form of an aperient requires caution when the bowels are disordered, though a more gentle aperient than these Pills in moderate doses has never yet been discovered. If taken according to the printed instructions, they conquer the complaint and strengthen the system.

### THE MAILS, &c.

The present inward mail is delivered on its due date. The next, which may be expected on Monday next, will be the French mail, with dates as follows:—Yokohama, July 6; Shanghai, July 9; Hong Kong, July 15; Singapore, July 24; Galle, August 3.

The latest telegrams received *via* Galle are those in advance of the mail leaving Hong Kong on the 22nd July; the succeeding mail (Hong Kong, Aug. 5) is due at Galle to-day. *Vis* Kiachta we have Shanghai telegrams to Aug. 4.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Bangalore*, arrived August 20.—From Shanghai: Dr. Coghill. From Hong Kong: Mr. Lowcock, Mr. Moffatt, Mr. Campbell. From Galle: Mr. Churchill, Master Parsons, Hon. C. Cadogan, Mr. Ramsay, Mr. and Mrs. Rose, three children, and servant.

To Southampton, per P. and O. steamer *Ceylon*, expected to arrive Aug. 28.—From Shanghai: Capt. Hooper. From Hong Kong: Mr. Piercy, Mrs. Hooper, Mr. Green, Mr. Dupont, Mr. Leighton. From Penang: Mr. Gibson. From Galle: Mr. Spright, Mrs. Duncan and child, Mrs. Higgs, three children, and servant, Mr. Milne, child, and servant, Mr. Galloway, Dr. Cooper.

By last mail to Southampton, per P. and O. steamer *Poonah*, arrived Aug. 12.—From Hong Kong: Lieut. Pringle, Mr. R. Scott, Mr. J. Gibson, Mr. A. Raymond, Mr. F. J. Angier. From Singapore: Capt. Davies, Mrs. C. Younge. From Penang: Mr. and Mrs. Fredericks and child. From Ceylon: Captain Cole, Mr. W. Banks.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Syria*, from Southampton, August 21.—To Yokohama: Mr. G. Wauchope. To Shanghai: Mr. Inaba, Mr. Collinson. To Hong Kong: Mr. Marcus Wolff, Mr. R. C. McClement. To Ceylon: Mr. W. Raikes, Miss A. Walker, Miss Crowe, Mr. and Mrs. J Robertson and child, Rev. Mr. Bateman.

Per P. and O. steamer *Bangalore*, from Marseilles, August 29.—To Shanghai: Mr. J. J. Tucker, Mr. Douglas Jones. To Singapore: Mr E. J. Tolson. To Batavia: Mr. T. Van der Chijs, Mrs. Van Haeften. To Ceylon: Mr. E. Rymer, Mr. G. S. Steward.

Per P. and O. steamer from Suez, Sept. 5.—To Hong Kong: Mr. and Mrs. C. C. Smith.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 4.—To Shanghai: Mr. Russell, Mr. and Mrs. J. Hart, Miss E. Hart. To Hong Kong: Mrs Hackin, Dr. Franklyn. To Ceylon: Mr. and Mrs. G. W. R. Campbell.

Per P. and O. steamer *Delhi*, from Marseilles, Sept. 12.—To Shanghai: Mr. J. Maitland.

Per P and O. steamer *Ceylon*, from Southampton, Sept. 18.—To Yokohama: Mrs. Campbell and child. To Hong Kong: Mr. J. Y. V. Shaw, Mr. Head. To Ceylon: Mr. M. Finch.

Per P. and O. steamer *Syria*, from Marseilles, Sept. 26.—To Yokohama: Mr. R. Johnstone. To Penang: Mr. and Mrs. H. Frohlich.

Per P. and O. steamer from Southampton, Oct. 2.—To Hong Kong: Mrs. E. Arthur, Mrs. Wilberforce Wilson. To Ceylon: Mr. C. Buchanan, Miss Macartney, Mr. J. Duncan's two children, Mr. and Mrs. W. Carver. To Singapore: Mr. J. W. Witham.

Per P. and O. steamer from Marseilles, Oct. 10.—To Ceylon: Mr. and Mrs. M. H. Thomas, Miss Creswell, Mr. J. W. Gossett, Mr. Stanley Daniell, Miss Sconce, Sir J. Elphinstone, Mr. H. W. Ridley.

Per P. and O. steamer, from Suez, Oct. 17.—To Ceylon: Mr. Duncan Davidson.

Per P. and O. steamer from Southampton, October 16.—To Penang: Miss Napier. To Ceylon: Mrs. Wilson.

Per P. and O. steamer from Marseilles, October 24.—To Shanghai: Mr. John Fraser.

Per P. and O. steamer from Suez, October 31.—To Shanghai: Mr. J. H. Cheape.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Advices from this port by the present mail extend to the 26th June. No later outward mail than that of April 23 had been received, but that of May 7 was hourly expected. The *Japan Times* summary of news is as follows:—

We announced in our last the capture of Esashi and Matsmai by the Imperial troops and the subsequent advance upon Hakodadi. We have not yet heard of the fall of the last stronghold of the rebels, but have little doubt that it is by this time in the hands of the Mikado's general. An attack was made on the 9th inst. upon the outposts of the place, when the village of Uragawa was taken after some severe fighting, in which the Imperial fleet was able to take an efficient share; and had the Imperial troops at once followed up their success, they could have, in the opinion of competent judges on board H.M. *Pearl*, then lying off Hakodadi, made themselves masters of the place without difficulty. This seems to have been the opinion also of M. Brunet and his companions, who deserted their piratical friends in the course of the night and sought refuge on board H.I.M. *Coetlogon*, which appeared to have been waiting for them. She left the next day, and arrived here on the 15th instant. Another Frenchman, who had been wounded and taken prisoner, and sent down to Yedo, was demanded of the Government by M. Outrey, the French Minister, and the whole were despatched to Saigon in H.I.M. *Duplcix* on the 19th. Of their conduct there is no need for us to speak, particularly as they are not here, nor at liberty; what engagement has been given to the Mikado's Government that they shall be duly punished is not known. If general opinion and, we may add, general experience are worth anything, they will not be punished at all; but we must wait awhile before giving credence to the statements freely made to that effect. The whole affair is sufficiently disgraceful to all concerned in it, without our anticipating too readily another stain on the tricolour.

Our latest dates from Hakodadi is by H.M. *Dove*, which left on the 16th. Skirmishing was still going on, and the town not taken, the apparent intention of the attacking force being to surround the place completely before going in upon it, so as to prevent any of the rebels escaping into the country to give further trouble. It was feared the town would be fired by its occupants as soon as an assault was made.

The financial difficulties of the Government are apparently as great as when we last wrote, which cannot be wondered at when we consider the heavy expenses of this expedition to the North; and its obstinate progression towards national bankruptcy, in spite of all advice, is, we regret to say, to the full as great. Since our issue of the 13th proclamation has been made ordering that *kinsats* (the inconvertible paper money issued last year at Osaka) shall be a legal tender here as well as there. The last operation of the Government has been the issue of an edict in Yedo notifying that necessaries of life, such as rice, fish, &c., may be sold only for *kinsats*, an attempt evidently to popularise the issue among the common people. Trade has, of course, been brought to a complete standstill, and it will not be difficult soon to show, from the results

Digitized by Google

of these pernicious measures, a sufficiently plausible reason for our representatives to complain of breach of treaty, inasmuch as "free buying and selling" of commodities between "all classes of Japanese" and ourselves will be interfered with. The best friends of the new Government, who have advocated its cause during its struggle for power, and sympathised with its difficulties in the hour of its success, will at last be alienated from it, if its perseverance in its present suicidal course continues to threaten so nearly the extinction of our trade. That its financial difficulties are immense we know and admit, but that it cannot extricate itself from them without appealing to Foreign experience for aid and counsel it has yet to own. Unless the lesson is soon learnt, there is no prospect before Japan but absolute ruin and probably partition of its soil. The country has been opened to our commerce, and we shall take it in hand to develop ourselves, rather than allow it again to be closed against us.

The expected visit of the Duke of Edinburgh in the *Galatea* seems to be attracting men-of-war of all nations to our harbour—at least we know of no other reason for such an assemblage as is shown in our local shipping lists. The U.S. *Piscataqua*, a fine frigate, and the N.G. corvette *Medusa*, are the most noticeable additions to the anchorage. A couple of Austrian vessels are also daily expected, and several more Americans, we are told, will be here in July.

The weather has been very pleasant and remarkably cool for this season of the year; in fact, the rice crop now requires some heat. Other cereals have been successfully harvested, and we are glad to hear good accounts from the surrounding silk districts. We shall shortly have reports on our most important staple from parts more remote, for, besides the Italian Minister's party, whose expedition westward we mentioned last mail, another, under charge of Mr. Adams, Secretary of the English Legation, has gone up into Mybash and Sinchu. The reports of these commissioners are anxiously looked for.

The following is from the *Japan Herald*:—

The much vaunted Parliament, from which we were led to expect so much, would appear, from all the information that reaches us as to its schemes, debates and influences, to be another of those extraordinary failures which the rulers of the nation have perpetrated since the commencement of the era of their Foreign intercourse with the outside world, and which have marked them out as a people most peculiar in the eyes of other nations. They have become possessed of Armstrong guns, Snider and Chassepot rifles, frigates of war, fighting rams, arsenals, &c., and possibly actuated by the same impulses, felt that they must have a Parliament, which having now, they know not what to do with, or how to control the thing they have created. Disdaining Foreign assistance and advice, they seem determined to continue in the folly of their ways until, with the country in a state of bankruptcy, trade paralysed, and themselves and their rule hated and despised, they plunge headlong into the universal ruin that they have so wantonly brought about. The prices to the Foreigner of the necessaries of life are increasing in proportion as his chances, not of profit, but of livelihood, are decreasing, and what it is all to come to we dare not predict. One idea is becoming very prevalent amongst Foreign circles, which is, that it is high time for our Foreign representatives to interfere for the protection of the commerce of their respective nationalities, for the interest of which the treaties were framed; and we are not sure that the idea is an unreasonable one. Our interests with Japan are purely commercial, and if these be not cared for in the spirit of the treaties which introduced us to these shores, we may as well pick up our "flags" and walk, and that at once.

From Nagasaki the news is unimportant. Messrs. Maltby and Company's new stone godown fell with a crash at eight o'clock on the morning of the 11th of June. Luckily no one was hurt, but three Japanese who were passing along Main-street had a very narrow escape.

### THE LOSS OF THE "HAYO-MARO."

We were able to give a brief account of the wreck of this steamer in our last, but fuller particulars have come to hand by the present mail. The *Japan Times* says:—

The *Hayo-maro* was wrecked on the 17th of June, some seventy miles from Yokohama, on her way to Kobé. The Europeans on board were:—Mr. Margesson, a well-known China merchant; Mr. Wainwright, of the *Hiogo News*; M. Jachimek, the Hungarian pianist, at whose concert half Yokohama attended a few weeks ago; Messrs. Kalle and Muller, two German gentlemen; M. le Conde de Mouton, a Spaniard from Manila, and Mr. Cream. Of these, only the last two named escaped. Besides, there were four Chinese passengers, all saved, and some ten Japanese, of whom only two survive. Captain Hill, a popular and able commander, went down with his vessel, and the second engineer, Mr. Watt, shares his fate. The first and second mates and the quartermaster got to shore, and the first engineer also, with a dislocated shoulder. The majority of the crew, Chinamen and Japanese, were equally fortunate, but in all, out of some sixty-five people, twenty-two have been lost. The disaster appears to be due, as in the case of the *Nepaul* in 1865, to skirting the well-known "Plymouth Rock" too closely. A little after 8 P.M., when dinner was over, and passengers and officers on deck were enjoying the hour after their meal, when the ship was going fourteen knots, and her engines making ninety-eight revolutions per minute, she struck upon the same rock as the *Nepaul*. Apparently she went right over the rock, and went down almost immediately—according to the best information we can get, in seven minutes. Had the engines been at once reversed, so that the ship could have been retained in her position on the rock, she might have remained suspended there long enough to enable all in her to get away from her at leisure; but it would seem that Captain Hill hoped to be able to run her ashore after clearing the point on which she was hanging, and directed his efforts to that end. Slightly built, however (she was originally constructed for a blockade runner in the American Civil War), her bottom was literally torn out of her, and she sank as soon as she got over into deep water, and has left not a wreck behind. One solitary bale of cotton is all that remains of her cargo. This must have gone up through her side, and was of some service in supporting the first mate, until, finding it rolling too much, he abandoned it for a floating spar. The way in which the European passengers met their death was pitiable. All except M. Jachimek, who would not leave his cabin, were being lowered from the side of the sinking vessel in one of the boats, and fully content with their position, the sea being smooth and shore within three miles of them, when one of the falls was cut or let go, it slipped through the block at the davit, and the boat, becoming instantly perpendicular, shot them all into the sea. M. le Conde de Mouton, a strong swimmer, struck out at once for shore, which he reached after being nearly two hours in the water; and Mr. Cream was picked up by the quartermaster's boat, which, after landing her freight of Chinamen and Japanese, returned to look for survivors from the wreck. Those of the crew who were saved had mostly reached the land in another boat.

A correspondent adds the following:—"When the news was brought up to Yokohama, the owners of the steamer, Messrs. Textor and Co., procured another steamer, the *Otago*, and proceeded to the scene of the wreck. On board were several of the residents of Yokohama, who had had friends on the ill-fated steamer, and some surgeons from the men-of-war in the harbour. The *Otago* left Yokohama at eleven o'clock, and reached the Plymouth rocks at about one. Not a sign of the rock was visible; not a spar, a rope, or a scrap of anything. Two boats were immediately lowered—one to go ashore with dry clothes and other comforts for the rescued (for with the exception of the two sailors first mentioned they had all remained at the village during the night), and to bring them to the *Otago*. In a little bight which formed the entrance to the village were found a white gig, the boat that had done such good service in saving so many lives, and a bale of cotton yarn, the only other sign of the wreck. The rock on which the vessel struck was found to be about six feet below water, and about 200 yards—certainly not more—to the eastward of the Plymouth rocks, with deep soundings all round it. When examined there were marks on the rock where the steamer had broken a piece off and smoothed off the surface. This rock is down on the old American charts; but on the charts now in use—namely, the English Admiralty charts—the eastern neighbourhood of the Plymouth rocks is only marked shoal. But, at any rate, it is the universal opinion among seafaring men that the captain—himself unhappily gone with the ship—had no business so near the rocks. A couple of days afterwards two gentlemen went down to the scene of the disaster and picked up one body—that of Mr. Jachimek, but otherwise the sunken steamer had made no sign."

---

### OSAKA AND HIOGO.

Our news from Hiogo and Osaka is as usual of no great importance. Perhaps the item most worthy of remark in either of the papers there received by the *New York* is a statement in the *Hiogo News* that some of the hill land at the back of the Settlement of Kobé is being brought into cultivation. A considerable acreage has been planted with mulberry trees, which are looking strong and healthy. There is no doubt that there is much waste land in Japan which could be thus usefully employed in increasing the export of silk.

A substantial and handsome brick building is being erected at Kobé for the Hiogo and Osaka Club. A curious fatality seems to ordain that settlements should not be known by the name of the treaty ports. According to treaty, we ought to be dating our letters from Kanagawa instead of Yokohama, and now we read of the Hiogo and Osaka Club building its residence at Kobé.

Osaka manifests an evident desire, however, to secede from the alliance. The Osaka merchants have lately attempted to have the name of their settlement removed from the title of the "Hiogo and Osaka Market Report," and, if the Osaka correspondent of the *Hiogo News* may be believed, not without reason. He writes:—

"Let any of your readers who question the policy of the secessionists refer to the *Price Current and Market Report*, published 'by authority' of the 'Hiogo and Osaka Chamber of Commerce,' and dated the 24th ultimo. They will there find it stated that the total deliveries at Kobé (Hiogo) and Osaka, of long, short, and Snider Enfield rifles, for the month ending the 21st ult. was fifteen stand. Now in Osaka alone I am convinced that fifteen hundred stand of the arms specified were delivered during the period in question, to say nothing of Spencer's, Henry's, and revolvers. One house alone assures me that they delivered upwards of six hundred Enfields, and having personally been witness to the delivery of several hundred stand, I feel assured that the quantity named is considerably understated. I shall not enter

Digitized by Google

into the question of erroneous prices and estimates of stocks; but whatever the motives of the compilers of the *Market Report* may have been, it is plain that they are not doing Osaka justice."

Of course, if merchants at Osaka decline, as in their present state of mind they are probably inclined to do, to give to the committee of the report in Kobé the necessary statistics of their trade, the report must of necessity be incorrect; if they persist the Hiogo or Kobé merchants would do well to let their brethren go.

The *Hiogo News* states the price of the *Sultan*, sold to Messrs. Aspinall, Cornes and Co. by the P. and O. Company, to have been 70,000 dols.

Five Japanese have been caught at Osaka forging paper money. The chief of the gang is to be crucified and suffer execution by the spear, the others will be beheaded.

## CHINA.

—o—

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, July 2.

The P. and O. steamer *Malacca* arrived on the evening of the 21st ult. with the London mail of the 7th May and telegrams to the 23rd May. On the 24th a Chamber of Commerce telegram was received, *via* Kiachta, to the 1st ult., and by French mail of the 15th May we obtained, on the 29th ult., London telegrams to the 2nd June.

On the 19th ult. the Austrian frigate *Archduc Friedrich* and corvette *Donau* arrived with Admiral Baron von Petz, who is about to conclude treaties with China, Japan, and Siam. His Excellency left for Tientsin in the *Donau* on the 26th ult. It is said that he will confine his efforts to obtaining the same provisions that are secured to other nations by the existing treaties. The Chinese are expected to insist on the insertion of a clause abolishing merchant-consuls, and for many reasons this would be a very advisable step. Wheaton's "International Law" has recently been translated into Chinese, but as yet the inadvisability of granting exequaturs to merchant-consuls is the only lesson they seem to have learned from it. But, indeed, this they had learned in practice long before Wheaton appeared in a native dress.

The meeting of shareholders and members of the Shanghai Club, adjourned from the 11th June, was held on the 21st. Amicable arrangements have after all been made. The rates of subscription are not to be increased, but the charge for boarding is to be raised by 10 dols. per head, and bedrooms, instead of being charged as heretofore at 20 dols. per month, are to be divided into two classes, for which 30 dols. and 25 dols. per month respectively will be charged.

The Union Steam Navigation Company held its annual meeting on the 22nd ult. Full reports will be found in the papers. The following were the resolutions carried:—

"That the report as presented be adopted, and the accounts passed.

"That the present directors be re-elected.

"That Messrs. J. P. Bisset and William Mitchell be elected auditors for the coming year.

"That all cheques shall be signed by three directors and countersigned by the general agents; and that the amount in the bank be kept in the name of the U.S.N. Company, and when the amount exceeds Tls. 5,000 the same be invested in the bank as deposit at interest.

"That each Tls. 350 share be replaced by three shares of Tls. 100 each, the additional Tls. 50 being a division of part of the reserve fund now transferred to capital account, against purchase of the *Glengyle*.

"That clause 67 of the deed of settlement be altered in such a manner as to allow returns upon the contributions of freight by shareholders to be paid every six instead of every twelve months as formerly; and as by the present wording of this clause the return contribution is fixed at a third of the profit, it is advisable to make some further alteration, and that in future the return be fixed by the shareholders at the half-yearly meeting, but that in no case shall it be less than five per cent.; and that in future an interim dividend be made to the shareholders when the half-yearly meeting is held in November, should the directors consider that the profits of the preceding six months will allow of it.

"That no more steamers be bought or contracted for until the directors have the sanction of the majority of the shareholders for doing so at a general or extraordinary meeting of directors."

I send you the agents' report separately.

On the 23rd ult. a native carpenter employed at Farnham and Co.'s Dock was shot dead by an Indian watchman, and another native was seriously wounded. The preliminary investigation is now being held. On the day following the occurrence the Prefect of Shanghai, while on his way to hold the inquest on the body, was mobbed by an immense number of Ningpo carpenters, who demanded the immediate execution of the criminal. With much difficulty, and only after having been forcibly rescued by the French police, the magistrate at length escaped. Next day he attended at the Supreme Court to listen to the evidence, but was too late. When leaving he was met by the murdered man's mother, who refused to allow him to pass until the accused should be executed. The same scene occurred on the following day, the luckless Che Hien getting rid of the old woman only after extraordinary exertions. Popular feeling is, after all, worth something in China, although in general its expression can be tolerably well stifled.

The Customs Returns for the quarter ended March 31 have just been published. They show a steady and in some cases astonishing increase in Foreign trade at the ports. Thus at Hankow "the quantity of Gray Shirtings and T-Cloths which arrived during the quarter was in excess of the total importations for the years 1863 and 1864." Newchwang, however, has fallen off seriously in exports.

Hankow seems destined to acquire an unenviable reputation for destructive fires. The third for this year occurred on the 23rd ult., resulting in the total destruction of between thirty and forty native houses on the north side of the town, close to the settlement. Fortunately no more than two lives were lost. The calamity originated in a hut, where an opium smoker dropped a few sparks into a heap of straw. The culprit is in custody.

Our reports from Tientsin are reassuring. More than ordinary delay in restoration of business activity after the cold season occurred this year, but our last advices inform us of a rapid advance in cotton goods, and of plentiful rain, which had for nearly a month been urgently wanted.

(FROM ANOTHER CORRESPONDENT.)

SHANGHAI, July 1st.

There was a report here lately of a contemplated rebellion at Soochow, as well as a rising in the native city of Shanghai. Both rumours were incorrect, but it appears that a rising was intended at Soochow for the purpose of plunder, without any ulterior views. The mandarins at both places showed their activity by beheading several so-called spies. Had any real outbreak occurred they would have been the first to bolt. The Chinese authorities have a great idea of the efficacy of executing spies, as striking terror. It certainly has that effect, as no one is safe, particularly if poor and friendless. I believe the bulk of spies executed are merely beggars or strollers. If the poor-law authorities in England would take a hint from the Chinese, and utilise beggars in that way by executing a few now and then as a terror to evil doers, it would be worth considering.

The impression seems to be gaining ground that the Chinese Government are preparing themselves for another encounter with Foreigners. They only reluctantly, and under pressure, tolerate their presence in the country, and every now and then unmistakable signs show themselves that they desire to free themselves of the incubus. The Government are now strengthening the Taku forts by every means in their power. Several large guns have lately been shipped here for Taku, intended to be mounted on the forts there. They are not only strengthening the forts themselves, but are increasing the number of disciplined soldiers to garrison them. Various occurrences have lately shown how the wind blows. A picnic party from Kiukiang this month were mobbed and driven back to their boats by some villagers, as it was reported that their purpose in going to the place was to boil and eat young children.

Mr. Consul Swinhoe is here now, having recently returned from his expedition up the Yangtze Kiang. It is understood that Mr. Michie is preparing for publication a detailed account of the expedition, which will be gladly welcomed by the community. Mr. Swinhoe will also doubtless forward a full account to the Home Government. Mr. Swinhoe shortly proceeds home, *via* San Francisco. He is at present the guest of Mr. Dick, Commissioner of Customs.

Mr. Taylor, of Yangchow notoriety, had his name again before the public. He was accused of forcing his ministrations on the Buddhist priests at the Sacred Island of Pootoo, near Chusan, but it turned out to be a false report. He had merely gone there for the benefit of his health, but had not in any way obtruded himself upon the inhabitants. This island, which is very picturesque, is solely inhabited by Buddhist priests, who spend their time in reciting prayers. They live exclusively on vegetable food, and live a life of retirement. No women are allowed to reside on the island. It is a favourite visit for invalids from Ningpo, who are in the habit of hiring some of the temples from the priests, who are not above turning an honest penny in that way. We have just had a visit from two Austrian frigates, the *Donau* and *Frederick*. The former carries an admiral, who has also the rank of Minister to the Chinese Government, and has left in the former vessel for Tientsin, for the purpose of negotiating a treaty with the Peking Government. Both vessels are wooden, of the old style now unfortunately going out of fashion, but they are fine specimens of naval constitution, and I have no doubt would give a good account of an enemy. Their fine band played by permission of the Admiral several evenings at our public gardens, which was a treat to the residents of the "Model Settlement."

A murder was unfortunately committed here a few days ago. A black watchman at Collier's Dock, situated about four miles down the river, was annoyed by some Chinese carpenters; he became excited, and fired a revolver amongst them, killing one and severely wounding another. He was handed over to the police. An inquiry has been held into the affair.

The tea ships are beginning to get away, but they load but slowly, and the freights are daily getting lower, owing to the number of ships and the difficulty of getting teas at a fair or moderate price. It is believed that all the teas already shipped

Digitized by Google

have been purchased at prices considerably above what can be obtained for them in London. The *Titania*, *Taitsing*, *Whinfell*, and *Helen Nicholson* have sailed, also the *St. Andrew's Castle* and *Lennox Castle* from Hankow.

The *Friend of China* says:—"In our issue of the 15th we gave a copy (and translation) of the King of Portugal's order for the release of Mr. P. Loreiro from gaol at Macao, though never was the saying of 'There's many a slip 'twixt the cup and the lip' so forcibly correct as has proved in this case. Hearing that such an order was to be made, an application went, *via* Downing-street, that Mr. Loreiro, before he left the Monte Fort, should be made to afford some explanation touching the accounts which had been in his hands, and he is detained accordingly, the present mail having brought out the papers on which he has to answer."

A correspondent of the *N. C. Daily News* at Chefoo mentions that considerable excitement has lately been caused at that port, owing to the escapades of a young adventurer, who, by giving himself out to be a son of a well-known retired Admiral, and closely connected with the chief aristocracy of the United Kingdom, succeeded in imposing himself as a guest on two of Her Majesty's ships of war, to obtain credit for sundry large purchases from both Foreign and Chinese stores, and finally to find himself a prisoner in Her Majesty's gaol for sundry acts of misdemeanour and felony.

The Comptoir d'Escompte has, it is stated, purchased for Tls. 57,500 the property on the bund next to the Masonic Hall, at present temporarily occupied by the Oriental Bank Corporation, and formerly by the Bank of Hindustan.

## REPORT OF THE UNION STEAM NAVIGATION COMPANY.

In presenting to the shareholders the annexed statement of accounts, for the year ended March 31st, 1869, the directors are glad to announce that the nett earnings for the year, after defraying all charges, amount to Tls. 55,066.71, which sum, added to the balance from last year's account, Tls. 1,542.57, leaves a total of Tls. 56,609.28 for appropriation.

The directors propose to divide Tls. 34,000 amongst the shareholders as follows, viz.:—Tls. 23,200 as dividend at the rate of 15 per cent. on paid-up capital, and Tls. 10,800 as return at 5 per cent. to contributing shareholders, carrying Tls. 20,000 to the reserve fund, and the balance to credit of next account.

The whole of the shares in the company have been taken up.

In comparing the result of the past year's working it must be borne in mind that freights on many articles, such as metals, seaweed, sugar, oil, &c., have been reduced nearly 25 per cent., that a brokerage of 5 per cent. on gross freights, amounting on half-year's working to nearly Tls. 7,000, has been returned to shippers, and that during a portion of the term the steamers were working at half freights, as alluded to in the last half-yearly report.

The steamers *Tunsin* and *Rona* have been thoroughly overhauled and repaired, and are now in good order, and are fully insured.

The directors have to advise that in accordance with their intention to purchase a steamer, as expressed in the report for the half-year ended 30th September, 1868, they have bought the *Glengyle* for the sum of Tls. 145,000, payable in instalments extending over two years and a-half. The *Glengyle* will replace the *Rona* on the river, and the attention of the board will be directed to the sale or employment of the latter steamer, as may seem most advisable.

Of the Tls. 16,829.56 standing at debit of uncollected freights, Tls. 13,126.31 have been since collected. The balance is quite good and is in course of collection.

The directors have to announce to the shareholders that the term of Messrs. Glover, Dow, and Co.'s agency expires on the 19th June, 1870, and that it will be necessary, at the next half-yearly meeting, to arrange for the future working of the company.

The departure of Mr. Probst leaves a vacancy in the board of directors, which will have to be filled. The remaining directors, in accordance with clause No. 49 of the deed of settlement, retire, but offer themselves for re-election.

Shanghai, June 14th, 1869.

## PEKING.

The *News Letter* has the following items:—

The great North and South Gates of the inner or prohibited city, in which is situated the Imperial residence, are undergoing extensive repairs. We have had several slight falls of rain during the latter part of May, but the showers have not been sufficiently copious to much improve the now almost desperate condition of the crops. The weather is becoming hot, the thermometer having been up to 94 deg. It is understood here that a gentleman competent for the task is busily engaged in the preparation of a pamphlet on the Burlingame Mission. Some interesting developments not calculated to place that mission in a very favourable light may be confidently looked for. The Gas Works have come into operation at last. This event took place on the 17th ultimo. At present Mr. Commissioner Hart, and the attachés of the Customs, are alone favoured with this Western method of illumination. It is to be hoped that the pipes may be speedily extended, not only to the various legations, but to the houses of the native aristocracy and the Imperial Palace itself. As might have been expected, the erection of so conspicuous and singular an object as the chimney created considerable alarm among the Chinese living in the neighbourhood, causing them to fear a serious disturbance of the *feng shui*. The Peking College, we hear, is a failure. Prince Kung was in favour of it, but it appears that other and powerful mandarins have succeeded in literally asphyxiating it. It is most likely, too, that its ultimate fate may have a deleterious effect upon the Anglo-Chinese schools established by Government in other places.

## HANKOW.

The third of a series of destructive fires during the present year took place at Hankow on June 23rd, and resulted in the total destruction of some thirty-six cottages and small shops, situated at the northern side of the town, close to the Foreign Concession. The fire broke out at 1.30 A.M., and quickly spread to adjoining houses and huts in three contiguous streets. The premises of the London Mission were placed from the first in the most imminent danger, and but for the springing up of a slight easterly

Digitized by Google

breeze, which carried the flames and sparks away from the Hospital and dwelling-houses, these too must have been burnt. Several members of the English community, and a number of men from the gunboat stationed at Hankow, together with the native fire-police, exerted themselves in the most praiseworthy manner to prevent the further extension of the fire. It was pleasing also to remark the presence of some dozens of native Christians belonging to the Mission, many of whom came from distant parts of the town to render assistance in extinguishing the fire, and removing the patients to a place of safety. A mother and child were burnt to death in one cottage, having been, it is supposed, asphyxiated by the smoke and carbonic acid while yet asleep—the natural sleep passing into the sleep of death by the happiest kind of euthanasia. These happily are the only casualties. The fire originated in the cabin of an opium smoker, who while in a state of semi-consciousness let fall some sparks from his pipe amongst a litter of straw, and so set the place on fire. He has been arrested at the instance of the local authorities, and is now lodged in the district gaol at Han-yang. The value of the property destroyed must be small the majority of the houses having been built of wood and roofed with tiles or thatch. Within a couple of hours the fire did its work, and levelled to the ground the unambitious dwellings of from thirty to forty families.

## HONG KONG.

Dates from Hong Kong are to the 7th July. The outward French mail of May 13, and English of May 21, were received on the 23rd and 30th June respectively, the latter bringing London telegrams to June 12. By the Pacific route, advices from San Francisco to June 4, and New York May 25, were received on the 6th July.

The *China Mail* furnishes the following items of news:—

We understand that the Census Returns have been completed, and will be published in next Saturday's *Gazette*. The decrease is said to be almost nominal, the total population of Victoria and adjoining villages being represented as less than last year by something between three and four hundred. One would have thought that as many as the number stated had disappeared on account of gambling embarrassments alone; but it would appear that Hong Kong does not lose its position in spite of "circumstances over which it has no control.'

We notice with regret, which will be widely shared both in this colony and Macao, the name of Mr. H. D. Margesson amongst the list of passengers lost in the ill-fated *Hayamaro*. He was making a pleasure trip in Japan, previous to finally returning home, when he lost his life, and this makes the occurrence more distressing. For twenty-six years he had been a resident in China, and during that long period he had won the esteem and regard of a large circle of friends. The deceased gentleman was of an old county family of Offington, Sussex, dating back A.D. 1490, and has many near relatives still alive, to whom his loss will be a severe blow.

A large number of pirates have been captured by H.M.S. *Bouncer* in concert with H.I.C.M. gun-boats *An-lan* and *Sui-tsing*. The two latter did good service.

Mons. V. Hartung, Chancellor of the French Consulate at Hong Kong, has been appointed Acting Consul at Singapore, in place of Mons. Troplong, who has been recalled. The decree under which this promotion is made states that it is in consideration of services rendered in New York, London and Hong Kong. Mons. Lacouthon de la Forrest is appointed Chancellor of the First Class at Hong Kong, and is expected to arrive shortly. The news of M. Hartung's appointment to Singapore came out by the last English mail, and he will take his departure for his new station by the next Messageries Imperiales steamer hence.

Whilst the Ceylon contribution for military purposes is £160,000, it has been ascertained that the total expenditure has been only £150,000 a-year. The colonists are thus paying in fact for other colonies £10,000. We are not so badly used in Hong Kong.

We learn that Lieutenant Commander Yates, of the U.S.S. *Unadilla*, has had conferred upon him the Order of the Tower and Sword by the Portuguese Government, for services rendered to a Portuguese vessel in the Inland Sea of Japan. The gallant officer may, therefore, be congratulated as amongst the first recipients of a Portuguese honour in this part of the world.

Mr. James Jarman, late assistant superintendent of police in this colony, has left by the *Belted Will*, bound for London. Mr. Jarman was one of our oldest residents, having been over twenty years connected with the colony in its police department, and it is only right that his departure should be noted as another of those incidents which serves to modernise Hong Kong, obliterate the memory of old times, and make historical the earlier events which took place on the island. As chief inspector, acting superintendent, and latterly as assistant superintendent of police, Mr. Jarman has been an element (almost an institution) in colonial affairs for a long period of years; and he will not readily be forgotten by the earlier settlers—few of whom, however, remain behind him. He was "about" (as soon as he had himself recovered) on the occasion of the attempt to poison all Foreigners in Hong Kong by putting arsenic in the bread; and he himself apprehended the famous Mah-chow Wong, as well as many other celebrated criminals. As an officer of police, especially in his younger, more nimble and active days, he did good service to the colony, and he now retires on a pension which we do not believe by any mean total up to a very formidable amount. The Chinese merchants and hong masters have come forward and handsomely acknowledged the services which Mr. Jarman has rendered the colony, and presented him with an address, accompanied with a gold medal of the value of nearly 200 dols. In the usual way the address is written in Chinese upon a long silk scroll, and is signed by seventeen of the oldest and most respectable hong merchants in the colony, and is stamped by the seals of fifty six of the longest-established hongs in the place. We congratulate Mr. Jarman on the possession of such a document, as it is a certificate of honesty and straightforward dealing with Chinese which few police officers of Hong Kong experience possess.

The following is from the *Daily Press*:—

Some interesting intelligence has come to hand concerning the cruise of the gunboat *Bouncer*, in company with the Chinese gunboats *Sui-tsing* and *Anlan*, which left this port about a month ago, to make an attack on the pirates on the coast. The present news is brought on by the Chinese gunboat *Anlan*, *via* Macao, to which place she has returned, and gives details of the doings of the gunboats up to June 26th, when they were at Hoi-Kow, in Hainan. They reached that port on the 9th June, and after taking in a supply of coal, they started on the 11th for the Island of Gowton. On the passage to this place the Chinese gunboat *Sui-tsing* captured a junk, and the gunboat *Anlan* did likewise. On the 13th the *Bouncer* captured five junks at the Island of Chunlan, but their crews escaped to the shore, and could not be taken. The *Bouncer*, on the 15th, was again successful in capturing two junks, which she burnt; their crews, numbering forty, escaped by swimming to the shore. On the 16th, the gunboats proceeded towards Cochin China, and when near Apowan came across a suspicious junk near the land. They immediately gave chase, and eventually succeeded in capturing her. This junk was quite new, carrying ten guns, and having upwards of seven cwt. of powder on board, with a large number of men. She was evidently one of their "crack" vessels. Nothing of any particular value was found in the junk, with the exception of spears and rifles. Only seven prisoners were captured; they have been taken to Canton, in the Chinese gunboat *Anlan*. The reason so few prisoners have been taken is, that the junks kept very near shore, and of course, on sight of a gunboat, they made their exit as quickly as possible, carrying the dollars with them. Since she left the *Bouncer* has captured twelve junks, the *Sui-tsing* three, and the *Anlan* six, which is pretty good work. They were to start on the 27th, with the *Sui-tsin* in company, to steam round the Island of Hainan, visiting all the bays and creeks, to ascertain whether there are any more pirates to be found, and it is probable they will return to Hong Kong about the middle of this month.

The Overland Trade Report has the following on our relations with China at the present time:—"The intelligence brought out by the last English mail, and the further Blue-books relating to China, which have been presented to Parliament, have increased the apprehension on the part of Foreign residents that the attitude assumed by the British Government will lead to serious disturbances. This has long been predicted by all acquainted with affairs in China, and there can be no doubt that very strong ill-feeling against Foreigners exists in many directions, and if not restrained by fear of the retribution, which giving vent to it will bring about, is likely at any time to break out in the form of some active demonstrations of hostility. At Foochow, in particular, there seems to be grounds for serious apprehension. It has come out that the ill-feeling which some months ago was shown by placards threatening to expel all Foreigners was quelled only through the timely wisdom of the Viceroy, who, in opposition to the views of the Footai, pointed to the dangerous results certain to be brought about by opposing Foreigners. Not long ago, in the same port, a gentleman employed as tea-taster by one of the large houses was spat upon by a man who formerly had treated him most obsequiously. The details of the onset of a mob of some hundreds of Chinamen on a picnic party, among whom was H.B.M. Acting-Consul of Hankow, show increasing ill-feeling in that direction, though fortunately, on account of a timely retreat, it resulted in nothing more serious than that peaceable British citizens had to make a "bolt" before a Chinese mob; while in Shanghai a mob-attack upon the Che-Hsien (who was only extricated from his perilous position by the intervention of the French police), in order to force him to exact vengeance in the case of a Chinaman who had been killed by a British subject, shows a growing distrust in Foreigners, and an increasing tendency on the part of the people to resort to riots the moment there is any cause for disagreement with Europeans. It is especially to be noticed in the last-named case that the mob attack on the Che-Hsien took place before there had been sufficient time for even a preliminary investigation at the Supreme Court. All these circumstances point to the uprising of a very dangerous feeling on the part of the Chinese, which there is no doubt is fostered by the idea that the recent instructions from the Foreign-office and the Admiralty remove all cause for the apprehension of immediate punishment for outrages."

A judgment has been given by the Chief-Justice in the case of Regina *v* Souza, which is to the effect that no criminal action can be instituted in Hong Kong for the publication of a libel directed

Digitized by Google

against an undistinguished Foreigner resident out of the Colony. The larger proportion of the Portuguese community have sent a petition to the Governor that if this is the law, an ordinance altering it may be enacted.

The City Hall has been so far completed that the Building Committe have handed it over to a general committe. There has been considerable discussion concerning the heavy expenditure in the Colony, and a letter has been published showing that it is far in excess of that of Singapore.

### THE HONG KONG ASSOCIATION.

The *Daily Press* says :—"The Hong Kong Association, which has been so long hidden from view, has again emerged from obscurity. It has published a report of its doings, and called a meeting for the 8th inst. It appears from the report that the endeavour which was made to secure a petition being presented to Parliament on the subject of the military contribution has fallen through, on account of the non-action of the London branch."

The *China Mail* has the following remarks on the subject :—

Two questions present themselves for the consideration of the members at the forthcoming meeting. The one, whether the local association shall or shall not continue to exist; and the other, if its existence be ensured, what machinery shall be used to ensure its beneficial operation—this latter consideration involving the minor question as to the acceptance or otherwise of the resignations of the existing committee and secretary.

We should be sorry to see it expire. But it is very evident that if that termination is to be avoided it must be reconstituted upon a broader basis, viz., the promotion of the interests of the colony, without reference to the result of any particular line of action. If it be considered that every ordinance of the local Government, every annual estimate, every action taken by the Consular and Chinese authorities in the neighbourhood of Hong Kong, the utilisation of our military, the tendency of the gambling licenses, the regulations of the coolie trade, even the very efficiency of our police, are all questions which legitimately fall within the province of such an association to discuss, too much stress can hardly be laid upon its importance. It might, if it so willed, become an informal but powerful court of discussion regarding all official measures, and, though protests might be overruled, the certain knowledge that a public organisation existed, willing and able to set forth in the strongest way every adverse fact and argument, would have weight. But if to this we add the assertion that scarcely any political measure taken by the British Government in China proper fails to more or less nearly touch the pockets of Hong Kong residents, the argument in favour of its continuance is much strengthened.

As to the London Association, the sooner all connection with it is severed the better for our local body. It does not require great talent to suppose that, with the forty or fifty people now at home interested in this colony, scattered over the length and breadth of Great Britain, such an association must be a failure. We require Parliamentary influence, backed by the efforts of two or three influential people at home, in communication both with us and the member or members who undertake our cause.

## JAVA.

### BATAVIA.

The *Handelsblads*, under date 25th June, says :—

"For some days back Mr. Netscher, Resident of Rhio, has been at Batavia. It is reported that his coming, as well as that of the Governor of the Straits Settlements, has for its object a discussion concerning the Netherlands' establishments of the East Coast of Sumatra, and the interest therein concerned.

"Some traders at Pulo Pinang have, above all, viewed these establishments with regret. It is a matter not to be wondered at that on the side of Great Britain every effort is made to secure for its subjects in the Straits Settlements the fullest freedom of trade, and its furtherance in the possessions on the East Coast of Sumatra. But to quite as full an extent must all Powers acknowledge the justice of the earnest endeavours of Holland to maintain its rights in the Indian Archipelago, fixed by the London treaty of 1824, as also the interests of the populations inhabiting the East Coast of Sumatra.

"Thus the question must not be whether our establishments on the said coast, and the order created thereby, leaves room for action to Foreign traders or subjects them to more difficulty, but whether just rights are injured. Among injury of rights there can by no means be included the introduction of taxes which are thought necessary towards the defraying of State expenses, and to which inhabitants as well as strangers are subject; and still less the taking such measures of good, in the interests of the people, that the latter no longer need to leave their fatherland and emigrate to English or other possessions."

The *Java Courant* confirms the information that the head planner of the Bekassie insurrection has been caught. In a provisional examination, undergone by him, he appears to have had decidedly the intention to raise an insurrection in Batavia. Shortly before the festivities he had stayed at a house in Batavia, where a great number of weapons, belonging to different persons, have been seized; and he has been caught fourteen days after those festivities in the neighbourhood of the capital of Netherlands India. Taking this into consideration, we see no reason to condemn the uneasiness felt by many about the close of last month and the beginning of this.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Dates hence are to the 16th July. The outward mail of June 4 was received on the 7th July, and that of June 10 (French) on the 13th July, the latter with London telegrams to July 2. The following summary of news is from the *Straits Times* :—

The Governor has returned from his visit to Java ; but we have not heard what have been its results. The Batavia papers altogether reprehend the opening up of the question of their position in Sumatra—which they say is fully and satisfactorily settled by this same treaty of Holland (1824), which it is our desire to revise. They seem moreover very seriously to distrust the diplomacy of their Governor-General (Mr. Meyer), when opposed to that of Sir Harry Ord, who, they say, once before, at the Hague, obtained a signal advantage over Mr. Meyer, then minister of the colonies, in the negotiations which took place regarding the Cocos, and which ended in the placing of these islands under protection of the British Crown. The Batavians are evidently a little bitter on this point, and, though they may have extended a cordial greeting to Sir Harry Ord, they could not wish him much success of his journey. In commenting upon our evident jealousy of their proceedings in Sumatra they dealt us a somewhat pointed rebuke, and ask—have our improvement and development of the Native States in the Malayan Peninsula been such as to warrant our interference in Sumatra? On the whole we do not think much will come of Sir Harry Ord's visit to Java, so far as Sumatra is concerned.

The *Straits Times* once more appears in its old form, the losses by the fire of February last having been repaired. In allusion to this, the *Times* says :—"In presenting our readers the *Daily Times* in its old form we are bound to acknowledge the forbearance they have extended to the shortcomings which were unavoidable under the temporary arrangements necessitated by the destruction of our plant in February last. All we can say is, that we have lost no time in restoring the paper to its old shape ; and this will, we think, be granted, when it is remembered that the fire which destroyed our premises occurred on the 17th of February last, not four months ago, and that now, on the 12th of July, we present a sheet printed by type and machinery all of which had to be manufactured in England after our orders reached there. That we are largely indebted to willing helpers for this result it is only just to acknowledge, prominent amongst whom is the P. and O. Company, but for whose liberality we could never have availed of the overland route for the transportation of the heavy plant required for the production."

Commenting on the results of the agitation for reform in the Government of the Straits Settlements, the *Straits Observer* says :—"The fact that already action has been taken on the three great subjects of finance, Government-house, and the steamer, has given rise to heartfelt thankfulness to the Minister, who has shown that some, at least, of well-defined Home principles are applicable here. Once let the attention of the Crown be directed to our real political requirements, and if economy be thought one of them we shall get relief. We have ever felt reliance on the Home Government. All through this battle with the shams and folly of our plush-adorned ones we have looked to the Minister for redress. It has been a waiting game hitherto. Those who have worked with us and for us have had many a weary step to take before they could bring help. The facts could hardly be related at once with any chance of their being relieved. Fancy, for a moment, telling a Minister that the man placed among us as Her Majesty's Representative was in the habit of airing his proclivities in such a way that the public sentiment regarding him alternated between scorn and derision. Thanks to the influential London newspapers, the *Morning Star*, *Daily News*, and the *China Express*, and to the uncontradicted facts set forth by their correspondents, daylight is again breaking on us, and with fair prospect of continuance.

The following is also from the *Observer* :—"Another disquieting report has been current in the Settlement for the last few days, to the effect that a counter statement of accounts has been received from Calcutta, showing a balance against the colony of no less than nine lacs of rupees, or upwards of four hundred thousand dollars. We think this needs confirmation, and his Excellency the Governor and the Auditor-General will, we hope, be able to prove the utter want of truth of this alarming rumour."

With reference to the alarming rumours of piracy on the North-western coast of Borneo, which were lately current here, we are happy to learn that the Governor of Labuan, in his capacity as Consul-General in the Island of Borneo, has visited the coast from Labuan to Pontianak, and found that the rumours in question were mere exaggerations of one small case which took place some months ago, and in which Lieut. Crowdy, of H.M.'s gunboat *Starling* was primarily the cause of the destruction of the robbers by driving them into the Bintulu river, where they were speedily destroyed by the inhabitants. The fact that the trade of Labuan

Digitized by Google

and of Pontianak with Singapore is rapidly increasing at this very time is the best evidence to our merchants that Borneo piracy is dying out. However, it is well to see that the gunboat at Labuan is kept on the *qui vive*.

The good folks in Hong Kong are, like ourselves, lamenting over the growth of public expenditure, but, singularly enough, they select the Straits Settlements for the purpose of comparison, and place side by side what they term our economical public establishments with the overgrown extravagance of those of Hong Kong. It seems that, after all, there are folks even worse off than ourselves. Ceylon, too, seems to be agitating both regarding its expenditure and the constitution of its Council. We really think there is more than at first appears in the suggestion of the *China Express*, that the various Associations which now exist at home representing Eastern Colonies should join together in a common League for the advancement of Colonial reform.

The steamer *Chow Phya* from Bangkok has brought down a young elephant calf, a present, we learn, from the Siamese Government to Lady Ord. The elephant will be landed from the vessel early to-morrow. This, we suppose, is in consequence of the Governor's trip to Wha-Whan.

### THE TANJONG PAGAR DOCK COMPANY.

The following is an account of the proceedings of an extraordinary general meeting of the Tanjong Pagar Dock Company (Limited), held on the 28th June:—Present, Messrs. Thos. Scott, F. Kustermann, Whampoa, P. Joaquim, G. Lipscombe, R. Padday, C. Moses, E. E. Angullia, J. L. Kirby, A. T. Carmichael, J. B. Caldbeck, H. Buchanan, W. Adamson, T. Beng Swee, Pochajee Pestonjee, and A. Logan, solicitor to the company. The Hon. Thos. Scott in the chair.

The Chairman explained that the object of the meeting was to obtain authority for the issue of 250,000 dols. in Preference shares, and referred to the "Amended Circular," which was in the hands of all present.

The suggestion for the issue of Preference shares, emanating from the company's London agents, Messrs. Mactaggart, Tidman and Co., and to which the large share-holders in London had subscribed, was also read to the meeting.

Proposed by G. Lipscombe, Esq., and seconded by Dr. Little,—

That the directors be authorised to issue 250,000 dols. in Preference shares, in accordance with the plan suggested through Messrs. Mactaggart, Tidman and Co.

Dr. Little asked whether any work had been done at a loss, as he had been informed that some of the docking and coppering work had involved the company in loss. The Chairman replied that the instructions of the directors to the Manager were, that unless he could see his way, at least, to protect the company from loss, work offering was to be refused. That the directors had always looked closely into this point, and that they were satisfied their instructions had been attended to and that no job had involved loss. A still better answer to the question was, that the work of the dock alone for the first four months of the year had resulted in a profit of nearly 4,000 dols.

Proposed by A. T. Carmichael, Esq., seconded by J. L. Kirby, Esq.:—

That the best thanks of the shareholders be given to Messrs. Mactaggart, Tidman, and Co., the company's agents in London, and to Mr. James Guthrie, Mr. E. Boustead, and his partners, for their valuable assistance in launching the preference shares, and their unceasing exertions to promote the interests of the company. Carried unanimously.

Messrs. Aitken and Cameron were elected by vote auditors in the place of Messrs. Willians and Powell, absent from the colony.

## CEYLON.

—o—

### COLOMBO.

Dates from this port are to the 27th July. The English mail arrived out on the 25th.

The *Examiner* says 'the past fortnight has been eminently a speculative one. All sorts of guesses and conjectures as to the future have kept the community pretty well amused, if not profitably employed. The measures to be brought forward for legislative sanction at the next Session have engaged a good deal of attention, and from the Galle Harbour Scheme to the Currency Question, from the visit of the Duke of Edinburgh to the possible annexation of Ceylon to India, we have had a rather extended field of speculation. As regards the Galle Harbour Scheme, opinions are divided, and not without reason, as to whether it should be considered an Imperial or a colonial work. Galle is acknowledged to be the key of the Eastern seas. It is the great coaling station and port of call for the different lines of mail steamers which converge there every fortnight to land passengers and deliver and exchange mails. The amount of local interests served is almost infinitesimal in comparison with imperial; and therefore that a work which should be undertaken by the Imperial Exchequer should be thrown upon the colony does not look like the fair treatment which we might have expected from the sense of justice of the British Parliament.

The Duke of Edinburgh's visit is yet contemplated from a distance. The people seem to think, and not without reason, that there is still time for the exhibition of their loyalty, but the Government have already commenced their preparations. The Queen's-house here and the Pavilion at Kandy are to receive additional wings and new ball-rooms; and the Architect of the Public Works Department is busy planning the various alterations suggested. An elephant kraal, plenty of shooting, and some receptions and balls here and at Kandy will comprehend all the sport to which the Sailor Prince will be treated. We are confessedly a poor people, and it would not be diplomatic to make a larger display of wealth than we can really afford, and our loyalty, in which we are second to none among the numerous subjects of Her Gracious Majesty Queen Victoria, need not necessarily find expression in expensive displays. The escapade of the Prince, however, at Sydney in the house of the Earl of Belmore, and a vote taken by the Legislative Assembly of Melbourne, to reimburse the Prince for the cost of certain presents which he had there given away, and which he charged the Imperial Exchequer with, have not contributed to add to the enthusiasm with which the visitof a Royal Prince has been looked upon. But let us not sit in judgment over an impulsive young sailor, who, in the position he occupies, may be excused if he does something not quite in keeping with the received notions of colonial society.

The currency question, it is now understood, has been definitely settled. From next year the familiar sounds of pounds, shillings, and pence will give place to rupees, annas, and pice in our account books, not to the utter discomfiture of our arithmetical housekeepers only. The change will be more nominal than substantial, as though our accounts are kept in £. s. d. the circulating coin is in rupees and annas, with a small dash of pennies, halfpennies, and farthings in copper and brass.

---

The following is a copy of the memorial recently forwarded to the Colonial Secretary by the members of the Ceylon Civil Service:—

"The humble memorial of the Ceylon Civil Service

"Showeth,—That your memorialists feel that by the recent appointment of gentlemen unconnected with the Ceylon Civil Service to the offices of Colonial Secretary and Auditor General it is implied that there is no member of their body qualified for these posts, and they submit that a general feeling of depression throughout the service is the result, as they are themselves confident of having among their number able and experienced men suited to hold these offices.

"2. That they beg most respectfully to submit that the standard of examination for admission into the Ceylon Civil Service is, as it is proper it should be, very high, and that the several successive examinations held in Ceylon after admission into the service to test the qualifications of the junior members for promotion from one class to another are very severe and embrace an extended range of subjects, including the native languages (Tamil and Singhalese) and the laws and customs of the various races in Ceylon; that in addition to these qualifications your memorialists have by their service in various parts of the country gained an intimate knowledge of the people, their wants and their requirements; and that they feel it a great discouragement to find no weight given to these considerations when the memorialists believe that there are amongst them men who in addition to possessing local knowledge in a marked degree have abilities of a high order, and are capable of taking a large and educated view of questions affecting the conflicting interests of the various classes, races, and religious sects in Ceylon.

"3. That your memorialists had felt much aggrieved by the successive appointment of gentlemen strangers to the service to the office of Auditor-General in 1861 and again in 1866; but that, judging from the fact that the office of Colonial Secretary having been shortly before conferred on Mr. Gibson, one of their number, they had hoped that what they could not then help feeling an injurious precedent would not be followed in the future. That, however, these hopes have been now destroyed by the almost simultaneous appointment of gentlemen strangers to the service to the offices just named.

"4. That the smallness of the salaries, the expensiveness of living, the many difficulties and drawbacks consequent on service in the tropics, render the life of a Ceylon civilian a hard one, and that very few are able to save anything out of their pay beyond the sums required for periodical visits to England, and many not even that. Hence the only inducement to good men to remain in the service is the hope of advancement to the few important positions at the head of the service, and if it is found that the best of these are not open to them the effect cannot fail to be discouraging.

"5. That the total inadequacy of your memorialists' salaries to the increased and still increasing cost of living in Ceylon has already been urged on the consideration of your lordship's predecessor, but hitherto without effect; that this insufficiency of pay is aggravated by the interruption to the course of general promotion which ensues on the appointment to high posts in the service of gentlemen other than those belonging to it, and that this has been the more acutely felt by your memorialists in recent years because while they are by the regulations of the service compelled to qualify themselves by severe study and application to their official work for the proper discharge of duties, whether judicial or administrative, and are instructed to look to efficiency for their promotion, they have had to witness the sphere of their promotion curtailed by the bestowal of judgeships on gentlemen not belong-

Digitized by Google

ing to the service, as well as by appointments such as those now more particularly referred to, though they beg leave to repeat their conviction that there are men in the service well fitted to fill those offices with credit.

"6. That your memorialists therefore pray that the foregoing may be taken into your lordship's gracious consideration, and that their claims to promotion may in future be recognised."

## KANDY.

(FROM A CORRESPONDENT.)

The town of Kandy is a pleasant little place, surrounded by hills and mountain scenery, with a lake reminding one of Ulswater, or one of our smaller Cumberland lakes. Round this lake stand the houses of the principal residents, mercantile and official, and to a visitor nothing could appear more charming. Its position in the centre of the town, also, reminds one of the Alster at Hamburg, so much appreciated as the only city in Europe which has anything like it. The Kandy lake, of course, lacks the bustle of the café, omnibus, and steamers of the Alster. Kandy has, also, its Government House, surrounded by charming grounds, and is certainly more sightly than the one at Colombo. Again, Kandy is ahead of her larger sister and capital town in possessing a town-hall, a fine, handsome building, purchased by the municipal council. Another fine building is being raised for a post and telegraph office, near the railway station. This station has the handling of the greater portion of the million cwts. of coffee annually exported from Colombo, as Kandy is the centre of all the great coffee estates, as well as the head-quarters of the planters and the planting interest, although the large mercantile firms are chiefly in Colombo. The importance of the place at Ceylon may be gathered from the following statement of the traffic on the Colombo and Kandy Railway.

TRAFFIC FOR THE WEEK ENDING JUNE 20, 1869.

| | | | |
|---|---|---|---|
| Passengers ... ... ... ... ... | £587 | 11 | 6 |
| Horses... ... ... ... ... ... | 8 | 11 | 4 |
| Carriages ... ... ... ... ... | 0 | 0 | 0 |
| Dogs ... ... ... ... ... ... | 1 | 1 | 0 |
| Live stock ... ... ... ... ... | 0 | 11 | 6 |
| Mails ... ... ... ... ... ... | 25 | 5 | 7 |
| Parcels ... . . ... ... ... | 22 | 10 | 11 |
| Merchandise ... ... ... ... ... | 1,843 | 6 | 5 |
| Total for the week ... | £2.488 | 18 | 3 |
| Do., corresponding last year ... | 2,210 | 12 | 8 |
| Train mileage, 4,693 Increase ... | £278 | 5 | 7 |
| Total for 29 weeks of 1869 ... ... | £83,374 | 0 | 0 |
| Do. do. 1868 ... ... | 68,752 | 0 | 0 |
| Increase ... ... ... | £14,622 | 0 | 0 |

These returns show the traffic at a time out of the coffee season, which is from November to March. This railway reflects the greatest credit on the planters and others concerned in its promotion. It is a well-executed and grand example of Anglo-Saxon energy, and the planters, in agreeing to an impost of 1s. per cwt. on their coffee, certainly conferred an immense boon on all Ceylon residents, for with this line Newera Ellia, the sanitarium (6,000 feet), can be reached in a day from Colombo.

Kandy was the residence of the now extinct Kandian kings, but several relics, such as a temple, still remain, and on the lake is a small island, on which stood the harem of the king. The climate is excellent; being at an elevation of some 1,800 feet, the heat is never oppressive; indeed, woollen clothes for nearly half the year are not only bearable, but comfortable. There is a very beautiful Botanical Garden, under the charge of Mr. Thwaites, which is a great boon to the inhabitants as a place of resort for driving or walking. This is maintained at Government expense, as also one at Newera Ellia, for the cultivation of the Cinchona plant.

One of the features of Kandy much appreciated by residents and strangers is Lady Horton's road, constructed during Governor Horton's time, and from which most charming views are obtained of the surrounding scenery.

(RECEIVED VIA GALLE, AUG. 10.)

### CHINA.

HONG KONG, JULY 21.—It is generally believed that the Chinese authorities at Peking have officially intimated to Sir Rutherford Alcock that the Duke of Edinburgh cannot be received by the Royal family of China on a footing of equality. Sir Rutherford Alcock has expressed his approval of all Consul Gibson's acts in the Formosa affair, including the taking of Ausping. At a meeting of the Hong Kong Association a strong expression of opinion was pronounced against the removal of Mr. Consul Gibson from his post.

### COMMERCIAL.

SHANGHAI, JULY 16.—Gray Shirtings, 6½ catties, 8¼ lb., $2 20. Cotton: Shanghai, 16 taels. Tea, firm. Silk, fair inquiry; No. 3 Tsatlee. 550 taels. Settlements since departure of last mail, 2,400 bales. Export to date (China and Japan) from commencement of season, 9,000 bales. Exchange on London, bank bills, six months, 5s. 11¼d. Freights: Tea, £2 10s.

HONG KONG, JULY 21.—Gray Shirtings, 6½ catties, 8¼ lb.. $2 80. Water-twist, 16-24, $135. Cotton: Bengal fair medium, $16½. Tea, total export (China and Japan), 33,250,000 lb. Exchange on London, bank bills, six months, 4s. 6¼d.

*** The above are in advance of the mail due in London on the 6th September.

### JAPAN.

YOKOHAMA, JULY 29 (*via* CALIFORNIA).—The civil war is ended, and the Daimios are disarming. Mr. Fletcher, the British Consul at Yedo, is dead.

# Commercial Report.

## CEYLON, STRAITS, JAVA, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The import trade was completely stagnant, with the exception of a few forced sales of Yarns and Gray Shirtings, in consequence of the injudicious action of the Japanese Government in making a fresh issue of inconvertible paper. Deliveries had virtually ceased, and the large stocks and expected arrivals made the outlook of the merchants extremely serious.

SHANGHAI.—Piece Goods: Transactions in Manchester Goods since last mail left had been to a fair extent, but prices for some staples show a further decline, and there was less activity generally than might be looked for. Gray Shirtings: The northern demand had continued slack, and only about 40,000 to 45,000 pieces were reported as having changed hands, some of these sales being for goods to arrive, and some being re-sales on the part of speculators. T-Cloths: There had been a steady inquiry for these goods throughout the fortnight (chiefly for the northern markets), and the values of medium to good cloth show a slight advance. Sales reported amounted to 110,000 to 120,000 pieces, though some of these were from second hands. White Shirtings: The demand for these goods had again been limited, and there had been an utter absence of speculation, the dealers simply buying from hand to mouth. Sales were 11,000 to 12,000 pieces, a good portion being from second holders. Drills, &c. American Cloth had commanded but little attention, local wants having been fairly supplied by auction sales of damaged goods. American Sheetings had gone off freely at about last rates, though some offers at the close were a shade over the best figures of last mail. Sales were 12,000 to 14,000 pieces. Jeans: Americans were asked for at a slight decline on last value, but holders did not seem inclined to give way. One sale early in the fortnight was reported at Tls. 3.70 per piece. Woollens: Small sales of Camlets were reported at a slight concession on last values, while Spanish Stripes had been almost neglected. For Medium Cloths, &c., the demand had been very slack. Long Ells: Scarlet had not been much sought for, but there had been a good inquiry for C. P. H. assorted, which had been freely met by holders; and several parcels had passed from importers to native hands at higher rates. Lastings: Crape Lastings, &c., showed no material change in value, while an inquiry for Plain Lustres at low rates had not been responded to by holders. The following were the current quotations:—G. E. Gray Shirtings, 7 lbs., per piece, Tls. 1.9.4 to 1.9.7; 8.4 to 8.6 lbs., Tls. 2.1.5 to 2.1.9. White Shirtings, Tls. 2.1.5 to 3.0.0. T-Cloths, 6 lbs., Tls. 1.4.4 to 1.7.2; 7 lbs., Tls. 1.6.5 to 1.9.2. American Drills, 40 yards, Tls. 4.1.5. to 4.3.3. American Jeans, 30 yards, Tls. 3.6.5 to 3.7.0. American Sheetings, 40 yards, Tls. 3.6.5 to 3.8.5. English Drills, 40 yards, Tls. 3.8.0 to 3.9.0. Dutch Drills, Tls. 3.7.5 to 3.9.0. Camlets, English, SS, per piece, Tls. 12.0 to 12.5. Spanish Stripes, Tls. 0.5.5 to 0.8.0. Medium Broad and Habit Cloth, per yard, Tls. 1.0 to 1.5. Long Ells, Tls. 6.4.3 to 6.6.0. Iron, Nail Rod, per picul, Tls. 2.1.0 to 2.1.3; fair to good assorted, Tls. 2.1.5 to 2.2.0; Hoop, Tls. 1.8 to 1.9; Flat and Round, Tls. 2.3 to 2.4. Lead, Tls. 5.7.5 to 5.8.5. Coals, Cardiff, per ton, Tls. 7.7.5 to 8.0; North Wales, Tls. 7.7.5; English, Tls. 6.5.

HANKOW.—The market during the fortnight had been somewhat more active, the dealers having shown more disposition to make purchases. Prices of most descriptions of goods were unchanged, and the bulk of the business done had been in staple Cotton fabrics.

FOOCHOW.—The sales during the interval had comprised 1,500 pieces, 8¼ lbs., Gray Shirtings at $3.05; 1,200 pieces, 7 lbs., T-Cloths, at $2.55 to 2.80; and 1,000 piculs Lead at $8.25.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 7th July:—Cotton Yarn: The arrivals have been small, and the demand during the first part of the interval had sensibly increased, but latterly the enquiry has slackened somewhat, and dealers are not so willing to operate; quotations are unchanged for all kinds. Piece Goods: The market has again been very quiet, and the principal settlements have been made at public auction. Several native holders of large lots have endeavoured to stimulate the market, by purchasing privately moderate parcels of 8.4 lb. Gray Shirtings, at figures over current rates, but the effect has been merely to place quotations nominally higher, whilst there are sellers of like goods upon former terms. 7 lb. Gray Shirtings are lower 2 to 3 cents, while 8 to 10 lb. show an advance of 5 cents per piece. Sales of good sound 8.4 lb. have been made at public sale at $2.70 to 2.72 per piece. White Shirtings of all Reeds are down 10 cents, and only the commonest makes are saleable. 6 lb. T-Cloths are in small stock, and a moderate demand exists at former prices. 7 lb. common are not enquired for though rates are upheld. 7lb. and 8lb. Mexicans are 5 cents lower. Dutch Drills are in full supply, and with but slight demand have receded in values. American Cotton Goods in the absence of inquiry are also quoted lower; none, however, are on offer. Woollens: No improvement is noticeable as yet in the market, but holders confidently look for it later on. Stocks of Camlets and Lastings are not large and sellers are showing greater firmness. Long Ells are unchanged. Spanish Stripes have fallen 1 cent per yard. Fair arrivals of Blankets have carried prices somewhat lower. Metals: Transactions have been unimportant. Nail Rod Iron has been but slightly taken, and a decline of 5 cents per picul is to be noted; Square, Round and Flat Bar is unchanged; Hoop is still very firm. The demand for Lead is very trifling, and as stocks have been increased prices have given way 20 cents. Tin is in increased supply, and is much weaker. Coal

Digitized by Google

The advance in Sydney last noted has been lost, and the market is dull at the close. Arrivals have been 800 tons Anthracite, 2,866 tons Welsh, 2,216 tons English and 920 tons Sydney, the most of which comes to consumers. Sales have been, 920 tons Australian at $6.75 to 7.00 and 866 tons English at $9.00 per ton. Ginsing: Although demand has not increased for the article, holders are apparently firm, and for Clarified Root extreme prices are asked. Settlements have been 5 packages Clarified at $200 to 203 per picul, and 5 casks Crude at $125 per picul. The following were the current quotations:—Shirtings, Gray, 7 lbs. per piece, $2.45 to 2.50; 8.4 lbs., $2.75 to 2.85; Shirtings, White, $2.50 to 5.10; T-Cloths, 6 lbs., $1.90 to 2.15; 7 lbs., $2.20 to 2.50. American Drills, $5.50 to 5.60; Dutch Drills, $4.95 to 5.00; Medium, Ladies, and Habit Cloths, $1.15 to 2.00; Long Ells, H Scarlet, $8.00 to 8.25; Assorted, $8.00 to 8.20; Camlets, SS, Assorted, $16.50 to 17.00; SS, Scarlet, $16.00 to 16.50. Metals, Iron, Nail Rod, round, square, and flat bar, per picul, $2.50 to 2.80; Lead, per picul, $7.10 to 7.35.

BATAVIA.—The Borneo Company's Circular contains the following report of the market:—The demand for English Gray Goods has shown no improvement, and transactions continue on an insignificant scale. A sale of about 2,000 pieces 39 inch 7 lb. Shirtings is reported at f.6¾ cash on delivery, and 8¾ lbs. are offered at f.7½ on same terms, without finding buyers. 45 inch 8 lb. Shirtings are scarce, but the inquiry is only trifling. 8 lb. Maddapollams are in ample stock, and difficult of sale. In Gray Drills there has been more doing, and stocks of prime qualities are light. 86 inch White Shirtings remain nominally as last quoted, with some improvement in demand. For 40 and 45 inch there is little inquiry, and sales are only practicable at low rates. Dutch Shirtings still interfere considerably with the sale of English makes. White Maddapollams move slowly and values are weak, owing to the decline in Dutch makes. White Cambrics are in no inquiry. Dyed Cambrics continue neglected, but some improvement may be looked for shortly. There continues to be little or no demand for Prints for actual consumption, and dealers, unable to make progress with their late purchases, have retired from the market; sales could not be effected at the moment except at some reduction of late currencies, and as at this season of the year any dulness should be but temporary, most importers are not pressing their goods, in the expectation of an early revival in demand. Yarns are in moderate request; one or two small sales of 40s Gray are reported as high as f.420, but this price cannot be made in quantity; the lower numbers in Gray are neglected. Orange and Green have been placed at quotations. Our highest quotation for Turkey red is for first quality Dutch dye; Glasgow dye is saleable at f.250 to f.255, but holders generally refuse this price. White Ball Thread is occasionally saleable. Woollens generally are dull, and saleable only in small quantities at low rates. Metals of all descriptions are overstocked, and sales at rates quoted are impracticable except in very trifling quantities. Tin Plates have been bought on speculation at quotation, but there is no demand for consumption.

SINGAPORE.—A moderate business had been done in imports during the fortnight. After the departure of last mail Gray Goods continued inactive, with a slightly downward tendency. Within a few days of the close a strong speculative demand sprung up and prices advanced. 8¼ lbs. Gray Shirtings, which were sold at $2.72½ per piece at the beginning of the fortnight, closed at $2.85 per piece, and were firmly held. Sales of Maddapollams were reported at $21½ to 22 for 3 lbs. cloth, with a slightly better demand. T-Cloths had participated in the general improvement; in Gray Goods the demand was more active and prices firmer. Drills quieter, and the only sales reported were of Dutch 30-yard cloth at $65 to 66.50 per corge. White Shirtings out of demand, and a further reduction of about 10 cents per piece had to be submitted to on fine goods. Imitation Irish Linens had been in fair inquiry, and sales were reported at $2.17½ to 2.22½ per piece. Cambrics less inquired for. White Figured Shirtings in request; sales of Spots at $2.82½ to 2.90 per piece. Dyed Goods of most descriptions had been neglected. A small sale of Orange Shirtings at $2.75 to close consignment, and of Pink Figured at $4.25 were the only transactions reported. T. R. Cambrics out of request, and dull of sale. T. R. Yarn in small stock; demand limited; holders firm. Coloured Yarns: Transactions insignificant; sales of Imperial Red at $76, Orange $82½ to 83, and Green at $84 to 87. Gray Yarn remained without alteration till the same speculative demand which affected Gray Shirtings caused prices to advance by about $5 to 10 per bale. Sales which were made at the beginning of the fortnight at $130 for No. 40s had since been concluded at $135 and 140 per bale; holders firm. The only sale of low numbers was Nos. 18 to 24 at $118; stocks nearly cleared. Metals: There was not much change to note, and transactions had been small. Sales of Nail Rod Iron at $2.50 per picul, and Swedish Iron at $3.40. Yellow Metal Sheathing sold at $22¼ to 23¼, and Zinc Sheathing at $9 per picul. The arrivals of Coal had been on a more moderate scale, and prices, though low, were firm. The sales had been:—A cargo of Scotch to arrive at $6 per ton; 250 tons North Wales at $5¾; 644 tons West Hartley at $7 cash, seller paying wharfage—equal to $6¾ ordinary terms; and 430 tons Cardiff at $6¼ per ton cash.

CEYLON.—The Import market had been animated and sales of Gray Shirtings had been made in all staple kinds to a considerable extent. Mule Twist was in active enquiry. T. R. Twist in steady demand at late rates. Orange and Green Twist had brought an advance. Cambrics short in good cloth and asked for. Sarons and Comboys in better enquiry. Regattas fully stocked, and sales could not be made at late rates. Handkerchiefs dull. Thread utterly neglected. Metals all in moderate stock and average demand.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The market had been opened at prices fully as high as last year's, but the leaf was said to be of fair quality, and not so much mixed. Settlements principally for San Francisco amounted to about 1,400 piculs of medium and good medium grades, for which full prices had been paid. Supplies had not come in very freely during the fortnight, and the stock of leaf on offer was about 2,000 piculs; no high class teas had appeared. Quotations:—Medium $26 to 29 per picul; good medium, $30 to 33 per picul; all other descriptions nominal.

SHANGHAI.—During the fortnight a large business had been done in Black Teas, and the market was almost entirely cleared of Teas possessing much quality. Prices paid had been irregular, but on the whole establish a considerable advance on those of the previous fortnight, more especially for Teas at and over Tls. 25. Arrivals from Hankow had been large, but most of the Teas were undesirable except at very low prices. In face, however, of settlements of common Shangtams at Tls. 18½ to 19 per picul it may possibly be difficult to induce teamen to accept some such rates for their fair to medium Oopacks and Oonams. Settlements on the market, 62,689 chests; re-shipments on owners' account, 31,279 chests; stock, 104,862 chests. The following are the prices that had been paid:—Hohows, Tls. 20 to 27 per picul; Oonams and Oonfas, Tls. 18 to 33 per picul; Oopacks, Tls. 21 to 29 per picul; Ningchows, Tls. 21 to 29 per picul. Green: There had been considerable arrivals of Pingsueys, and 8,000 ½-chests had been taken at from Tls. 31½ to 39. Settlements and Re-shipments: 8,697 ½-chests Pingsuey; 1,470 ½-chests Shanghai packed, Japan, &c. Stock: 10,500 ½-chests Pingsuey; 4,000 ½-chests Shanghai packed, Japan, &c.

HANKOW.—The following is from Messrs. Drysdale, Ringer and Co.'s Report, dated 25th June:—After departure of last mail we had a dragging market with gradually declining prices till the news of the opening of the Shanghai market reached us, when teamen became firmer, as the prices paid there for the inferior grades were above our rates. Buyers did not at first show any disposition to meet the teamen in their increased demands, and for two or three days but little was done, and only such parcels were taken as would come at former rates; subsequently, however, more inclination was shown to operate on terms slightly in favour of sellers, and closing transactions show an advance of about 1 tael per picul from the lowest point. Settlements for the fortnight are 35,000 chests, 2,200 half-chests, and 1,700 boxes at 12½ to 24 taels, a fair portion of which has been in barter against goods. Total settlements for season are 153,457 chests, 19,000 half-chests, and 6,600 boxes, against in 1868, 165,829 chests, 6,600 half-chests, and 2,700 boxes. We quote good medium to fine Oopacks 20 to 24, medium to good medium 18 to 20; fair to good Oanfas 18 to 21; common Oonams and Shuntam 12½ to 16. Shipments to Shanghai for sale on native account are, for the fortnight, about 42,000 packages, making a total of 97,500 packages, against 5,300 packages for corresponding period last year. The total quantity shipped by natives to Shanghai for sale during last season was under 120,000 chests, and we can only account for the present enormous increase by this season being earlier, and the first crop being larger than it was last year, and also that many teamen preferred trying another market rather than sell at the heavy loss consequent on accepting our current rates. The future of our export now depends on the course taken by Shanghai buyers; we fear that if they continue to buy on the same scale as their opening rates, our export will in all probability be quite as large, if not larger, than it was in 1868.

KIUKIANG.—Fair arrivals had taken place, but, owing to the scarcity of fine Teas, very little business had resulted. A decline of 3 taels per picul had been established in Ningchow Teas, but teamen preferred to ship to Shanghai rather than accept these rates. Settlements were four chops Ningchow, at 21 to 23 taels.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Circular, dated 2nd July:—We have to advise that our Tea market has at last been opened, though only a moderate amount of business has as yet been done. Congous: Business was commenced on 20th ult., by the settlement, on Russian account, of about 2,000 chests "Ching Wo" kinds, at Tls. 32.8 to 36.8 ship off, being a decline of 3 to 4 taels per picul on rates ruling last season. During the next few days only a few chops, which appeared to stand out as regards quality, were settled; but on the 25th ult. a purchase of about 7,000 chests was reported by one firm, since when buying has become more general. Common grades have been in demand on Australian account, and buyers, being anxious to despatch their chartered vessels, have paid full rates for these grades. Dust and broken leaf have been in good demand, and of the settlements reported at foot there are fully 17,000 chests of these sorts. For the good medium to finest Kaisow kinds, prices have gradually declined, and purchases could now be made about 4 taels cheaper: and compared with rates ruling last season, they show a reduction of 6 to 10 taels per picul, while Packling kinds, which are in very full supply, have been pressed for sale and show even a more marked decline. The well known "Crack" chops of Kaisow, which are inferior in quality to the average of years, have been sold out of their usual channels and realised a decline of 10 to 12 taels per picul on last year's rates. The quality of good and fine Tea remaining on offer is very small, the bulk of our large stock consisting of common mixed leaf kinds. We confirm our previous report as regards the yield of the first crop, viz.:—that it will be about 20,000 to 30,000 chests short of that of last season. The teamen have not yet commenced purchasing the second crop, waiting lower rates. Souchongs have come to hand more freely within the last few days, but business has not yet been commenced. As regards quality, they compare unfavourably with those of last season's growth. Oolongs: The teamen are unwilling to meet the views of buyers, and there are no transactions to advise. Scented Teas have been in fair inquiry and rates paid are about 10 taels cheaper than those ruling last season. Flowery Pekoes: A few small parcels have found buyers at full prices. Settlements have been—Congou, 95,178 chests, at Tls. 8.3 to 38.8 per picul, ship off; Scented Tea, 22,800 boxes, at Tls. 22.8 to 32.8 per picul, ship off; Flowery Pekoe, 663 chests, at Tls. 32.8 to 42.8 per picul, ship off. The above settlements of Congou were made at the following rates:—Dust to broken leaf kinds, Tls. 8.3 to 13.5.5 per picul, ship off; low ordinary to fair flavoury kinds, Tls. 14.8 to 22.8 per picul, ship off; fine to finest Kaisow, Tls. 24.8 to 35.3 per picul, ship off; extra fine, Tls. 35.8 to 38.8 per picul, ship off.

CANTON.—The market for new season's teas was opened on the 29th June (five or six weeks later than usual) by the settlement of some 5,000 boxes Scented Caper at Tls. 26 to 28 for fine to ordinary finest kinds. Since then a large business had been transacted almost entirely in good medium to finest Caper at about similar rates. Prices paid for the bulk of the settlements were seven taels below the opening quotations of last

Digitized by Google

year. A few small parcels of finest Scented Orange Pekoe had been taken at full to excessive prices, but no business was reported in the medium and fine qualities. No settlements of district Congou had been made. But few chops of new season's Canton made Green Teas had been offered. The settlements reported were principally parcels of mixed old and new season's teas. Canton settlements from 19th June to 3rd July, 1869:—Country Congous, no stock; Canton District Congous, no sales; Scented Orange Pekoe, 8,000 boxes at Tls. 15½ to 34; Scented Capers, 55,000 boxes at Tls. 20 to 34; Canton Greens, Gunpowder, 15,500 boxes at Tls. 12 to 25; Young Hyson, 6,000 boxes at Tls. 14 to 18; Country Greens, no stock.

## SILK.

Yokohama.—Business in Silk had been all but nominal. The settlements did not exceed 150 bales, and a good part of these were shipped on native account. The small stock remaining was held for very full rates. Total settlements for season are thus just 15,000 bales. No new Silk had arrived.

Shanghai.—Messrs. C. J. Skeggs and Co. report upon the market as follows:—Soon after the departure of last mail buying was renewed at gradually hardening prices until an advance of fully 10 taels had been reached, when the receipt of a London telegram to the 8th June checked operations. Since then business has again commenced at a decline of 10 to 15 taels for common sorts, and about 10 taels on good and best Silks, chops, however, having been taken at last mail's rates. The following prices have been paid:—Chooping's No. 3, Tls. 560; Dragon, Tls. 550; Yakee and Donkey, Tls. 540 to 545; Blue Flag, Tls. 510; and Red Peacock, Tls. 460. Fatmow Hainin No. 2 has fetched Tls. 480, but sales have also been made at Tls. 475. In Kahing Taysaams, Ching-Yuen-Sing's Nanling has been taken at Tls. 435, but other inferior chops have been sold down to Tls. 420 for such Kah-Yuen-Fong's Nanling. In Chin-Cums there is no market to report, but very high prices are asked. Exchange is about a third per pound in favour of buyers. The total settlements are estimated at about 2,500 bales.

## STRAITS PRODUCE.

Singpaore.—The business done had been moderate, and prices were without much alteration. After the departure of the last mail Gambier receded to $3.05 per picul, but had again advanced to $3.07½, at which it was firm—about 950 tons having been contracted for. Black Pepper remained firm at $6.80; and about 7,500 piculs had been contracted for at this price; deliveries were small. White Pepper of good dry quality was scarce; what was offering being chiefly inferior. Pearl Sago was taken up freely at $3.15 to 3.20 per picul for ordinary grain, and $3.25 for large pearl. Sago flour remained without alteration, and had been taken up freely, at $2.50 to 2.55. Tapioca had been bought to a moderate extent at $4.60 to 4.80. Hides in larger supply. Tin declined to $29, and $29¼ for Malacca, until arrival of the present Mail from China, when, owing to advices thence, prices advanced to $29¾ to 30.

## JAVA PRODUCE.

Batavia.—Arrack was in fair supply, and the value was rather lower, a sale of about 100 leaguers having been made at f.117.50 per leaguer (equal to f.165.72 per leaguer f.o.b.). Coffee had been neglected, and no transactions in Java qualities had been reported; f.35 per picul may be considered the nominal value of good ordinary (equal to f.33.94 per 50 kilo., or 58s. 5d. per cwt. f.o.b.). The Government auction, held at Padang on the 29th May, averaged f.37.55 per picul for 41,600 piculs first quality, and f.13.71 for 1,200 piculs black beans. Gum Dammar continued to advance, the last price paid for fine clean being f.48,50 per picul (equal to f.46.17 per 50 kilo., or 76s. 10d. per cwt. f.o.b.). Unpicked quality offers at f.28 per picul. Hides readily commanded last rates. India-rubber, Gutta Percha and Pepper were not procurable, the market being quite bare of supplies. Sapanwood: About 600 piculs had been sold at f.3.25. Sugar was again dearer; transactions during the month had taken place at f.15,75 for No. 14, and selected parcels could not be bought at better than f.16 for No. 14 (equal to f.29.11 per 100 kilo., or 25s. 1d. per cwt. f.o.b.). Two crops of about 30,000 piculs each had been sold at public auction at f.15.16, delivery to be taken at the mills. The weather during the fortnight has become more favourable for drying, and some new sugars had already arrived. Tin: An auction of 5,000 piculs Billiton would be held in July.

## CEYLON EXPORTS.

Colombo.—The Report of Messrs. George Wall and Co. contains the following:—Coffee—Plantation: As the home advices continue to report a dull market at declining prices, and the demand has ceased for Australia, there is very little doing; the last transaction was at 11s. 3d. per bushel. Native: The price of Native Coffee is supported by a present demand for America, and it stands at 59s. per cwt. f.o.b. Exports of both Native and Plantation to date 921,161 cwt., against 879,765 cwt. at the same time last year, showing an increase of 41,396 cwt. Cinnamon: 24s. per pound is still paid for the best garden description; the clearances are 2,400 bales in excess of last year, being 8,336 bales this year, against 5,936 bales last. Cocoanut Oil has been dealt in at prices equivalent to £34 per ton f.o.b. The supply of Copperah is scarce; makers are disposed to advance their rates, but the dull advices from home prevent buyers from responding. Plumbago: Only the finest descriptions attract the attention of buyers, for which they only offer about £12 per ton for lump and £4 for dust; medium and low qualities are quite neglected; the prices now ruling do not pay the cost of mining, and for the present these operations are in large measure suspended. Coir Yarn: We have not heard of any transactions during the past fortnight, and the medium descriptions we quote 22s. per cwt. nominal.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks,—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ½lb., ¼lb. and 1lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

O'GRADY—On the 15th June, at Caraitivoe, Batticaloa, Ceylon, the residence of his third son, E. H. O'Grady, Esq., M.D., late Physician to the British Embassy at Paris, aged 80.

ORD—On the 9th Aug., at his residence, Upper Clapton, Middlesex, John Ord, Esq., aged 85.

THURNBULL—On the 15th July, at Singapore, Hannah, wife of Mr. W. Thurnbull.

THE Silk Supply Association has determined to start a *Silk Supply Journal*, on the model of the *Cotton Supply Reporter* of the Manchester Cotton Supply Association. Some talk has taken place among the Indian tea companies of publishing a journal on tea culture, to follow up the proceedings of the tea conference of the Indian Committee of the Society of Arts. The Society gives a medal for a book on the promotion of tea cultivation, and the Indian Government are likely to produce a manual on the same subject.

*LONDON, MONDAY, AUG.* 23.

## AFFAIRS IN JAPAN.

We had some time ago a tolerably circumstantial account of the inauguration of the first session of the Parliament at Yedo, but have heard little of its doings since. The country seems to be a good deal disturbed, trade is at a standstill, and altogether the state of affairs is such as must give some cause of uneasiness to the Government, as well as to the representatives of Foreign Powers. If the so-called Parliament really possesses any legislative powers, they might surely be brought into operation with advantage. We hope Sir Harry Parkes will soon be able to obtain some insight into the working of this Assembly, with a clear definition of its *status* in the Empire, and the extent to which it may influence the relations of the Mikado with Foreign Powers. At present its functions appear to be involved in some degree of obscurity, the only one exercised being that of "considering" any question submitted to the members, and laying a report of their deliberations before the Mikado; and to-day's mail brings us a translation of a curious sort of memorial recently produced by the Japanese Foreign-office that is now undergoing that process.

This remarkable document professes to set forth, *seriatim*, the various difficulties occasioned by the presence of Foreigners in Japan; it is divided into twenty-one clauses, each containing a question, to which an answer appears to be required. It commences with an allusion to the diversity of opinion that exists in Japan as to the manner in which Foreign intruders ought to be dealt with; some, it is cheerfully remarked, think they ought to be exterminated at once, while others would prefer encouraging them for a time, until the Japanese have thoroughly perfected themselves in the science of warfare, and *then* driving their unwelcome guests into the sea. In the second clause the Assembly is naïvely asked for a candid opinion as to the relative merits of assassination or ejection — "shall we proceed to a "systematic expulsion, or shall the Foreigners residing in "our country be killed?" and then, with a sort of lingering doubt as to whether either plan will meet with unreserved approval from the Foreigners themselves, the writer pertinently adds, "But if the Foreigners wage war against us for this, how shall we resist them?" A query which, we should imagine, the Japanese Parliament will regard as a rather difficult conundrum, and "give it up." After discussing the best means of guarding the Imperial person in case of such a war, the writer proceeds to point out that the large force of Foreign soldiers (chiefly English) kept in Japan is entirely owing to the repeated murders of innocent Foreigners that have taken place; and asks, if this system of assassination and the consequent augmentation of the Foreign troops is to continue, what is to be done when they become so numerous as to take possession of all the ports? The difficulty is put in clear and forcible language:—"If, in consequence of new "murders of Foreigners, their troops should be so much aug-"mented that they occupied all our ports, what country will "be then more despised and humiliated than ours? Even "now, there are many grievances the Foreigners have against "us. How can we clear our old and sacred laws and religion "from this stain? What are we to do? It is because our "Government can neither protect their own people nor the "Foreigners that the Foreign countries have sent their troops "to us, and they declare that they will not withdraw "them until the Government has obtained the power over "life and death, and to punish and reward. And this power "the Government must have—enough authority to protect "their own people and the foreigners. That, as is now the "case, the Foreign countries themselves punish crimes com-"mitted in our country is a shame and an insult. How "can we wipe it out?" Theoretically, this is easily answered. Organise a strong Government, we might say. Make a law whereby offences against Foreigners shall be punished as severely as against natives, and honestly carry it into effect. You will then have done all that can be done to efface the stain of former misdeeds, and rendered armed interference unnecessary for the future. But, practically, this is not so easy; the country is torn by internal dissensions, and the restoration of tranquillity at home must precede a satisfactory adjustment of external relations.

The debts owing to Foreign countries, and the ways and means of paying them off, form the next "difficulty" regarding which advice is asked. The Foreign debts taken over by the new Government from the old one (the Shiogoon's) is stated at six millions of dollars. This includes the overdue balance of the Simonoseki indemnity—one million and a-half; a loan of half a million from the Oriental Bank; one of a million from (or through) an English merchant; debts from Daimios to Foreigners, now guaranteed by Government, to the extent of 240,000 dollars; and various other items. To the credit of the Japanese Foreign-office, their memorial does not exhibit any intention to rely on the bloodthirsty measures more than hinted at in its commencement as a means of extinguishing these liabilities. Even repudiation is not alluded to. The memorialists simply ask—"How are we to satisfy these claims?" Whereas, in some countries that we could name, a good deal nearer home, the formula would be "how are we to *avoid* paying these claims?" A portion of them, by the way, arise out of the large quantity of spurious gold and silver coin that has found its way into the hands of Foreign merchants, and in this document the fact of the debased coinage having emanated from the Government Mint at Osaka is freely admitted:—"The Japanese Government, by issuing bad coins and acting "contrary to the treaties, have, by deceiving their own people "and Foreigners, polluted their name in the sight of all the "countries; how shall we clear ourselves of this stain?" This is the final question, and the memorial (we can find no more suitable name for it) winds up with an earnest appeal to the Parliament for an early and thorough discussion of these pressing difficulties.

We await the result with some curiosity. Will the proposal to "kill all the Foreigners" be discussed by the Yedo Parliament as coolly as it is put forth by the Foreign-office? Or will the Daimios pass that over, as rather too strong a measure, and, accepting the presence of strangers as a necessary evil, proceed to legislate for their protection, and otherwise prepare to meet the difficulties they are called on to face? At any rate, whatever it may result in, this memorial is in itself an extraordinary document, for it admits us, so to speak, behind the scenes of Japanese officialdom, and affords a new and striking illustration of the peculiar point of view from which the natives survey questions of Foreign policy.

---

Before the Session of Parliament came to an end the "Straits Settlements Bill" was read a third time and passed. Lest any over-sanguine Straitsonians should be led to imagine that their wildest visions are on the eve of realisation—that the constitution of the Legislative Council is about to be reformed, the independence of the Judges secured, and Governor Ord suppressed altogether, we may as well mention that this is simply a measure for transferring the Straits Settlements from the Episcopate of Calcutta, of which they have hitherto formed part, to another ecclesiastical jurisdiction.

---

In another column we print the text of the Memorial addressed to Earl Granville by the members of the Ceylon Civil Service, wherein the Colonial Department is roundly taken to task for what the Civil servants are pleased to regard as a wholesale maladministration of patronage and promotion. The Memorial—the "humble Memorial," it styles itself at the outset—is couched in terms of such arrogance that we cannot anticipate for it much sympathy either in or out of the Colonial-office. It is an outburst of temper rather than a temperate statement of grievances, and will in all probability bring on its authors a decided "snubbing."

## CHINESE EMIGRATION.

SINCE the *regime* of Admiral de SOUZA as Governor of Macao was inaugurated, the infamous slave trade that had so long disgraced that colony under the disguise of "free emigration" has been suppressed; but, unhappily, an equally vile, if not a worse form of the traffic, seems to have become naturalised in Hong Kong. According to the *Hong Kong Daily Press*, a perfectly trustworthy authority, the exportation of Chinese women from that port to California for the worst of all purposes, has lately increased to an enormous extent. Among the hundreds of Chinese passengers leaving by every vessel for San Francisco there have doubtless always been a certain proportion of "unfortunates"—women who went knowingly, and, alas, only too willingly, to pursue their miserable vocation in the Pacific States. Of course, no legislation, no care on the part of the Hong Kong Government or the owners of ships, could check this. But of late we are told that hundreds of girls are kidnapped, and shipped off wholesale against their will, to be sold to a life of shame, being first inveigled from their homes in the interior, then taken to Hong Kong, and finally forced on board ship under a system of terror and intimidation that frightens them into the appearance of being consenting parties. No wonder that the *Daily Press* calls for colonial legislation on the subject; and its suggestion that a proclamation should be issued, informing these poor people (who are necessarily ignorant of the law) that they can claim the protection of the Government, should be instantly adopted, together, we would add, with another, offering a reward for the detection of the guilty persons, for whom no punishment admitted by English law would be severe enough.

At the same time that this most unwelcome revelation is forced on our notice, a great controversy is going on in the United States as to the expediency of introducing Chinese coolie labour into the South, whereby it is thought that the formerly slave-cultivated States might be raised to a pitch of productiveness and prosperity even superior to that which they enjoyed in the palmy days before their peculiar "institution" was overthrown. Mr. KOOPMANSCHAAP is the hero of the hour; he has held up the tempting bait to the promoters of Southern regeneration, and they have become so enamoured with the scheme as to organise a company with an immense capital, to promote the influx of the wished-for tide of Chinese labour. But a difficulty has intervened. The importation of the coolies seems, according to the present condition of United States law, to be wholly illegal. Congress had passed an Act in 1862 totally prohibiting the coolie trade. By this Act citizens of the United States, and residents within the same, are forbidden to "raise, equip, load, or otherwise prepare, any ship or vessel, "registered, enrolled, or licensed in any port of the United "States, for the purpose of procuring the subjects of China, "known as coolies, to be transported to any Foreign country, "&c." The penalty for the infraction of this enactment is the forfeiture of the ship and all her appurtenances. It is also made an offence, punishable with fine and imprisonment, to aid or abet in building, equipping, or navigating any vessel intended for the coolie trade, or to take on board, receive, or transport coolies so intended. Again, in 1867, the matter was brought to the notice of Congress in connection with the Macao traffic, and a resolution was passed unanimously by both Houses of Congress, expressing the abhorrence of the people of the United States of the coolie trade, and their firm determination to maintain the prohibitive Act. And the fifth article of the celebrated BURLINGAME Treaty provides against any other than voluntary emigration, and agrees to make it a penal offence to take Chinese subjects from China without their free and voluntary consent. All these provisions are, it seems, to be interpreted in the most stringent form, for the Collector of Customs at New Orleans having applied to the SECRETARY of the TREASURY for instructions, in view of the expected influx of Chinese, has received a reply in which he is authorised and directed to use all vigilance in the suppression of this, as the SECRETARY of the TREASURY calls it, "new modification of the slave trade." This appears to us a most unreasonable action on the part of the United States Government. The law thus enforced was passed at a time when the shipment of coolies from Macao to Cuba, the Chincha Islands, &c., really embodied all the horrors of a slave trade; and the determination to be in no way identified with it reflected nothing but honour on Congress. But in what respect can the introduction of these labourers in American ships, to reside and work on American soil, under the protection of American law, be compared with a slave trade? If it is the deliberate conviction of the Southerners that coolie labour will be a blessing and not a curse to their land, why not let them have it? Once on American ground they will be free to all intents and purposes, and can no more be placed in the position of slaves than the now emancipated negroes can be again reduced to bondage. The only real difficulty is that of guarding against kidnapping or forced embarkation in China, and this might be accomplished by placing each vessel in a sort of quarantine on arrival at San Francisco, and permitting none of her passengers to be landed until a certificate had been produced showing the exact number on board, and that the United States Consul at the port of embarkation had received satisfactory proof that in every case the departure was free and voluntary. This system, properly carried out, and combined with the infliction of heavy penalties for every delinquency, would at once admit of the safe introduction of Chinese labour into the States, whether required for mining or agriculture, and at the same time put a stop to the monstrous evils that evidently beset the female emigration from Hong Kong. In adopting such measures the United States Government would assuredly receive the most hearty co-operation from Governor MACDONNELL, and the cordial sympathy of Englishmen in all parts of the world.

## AUSTRIAN TRADE WITH THE FAR EAST.

THE latest accounts received from the Expedition to the Far East contain some interesting particulars of the Treaty of Commerce concluded with Siam, which appears to have been very cleverly managed, and in many respects highly favourable for the interests of Austrian trade. The treaty differs in so far from similar ones concluded between Siam and the other European States that it contains a specified list of the articles of export and import either prohibited or monopolised. This has been overlooked in framing the treaties with England, France, and other Powers, by which the merchants and shippers of those nations are exposed to innumerable difficulties and chicanery in unintentionally infringing the laws and customs of Siam, and having to pay dearly for their experience. This definition of the prohibited articles, which is certainly an improvement on the existing treaties, is understood to be a diplomatic success of Herr VON SCHERZER, who was charged with the negotiation of the treaty, and who carried his point in spite of the violent opposition of the Siamese, who objected to it as an innovation, which they will probably be soon compelled to extend to their treaties with other countries under the "most favoured nation" clause.

It cannot be doubted that the Government of Austria acted wisely in sending out the Expedition, and "in the nick of time;" for in the face of the opening of the forthcoming Suez Canal, great preparations are being made in various parts of the monarchy to profit by the opportunity thus offered for direct communication with India and China. In Austria no doubt has ever been entertained that the Suez Canal would become an established fact, and a fair amount of the shares in the company are held by Austrian capitalists. It was only considered a question of time, and the uncertainty of the period of its completion was the sole reason for taking measures which have long since been projected and organised, and are now being brought into execution. At Trieste a company is in course of formation, for the purpose of running a line of steamers from that port through the Canal in the first instance to Bombay, and Calcutta, to fetch the two principal staple articles of the Austrian manufactures, cotton and indigo, for which they have hitherto been dependent on the English markets, subjecting them to the disadvantage of a doubly round-about route, firstly round the Cape of Good Hope to England, and secondly from London or Liverpool up the Mediterranean *via* Gibraltar. These long and tedious routes will now be dispensed with, at an immense saving of time, expense, and risk; and the saving thus effected will amply compensate the merchants for the trifling extra expense of steam navigation and the equally insignificant toll of ten francs per ton to the Suez Canal Company, whilst they will always have

Digitized by Google

sure market for the disposal of their goods in Austria, Switzerland, and Germany. For this service, which is to be at first fortnightly, six steamers of 1,200 tons each are now being built, and as soon as this line is organised the company proposes establishing another through the Suez Canal to Siam, China, and Japan, with larger and more powerful steamers.

## THE CEYLON PLANTERS.—PRESENT CONDITION OF THE COFFEE ESTATES.

Mr., now Sir Wentworth Dilke, in his book, "Greater Britain," has allowed such surprising inaccuracies to creep into his description of Ceylon that it is difficult to believe that he was ever on the ground on which he writes. It would seem as if the knowledge he gained of the various countries through which he passed had all got mixed up together. For instance, instead of the coach which plies between Galle and Colombo being on the Java system of four ponies, it is simply the fact that it is always drawn by *two horses*. Not even on the occasion of the arrival of the Governor, Sir Hercules Robinson, were four horses used. This might pass as harmless, but not so when the writer attempts to twist the act of "a lady from Mauritius," in taking a cowrie from a native, into a specimen of the manner in which the English in Ceylon tyrannise over the natives. Mr. Dilke jumps at conclusions with more vigour than accuracy, and if this is a specimen of how he has used his experience in describing English people abroad he had better have remained at home, and left "Greater Britain" to be explored by a more experienced and more thoroughly English mind. The mischief of such anti-English tendencies is that they generally act as incentives to a train of abuse on Englishmen abroad. The *Edinburgh Review*, in reviewing Mr. Dilke's work, stretches these charges into a tirade of vulgar abuse against the Ceylon planters as a class, which is utterly untrue and scurrilous. The reviewer says:—"The people may often have been "treated harshly and superciliously by the officers of the "British army or the Government, but they were reconciled "to it by the knowledge that those were high-caste men— "sahibs—men in authority; whereas these fellows (alluding "to planters) are evidently, by their demeanour and bearing, "low-caste, low-born, and low-bred. It is scarcely possible to "imagine any human beings who combine all the disagreeable "qualities of the national character in a greater degree than "some of the creatures *who find their way to Ceylon and "India as managers of tea and coffee plantations*. English- "men without manners, education, or scruples; Irishmen "with an acuteness which their want of principle makes dan- "gerous, and with a recklessness which their want of kind- "ness makes terrible, are sent out to superintend the tasks of "Cinghalese or Assam labourers."

Now the planter, as a rule, is a man living entirely alone on his estate; he has to manage some two hundred to four hundred coolies in such a manner as to obtain from each coolie a fair amount of work for his wage, and it is the most important item in his management to do so without causing discontent. He must know how to act with firmness, as like all Asiatics these labourers are prone to idleness, but to resort to cruelty would be the most suicidal policy possible, for they would all walk off in a body to the nearest police magistrate, and most certainly obtain redress. The author must have had in his mind the condition of the slaves in the Southern States of America, with its system of nigger-driving. It is simply a matter of fact that no flogging or other means of coercion is permitted on a Ceylon coffee estate. It is notorious that all proprietors or their agents would immediately dismiss any superintendent who resorted to any kind of ill-treatment. The place of the superintendent is entirely dependent on the success of his management in this and other respects. Any man found to have a bad temper and to be unable to treat his labourers with kindness does not long retain his position. The chief element in the success of a coffee estate is of course an adequate labour. To judge the question however from a different test, we can state that these labourers, of their own free will, are continually passing to and from India, and if there were any truth in the statements alluded to we should not find the stream of immigration maintained; whereas at this time the supply of labour even exceeds the requirements of planters. Another test may be found in the fact that it is an unheard of occurrence that the help of the police or military is required to quell disturbances on estates, or, what is not uncommon in cases where Asiatics are ill used, the massacre of the superintendent and his staff.

Now, with regard to the personal habits of the planters, as a class, instead of abusing them, it should have been stated—very much to their credit considering their lonely life—that the cases of dissolute and intemperate life amongst the 800 planters are rare. Of course they are not angels, and there are exceptions; but as a rule these planters are a decidedly respectable class of men. Many, indeed, have had a college education—not that that guarantees a man against bad habits; but as a body planters are so well looked after by the proprietors or their agents that any such tendencies are followed by dismissal. Where the whole value of the estate depends on the efficiency of one man it is of the utmost importance that he should be free from intemperate habits. Even if there had been in days gone by any acts by which the planters could be spoken of as oppressors or "nigger-drivers," it was the duty of the reviewer to draw the line, and not to vilify the present generation for the acts of the past. That a journal of the standing of the *Edinburgh Review* should utter so gross a libel on the planters of Ceylon is most unaccountable; it is a gratuitous insult to a body of hard-working and generally speaking well-educated men.

In these days of close working estates are regularly visited by an inspector, who examines into all the departments, and reports accordingly to the proprietors or agents. Nothing is taken for granted, as in former days, when a planter dealt direct with the proprietor or his financial agents in London, and no doubt often appropriated a large portion of the funds drawn for the purposes of the estate to his own benefit. Very dishonest management was sometimes carried further, for planters who owned estates under loans from London houses would obtain advances under false representations as to the yield of the crop. More than this, a planter has been known actually to obtain these advances whilst his estate was under mortgage, and conceal that fact. In those days registration of mortgage deeds was not known, and hence the facility for frauds. Then followed the introduction of limited companies in London, for taking over estates at prices that have left heavy losses to the shareholders, although a few knowing vendors made a handsome profit by the transfer of estates they had easily acquired. This, added to some previous discreditable transactions, made Ceylon stink in the London market, and no capitalist would look at a coffee plantation as an investment.

This fast and loose condition of things has now happily been succeeded by a more strict *regime*, and it is no longer possible for a planter to draw up his estimates for the season, obtain the money, and spend it as he likes. The inspector now goes round and checks all the items. The reason that coffee estates did not pay became clear enough when examined into. The sums drawn for expenditure on the estate for its proper maintenance was not expended on it, but went another way. With such management, or rather want of management, it is not surprising that the yield was unsatisfactory as compared with the outlay. As a proof of the economical management now prevailing, it is only necessary to state that coffee was last season put on board ship at Colombo costing not more than 30s. to 40s. per cwt., and netting in the London market 60s. to 70s. This is the investment which capitalists turn aside from. These facts will, however, speak in time, and instead of acquiring a good-bearing estate at the present market price of £40 to £50 per acre, the rates will most probably considerably advance. The monsoon rain, which has not appeared for five years, has returned this season, and the crops all look very promising for next autumn's yield. There is but little forest land left suitable for coffee cultivation in the hands of the Government, which is selling at £1 to £3 10s. per acre. Really promising land is, however, worth £5 per acre, to which must be added all the expenses of clearing, planting, and a delay of three years before the maiden crop is gathered. Coffee estates in Ceylon properly bought at the present time and well worked will yield at least 10 to 20 per cent. Some estates will, with good honest management, return a much larger percentage, and a fortune can be made out of them with less than ordinary risks.

The colonists of Hong Kong are hard to please. Labouring under a complication of inconveniences arising out of their defective monetary system, they cried out for a Mint of their own. In due time this was obtained, but no sooner had they got it, than they cried more loudly still to be rid of it. The second wish also was speedily, and we have always thought prematurely, granted; and yet they are not content. The *China Mail*, in a recent issue, draws a melancholy picture of the miseries arising from the want of a local coinage, "short," "chopped," and spurious dollars, the bank system of receiving by weight and paying by tale, the squeezes of shroffs and compradores, and innumerable other evils being inseparable from the present system, or rather total absence of system. The *Mail* suggests two remedies—one is, that clean Mexican dollars, before being paid away by any local bank, should be stamped with the "chop" of that bank, in English and Chinese, and that these dollars should be thereafter a legal tender in paying sums of moderate amount. This would certainly be a great boon in small transactions, while large ones might still be carried on by weight. But we like the second plan better; it is to resume the coining of Hong Kong dollars (and, we presume, the subsidiary coins) *at home*, and at the same time making an ordinance that, after a reasonable interval, say a year from the first issue, they should be the only legal tender, Mexicans ceasing to be so except in sums above a given amount, and then by weight only. This is an ingenious plan, and, unlike many ingenious plans, has the additional merit of being strictly feasible. We hope to see something of the kind carried out shortly.

---

Really, some people are very unreasonable. Commander Robinson, for instance, of H.M.S. *Rinaldo*, who so rudely refused to allow his vessel to be used to convoy the yacht of his Majesty—we beg pardon, his Excellency, Sir Harry St. George Ord, on the occasion of that potentate's visit to Java. Governor Ord, who possesses a cultivated though somewhat expensive taste for sublimity and regal magnificence, thought it would be very nice to go in his own yacht, with one or more men-of-war in his suite—in fact to arrange it somewhat in the manner of a Royal progress. The commander of the *Rinaldo* quite failed to see the beauty of the plan, and, in deed, not only declined to sanction it, but so far forgot the respect due to Sir Harry as to offer the humiliating alternative of a passage to Batavia on board the *Rinaldo*. A mere sloop, however, could not possibly contain his Excellency's dignity, so the *Peiho* had to take him over alone, while the *Rainbow*, another Straits vessel, was told off to act for the nonce as a private despatch-boat, and carry his Excellency's mails over after him—a task that might very well have been left to the regular mail steamer. The fitting-out and coaling of the two steamers, of course, cost several thousand dollars, and the colonists will have to settle the little bill. No wonder if they begin to think that King Log was best, after all.

---

The August number of the *Cornhill Magazine* contains a contribution by Mr. Mitford (Secretary to Her Majesty's Legation in Japan), in the shape of a translation of a Japanese sermon. Mr. Mitford has brought to bear on his task—doubtless a pleasant one—all the art of a good translator, for while rendering the discourse in most unexceptionable English, he has quite preserved the character of the original. If the sermon he has chosen is a fair average specimen, and not one selected on account of its peculiar excellence, the hearers of sermons in Japan are much to be envied, for it is as full of point, illustration, and vivacity, as an English sermon is usually of rigid formality and dulness.

---

A Hong Kong telegram, recently published, says it is generally believed in China that the Peking Government has officially informed Sir Rutherford Alcock that the Duke of Edinburgh cannot be received by the Imperial family on a footing of equality. Of course our present Government, with its avowed intention to humour every prejudice of the Chinese, will not press the matter; so we earnestly hope, that as the Duke cannot go to Peking without subjecting himself to shameful humiliation, he will not go there at all. The Queen of England's son can hardly be expected to eat humble-pie with the startling avidity shown by the members of our present Administration.

---

## CHINA MISSIONARIES.

**The following correspondence upon missionaries in China has been addressed to the editor of *The Times*:—**

Sir,—It is with great interest that we English of this extreme East have read the debates on the China Missions and the leaders in *The Times* to the same effect. By the time this letter reaches you the interval that must elapse will be too great to suppose that even the faintest trace of public interest will be felt in the matter; but still there are a few whom it affects directly, and others, again, who are compelled, however great a nuisance it may be to them, to take an interest in the matter, and it is to them that I would address a few words, which I can be trusted to do the more impartially as I am utterly indifferent to both sides of the question, and will merely record the few things that have fallen under my notice during a three years' residence in China, Formosa, and Japan. It is hardly necessary to say that there is not the least resemblance in the manner of conducting the Roman Catholic and Protestant missions. While the former endure every hardship, lead a wandering, precarious life in the remote regions of Thibet, in the wilds of Lower China, far inland, where their lives are completely buried, and their death often remains unknown for years after it has occurred, the latter are the sleek, typical, under-educated class, who are represented in England by the Bible readers and lecturers in the small Sunday-schoolrooms of the provincial towns. They here find themselves, to their utter astonishment, almost political agents (certainly as far as doing mischief is concerned), in obstinate defiance of the requests of their own Government, and with narrow-minded, bigoted prejudices against the people they come to convert. While I have attempted roughly to sketch the poor lay brother, a Franciscan of Rome, with no pay, no house, nothing but his breviary and his Chinese food, let me draw, with the object staring me and all other Eastern sojourners in the face, the comfortable bungalow of the worthy missionary—on a hill, to catch the least air from the south-west monsoon, with his mosquito curtains and his China logs, his well-stocked table and full cellar, his conventicle not a stone's throw from the house—probably his wife and children (the last certainly above the proportion usually allotted to men)—perfect immunity from all personal danger, with the inevitable gunboat under his windows.

I refrain from saying how they teach, or what they teach, or by what process they succeed in making the mission of peace and mercy an eternal cause of strife and bloodshed. For the same reasons am I unwilling to bear testimony to the amount of "fruit" these invaluable husbandmen produce, but I may fearlessly call all China to witness that of all the rascals that infest Shanghai, Hong Kong, or Canton, few exceed in villainy these precious lambs rescued from the toils of the Chinese Devil, whoever that may be. But if they did nothing worse than what I have already referred to, the evil in itself might be easily cured by having a better class of men, by having them more under control, and by a distinct determination that they should really be missionaries, and not so many well-housed, over-fed, illiterate persons, enjoying comfortable homes and good incomes, and doing worse than nothing. It is absurd the public at home should be made to support such an intolerable incubus as the fleet in China, which was distinctly proclaimed as necessary for the protection of the missionaries, while at the same time we are throwing off the burden of an ancient and magnificent establishment at home.

The present First Lord of the Admiralty is, no doubt, perfectly well informed as to the necessities of the China station, and if he carries out his reductions still more—if he can by that measure compel the missionaries to reside in recognised localities of safety—he will do more to preserve the peace between the two countries, and to pour the commerce into its legitimate channels, than probably he has any idea of. What can be more disastrous for the general traveller out in these remote regions than a horde of *soi-disant* proselytarians wandering about the country, craving protection everywhere, with their price-list and samples in three pockets, a Bible and tracts in the fourth? I am afraid I have already exceeded the very valuable space that you usually allow in your columns for a letter, and with the concluding remark, which now appears necessary to me, that I am neither a Roman Catholic nor of the Church as preached by the missionaries of China,—I remain, &c.,

Veritas.

Shanghai, June 10.

---

Sir,—As a Protestant missionary of some standing in China, I cannot leave unnoticed the very strong charges brought against my class by your correspondent "Veritas," in *The Times* of to-day, and I trust, in justice to myself and my brother missionaries, that you will allow me space in your columns to state a few relevant facts.

I am a Churchman, and my testimony will be, perhaps, the less suspected if I speak, not of Churchmen, but of Independents,—namely, the missionaries of the London Missionary Society.

Protestant missionaries are charged indiscriminately with indolence and self-indulgence, want of education, narrow-minded prejudice, and a habit of mixing up trade with their ostensible calling.

The pioneer of Protestant missions in China was the London Society's missionary, Dr. Morrison, who, after many years of labour, left behind him translations of the Holy Scriptures and of portions of the English Liturgy, and also his well-known *Lexican* in six quarto volumes, which was published under the patronage of the East India Company.

Among his successors, reaching down to the present time, occur the names of Milne, Medhurst, the Strunachs, Drs. Lockhart and Hobson, Legge, Wylie, Edkins, and Muirhead. And of their works, passing over a large mass of both religious and scientific tracts, I may name a verson of the whole Bible in admirably lucid and classical Chinese, to the perfection of which several of the missionaries just named contributed; a *Lexican* in four thick octavos by Medhurst; translations of Euclid, and of standard works on algebra, mechanics, the differential and integral calculi, astronomy, and medicine; and a critical and exegetical translation of the Confucian canonical works by Dr. Legge, of which four octavos are published and which is still in progress.

Digitized by Google

Your correspondent declines to discuss the question of the "fruits" of our labour, technically speaking: but I think I have at least said enough to call in question his wholesale charges of ignorance, indolence, and "narrow-minded bigoted prejudice against" the Chinese, so far, at any rate, as the missionaries of the London Society are affected by them.

It ought not to be overlooked that two of the great works I have named—*Morrison's Dictionary* and *Dr. Legge's Classics*—have been munificently patronised by lay residents in that China which "Veritas" invokes to sustain his indictment against us; the former work having been edited at the expense of the Hon. East India Company, the latter at that of the late Mr. Joseph Jardine and his executors.

With regard to the Chinese scholarship displayed in these works, my testimony will go for what it is worth. But having lived nine years consecutively within the walls of Chinese cities, Ningpo, and Hangchow, daily reading and conversing with natives, and having, through a university education, gained some notion at least of what scholarship means, I cannot help bearing very cordial witness to the fact that the Chinese of the above-named works is remarkably good, and acceptable to native scholars—heathen and Christian—particularly that of the version of the Bible, and that the dictionaries and the great critical work of Dr. Legge are probably the most valuable contribution to the knowledge of Chinese literature since the works of the great Jesuits of the seventeenth and eighteenth centuries.

I have, as I proposed to do, spoken only of the achievements of one of the missionary bodies—the London Missionary Society. They have been the longest in the field, they have been eminent for ability, and they have addicted themselves very much to literary work.

There are others, however, not far behind them in this respect, who in the special duties of evangelists are fully their equals.

For myself and my colleagues of the Church Missionary Society, I will only say that we are quite unconscious of having gone to China either to make money or to live in luxury; and that the Divine command and obligation which first overcame our aversion from expatriation has kept us hitherto conscientiously endeavouring to live as well as preach the gospel of truth and love among the Chinese.—I am, Sir, your obedient servant,

GEORGE E. MOULE,
Missionary of the Church Missionary Society.

Fordington Vicarage, August 17.

## THE OPIUM TRADE.

(THE GLOBE.)

It is an ill wind that blows nobody any good; thus the duty on the opium exported to China with such baneful and destructive results to the people of that empire, forms, as we were told by Mr. Grant Duff, no inconsiderable portion of the revenue of the British Indian Empire. At the same time the impost is one of great financial uncertainty, and exposed, Mr. Grant Duff considers, to three dangers—"first, to the possibility of some movement in China which might effectually close that market; secondly, to an effective competition in the Chinese market from other countries; and, thirdly, to such an improvement in the manufacture of opium in China itself, as to make it independent of the Indian supply." The first two dangers he was inclined to dismiss as being, though possible, improbable; and the third he looked on as only a remote contingency. We are inclined to think, however, that more weight is to be attached to this last than Mr. Grant Duff is willing to admit. The cultivation of the poppy has been for many years largely increasing in China, and whereas formerly it was confined to the provinces of Se-tchuen and Yunnan it is now also very generally grown in Shensi, Shansi, Mongolia, and Manchuria. At the present day the prepared native opium has nearly supplanted that of the Indian growth in many districts formerly supplied from Hankow, and has recently found its way to Shanghai, where it has been offered in the market at prices far below the cost of the Foreign drug; and although the rapid spread of opium smoking among all classes of the Chinese has prevented any decline in the quantity of Indian opium imported, the competition it has met with has materially lost its price. Malwa, which in 1866 was worth 650 taels per chest, in 1868 fetched only 500 taels; and it is impossible not to anticipate that the price must fall still lower, for as the cultivation of the poppy spreads, the use of native opium, either mixed with Malwa or pure and simple, will become more general; and although it lacks the strength and flavour of the Foreign kinds, and is at first unpalatable to those unaccustomed to its use, a taste for it is very easily acquired, while its comparative cheapness is an irresistible argument in its favour. The native growers have such manifold advantages over the importers that it is obvious that, unless some strong prohibitory measure is enforced against the cultivation, they will produce more and more opium each year; for while the import duty on the Foreign drug is as much as thirty taels per picul, the taxes on the same quantity of native opium amount to only three taels and a half—a difference which partly enables the grower to sell his opium at a price about 250 taels per chest less than that which is imported. The loss inflicted on the Imperial exchequer by the check thus given to the further importation of the Indian opium is very great, and has lately drawn from the Throne a decree forbidding altogether the cultivation of the poppy; but the profits to the farmers are so large, being, as compared with crops of pulse or grain, as twenty-four to fourteen, and the illegal exactions levied on it by the local mandarins are so considerable that only a very strong Government, backed with the full force of public opinion, would be able to suppress its production. Unfortunately for the revenues of both India and China, neither are known within the limits of the Flowery Land. It is said that last year the crop in See-chuen produced 50,000 piculs, while a traveller who lately visited Manchuria found that in the richer and more fertile districts the poppy was rapidly superseding all other crops. In a memorial recently presented to the Throne by an Imperial Censor it is also stated that in the Western Provinces the more productive districts are entirely devoted to the growth of the poppy, while the more sterile regions are considered good enough for the less remunerative, but all important crops of grain and pulse. While, then, at present the quantity of opium imported from India to China increases rather than diminishes, it is obvious that the rapid progress of the poppy cultivation in the latter country threatens eventually to drive the Foreign drug out of the market. And although, as we have shown, the loss being thus inflicted on the Imperial exchequer is very great, the section of the community who are interested in its growth is so large and powerful that the Government is powerless to take any effective measures for its prohibition It remains, then, for the Government of India to find a remedy for this condition of affairs. The true remedy seems to us to be to increase the quantity of opium produced, and to reduce the duty levied on it, and thus to enable larger importations at lower prices effectually to compete in the China markets with the native drug. We have as yet only looked at the question from a commercial point of view; but it is plain from the cheers which greeted Mr. Grant Duff's ambiguous declaration, "that no one who occupied himself with Indian finance could be altogether happy about this (the opium) revenue," that there is a large party in England who are opposed on moral grounds to what is called this "iniquitous traffic;" and with good reason, for it is abundantly evident that the use of opium is most injuriously affecting the people of China. The great diminution in the rate of increase of population, the widespread poverty, and the rapid growth of brigandage, are in a great measure traceable to its influence. By its enervating effects on the body, and its weakening effect on the mind, it disqualifies and disinclines the smoker for all work, either mental or bodily; and thus, at the same time that the indulgence entails on him a large additional expenditure, it deprives him of the energy necessary to earn that subsistence which without it he would be able to obtain. These evils are fully recognised by the poor wretches themselves, who eagerly seek from European science for remedies to enable them to free themselves from the pernicious habit. But none exist; and thus, while we have been the means of bringing innumerable evils on the countless thousands of China, we are powerless to alleviate their suffering.

## SUBSIDISED STEAMSHIP COMPANIES.—THE MESSAGERIES IMPERIALES.

The *Semaphore* of Marseilles makes the last report of the directors of the Messageries Imperiales Company the text of the following observations:—Documents of this kind possess something more than a momentary interest. They are read by the public for other motives than the shareholders, and the press, moved by considerations of a much more general nature, examines undertakings of this kind less to ascertain what profits they may yield, than to study the progress of, or the circumstances which may have exercised an influence on, this important branch of the national industry. At the present moment especially, since the mercantile marine of France ceases to be protected by artifices of Customs legislation, it is of interest to learn whether our great navigation companies are prospering, and whether they are, as our opponents say, in a healthy state. The Messageries Imperiales Company no doubt enjoys that peculiar situation of all companies largely subventioned by the State. It must naturally result that the bases of competition are sensibly modified. In such cases the question to be examined is not whether these companies do not depend too much on their privileged situation, but whether they really endeavour to attain that necessary equilibrium for the balance not to incline to either side, and for the laws of free trade not to be continually in peril. A country may submit to great sacrifices in order to organise, in all their branches, services as extensive as those of the Messageries Imperiales Company, and to create a new industry. But this enterprise must on its side prove in time that there is a reason for its existence by sustaining itself with its own resources, by flying with its own wings, and by providing for its own necessities; and that end may be attained without the State ceasing to take into account the services it requires and which are rendered to it. We happily find traces of these preoccupations in the report presented this year. In the announcement of the transformation of the vessels on the Brazil and La Plata line, it is easy to see that the directors of the Messageries Imperiales Company are struck with the difference existing between the present movement and the period at which they inaugurated the service. Since then there has been created a French line, two or three English services, and one from Hamburg, which have endeavoured to combine the regularity and rapidity of steam voyages with the requirements of commercial competition. These free companies, without subvention of any kind, are carried on to the advantage and to the satisfaction of numerous interests. Some of these foreign companies even come to the French ports of the Atlantic to compete for passengers and freight with the French company. Established subsequently to this last, and profiting by experience and the progress of naval constructions, they employ vessels in which efforts have been made to combine rapidity with a greater disposable space for cargo, and the minimum of expense possible. One of the steamers of the Hamburg company excited recently, from these different points of view, the admiration of one of our *confreres* of the *Journal du Havre*, a good judge in these matters. It is clear that if we are anxious to maintain our rank we cannot remain stationary, and trust to a certain excessive extravagance of installation and administration to assure the prosperity of our postal services. When our neighbours and opponents are advancing we cannot rest idle, and leave to the impulses of national *amour propre* to induce the public to tolerate our inferiority. The opponents of our South American line have brought about a reduction in the rate of freight. The receipts of the Messageries Imperiales Company have suffered from that competition, and it is about to defend itself by modifying its naval material. The vessels it is having constructed, and which are destined for that service—the *Gironde*, *Amazone*, and *Uruguay*—will meet those new requirements. They will convey almost double the number of passengers, will carry twice the quantity of merchandise, and will navigate at less expense. These vessels, with engines of 500-horse power, will be equal to 4,000 or 4,500 tons effective burthen. Commercially, the effect of the transformation of the naval material will permit a reduction of the rate of freight, and an increase of traffic, which is the indispensable basis of a

Digitized by Google

profitable working. Those who have observed the history of steam navigation during the last few years must have noted the immense progress realised. In the Mediterranean, which is the centre of an incessant movement of steam navigation, the competition has been keen and profitable. The lines, at first created for passengers, did not disdain soon to carry merchandise; the latter has become the chief source of revenue, and at the present moment there is scarcely any article, however little may be its value, which does not constitute an aliment for steam navigation, formerly considered too expensive. What has taken place in the Mediterranean is now being repeated in the maritime relations between Europe and South America. We are witnessing the commencement of the rivalry between steam and sailing vessels, and we shall not have to wait long for the result. In this new situation, the course of the subventioned companies is marked out beforehand. Should it continue its first system it would soon be outstripped; while, on the contrary, only one consideration can justify the sacrifices the State is making in its favour—namely, that it should be always the first to adopt the progress accomplished, and to profit by the experience acquired, in order to anticipate the wants of the future. That future is, no doubt, in some measure foreseen. The conditions of competition will tend at each progress realised to equalise themselves, so that there will eventually be no privileged individuals, but only equals, remunerated according to the services rendered. And all the existing interests, far from having to fear those changes, will certainly have reason to be satisfied with them. Thus we believe we are acting wisely in openly approving of the decision taken by the Messageries Imperiales Company with respect to its Brazilian line.

# Foreign Intelligence.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, August 15.

In Germany we are in the midst of the dead season, when crowned heads are either travelling or enjoying rusticity at their country *chateaux*, and ministers are enjoying themselves at the various bathing places; the Parliaments are all closed, the Courts of Law are in vacation, politics are a drug in the market, and the newspapers find it so difficult to fill their columns that they look upon Count Beust's Austrian Redbook as a Godsend, from which they can reproduce a despatch every day for the edification of their readers, whilst the number of frightful accidents and offences that are brought prominently before the public is quite alarming. The great fire at Gefle, the discovery of a Carmelite Sister immured for twenty years in a convent at Cracow, and the awful explosion of coal gas in a mine in Saxony, caused, according to Reuter's telegram, "by stormy weather," have in their turn been all made full use of by the journalists. And *apropos de bottes*, as Mr. Reuter himself is a German, it is wonderful that his people should have been allowed to make so gross a blunder in translating *Schlagendes Wetter* into "stormy weather," as if any amount of stormy weather could have any effect on the atmosphere in a colliery four hundred feet below the surface, or cause an explosion of coal damp in the mine.

Count Bismarck is still residing quietly at his country seat in Pomerania, amusing himself with fishing and shooting—for hare and partridge shooting commence in Germany much earlier than is permitted in England—and leaving his colleagues at Berlin to make up as best they may the drafts of the Bills to be presented to Parliament in the next Session, and especially the Budget. It is asserted that the Finance Minister has had a bright idea, and happily hit on an expedient to reduce the deficit of eleven millions of dollars in the Treasury by five or six millions by shortening the credits granted to merchants for payment of duties from nine to three months, by which means the sums only due next year will be available in this. If this be confirmed it will require but a very small increase of taxation, or perhaps even only the issue of Exchequer Bills, to enable the Minister to tide over the difficulty.

Captain Kohler, of the German Navy, who was appointed to the command of the *Arcona*, intended for China and Japan, has just been gazetted to the *Hertha* at Kiel for service in the Mediterranean, to represent Germany at the festivities consequent on the opening of the Suez Canal. This would seem to confirm what I wrote in a previous letter, that the voyage of the *Arcona* to the Far East had been abandoned from motives of economy.

### COMMERCIAL.

In spite of the large supplies that have arrived at this port and Bremen during the past fortnight the deliveries of Rice have been considerable, and much animation has prevailed in the market, prices showing but little alteration. The Tea market is quiet, as is usual at this season of the year. Cassia Lignea continues in favour, and commands 13 to 13¼ sch. bco. Pepper rules firm. Spelter is tightly held, and not to be had under 14 marks banco in loco. If the holders would make a trifling concession a good deal of business might be done; though for delivery there are no inquiries, it being so uncertain when the supplies now on the way may arrive, as river navigation in the interior is almost suspended, owing to the want of water consequent on the drought. Discount 3¼ to 3½ per cent.

### SHIPPING.

ARRIVED.—Black Prince, from Rangoon (11,000 bags rice); F. C. Clarke, from Rangoon (9,868 bags rice); Cecilia, from Sourabaya (6,443 kranjangs sugar, 1,879 bundles rattans) and Passaroean (19,974 kranjangs sugar); M. W. Sass, from Saigon (5,640 bags rice); Octavia, from Rangoon (5,850 bags rice).

SAILED.—Formosa, to Hong Kong; Bertha, to Hong Kong.

ARRIVALS AT BREMERHAVEN.—Sadowa, from Bangkok (2,000 bags rice, 2,000 bundles rattans); Hudson, from Rangoon (10,210 bags rice); Woodville, from Maulmain (5,500 bags rice); Richard, from Rangoon (11,500 bags rice); Neptune, from Singapore and Saigon (17,310 bags rice, 2,132 bundles rattans); Jessie Jamieson, from Rangoon (8,525 bags rice); Viscount Canning, from Maulmain (10,300 bags rice); Eureka, from Bangkok (28,131 bags rice, 4,222 pieces sapanwood); Schwensen, from Saigon (14,400 bags rice); Pleiades, from Rangoon (17,730 bags rice); Castlemaine, from Rangoon (22,322 bags rice); Benjamin Bangs, from Rangoon (17,728 bags rice); Malta, from Rangoon (15,953 bags rice, 804 chests cutch).

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, August 16.

You must not be surprised if you hear that your correspondent is a traitor, and has been committed for high treason, for reproducing your leader, "Dutch Rule in Java," which is now a topic of universal comment. The leading Opposition papers have accused your most obedient of something quite equal to that offence for translating the article. I regret that our Conservatives are so angry with me and with your paper, which, they say, has no other aim than to make some English *chevaliers d'industrie* proprietors of Java. Such nonsense as this our Tory papers are talking every day, and, what is worse, not only some people believe it, but even the present Liberal Minister of the Colonial Department has so much respect for Conservative opinions, that he has not the courage to solve the colonial question. Instead of applying a Radical measure, he laid before the M.P.s an Agrarian Bill, of which even the prudent *Nieuwe Rotterdamsche Courant* said that it ought to be improved by amendments. My own opinion is that Mr. de Waal should be called upon to resign, and that the portfolio of the Colonial Department should be intrusted to a more Radical Minister. Mr. de Waal has made a very bad impression by appointing Mr. Nieuwenhuyzen as Vice-President of the Council of India, instead of conferring that important post upon Mr. Otto van Rees, who is so much feared by the Conservatives that they have named him "King Otto." It needs no assurance that the appointment of Mr. Nieuwenhuyzen will make the worst impression in India.

Some days ago a pamphlet was published by Mr. de Bruin, ex-director of the public works, on Java, to promote the establishment of a company for exploring the copper mines of the Island of Timour. The capital required is half a million of guilders. The plan is highly commended by the Liberal press.

Rumours with regard to alterations in the Cabinet still circulate. It is now asserted that General Knoop, M.P., is to be appointed Minister of the War Department.

I regret to have to record the death of Rear-Admiral J. G. Huys. He died at the age of seventy-five years, at Leeuwarden. Mr. Lamb, the Bristol bankrupt, has arrived safely at Flushing, without the intervention of our Government. The Opposition papers have made considerable noise about this question, but it was "much ado about nothing." The Belgian, or rather Flemish, papers are trying to raise subscriptions for erecting a memorial upon the grave of the Flemish author, Jan van Ryswyk.

### PRODUCE MARKETS.

Although there is, upon the whole, no change to report in the general features of our market for colonial produce, the approaching resumption of a more active trade, which is looked forward to during the fall, tends to impart sufficient firmness to most of the leading articles to ensure prices being well supported. The announcement by the Trading Company of their August public sale of Coffee and of their annual public sale of Spices will no doubt attract general attention to our market for these articles, the former of which has been in partial request, whilst Nutmegs and Mace have continued in fair demand at a further advance.

COFFEE.—There is no alteration to report in the position of the market, which is firm but quiet, purchases being strictly confined to the requirements for pressing wants. Sales since my last report—331 bags Padang Benkoelen, ex Henrietta, Maria Sarah, and Zaanstroom, at 31⅜c. to 33½c.; 856 b. Macassar, ex Neerlands Vlag; 1,544 b. do., ex Henriette; 1,500 b. do., ex Bulwark; 1,000 b. do., ex Areta; 3,400 b. do., ex Bulwark. The Trading Company will offer for public sale here, on the 25th inst., 70,200 bags Java and 2,000 b. Padang.

RAW SUGAR.—No change has taken place in the quiet tone of the market since my last report, and only a few small sales have been effected at ¼f. to ⅜f. below the currency of the July auction. About 30,000 mats syrup sugar (stored) have been sold for export at Amsterdam on secret terms, supposed at 22¼f. Refined continues in brisk demand for immediate delivery, whilst some transactions have taken place in barter against raw at a reduction of ½f.

TEA.—The market is firm under the influence of the gradual improvement in the London market. Ordinary Congou is in demand.

JAVA TOBACCO.—Very dull. Only 636 b. Java, ex Arlington, have been sold.

SPICES.—A steady demand has been manifested for Nutmegs, and prices are fully maintained in the proportion of 98c. for No. 1, 90c. for No. 2, and 73c. for No. 3. Mace, D 165c.; E 160c. Black Pepper is firm, but the market is almost bare of stock. Sales have been closed at Amsterdam of 700 packages Cassia Lignea, ex Amstelstroom, at a high price, which has, however, not been named. The Trading Company's annual public sale has been announced to be held at Amsterdam on the 31st inst., comprising 1,040 casks Nutmegs, 380 casks Mace, 380 casks cloves. No further quantities will be offered until the 1st August, 1870.

RICE.—I have to report the sale of 7,000 bags Rangoon, afloat, at 5¼f., on Rotterdam floating conditions of sale, and of 1,544 bags Java, ex Henrietta, at 7⅛f., and 580 bags ditto, ex Damio. The market is heavy.

RATTANS.—About 35,000 bundles were sold by public auction for account of the Trading Company, on the 5th inst., at the following prices:—Borneo, at f.11.20 to 12.30; Padang, at f.7.10 to 14.20;

Digitized by Google

Koetie, at f.6.10 to 7.70; Mixed parcels, at f.6.60 to 9.60, according to quality. The business done privately has been confined to 150 piculs ex Jacoba Cornelia.

Banca Tin.—It is currently stated that in addition to the quantity of Banca afloat, officially reported, there is about 20,000 slabs more actually shipped, though the bills of lading have not yet reached the Trading Company. With regard, also, to the production of Banca during the year, on which so much dissension has taken place, all statements must be mere conjecture, and it cannot be positively ascertained till the spring of next year, but we may take it for granted that a large portion of the accumulated stock in the Island of Banca will come forward as soon as possible, and will be available for consumption next year. However this may be, it will be useful to look at the position of the article as it now is, taking the official returns, which I reported in my last. The business done since the last mail embraces:—700 slabs at 79½f.; 1,600 ditto at 79¾f.; 400 ditto at 79½f.; 500 ditto ex autumn sale. 1869, at 77f.; 300 ditto ex spring sale, 1870, at 70f.; 300 slabs Billiton, at 77f.

Kapok.—Sales have been closed at Amsterdam of two lots of raw, of 76 and 30 bales, the latter at 15c.

Hides.—A healthy tone continues to prevail in the market, but no sales have been closed here since my last. The following parcels have been sold by secret tender at Amsterdam, viz.:—977 Batavia Ox, ex Wykaan Zee, at 61c.; 1,000 Sourabaya do., ex Tjilingsie, at 61c. to 62c.; 374 Macassar do., ex Neerlands Vlag, at fully 43c.; 178 Sourabaya Buffalos, ex Wykaam Zee; 362 Java do., ex Tjilingsie; 3,000 do., ex Australie; 2.000 do., 718 Batavia, and 95 Macassar, ex Hendrik Ido Ambacht and Neerlands Vlag.

Java Indigo.—Buyers are readily offering for Indigo of fine quality, for which full rates are being paid. A fresh supply of 153 cases Java has arrived for our market, which will soon make their appearance, and several parcels of late importation are to be offered for sale by private tender this week.

Drugs.—Gum Damar is offering on the spot at 56c., bnt there are no floating shipments on sale in the market at present. Cassia Vera continues to be in request, and since the Trading Company's public sale has been attended with such a favourable result as regards this article the small balance of the stock left over with private importers is held for much higher prices—namely, from 49c. to 52c., according to quality. About 2,000 kilo Sumatra Gutta Percha, ex Henriette, have been disposed of at prices that did not transpire. The public sales on private account went off as follows, viz.:—1,479 baskets Padang India-rubber bought in at 75f.; 100 bags Cassia bought in at 25c.

Arrack.—184/1 and 82.2 casks, ex Dunedin, put up to tender last week have not been taken. The market is very dull.

Manila Tobacco.—The stock has greatly decreased, and some qualities are totally exhausted; prices are very firm. Floating parcels are in much demand.

Cotton.—Has continued in fair demand, both for home consumption and speculation, for which latter purpose a fair business has been doing in East India afloat.

### SHIPPING INTELLIGENCE.

Departures.—August 5, from Brouwershaven, for Batavia, Doelwyk; from Texel, Batavia, for Zaanstroom, Java Packet, Gebroeders van der Beck, Zeenimph; August 6, from Brouwershaven, for Batavia, Kosmopoliet I.; for Samarang, Albrecht Beyling; from Texel, for Macassar, Macassar.

Passengers Inward.—From Java, per Cornelis Wernard Eduard: Messrs. Scheltema and family, Hofstede and family, Le Rutte and family, Kroesen and family, Pahud and family, Spaan, van der Meulen, F. J. H. D. Baron d'Aulmis de Bourville, Mrs. van Es, and Mrs. v. d. Heul.

Passengers Outward.—For Java, per Kosmopoliet: Messrs. J. P. Mansfeld and family, J. M. Admiraal and family, H. G. Baumgarte and family, F. G. Leidelmeyer, P. F. L. van Hourbracht and family, E. J. C. Heiligers, and family, J. van der Maaden, P. J. Pauwells, Mrs. E. K. van de Venkeys and family, Miss A. Keller, and A. L. C. J. Casteren van Catteuburgh, and 125 soldiers. Per Java Packet: Messrs. H. C. Kloppenberg, B. Baud, Berg, and Sigon. Per Zeenimph: Messrs. van Braan, B. Loggere and family, J. C. Tamson and family. Per Gravenhage: The officers F. C. L. Reuling, J. H. van Holst, Pellekaan, and 125 soldiers.

## Naval and Military.

Vice-Admiral Sir Henry Kellett, K.C.B., accompanied by Lieutenant R. G. Thornhill, who has been appointed his flag lieutenant, left London for Southampton on the 6th inst., to proceed by the overland route to China, for the purpose of relieving Admiral the Hon. Sir H. Keppel, K.C.B. Captain Hewett, V.C., his flag captain, will remain to superintend the fitting out of H.M.S. Penelope, and will then take her out to be the flagship of the China squadron.

The distribution of naval prize money, &c., in the financial year 1868-69 included £24,519 in respect of slave vessels captured by Her Majesty's ships; £2,145 bounty for destruction of pirates; and some small sums out of the proceeds of junks captured by Her Majesty's ships in the Canton river for breach of blockade in 1857, from prize money allotted in the Indian mutiny, and from stores captured at Kertch and Yenikale in 1855. At the close of the year, on the 31st of March, 1869, there was still in hand, not distributed, £19,079 for slave and tonnage bounty, £7,333, for stores captured at Kertch and Yenikale, £5,937 from the Parliamentary grant of thirty days' additional pay to the naval forces for special service on the China station in 1856-58, £2,892 bounty for destruction of pirates, £1.413 from captures for breach of blockade of the Canton river in 1857, £1,214 for booty captured in China in 1857, £925 for booty captured in Pegu in 1852-53, £828 for prize money in the Indian mutiny, £800 shares of prize money forfeited by desertion, &c. In the year 1868-69 £6,568 was received from owners of merchant vessels for salvage services rendered by Her Majesty's ships, and £3,210 of the moneys received for salvage services was distributed.

The crew of the screw steam gun-vessel Serpent, 4, Commander Chas. J. Bullock (recently returned from China), were paid off at Devonport on the 10th inst. She will be placed in Keyham Steam-yard to have her machinery removed.

## Monetary and Commercial.

We understand that a prospectus of an "East India, Asiatic, and American Telegraph Company" will be issued shortly. This company will lay submarine cables along the coast of China and in the Chinese Seas south to Singapore, and *via* the North Pacific Ocean to North America, thereby completing the telegraphic circuit of the globe. The promoters are understood already to have obtained the assent of the Chinese authorities at Peking and the promise of co-operation in aiding and protecting the work. The Navy Department of the United States' Government have given instructions to their Asiatic squadron "to aid, assist, and protect" the undertaking, and similar directions are said to have been issued by the British Admiralty. The French and the Russian Governments will be solicited likewise to co-operate. The enterprise, it is added, "will be British, European, Asiatic, and American in character, and international in interest and protection." In our next issue we shall be enabled to give further particulars of the scheme.

The tenders for £325,000 in bills on India were received on Wednesday at the Bank of England. The amounts allotted were—to Calcutta £311,500, and to Madras £13,500. The minimum price was fixed as before, viz., at 1s. 10¾d. on Calcutta and Madras. Tenders on the above presidencies at 1s. 11⅛d. will receive about 39 per cent.; those above that price in full. These results indicate a slight increase in the demand for remittance to the East.

The Stock Exchange Committee have appointed Tuesday, 24th inst., a special settling day in the shares of the Falmouth, Gibraltar and Malta Telegraph Company (Limited), to bemarked in the official lists.

We understand that very satisfactory financial arrangements have been made on behalf of the Tanjong Pagar Dock Company, a sum of 250,000 dols. having been raised by an issue of preference shares at 7 per cent. The debentures falling due in October next are to be renewed at the same rate (7 per cent.), and the company will thus be relieved of the pressure of a loan at a high rate of interest, while there is the prospect of a satisfactory dividend both for old and new shareholders. The business done by the company during May and June shows a very large increase.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton on the 21st inst., was in gold, to Galle, £135; to Bombay, £70,100; to Madras, £5,200; to Calcutta, £20,000; in silver, to Bombay, £13,000; to Singapore, £89,217; to Hong Kong, £49,896; to Shanghai, £1,532; to Yokohama, £190; total in gold, £95,435; in silver, £153,835.

## LOADING.

At London.—For Hiogo and Yokohama: Corsair. For Nagasaki and Hiogo: Chanticleer. For Yokohama: Mountain Ash, Osaka, Velocity. For Shanghai: Carrick Castle, Dartmouth, Hertfordshire, Carnarvonshire, Undine. For Hong Kong: Sophie, Borealis, Cleta, Isles of the South, Queen of the Age, Everest. For Singapore: Henry Grenfell, Belle of Southesk, Antipodes, For Penang: Alvington. For Bangkok: Lotus. For Batavia and Sourabaya: Gladiator. For Colombo: Thomas Blythe, Spirit of the North, Britomart.

At Liverpool.—For Yokohama: Edwin Bassett, Caractacus. For Shanghai: Banian. For Singapore: Banda. For Manila: Maria, Trinidad, Loyola. For Batavia and Sourabaya, Maranon.

At Glasgow.—For Yokohama: St. Dunstan. For Hong Kong: Grace Peille. For Singapore: Loch Ken. For Penang: James Paton. For Batavia and Sourabaya: County of Elgin.

## SPOKEN.

Valador (?) (brig), Hamburg to Hong Kong, 70 days out, May 16, 38 S., 14 E.

Uknia (? Utinia) (ship), Cardiff to Singapore, 72 days out, June 2, 39 S., 24 E.

Siberia (ship), Singapore to London, May 29, in the Caramatta Passage.

Anjer, Cardiff to Shanghai, June 26, 8 N., 27 W.

No. 3,768. 3rd d. p. (English ship), Colombo to London, July 23, 42 N., 30 W.

Tartar, London to Shanghai, June 27, 1 S., 32 W.

Hernsten (?) (barq.), Liverpool to Sourabaya. June 16. 1 S., 31 W.

Lammermuir, London to Shanghai, July 23, 44 N., 9 W.

Mary Spencer, Liverpool to Batavia, June 4, 36 S., 19 E.

Queen of Trumps (?) (Brit. bq.), Manila to London, June 19, 18 S., 3 E.

Premier, London to Chefoo, June 29, 8 N., 27 W.

Laju, Glasgow to Shanghai, July 27, 50 N., 12 W.

Moro Castle, New York to Shanghai, June 26, 1 N., 31 W.

Ellary, Liverpool to Yokohama, 11 days out.

Oribe (brig), Colombo to London, June 26, 22 S., 5 E.

Artistic (brig), from Colombo, June 17, 33 S., 16 E.

Contest (brig), Bangkok to Falmouth, June 11, 31 S., 35 E

Queen of India (barque), Singapore to London, June 12, 31 S, 36 E.

Comet (barque), Cochin China to Belle Isle, June 18, 35 S., 20 E.

Maude, Bangkok to Falmouth, July 8, 18 S., 3 W.

Everton, from Singapore, April 22, 6 S., 105 E.

Pepita (Sp. bq.), Manila to Falmouth, April 22, 10 S., 103 E.

Undine (ship), Shanghai to London, June 1, 29 S., 40 E.

Amoor (barque), Saigon to Bremen, July 8, off St. Helena.

Madagascar (Aust. barq.), Singapore to Hamburg, June 1, 33 S., 32 E.

Alfred, Falmouth to Singapore, 67 days out, 44 S., 18 W.

Alpha, Singapore to Liverpool, June 24, lat. 11, lon. 5.

Lola (Brit. bq.), Saigon to Falmouth, 65 days out, April 29, 23 S., 60 E.

Agra, Manila to New York, April 13, in the Straits of Sunda.

Susan Collins, Ilo Ilo to London, April 18.

Hamilla Mitchell, London to Shanghai, May 25, 25 S., 30 W.

Etha Rickmers, New York to Shanghai, July 4, 21 N., 40 W.

Mary Ismay, Bangkok to Falmouth, June 1, 32 S., 29 E.

Anita, Cardiff to Shanghai, June 30, 5 N., 25 W.

Hendrick, Hamburg to Japan, March 1, 4 S., 22 W.

Good Hope, New York to Hong Kong, about June 24, lat. 31, lon. 72

Abracan, New York to Anjer, May 29, 1 S., 29 W.

Henriette Gerardina Susanna, Rott. to Bat., July 15, 45 N., 11 W.

Electra, Batavia to Amsterdam, June 27, 31 S., 33 E.

Emolus (?), (Eng. bq.), Liverpool to Japan, 80 days out, March 22, 37 S., 21 W.

Vizcaya (?), London to Shanghai, April 22, 41 S., 30 E.

A Russian ship, 120 days out, Cardiff to Japan, May 10.

Nederland, Amsterdam to Batavia, July 23, 46 N., 13 W.

Empress of India, Cardiff to Singapore, June 11.

Ann Bow (?), Newcastle to Hong Kong, 32 days out, June 12.

Insulinde, Amsterdam to Batavia, June 16, 17 N., 26 W.

India Packet, Amsterdam to Batavia, Aug. 3, 40 N., 10 W.

Kate Carnie, Japan to New York, May 31, 80 S., 84 E.

Roslin Castle, Clyde to Singapore, July 1, 2 N., 25 W.

Nieuwe Waterweg II., Sourabaya to Amstdm., July 24, 33 N., 45 W.

Alcyone, Amsterdam to Sourabaya, 49 N., 6 W.

Bezoekie (Dutch barq.), Batavia to Rotterdam, Aug. 10.

Agatha Johanna (Mecklenberg barq.), Cardiff to Hong Kong, Aug. 6 46. N., 12 W.

Chryseis (barq.), Bangkok to Falmouth, Aug. 10.

Elsinore, Manila to New York, July 16, 6 N., 42 W.

Annie Braginton, Shanghai to New York, June 11, 36 S., 20 E.

Maria Therese, Colombo to London, June 12, 25 S., 6 E.

Bothwell Castle, Clyde to Singapore, June 10, 39 S., long. 60.

Eleanor, London to Padang, 63 days out, 37 S., 19 E.

Janet Ferguson, London to Japan, 65 days out, 39 S., 22 E.

Kate, Hamburg to Hong Kong, June 20, 27 S., 32 W.

Abacan (Dutch barque), Amsterdam to Sourabaya, 45 days out, June 25, 20 S., 33 W.

Norwood, of Workington, bound to Singapore, July 26, 33 N., 18 W.

Alpha (Norwegian ship), Singapore to Liverpool, July 28, 37 N., 44 W.

Grondwet (Dutch), Batavia to Zierikzee, June 3, 35 S., 22 E.

H.D.F.G., Colombo to London, 91 days out, July 28, 37 N., 41 W.

Reigate (ship), from Batavia, August 6, 45 N., 29 W.

Red Deer, Bangkok to Falmouth, July 11, 11 N., 27 W.

William Connal (?), Batavia to Amsterdam, Aug. 4, 45 N., 29 W.

Agra, Colombo to London, Aug. 7, 45 N., 28 W., had been becalmed fourteen days, and was supplied with provisions.

Webfoot, Saigon to Falmouth, Aug. 8, 46 N., 27 W.

Eunomia, Colombo to Havre, Aug. 8, 46 N., 27 W.

Westbury (barq.), London to Japan, June 28, 7 N., 24 W.

Susanna and Elizabeth, Flushing to Batavia, July 10, 12 S., 34 W.

Union, Banca to London, 147 days out, 38 N., 34 W.

Southern Cross, for Colombo, July 12, 12 N., 25 W.

Olano, Manila to Liverpool, May 30, 29 S., 37 E.

Assistance, Penang to London, June 2, 32 S., 29 E.

P D L C (com. code), Padang to New York, July 5, 6 N., 28 W.

Chariot of Fame, Liverpool to Hong Kong, July 5, 1 N., 23 W.

Monkchester, Shanghai to New York, May, 30 S., 34 E.

Malacca, Liverpool to Japan, July 3, 1 N., 29 W.

Johanna Auguste, Cardiff to Singapore, May 30, lat. 23, lon. 103.

Peruvian, New York to Japan, in the China Sea.

Maria and Elizabeth, Rotterdam to Sourabaya, June 26, 10 N., 26 W.

Bristow, London to Shanghai, June 27, 11 N., 27 W.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports still continue much depressed, and rates rule very low; the steamer Alonso, for China and Japan, has been withdrawn from the berth, owing to the small quantity of goods offering. In coal freights from the Northern outports we have no change to note.

Current rates of freight for vessels on the berth:—To Yokohama: 30s. weight or meast. To Nagasaki: 40s. weight or meast. To Hiogo: 35s. weight or meast. To Shanghai: 30s. weight or meast. To Hong Kong: 30s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £43. For Hong Kong: £32 10s. For Singapore: £25. For Galle: £25. From Newport, Cardiff, or Swan-

Digitized by Google

sea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 13s. For Singapore: £1 6s. For Galle: £1 5s.

## MISCELLANEOUS.

At Ascension.—June 23, Eunomia, from Colombo, and sailed for Havre; 25, Estrelle, from Manila, and sailed for Liverpool; 27, Hakon Jarl and Virgilia Lesueur, from Bangkok, and both sailed for Falmouth.

Off Ascension.—June 19, Marbs (?), from Penang; July 11, John Fraser, from Java.

At St. Helena.—July 1, A. Lloret, Gonzala, from Manila, and sailed 2 for London; Gefle, Wahlman, from Sourabaya, and sailed 2 for Amsterdam; 2, Milton, Smith, from Ilo Ilo, Appelina, Youll; from Saigon, and both sailed 3 for Falmouth; 4, Betty, Chevalier, from Tjilatjap, and sailed 6 for Amsterdam; Drie Gerzusters, Fischer, from Batavia, and sailed 5 for Amsterdam; 5, Ocean Empress, McDonald, from Saigon; Cornelia Mathilda, Houtkoper, from Banjoewangie, and both sailed for Rotterdam; 6, Ellenborough, Robb, from Colombo, and sailed 7 for London; 7, Bengal, West, from Manila, and sailed 8 for New York; 8, Ercilla, Vicente, from Manila, and sailed 9 for Cadiz; 9, Vyf Vrienden, Verweg, from Batavia; Gertrude, Dewar, from Saigon, and both sailed 10 for Rotterdam.

Off St. Helena.—June 30, Sir Henry Havelock, from Manila; July 7, Royal Minstrel, from Colombo.

At Simon's Bay.—June 23, Hollandia, Nieuwenhuys, sailed for Macassar; Moneca (str.), Barclay, sailed for China.

At Mauritius.—June 22, Couronnement, Lauriol, from Saigon, and sailed 26 for Falmouth; 23, Andreas, Krabb, from Bangkok, and sailed 24 for Falmouth; 24, Glenallan, Shilston, from Bangkok, and sailed 26 for Falmouth.

On the 20th inst. a fine ship, called the Hesperia, 500 tons burden, commanded by Captain Jarvis, laden with a valuable cargo, bound for Singapore, foundered in the river near Gravesend, after being in collision with the Northumbria steamer, bound to Cardiff. The Hesperia left St. Katherine's Docks on the 18th inst., and on arriving at the lower part of Gravesend Reach was brought to an anchor, and would have sailed on her voyage at daybreak the following day but for the unfortunate accident, which occurred about half-past one o'clock in the morning. The Northumbria is quite a new steamer, nearly 1,000 tons burden. It was her first voyage, and all that can be at present ascertained is that she ran into the Hesperia with such force as to bury her bows in that vessel, cutting her down to the water's edge. Fortunately for the crew of the Hesperia the Northumbria was unable to extricate herself for some time, thus enabling the crew to get safe on board, but directly she got clear the Hesperia went down at her anchors in deep water. The Northumbria put back and has arrived at Victoria Docks. It is represented that the Hesperia and her cargo were insured for £30,000.

The already large and important steam fleet of Liverpool has just received a valuable addition in the case of the new and large steamer Palm, owned by Messrs. Charles Horsfall and Sons; the Palm is brig-rigged. Her gross tonnage is 1,600, her nett about 961, and she can carry 2,500 tons of coal and cargo by measurement, or 1,900 tons dead weight, on a draft of 16½ feet. Besides carrying a large quantity of sail, she is propelled by a screw worked by engines of 160-horse power nominal, but which with a pressure of 100 lbs. to the square inch can be worked up to between 700 and 800-horse power, with which, on a consumption of 10 cwt. of coal per hour, she can, while drawing 16 feet, make 9½ knots per hour, an immense amount of speed on so small a consumption of coal. Yet, under the conditions named, she was tested and proved during her trial trip on the Clyde. She is divided into seven water-tight compartments by six iron bulkheads, which extend from the keel to the main deck, the latter of which is entirely of iron, and, combined with the bulkheads, give great strength and elasticity to the hull. Her engines are Macnab's patent, with surface-condensers, the whole of the machinery being constructed on the principle of combining simplicity of structure with efficiency of working. The boilers for these engines are Ramsden's patent—of the firm of Hebson and Ramsden, consulting engineers, of Liverpool. The Palm is fitted with four patent steam winches, which are adapted to assist in all the deck working of the vessel, in loading and unloading cargo, lowering and raising the anchors, and also in working the pumps. This noble vessel was built by Messrs. Macnab and Co., shipbuilders and engineers, Greenock, under the special supervision of Mr. Douglas Hebson, consulting engineer, of Liverpool, and under the superintendence of Captain Brown, overlooker for Messrs. Horsfall and Sons. The builders also furnished, under the same supervision, the splendid engines and machinery of the ship. She has now nearly completed her loading, and will, it is expected, sail on her first voyage to Africa under command of Captain Buchanan.

## CASUALTIES.

The Zeebloem, Gollards, from Amsterdam to Batavia, put into Rio Janeiro, July 20, with bowsprit broken.

Advices from Cuxhaven, dated Aug. 16, state that the Panama, Nielsen, bound to Hong Kong, grounded on Schaarhorn, when going out the day previous, but was assisted off on the 16th without damage.

The Hesperia, Jarvis, from London to Singapore, foundered in Gravesend Reach on the 20th inst., having been run into by the Northumbria (s.s.), bound to Cardiff.

The Eliza Laing, Jones, which sailed from Sunderland, Aug. 13, for Galle, put into Falmouth on the 20th inst. with loss of water.

## LAUNCHES.

On the 11th inst. there was successfully launched from the building-yard of Messrs. C. R. Clover and Co., Woodside Ferry, Birkenhead, a beautiful iron clipper ship, named the Cumeria, which has been built for Messrs. Richd. Nicholson and Son, of Liverpool. She is a full-rigged ship of 1,380 tons B.M., and 1,275 tons register. Her length is 225 feet; breadth, 37 feet; depth of hold, 22 feet 9 inches; and she is classed A (highest class) at Lloyd's. The Cumeria, as regards strength, model, and finish, will compare favourably with any of the many fine East Indiamen launched by these celebrated builders, neither ability nor expense having been spared to make her one of the finest ships afloat. The general appearance and fitting of the Cumeria—being smooth-plated—is very fine; her saloon is handsomely finished with polished fancy wood, the ceiling, which is lofty, being white and gold; the skylight is fitted with stained glass with views of Lanercost Abbey and Carlisle Castle, scenes in Cumberland, from which county she takes her name. The sleeping berths are light, airy, and commodious. Amidships there is a steam winch for loading and discharging cargo, working the pumps, windlass, &c., and attached to the same boiler is a condenser for 200 gallons water per minute, and a circulating pump which acts as a powerful fire-engine. Directly after being launched the Cumeria was towed into the Queen's Basin, where she will receive her masts, &c. Captain Joseph Brown, late of the ship Carlisle, belonging to Messrs. Nicholson, has been appointed commander of the Cumeria, and she will be immediately placed on the berth for Calcutta.

At Pallion, near Sunderland, on the 10th inst., a fine iron sailing barque, about 682 tons register, was most successfully launched by Messrs. William Doxford and Sons, shipbuilders. The name Garnock was given to her as she started on the ways by Miss Doxford, daughter of one of the builders. The vessel has been built for David Hunter, Esq., of Ayr, and is intended for the India trade. This is the second iron vessel Messrs. Doxford have built for the same firm. Captain Auld, late of the Inverary, will take command.

We understand that Messrs. Scott and Co. have contracted with Mr Alfred Holt, of Liverpool, to build a screw-steamer of 1,800 tons and 200-horse power, to be employed in the China trade. The engines will be supplied by the Greenock Foundry Company. The new steamer will be sister to the Achilles, Ajax, and Agamemnon, built by Messrs. Scott and Co. for the same owner.

# THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

## THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

THE MANAGER,
CHINA AND JAPAN AGENCY,
2, Cowper's-court, Cornhill, London, E.C.

HOLLOWAY'S PILLS and OINTMENT.—Debility, Consumption.—In no diseases are the results of the alterative and tonic influence of these invaluable remedies more apparent or more gratifying than in that feeble condition of the body which precedes consumption. A change for the better is observed ere this treatment has been followed for a week, and the improvement steadily progresses; the encroaching emaciation and mental depression gradually gives place to health, strength and cheerfulness. The Ointment should be rubbed most diligently between the shoulders, on the chest, and left side at least twice a-day. Two Pills should be taken nightly; the air should be sought, solids eaten, slops avoided. This treatment duly followed will soon arrest both cough and feverishness.

# THE LONDON AND CHINA EXPRESS,

## A NEWSPAPER SPECIALLY ADAPTED FOR READERS IN CEYLON, CHINA, JAPAN, AND OTHER EASTERN SETTLEMENTS.

THE "London and China Express" is published in time for transmission by each outward mail, *via* Marseilles, to Ceylon, the Straits Settlements, Java, Siam, Manila, China, Japan, &c. Each number contains a well-selected digest of the news since the preceding mail, English, Continental, and American; extra space being devoted to subjects having a special interest for residents in the above countries. It also includes the fullest Commercial and Shipping Reports, and the same Leading Articles and Special Correspondence as appear in the "London and China Telegraph."

Merchants and others who wish their Correspondents or Agents in the Eastern Settlements to be kept well supplied with General, Mercantile, and Shipping news from Europe, are recommended to order the "London and China Express" to be sent to them regularly.

Terms of Subscription (including postage), 54s. per annum, payable in advance; or with Export Supplement (similar to that issued with the "Telegraph"), 12s. extra. Subscriptions payable to any of the Agents abroad (see list in separate advertisement), and in London to James West, publisher, at the head office,

2, COWPER'S COURT, CORNHILL, E.C.

## GELLÉ FRÈRES' PERFUMERY.

Chief Establishment, 35, RUE D'ARGOUT, à PARIS.

THE house of GELLE FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygienic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

For further particulars apply to

J. M. LLOYD, Secretary.

Royal Mail Steam Packet Company, 55, Moorgate-street, London, E.C.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

### THE MAILS, &c.

The present inward mail is delivered on its due date; as usual with the French mail, there is but a meagre budget of news. The papers were not delivered until after eleven o'clock.

The next inward mail, due here on Monday next, will bring the following dates: Yokohama, July 14; Shanghai, July 15; Hong Kong, July 22; Singapore, July 30; Galle, August 9.

Telegrams from Hong Kong, *via* Galle, have been received in advance of the mail of August 5. *Via* Kiachta, we have Shanghai telegrams to August 9, received on the 27th inst.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per French mail steamer *Peluse*, arrived August 28.—From Yokohama: Messrs. L'Amiral, De Chaille, Des Perriere. From Shanghai: Messrs. Maignan, Fimk, Fitzhenry, Bourlet, Dumont, Debacker, Marneffe, Hensel. From Hong Kong: Messrs. Vallé, Mollie, Mesdames Ribotte, Vidal, M. Faurié, General Maldonado. From Saigon: Mr. Denis. From Singapore: Messrs. Smith, Mayboon, Serratico, Van der Multon. From Batavia: Messrs. Forbecque, Hatendicke, Bowles, De Mareuil, Calish, Mr. and Mrs. Harting. From Galle: Messrs. Goodall, Brabazon, Madame Reeres.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Syria*, from Southampton, August 21.—To Yokohama: Mr. G. Wauchope. To Shanghai: Mr. Inaba, Mr. Collinson, and one second-class passenger. To Hong Kong: Mr. Marcus Wolff, Mr. R. C. McClement, and two second-class passengers. To Ceylon: Mr. W. Raikes, Miss A. Walker, Miss Crowe, Mr. and Mrs. J Robertson and child, Rev. Mr. Bateman, and one second-class passenger.

Per P. and O. steamer *Bangalore*, from Marseilles, August 29.—To Shanghai: Mr. J. J. Tucker, Mr Douglas Jones. To Singapore: Mr E. J. Tolson. To Batavia: Mr. T. Van der Chys, Mrs. Van Haeften. To Ceylon: Mr. E. Rymer, Mr. G. S. Steward.

Per P. and O. steamer from Suez, Sept. 5.—To Hong Kong: Mr. and Mrs. C. C. Smith.

Per P. and O. steamer *Poonah*, from Southampton, Sept. 4.—To Shanghai: Mr. Russell, Mr. and Mrs. J. Hart, Miss E. Hart. To Hong Kong: Mrs Hackin, Dr. Franklyn. To Ceylon: Mr. and Mrs. G. W. R. Campbell, Miss A. Carey.

Per P. and O. steamer *Delhi*, from Marseilles, Sept. 12.—To Shanghai: Mr. J. Maitland. To Singapore: Mr. T. F. van der Plas.

Per P and O. steamer *Ceylon*, from Southampton, Sept. 18.—To Yokohama: Mrs. Campbell and child. To Hong Kong: Mr. J. Y. V. Shaw, Mr. Head. To Ceylon: Mr. M. Finch, Miss Horn.

Per P. and O. steamer *Syria*, from Marseilles, Sept. 26.—To Yokohama: Mr. R. Johnstone. To Penang: Mr. and Mrs. H. Frohlich.

Per P. and O. steamer from Southampton, Oct. 2.—To Hong Kong: Mrs. E. Arthur, Mrs. Wilberforce Wilson. To Ceylon: Mr. C. Buchanan, Miss Macartney, Mr. J. Duncan's two children, Mr. and Mrs. W. Carver, Capt. Skottowe. To Singapore. Mr. J. W. Witham.

Per P. and O. steamer from Marseilles, Oct. 10.—To Ceylon: Mr. and Mrs. M. H. Thomas, Miss Creswell, Mr. J. W. Gossett, Mr. Stanley Daniell, Miss Sconce, Sir J. Elphinstone, Mr. H. W. Ridley.

Per P. and O. steamer, from Suez, Oct. 17.—To Ceylon: Mr. Duncan Davidson.

Per P. and O. steamer from Southampton, October 16.—To Penang: Miss Napier. To Ceylon: Mrs. Wilson.

Per P. and O. steamer from Marseilles, October 24.—To Shanghai: Mr. John Fraser.

Per P. and O. steamer from Suez, October 31.—To Ceylon: Mr. J. H. Cheape.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The present mail brings advices from Yokohama to the 6th July. The outward French mail of May 13 was received there on the 3rd July. The *Japan Times* supplies the following:—

We hear that an Embassy is shortly to leave for Hawaii, in charge of which will be Terashima Tozo and a Vice-Minister for Foreign Affairs. We have never been able to comprehend the object of the unenlightened opposition to freer intercourse between Japan and Hawaii manifested in quarters where we should have expected greater liberality. Japan has as good a right to make a treaty with Hawaii and to inaugurate a trade with that country as any of the great Western Powers had to make treaties with Japan—and certainly she is likely to derive more benefit from such intercourse with a kindred race than she has as yet received from ourselves. We shall watch the progress of the mission with interest, and trust that it will successfully achieve its object of bringing both countries more closely together.

#### THE FALL OF HAKODADI.

The following picturesque account of the recent events at Hakodadi, which have culminated in the fall of the place, will be read with great interest. Written as it is by a correspondent who is entirely independent of either side, it has the additional advantage of being impartial:—

"HAKODADI, 19th June, 1869.

"The *Dove* left us at daybreak on the 16th inst., and was barely out of sight before the severest engagement commenced between the Tokugawa refugees and the Imperialists that we have yet seen. The *Stonewall* steamed towards the head of the bay, followed by the *Henda*, the *Kami-no-kami*, a Dutch built vessel whose name I have forgotten, and the *Kiangsu*, all directing their fire against the fort and the *Eagle*, which was replied to with much spirit, especially by the latter. The *Stonewall* was apparently husbanding her ammunition, which is said to be falling short, and only fired one of her great guns at long intervals. The shells invariably burst a few yards after leaving the gun, and were thus wholly useless. As she slowly steamed towards the *Eagle* the latter backed towards her, and we looked for a death-grapple between the two. The *Eagle* fired with unabated spirit during the approach of her formidable opponent, and we waited—almost breathlessly—for the great gun of the *Stonewall* to tear the other ship to pieces, previously to the last fatal charge of the ram; but, strangely enough, the *Stonewall* did not fire, deterred, possibly, by want of spirit to open her bow port and expose herself to the deadly and well-directed fire of the *Eagle*. She then sheered off, and the *Eagle* backed to her old position in the bay; but, being terribly pressed by her opponents, ran ashore, where she now lies stranded, yet still an effective battery."

* * * * * *

"Sunday, 20th June, 1869.

"At 3 A.M. the Mikado's fleet commenced an attack on the fort,

Digitized by Google

while the troops advanced towards the breastworks near Kamida, and prepared to contest possession of the fort itself. For four hours a severe and continuous fire of great guns and musketry was kept up, and both sides fought with vigour and spirit. But superior to all in gunnery, in indomitable courage and inexhaustible vigour were distinguished the crew of the *Emperor*. Beset by the whole of the Mikado's fleet, menaced by the crushing ram of the *Stonewall*, the especial mark of the well-directed fire of the *Kiangsu*, the Dutchman, and the *Henda*, the little vessel was fought with heroic courage and dauntless resolution. Shell after shell and shot after shot from her kept the other vessels at bay, nor did her fire ever slacken duirng the terrible struggle. That a craft so small should have been able successfully to defy the successive and sometimes the united efforts of five men-of-war—a mere yacht—for it must be remembered that she was the present of our Queen to a former Shiogoon on the occasion of Lord Elgin's signing the treaty—against vessels built for warfare, is due partly to the indomitable courage of her defenders, but chiefly to their education by Captain Tracy, R.N., formerly Naval Instructor to the Japanese in Yedo. This little ship was manned by his pupils, and had he seen their gallant conduct and dauntless bearing in action he would indeed have been justly proud of them. And now occurred the great incident of the day, which drew all eyes toward the north-east corner of the bay. Without warning or note of preparation of any kind, a column of flame, high as the mainmast of the British corvette, shot into the air, followed by a dense column of smoke, in the midst of which fragments and *debris* of all kinds might be discerned. A shell from the *Emperor* had burst in the magazine of the *Chosu Maro*—the Dutchman, as I have hitherto called her—and she sank instantly, her bowsprit and foremast alone appearing above the water. Then commenced one of those dreadful scenes which so greatly intensify the horrors of war, poor wretches clinging to the spars and rigging, others striking out for the shore and perishing in the attempt to reach it, and, worst of all, the throwing of more shells by the *Emperor*, which burst over so closely that they could hardly have failed to swell the fatal tale of mortality caused by the explosion. Of course this would never have been seen in European warfare, mitigated as that is by the more humane and chivalrous dictates of a higher civilisation; but before we blame the crew of the *Emperor* we must remember that the sentiments connected with human life are very low—in spite of institutions which show that death is readily preferred to a disgraced life. The Tokugawa men are fighting in a desperate cause, and no set of men are blameable for not being in advance of the general average of the national sentiments they represent.

"But the conduct of the *Henda's* commander cannot be excused; instead of moving at once from his position, which was not a thousand yards from the *Chosu Maro*, with the view of assisting the victims of the explosion, he steamed away at once to what seemed a cooler part of the bay, and left the poor wretches to their fate. I am unable to explain these movements, and do not wish to place a wrong construction on them, but do not hesitate to say that the strangely unsympathetic feature of the Asiatic character never appeared to me more prominent than on this occasion. Two cutters from the *Pearl* were at once lowered and pulled towards the wreck, returning in about an hour with some twenty odd of the survivors. Some few had miraculously escaped without hurt, but most, I am told, were cruelly burnt or mangled. One died during the passage from the wreck; some were bleeding from great open wounds which dyed the boats with their blood. The captain had escaped, but was frightfully burnt and had an arm broken. Sitting in the stern sheets at the bottom of the boat, he seemed almost insensible to what was going on, but as the boat pushed off for the shore, with the inborn politeness of the Japanese, he bowed forward in acknowledgment of the efforts made on his behalf, though the effort cost him dear, in the evident increase of the agony he suffered. Assistant-Surgeon de Meric and Mr. Quin, of the Consulate, accompanied the sufferers to the shore, secured accommodation for them in the neighbouring village of Arigawa, and there all that skill and thoughtful kindness could effect or suggest was done for them.

"The *Eagle* during this time had been doing but little work, firing occasional shots, but showing nothing like the spirit or good practice of the little *Emperor;* her crew, however, have often enough shown their mettle, and they were perhaps employed at some other quarter of the defences.

* * * * * * * * * *

"But as the day wore on it was evident that the Tokugawa men were being overpowered, though they still fought with unabated gallantry. A little smoke was detected issuing from the stern of the *Eagle*, and it was soon evident that she had been fired. Two hours afterwards she blew up, a vast dense column of smoke rising slowly into the air, carrying with it the clearly discernible fragments of the ship. When the smoke cleared she appeared with her poop blown away, but still little changed otherwise in general appearance. The flames continued to gain on her, and she was slowly burnt to the water's edge, shells bursting one by one at intervals as the fire destroyed her. In the same way the *Emperor* was presently also seen to be on fire, which, smouldering at first, gradually burst into flames, and as evening drew on the two burning vessels threw a brighter and still brighter light over the bay. Meanwhile, two large fires had burst out in the town, and the mountain at the foot of which it is placed was enveloped in a dense cloud of smoke, which entirely obscured its features. The wind blew strongly during the evening, and the fires ate their way rapidly to leeward, but as night fell the wind fell with it, and they subsided in great measure. The Tokugawa people had also fired the villages and officials' houses round Kamida, and the horizon for several degrees was lit up with flames. Brightest among them all showed the fire that was consuming the *Eagle*, which, changing from deep red to glowing white, was as the intense glare of an open furnace, and brightly illumined the western side of the town. I should have mentioned that during the afternoon a fresh steamer belonging to the Mikado's fleet had arrived, and, boldly taking up a good position within easy range of the fort, threw many shot into it, and evidently damped the ardour of its defenders, for their return fire slackened considerably. One gallant fellow, however, was long seen loading and firing the gun at the eastern angle, and attracted constant attention by his undaunted behaviour and strange good fortune during the hot fire directed upon the work.

"When morning dawned the *Pearl* was seen thickly surrounded by the floating remains of the sunk *Chosu Maro*, and the fires of the *Eagle* and the *Emperor* paled gradually before the growing light. During the morning, of Monday the 21st, little was done; the Mikado's troops and civil officers had occupied the town at two P M., after the crews of the *Eagle* and *Emperor* had thrown themselves into the Kamida fort, but a dropping fire was carried on by besieged and besiegers. The fires in the town had greatly subsided, and parties landed from the foreign vessels to survey it. It presented the forsaken and desolate appearance we anticipated, marks of shot and shell were everywhere apparent, and the shore was lined by the smouldering ruins of houses. The few inhabitants who had returned to look at their homes, or at the charred remains which but too often represented them, seemed to creep about scared and sad at the changed aspect of affairs. In the afternoon the *Stonewall* took up a position in the bay, about 2,000 yards from the Kamida fort, and opening fire from her great bow gun, made splendid practice against it. Most of her shells burst just over the great earthwork, and must have done fearful execution among the fifteen hundred men now cooped up in the place. An early shot took off the crest of the tower which stands in the midst, and every successive shell added to the destruction of the place.

"Thus for the present I must leave Hakodadi. Imperial troops are in the town, but the small fort in face of the bay is still in the hands of Enomoto's party, tenanted by some thirty or forty desperate men. Kamida contains now perhaps fourteen hundred, and this is all that remains of the whole piratical force. Kamida is surrounded by the Imperial troops, and can be shelled from the bay. It is difficult to believe that it can hold out long, though it is said to contain provisions for six months and plenty of ammunition. The latter statement I greatly doubt.

* * * * * *

It is only right to advert to the utter destruction of the French *prestige* among both parties, indeed, it is too clear and acknowledged a fact to be passed over without notice. It is possible, and I dare say true, that among the French adherents of Enomoto's party, some have behaved with individual gallantry, though it is certain that their instructions forbade their exposing themselves. Those instructions were given and implicit obedience—to the letter—were paid to them—by M. Brunet. Whatever other accounts may be circulated regarding this part of the affair, you may entirely rely on my statements in respect of it. M. Brunet may be an excellent theorist in military tactics, but he lacks the quality which is absolutely essential to his putting his theories into practice, or at all events to any personal superintendence of carrying them out. He has shown what I cordially believe to be amongst French soldiers an exceptional 'discretion,' and has deserted a cause with which he was entirely bound up at the time when, of all others, it most needed his devotion. He has shown himself heartlessly indifferent to the fate of men whom he encouraged to rebellion, and whose submission to the Mikado's authority would have saved the lives of many brave men and supplied the Empire with many good servants.

"All honour to the gallant little crew of the *Emperor!* Deserted by their French leaders, they showed themselves well rid of such unworthy comrades, and fought their tiny vessel with a heroic gallantry which the opposition of tenfold her power could not abate. Many of them must have perished, but they died like brave men, and fought nobly for a cause to which, whether espoused for higher or lower motives, they have sacrificed themselves and followed to the end, without regard to the dastardly conduct of those whose precepts they obeyed so well, but whose example they disgustfully scorned to imitate."

## CHINA.

—o—

### SHANGHAI.

Our advices from this port extend to the 8th July. The English mail of May 21 arrived out on the 5th July. The latest London telegrams were to June 15, *via* Kiachta. The following items are from the *North China Herald*:—

The *Peking Gazette* contains a memorial from Ting Futai to the

Digitized by Google

Emperor, advising, amongst other things, that the tribute rice should be carried in Foreign built ships instead of native junks, and pointing out the superiority of the former in point of speed and safety. It is mentioned in the Tientsin trade report that nine Foreign ships were employed in this carriage last year; but they were too large to enter the Peiho, and the additional cost of lighterage from Taku made the total freight heavier than would have been the case if junks had been the carriers. Mr. Mongan feared that this mischance might prevent the re-engagement of Foreign ships, for a time.

The *Gazette* also contains a memorial from a Censor begging the Emperor to take measures to stop poppy cultivation. A proclamation has been issued in accordance with this request, but it is not expected to have any effect. The Indian Government, which has ordered an increased cultivation, in consequence is likely to find itself rudely deceived. In our opinion, the tendency is to a steadily lessening demand for the Indian drug; and the import statistics of the past year bear us out.

We learn that there is renewed apprehension of an outbreak at Soochow. The Taoutai and a number of officials are congregated there.

We have to acknowledge a copy of the sixth annual report of the Peking Hospital, on whose useful career, under the care of Dr. Dudgeon, we have frequently had occasion to comment. The total number of patients relieved during 1868 was 13,239. We are glad to find that the hospital fully maintains its reputation among the Chinese, and continues to do vast good.

We are sorry to hear that the steamer *Ying-tze-fei* got ashore on Shantung Promontory during Thursday night last (July 1). The *Manchu*, which passed at daylight, stayed by her several hours, trying to help her off, but failing, went on to Chefoo, where the *Nanzing* happened to be lying. The latter at once went to the assistance of her consort, and it is hoped that, by taking out some of the stranded vessel's cargo, she may be safely got off. The weather was thick.

The apse windows in the new church have just been filled with stained glass, to commemorate the late Mr. George Henry Fitzroy. The subjects represented are:—The Agony in the Garden of Gethsemane, the Carriage of the Cross, the Crucifixion, the Entombment, St. Mary Magdalene in the Garden, and the Angel announcing the Resurrection to the Three Holy Women at the Sepulchre. Each subject is surmounted with a small canopy, laid upon a ground of rich colour. In our opinion the colouring of the centre window is a little cold and monotonous; and in all cases the borders are too wide, thus giving them an undue prominence, and confining the space devoted to the subject work. On the whole, however, the work possesses much artistic merit, and gives a handsome effect to the interior of the building. It was executed by Messrs. Lavers, Barraud, and Westlake, of London, at the cost of some of the late Mr. Fitzroy's friends in the Customs service.

The body of Captain Cooper, commander of one of the gunboats lately launched from the Kiangnan Arsenal, whose death by drowning (at Hankow) was recorded by last mail, has been picked up nearly at the spot where the steamer was anchored.

We regret very much to have to record the death of Mr. Hamann (of Messrs. Trautmann and Co.), who was accidentally drowned while boating. He was out sailing with a friend, when the boat capsized in a squall, some distance below the Harbour-master's hulk. They stuck to the boat for some time, but as she was sinking, the survivor swam off, and was picked up when at the point of sinking; but Mr. Hamann disappeared immediately. Everything has been done to recover the body, but so far without success.

Our Foochow correspondent writes:—"As a faithful chronicler of the times, I must state that freshets No. 4 and No. 5 have come and gone since I reported concerning the third. Since the memory of the oldest Foreign inhabitant, there have never been two freshets in one season so high as any two of the five we have already had this year. Several years there have been one h gh and a very small or low one, doing no damage, and lasting but a short time. No. 3 was the highest of all. How many more we shall have this season it is useless to conjecture, as all signs seem to fail this year."

The *Evening Courier* of July 8th says:—"The American mail steamer *Costa Rica*, arrived yesterday, brought treasure to the large amount of 875,000 dols., while the Messageries Imperiales steamship *Phase* carries out 505 bales silk. The two facts taken together are well fitted to illustrate the important place which Shanghai takes in the world's commerce."

The *Daily News* says:—"Ting Futai passed Chingkiang on the 1st, *en route* for Soochow, in a rather seedy looking barge towed by a small canal steamer. The military were in waiting along the river banks to give him a *feu de joie* as he passed. It is stated that his boat was towed all the way from the Yellow River. This enlightened official appears to appreciate travelling by steam; but we always understood that the people objected to steamers entering the canals. How is it that H. E. Ting is not afraid of hurting their feelings?"

### OPIUM.

The following is the memorial above alluded to:—

"It is the duty of the State to provide for the wants of the people, and this poison is destroying the very foundations in which the State rests. Food is like heaven to the people; planting opium like nourishing disease. It entered the country first at Kan Liang, and then it spread to Shen Si, where it grows everywhere in abundance. There are in each *hsien* more than 10,000 *mow* of land, and in each province more than one million *mow* under cultivation, and allowing three *mow* of land for one *mow* for one year, there is thus in each province a deficiency of food sufficient to support some 10,000 and more men. So common is it that the children have a rhyme which is heard everywhere. 'The whole earth over the flowers [of opium] open; sleep goes, waking comes, to-day we possess, to-morrow it is lost, let the future care for itself; the people covet wealth and forget the evil; the earth (opium—foreign dirt) spreads everywhere without bounds.'

"The root must be removed if opium smoking is to be abolished, and in this way only can the people have plenty and life be nourished.

"In Kan Su and Shen Si, where it was first planted, the people made money and the mandarins also made much gain from the duty, and this plan they adopted to increase the revenues of a poor appointment; by-and-by, the land was overgrown with it, and less and less grain was produced, and thus it came about that the people began to starve—the valleys among the mountains were depopulated from insufficient food, and the people and soldiers were alike in want, those who came with money to buy could not procure anything, and then it was that they threw themselves into the rivers and canals. The rebellion in the S.E. was nothing to the misery caused by this want of food. A good opium harvest cannot be called a good year; it destroys the land—leaves the land uncultivated; and the growers of opium never try to bring in the waste ground and make it arable. The powers of the body are destroyed by the drug, consequently all other business suffers—even the cultivation of the grain for the food of man. The opium smokers become idle; and, after some years, the strength of their bodies and the abundance of the earth become paralysed—the people become poor, and all manner of evils arise. The evils are so great that they cannot be spoken of. It is fast spreading, and soon the whole earth will be covered with it, so that every one may see it. It would be easy to forbid its cultivation if the yamen did not make so much by it. If the great officers of the Government took the matter up in earnest their action would resemble the sun. Darkness flies away at his rising; so would it be with opium.

"The Censor is harassing his soul night and day, fearing that this will never come to an end. He begs the Emperor and the Empress to issue a proclamation to all the high officials throughout the provinces, to prohibit it and to make it a punishable offence. The people will then be afraid, and desist from its cultivation. Now that the Taeping rebellion is over and the people who were scattered, and who had lost their all, lands, houses, &c., are settling down to peaceful industry, it is a convenient time to inform them to grow the ordinary cereals, upon which depend the life of men, and not to listen to those people who wish to grow opium because of its lucrativeness. This is only temporary and apparent, not real prosperity, and the future will prove this."

## HONG KONG.

The latest date from this port is the 16th July. The outward mail of June 4 was received there on the 13th of July. As usual, by the French mail, there is not much news.

In the matter of *Regina* v. *Saint* the following letter has been received by the defendant's attorney from the Crown solicitor:—

Hong Kong, 13th July, 1869.

Sir,—The two letters addressed by you to the Honourable the Colonial Secretary on behalf of your client, Mr. Saint, concerning the costs in the above criminal information, have been transmitted to me with directions to acknowledge their receipt. I am further instructed to inform you that, under the particular circumstances of that case and for reasons which, though ample, it is unnecessary to detail here, the Government feels precluded from taking any further step in the matter at present.

As an important question of prerogative is concerned, his Excellency is advised to wait the result of the application made to the Privy Council for special leave to appeal against the judgment of the Honourable the Chief Justice; more particularly as to that portion of his honour's judgment by which the Crown is condemned in costs.

The necessity of making certain references on the subject of your communication has unavoidably caused delay in replying thereto.—I have the honour to be, Sir, your most obedient servant,

F. I. Hazeland, Crown Solicitor.

On this the *Mail* has the following very just remarks:—

"Mr. Acting Attorney General Ball consented on behalf of the Crown that the costs in this case should be regarded as if they arose in a case between private parties. By the above letter it appears that the Crown, as it is represented in this colony, holds itself at liberty to depart from an agreement which, if made between private suitors, it might be called upon to enforce in Court as a matter of common honesty. It is excellent to have a giant's strength, but it is tyrannous to use it as a giant. The exercise of such a 'prerogative' is no doubt a pleasant thing, but whether it is precisely generous or honourable we do not stay to inquire. On the whole we are not sorry that leave to appeal has (so the above letter states) been applied for, inasmuch as the result will probably be to teach the lesson that the highest prerogative

Digitized by Google

powers of the English Crown cannot be exercised at discretion by the Attorney-General (or his substitute) of a small Crown colony. Mr. Hazeland refers to the application for special leave as being already made. On June 4 defendant's solicitors at home had heard nothing of it, but of course the application may have been made since that date. We may be permitted to express surprise at the refusal to pay costs. Mr. Pauncefote, if we remember rightly, told the Court—at any rate he led the Court to believe—that security for costs had been given by the Government of Macao. That would be in accordance with the usual practice. Why, then, decline to pay costs for which the security was given? The acceptance of the security implies an original intention to pay costs; but it is possible that, among the other mistakes which have been committed by the Government in this matter, is the neglect to provide security—a mistake of which Senor Souza takes advantage, the damage falling upon the defendant alone. The taxed costs (only portion of the whole) amount to over 1,400 dols.—an amount which must necessarily be increased by the course which his Excellency has been *advised* to adopt."

The *China Mail* says:—"As the Ocean steamer *Ajax* was to have left Shanghai about an hour after M.I. str. *Phase* on the 9th, and has not yet arrived, some fears are expressed that she may have got on shore in the river, or been compelled to anchor an unusual time on account of fogs. We trust that the former is not the case."

### COMPTOIR D'ESCOMPTE DE PARIS AND ANOTHER V. RODGER AND OTHERS.

This was a motion for the leave of the Court to issue execution of the judgment debt arising from the recent decision of the Chief Justice in the *Min* case; and as the moneys therein stated have not yet been paid, although judgment was given on the 16th of June last, the Manchester firm, by their counsel, Mr. Whyte, apply for the payment of the money on the part of the banks here.

A long and confused conversational discussion arose between the Court, Mr. Whyte, Mr. Hayllar (counsel for the banks), and Mr. Pollard (who represents the official assignee), touching the complications in which the parties seemed to be now thrown.

Mr. Hayllar said that the large sum (56,392 dols.) was in the hands of the Court, under notice from the official assignee not to pay the same, which notice was given before his lordship's judgment. This state of things had gone on for a long time, and his only fear was that, if he paid over the money to the defendants (Rodger) there might be a responsibility cast upon them for so doing.

Mr. Pollard explained that the official assignee had not appeared before the Privy Council as a party in the recent case, but that some large and important questions would most likely arise regarding the bankruptcy of Lyall, Still and Co. Lyall had been declared bankrupt in London upon one of the Manchester debts.

His Lordship suggested that an inter-pleader bill could be filed. He had been promised a case prepared on behalf of the official assignee, which he had not got.

After some conversation Mr. Hayllar discovered that Mr. Whyte only moved for the costs and interest (some 9,000 dols.); and as he said they had never objected to pay that sum, he now undertook to pay it.

Mr. Whyte asked for costs of present motion, when another conversation ensued, resulting in an agreement to file affidavits on the matter. The Court then rose.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Advices from this port are to the 24th July. The outward English mail of June 18 was received there on the 20th July. Our Singapore despatches have not come to hand, but there appears to be very little news of importance, except that a telegram previously received of the failure of a large Chinese hong is now confirmed. Pay-tung is the name, and the liabilities are stated at 80,000 dollars.

## AUSTRIA AND SIAM.

(To the Editor of the *London and China Telegraph.*)

Sir,—The remarks contained in your impression of the 23rd instant, relative to the late treaty between Austria and Siam, do not do justice to the liberality of the latter Government.

It is set forth that the definition of prohibited and monopolised articles entered in that treaty at the request of the Austrian representative is an improvement, inasmuch, as it removes the innumerable difficulties and chicanery to which other nations are exposed in unintentionally infringing the laws and customs of Siam.

Permit me to state that the Siamese Government cheerfully conceded the addition referred to, viewing it as consonant with the extension of Foreign trade, and being at the same time aware that if such a definition is important to Austrian interests, the advantages derived would forthwith accrue to the commerce of other nations.

I can confidently refer to the resident Consuls of the Treaty Powers, who can best attest to the spirit of fairness which has always actuated the Government of Siam in the adjustment of cases extraneous to the provisions of existing treaties.—I am, Sir, your obedient servant,

D. K. Mason, Consul.

London, Aug. 26, 1869.

## MISSIONARIES IN CHINA.

The following extracts from a letter on this subject, written by a highly respected member of the missionary body in China, will be found interesting:—

Hankow, July, 1869.

The news from England has lately been full of interest, both to us missionaries and to Foreign residents generally. The notoriety which, as a class, missionaries have lately acquired contrasts, not a little strangely, with the general quiet of our daily life, the invariable kindness and respect which we receive from our mercantile fellow-countrymen, and the unmolested, friendly manner in which we are mingling with, and trying to benefit, the natives themselves. We care little what those who know us not may think or say, so long as those who do know us, who see both what we are and what we do, continue, by word and deed, to testify their approval and respect. A great dust must have been raised in England respecting us; but it has settled on their heads whose feet kicked it up, and scarce a stray particle has been wafted into this remote region. We hear the distant murmur of the terrible storm in certain official announcements that, hereafter, outside the Treaty Port, we have no claim on Consular assistance, and therefore must expect none. But that whispering echo does not cause us much alarm, specially as things go on as usual, and rather better than worse.

*Apropos* of the question of our right to purchase and build outside treaty ports, it may surprise you to learn that in Wuchang, the capital of two provinces, with the famous Li Hung Tsang for Vicerory, the mandarins themselves have procured for and sold to a certain Mission, an eligible plot of land, in a main thoroughfare, and near to the Viceroy's own yamun. Does that admit our right to be there, or does it not?

It seems to me that the whole case, as respecting missionaries in China, has, in England, been greatly exaggerated and misunderstood. One case has precipitated some statesmen and certain men of the press headlong into the conclusion that all are alike, all rash and untrustworthy, and all to be censured. A capital article in one of the recent Shanghai papers cleared the Yangchow missionaries of any particle of blame, clearly putting the blame on other shoulders, so that for the suspicion, censure, and calumny so freely vented on us there is not the slightest foundation. But apart from this Yangchow business, philosophers, such as have the ear of the Upper House, and such as write for the upper ten thousand through *The Times*, ought to have been able, from certain well-known premises, to have reached a different conclusion. *A priori*, missionaries, as such, should not be objects of great suspicion, dread, or hatred to the Chinese. Already, and from ancient time, China has tolerated several great and diverse religious sects. Side by side with the State religion, or Confucianism, grow up the sects of Tau and Buddha—three venerable growths, whose intertangled branches and commingled foliage show no lack of the spirit of toleration. Hence one might justly and logically conclude that missionaries would rather command a quiet hearing than provoke to violence. And such is the case.

To Christianity the Chinese have no violent objection, but against Foreigners they have considerable antipathy. When a missionary is attacked, the Foreigner is attacked; rarely, if ever, is he attacked as a missionary. Hence the difficulty of making a legislative distinction. Let the English Government try to put us beyond the shadow of its protection, if it will; it cannot do so without injury to all other British subjects in China. And knowing, as it ought to know, that these small outbreaks are not the result of a general popular ill-feeling, but rather of the prejudices of certain troublesome but influential minorities, the English Government cannot but be in the wrong in withdrawing the ægis of its protection from a class of conscientious and peace-loving men, who until now have gloried in the name of Britain.

## LATEST TELEGRAMS.

(Received via Galle, Aug. 24)

### CHINA.

Hong Kong, Aug. 3.—The Peking Government definitively refuses to ratify the Burlingame Convention with the United States. The death is announced of Consul Gibson. It is stated that his decease was hastened by anxiety in consequence of the recent troubles. Mr. G. Ross Browne, the American Minister, replying to an address of the British and American communities at Shanghai, emphatically denounced the policy of Mr. Burlingame, which he considered as evidence of the Chinese disinclination to progress. Equality in the relations was impossible at present, and a yielding attitude on the part of the Foreign Powers would tend to produce war, as the revelations made proved that the

Digitized by Google

British was a mistaken policy. The Chinese text of Mr. Burlingame's credentials differed from the Foreign version, and appointed him envoy to a tributary nation.

HONG KONG, AUG. 5.—The reports that some missionaries have been massacred in the province of Szechuen are confirmed. Twenty persons, among whom is supposed to be a French priest, have been killed. The Peking Government has ordered the Hungchan to proceed to Szechuen, in order to examine and report on this affair.

COMMERCIAL.

SHANGHAI, JULY 30.—Gray Shirtings, 6½ catties, 8¼ lb., $2 17. Cotton: Shanghai, 16 taels. Tea, Shanghai, active. Silk, active, but unchanged; settlements since departure of last mail, 3,400 bales. Export to date (China and Japan) from commencement of season, 12,500 bales. Exchange on London, bank bills, six months' sight, 5s. 11¼d. Freights: Tea, £2.

HONG KONG, AUG. 5.—Gray Shirtings, 6½ catties, 8¼ lb., $2 80. Water-twist, 16-24, $136. Cotton: Bengal fair medium, $17. Tea, at Foochow active; short supplies; total export (China and Japan), 53,000,000 lb. Exchange on London, bank bills, six months' sight, 4s. 6½d.

*** The above are in anticipation of the mail due in London on the 19th September.

# Commercial Report.

## CEYLON, STRAITS, JAVA, CHINA AND JAPAN IMPORTS.

SHANGHAI.—Piece Goods: The market for Gray Cottons had been very quiet during the week, but prices showed no change. Local and river wants had been fairly supplied by auction sales of damaged goods, and the reported stranding of a Tientsin steamer with a large cargo of uninsured goods on board had tended to keep the Northern dealers very quiet for the time. White Shirtings: Small sales are quoted at rather easier rates. Drills were lower, but wanted at the reduced values. American Jeans had also fallen. In Fancy Goods and Woollens there was nothing fresh to report. Metals.—Lead: A lot of L. B. had found a buyer at Tls. 5.35. The latest advices from the river ports led to the inference that the demand for the season was at an end. Nail Rod Iron: The sales of Nail Rods during the week had comprised some 6,000 bundles of small sizes at Tls. 2.15, 2,000 bundles of fair assortment at Tls. 2.20, and 3,000 bundles of large-sized Rods at Tls. 2.30 per picul. Bar Iron also had been inquired after, and some 150 tons of large sizes had found buyers at Tls. 2.40 to 2.45 per picul. Stocks of Nail Rod Iron were estimated at about 100,000 bundles, and of Bars about piculs 5,000 to 6,000. For Nail Rods the market was very dull, whilst Bars were more in demand. Coal: This market had been quiet, English and Cardiff kinds were arriving freely, but there were few purchasers at last rates. In other kinds there had been no arrivals or transactions of consequence. The cargoes arrived were—Trudel, John Milton, and Lord Macaulay, from Cardiff; Clara Babuyan and Inarime, from Sunderland. Quotations:—Gray Shirtings, 7 lbs., per piece, Tls. 1.9.4 to 1.9.7; 8.4 to 8.6 lbs., Tls. 2.1.6 to 2.2; 9 to 9.12 lbs., Tls. 2.6.5 to 3.1.0. White Shirtings, Tls. 2.1.5 to 3.0.0. T-Cloths, 6 lbs., Tls. 1.4.4 to 1.7.2; 7 lbs., Tls. 1.6.5 to 1.9.2; 8 to 8.4 lbs., Tls. 2 to 2.5.5. American Drills, 40 yards, Tls. 4.1.5. to 4.3. American Jeans, 30 yards, Tls. 3.6.5. American Sheetings, 40 yards, Tls. 3.6.5 to 3.8.5. English Drills, 40 yards, Tls. 3.8.0 to 3.9.0. Dutch Drills, Tls. 3.6.5 to 3.9.0. Camlets, English, SS, per piece, Tls. 12 to 12.5. Spanish Stripes, per yard, Tls. 0.5.5 to 0.8. Medium Broad and Habit Cloth, Tls. 1 to 1.5. Long Ells, Scarlet, 24 yards H.H., per piece, Tls. 6.4.8 to 6.4.5.; CPH, Tls. 6.4.5; Assorted, HH, Tls 6.5.5 to 6.6; CPH, Tls. 6.5.5 to 6.6.5. Coals (Cargo quotations afloat), Cardiff, per ton, Tls. 7.7.5 to 8; North Wales, Tls. 7.7.5; English, Tls. 6.5; Anthracite, nominal.

HONG KONG.—Messrs. Olyphant and Co.'s Circular, dated 16th July, is as follows:—During the last eight days very little change has taken place in this market for any description of goods, and business has continued upon a limited scale. Holders of Cotton Yarns have accepted dealers' offers in some instances, and the sales made have been within previous quotations; the enquiry is very light at the close. Transactions in Piece Goods have been restricted entirely to 8.4 lb. Gray Shirtings, of which only some 13,000 pieces have been settled, at former rates. Quotations for T-Cloths are unchanged. American Cotton Goods are very quiet.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

SHANGHAI.—Since the departure of the English mail the demand for Congou had continued active, and prices were fully up to those then current. Low common Hohows had been settled at Tls. 17, and sound common black leaf at Tls. 18¼ to 18½. Settlements of 36,000 chests and reshipments of 16,000 chests had been reported, and further business, of which no account has been given, had been transacted. The departures for London since the mail had been the Argonaut and Golden Spur, the former taking 1,110,233 pounds, and the latter 906,009 pounds Congou, making a total for the season to date of 17,280,556 pounds. In Green Teas about 8,000 half-chests had been settled at Tls. 33.75 to 40 for Ping-suey, and Tls. 34 to 38 for new Hoochow teas. Arrivals of new Teenkies and Moyunes were expected.

FOOCHOW.—After the despatch of the P. and O. mail the inquiry for Congoes became much more active, and, owing to the demand, which had in great part been for Australia, and the small supplies received, prices had become considerably firmer, and showed a slight advance. The teamen having sustained such heavy losses on the first crop, it was thought that a large portion of the second would be kept back; but this, of course, will be regulated by the character of demand at this port. A small business had been done in Souchongs, five chops (888 chests) having been settled at from Tls. 30.8 to 34.8 o.b.; these Teas were called finest, but in reality they were thin, flavourless, and of indifferent quality. The Oolong market was opened on the 5th July, at from Tls. 24.8 to 26.8 o.b. for good to superior cargo, or about 8 taels under last season's figures. Since that date business had been transacted on the same basis to the extent of 11,214 ½-chests. For Scented kinds but quiet inquiry had existed. Departures had been—for London, Spindrift, 1,219,012 lbs.; West Indian, 1,241,648 lbs.; Taiping, 1,129,124 lbs.; and Ziba, cargo not circulated.

AMOY.—Settlements of Congous had been made to the extent of 10,030 half-chests and 620 boxes, leaving in stock 10,151 half-chests and 3,643 boxes. Rates paid ranged from $15 to 21 per picul short. Since the opening of the market prices were easier, and business had become more general; we do not however expect to see any marked decline in rates. The Katharina Maria was loading for Dunedin. Second crop Teas were arriving, but, in this class, no business had been done. Oolongs: No transactions were reported. Stocks were 10,211 half-chests and 1,742 boxes.

CANTON.—There had been a pretty steady demand for Teas of all descriptions, and settlements had been:—Scented Caper, 38,000 boxes, at Tls. 16 to 26; Scented Orange Pekoe, 16,000 boxes, at Tls. 15 to 32; District Congou, 5,000 boxes, at Tls. 19 to 24; and Gunpowder, 2,000 boxes, at Tls. 20 to 26—making a total of 56,000 boxes. Prices were about 2 to 3 under opening rates, quality considered. Really finest Teas were scarce, and brought full prices. Transactions had been confined to two or three buyers; the usually largest operators were holding off apparently for lower rates. The Maitland was engaged full. The Seawfell and Dunmail had been laid on for London, rate £3 10s. For New York, the P. Rickmers and Enrique were loading at £2 15s., and the Game Cock and Nightingale were advertised to follow these vessels.

### SILK.

SHANGHAI.—About 600 to 700 bales had been settled at irregular prices, purchases in some cases showing a slight decline and in others a slight advance; but at the close the tone of the market was decidedly firm. Arrivals coming forward were of a very mixed and undesirable nature and tended to confirm previous reports of a short and bad crop. Unsold stock about 4,000 bales, a great proportion of which consisted of undesirable parcels. This remark applied specially to all Taysaams, which classes were worse in quality and not so clean as last year.

CANTON.—There had been a large business done in Silk, at slightly reduced prices. The discouraging advices from the home market had had a beneficial effect upon the market, and caused a reduction of from $25 to 50 in the offers made. Tsatlee, which was settled at $485 to 505 per picul for last mail, would not realise over $440 to 475. The Silkmen were asking higher prices for Re-reels, but buyers offered reduced values.

Arrivals not in the Tables.—Aug. 23, at Scilly, from Maulmain, Moravia; 24, from Bangkok, Chryseis; 25, from Rangoon, Pride of England; off Crookhaven from Rangoon, Garibaldi; at Plymouth, from Singapore, for Hamburg, Madagascar; off Falmouth, from Bangkok, Yokohama; from Rangoon, for Hamburg, Helios; 26, at Liverpool, from Rangoon, Belpore; off Palais, B. I., from Akyab, Karikal; 12, at New York, from Colombo, Lady Turner; 26, at Queenstown, from Rangoon, Ostendie; 27, at Falmouth, from Bangkok, Virgilia; from Rangoon, for Bremen, Hakon Jarl; from Rangoon, Metis; off Falmouth, from Akyab, for Bremen, Joseph Haydn; 25, at Queenstown, from Akyab, and sailed for Antwerp, Black Watch; 26, off Queenstown, from Rangoon, Glaramara; from Bassein, Dipton; 25, off Plymouth, from Batavia, for Rotterdam, Bezoekie; from Colombo, Liberator; 27, at Falmouth, from Bangkok, Hydra; 19, off Cape Clear, from Rangoon, Eriminta; 27, at Falmouth, from Bangkok, for Liverpool, Red Deer; 26, at Queenstown, from Rangoon, Brodrene; from Akyab, Argo, Alpine; off Queenstown, from Bassein, Sterling; from Akyab, Heidi, Nordeus Dronning; 15, at New York, from Manila, Agra; off the Start, from Colombo, Queen of the Sea; 25, off Plymouth, from Batavia, for Amsterdam, Aria and Betsy; 28, at Falmouth, from Akyab, Harwich; 26, off the Lizard, from Colombo, Harvest Home; 28, at Penzance, from Colombo, Phillis; at Queenstown, from Akyab, Gladstone; 14, at San Francisco, from Hong Kong, John L. Dimmock, Malay; 29 at London from Hankow, Erl King (s.s.); at Queenstown, from Bassein, Nena Barbena, Barracouta; from Rangoon, Lesbia, San Bartolomeo; at Falmouth, from Rangoon, Jupiter, Clara Morse; from Bangkok, Lota; from Saigon, Robert Rickmers; off the Start, from Manila, Sir Jamsetjee Family; at Falmouth, from Rangoon, Woodcote.

Departures.—Aug. 26, from London for Cardiff and Hong Kong, Trion; 24, from Cardiff for Chefoo, Therese; 25, from Liverpool for Singapore, Glenlyon; 24, from Glasgow for Penang, James Paton; 27, from London, for Hong Kong, Borealis; for Cardiff and Singapore, St. Petersburg; 26, from Swansea, for Galle, Suomi; from Liverpool, for Hiogo, Isolina; 27, for Shanghai, Banian; 14, from San Francisco, for Hong Kong, Haze.

Laid On.—At Liverpool for Yokohama, Haddington; for Shanghai, Bolivia.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

Bell.—On the 27th June, the wife of F. H. Bell, Esq., of a daughter.
Bush.—On the 21st Aug., at Greyfriars, Chester, the wife of Commander Bush, R.N., of a daughter.
Carbery.—On the 9th July, at Kandy, the wife of Dr. J. Carbery, Assistant Colonial Surgeon, of a son.
Irving.—On the 15th July, at Singapore, the wife of Charles John Irving, Esq., Auditor-General of the Straits Settlements, of a daughter.
Keele.—On the 6th July, at Shanghai, Mrs. O. R. Keele, of a daughter.
Morgan.—On the 29th July, at Whist Bungalow, Colombo, the wife of Richard Hillerand Morgan, Esq., of a daughter.
Padday.—On the 6th July, at Penang, the wife of H. J. D. Padday, Esq., of a daughter.
Pigott.—On the 19th July, at Colombo, the wife of Henry R. Pigott, missionary, of a daughter.
Place.—At Shanghai, on the 29th June, the wife of T. Place, jun., of a son.
Ramsay.—On the 22nd July, at Hankow, Mrs. Hugh F. Ramsay, of a son.

### MARRIAGES.

Le Feuvre—Dodsworth.—On the 20th July, at St. Paul's Church, Kandy, by the Ven. Archdeacon Mooyaart, assisted by the Rev. W. Clarke, William Seward Le Feuvre, Esq., to Jane, younger daughter of B. Dodsworth, Esq.
Marshall—Clarke.—On the 24th August, at St. Georges, Everton, Liverpool, by the Rev. Charles M. Aldis, M.A., incumbent of Wrenbury, Cheshire, uncle of the bridegroom, John Clarke Marshall, captain of the *Douro* (s.s.), to Ellen Jane, second daughter of William Clarke, Esq., of Liverpool.
Thompson—Tate.—On the 13th July, at Christ Church Cathedral, Colombo, by the Rev. W. E. Rowlands, assisted by the Rev. J. Bacon, Henry Thompson, of Kandy, to Miss Harriet Louisa Tate, of the same place.

### DEATHS.

Cooper.—On the 26th July, off Woochang, Simon W. Cooper, of Babylon, Long Island, U.S., Master of the Imperial Chinese gunboat No. 2, aged 42.
Droege.—On the 4th July, Wilhelm Christian Albert Droege, aged 10 months and 20 days.
Hendrickson.—On the 1st July, at Shanghai, suddenly, Mr. W. T. Hendrickson.
Pratt.—On the 8th July, at Shanghai, Mr. G. S. Pratt, of the Imperial Customs, Hankow, aged 37 years.
Ramsay.—On the 27th June, at Hankow, Francis Claude, infant son of Hugh Francis Ramsay.
Reeks.—On the 19th July, at Shanghai, of heart disease, Sarah Reeks.

## GERMANY.

—o—

(FROM OUR OWN CORRESPONDENT.)

Hamburg, August 26.

Although in Prussia the fullest liberty of conscience exists, and all professions are placed on an equal footing, yet it cannot be doubted that it is, and has been ever since the Reformation, a pre-eminently Protestant country. The great strongholds of the Catholic Hierarchy are the provinces of Silesia—annexed to the Monarchy by Frederick the Great as the result of the Seven Years' War, and where the Catholics and Protestants are to be found in equal numbers—and the Rhine Provinces, which were attached to Prussia by the Congress of Vienna after the peace and the final breaking up of the Confederation of the Rhine. Here the Catholic element predominates over the Lutheran in the proportion of three to one. But Berlin is essentially a Protestant city, and it has therefore created a feeling of much bitterness and discontent to find the Catholics making of late strenuous exertions to extend and consolidate their sphere of action in various ways. The negotiations between the Court of Prussia and the Papal See for the appointment and recognition of a Nuncio from the Pope at Berlin have been broken off in consequence of unmistakable proofs of public opinion being decidedly averse to such an innovation; but the Roman Catholics have been unusually energetic in their attempts to obtain a footing at Berlin, and have spent a large sum of money in the construction of an establishment of monks of the Dominican Order in the suburb of Moabit. This convent has just been completed and taken possession of by the monks, which has given great umbrage to the Protestant part of the population, who have expressed their feelings by committing great excesses for several nights last week, breaking the windows, openly insulting and assaulting the monks, and one evening would have formally stormed the convent and demolished it had not preventive measures been taken by the police; so that when the mob were about to carry their project into execution they were taken by surprise at seeing a hundred and fifty policemen issue forth from the portals. An engagement ensued, in which about forty of the rioters were more or less severely wounded and many of the ringleaders captured. The excitement against Catholics, and especially against convents, has been much increased by the late revelations of the Carmelite nunnery at Cracow, abduction of Hebrews, and other irregularities that have lately been brought to light in monasteries on the Rhine and in other parts of Germany.

Great excitement has been created in this city by the intelligence of the loss of the Hamburg-American Company's fine steamer *Germania*, in Trepassy Bay, near Cape Race, Newfoundland, where she ran aground in a fog; passengers, crew, and mails saved, and brought home by the *Cimbria*, belonging to the same company. The ill-fated vessel was of 2,000 tons register, and was built on the Clyde by Messrs. Caird and Co., of Greenock, in 1863. She was considered a good seaboat, but was not so fast as the other vessels of the company constructed more recently by the same eminent firm. She cost originally a million marks banco, but had been so successful during her career that the directors were enabled to write off considerable sums every year, so that on her thirty-seventh and last voyage she stood in the company's books at somewhat less than half her original cost, for which she was fully insured.

An International Horticultural and Floricultural Exhibition on a very grand scale will be held in this city from the 2nd to the 14th of September, for which the preparations have been going on for a whole year, as they include a transformation of the former ramparts, fosse, and glacis of the fortifications into a park of singular beauty, which will remain *in statû quo* after the Exhibition as a place of recreation for the public. Promises of efficient support have been received from almost every part of Europe and some States of America, and many valuable prizes to be competed for have been sent by various potentates. Among them is a magnificent silver-gilt vase presented by Her Majesty, and bearing the simple inscription—"For the best assortment of grapes. Victoria R. 1869." For this there will be a very keen competition, for not only will many assortments of hothouse grapes be sent over from England, but space has been bespoken and reserved for seventy-five assortments from different parts of France, more than a hundred from the Rhine, and numerous others from Austria, Italy, Portugal, Belgium, and other countries. The King and Queen of Prussia have sent to the committee a splendid vase of china, made at the Royal Porcelain Manufactory at Berlin; the Kings of Wurtemberg, Bavaria, and Belgium, silver vases; the Senate of Hamburg, various money prizes to the extent of 250 ducats, and there is an almost interminable list of prizes placed at the disposal of the managing committee by wealthy citizens of this city and other private patrons of horticulture and floriculture in different parts of Germany. Her Royal Highness the Crown Princess of Prussia

Digitized by Google

(Princess Royal of England) has intimated her intention of sending over her head gardener to attend the Exhibition and draw up a special report for her own perusal, and at the same time he is to make a selection of the finest rose-trees for transplantation in the autumn to her Royal Highness's own rosary in her garden at Potsdam.

COMMERCIAL.

Cassia Lignea is in continued good request, and within the last few days 6,000 chests have been sold by importers at 12¾ sch. bco. per lb. After a long period of lethargy, Pepper has again come into favour, and as the autumn approaches a more lively business may be expected. Mace and Nutmegs command an easy sale at full prices, but Cloves are neglected. In Rice the transactions have been on a very limited scale, as importers make such great pretensions that buyers are unwilling to come forward. The Tea market is firm, and 420 chests of Congou changed hands, as well as some hundred chests of Souchong and Pekoe by the dealers. Spelter: Totally neglected, and quotations at 13¾ mks. bco., both for delivery and in loco, purely nominal.

SHIPPING.

Sailed.—Pyrmont, Niemeyer, to Shanghai (this is the vessel that saved part of the crew of the Blue Jacket, burnt at sea, for which Captain Niemeyer has just been rewarded by a present from the British Government of a gold chronometer and chain); Panama, to Hong Kong (got aground on Schaarhorn, at the mouth of the Elbe, but got off by assistance from the lightship, and proceeded to sea.)

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, August 26.

Whilst the members of Parliament are enjoying their holidays, and the Ministers are busy making up their Budgets (that for the East Indies is already printed), the public is occupied with "Congresses," exhibitions, and rifle-shooting. Columns in the newspapers are filled with reports of the festivals in the camp at the Bildt, where the volunteers met, in order to try their rifles and to get an idea of military life. The heath offered a beautiful aspect, with its bands of music and crowds of uniforms that might be heard and seen for several days. The King, the Prince of Orange, and Prince Frederick were present, and assisted in the military festival from the beginning, until it ended with a display of fireworks in the neighbouring town of Utrecht. The volunteers have now returned home. The public has not much sympathy with these military festivals, and none of our leading papers published reports, for which they were accused by the *Dagblad* of want of love for their fatherland.

In Amsterdam a most interesting meeting was held some days ago, in accordance with an appeal from the International Association for Promoting Trade. Mr. C. A. van Hemert occupied the chair. The principal question discussed was a proposal to organise a communication by steamers between Holland and Java *via* the Suez Canal, when that is opened. After a great many speeches the following resolutions were carried:—1st. That a congress of tradesmen should be held at Cairo, in which Holland should be represented. 2nd. That it was most necessary to establish a steam line between Holland and Java. And, 3rd. The meeting agrees with the proposal that the Suez Canal shall be declared neutral. The question now remains, whether the steam line will be established, or whether it will prove a mere paper project. In such matters we Dutch are very slow; our capitalists prefer to buy and sell metal rather than to invest their money in industrial undertakings. This is proved by the very small success of the endeavours to establish a steam line between one of our harbours and America. The papers are publishing every day "reclames" for this plan, but not a guilder is furnished. The only meeting held to promote this plan assembled at Enschede. Of course, the proposal was applauded by the "industrials" of Twenthe, who profited by the occasion to discuss the India Agrarian Bill, whilst it was resolved to forward an address to the Second Chamber, in order to urge the necessity of the Bill being carried, whether altered in a more liberal sense or not.

In a few days the members of the International Statistical Congress will meet in the Hague. It is stated that most important discussions will take place about our colonies. The meeting of this congress has caused the postponement of that of the Association for the Welfare of the Javanese for some days. At this congress a most interesting project will be discussed, namely, that of Mr. H. de Bruyn, ex-director of the public works in India, which proposes that the Government, when the Agrarian Bill is passed, should grant to the association 20,000 bouws of waste grounds belonging to the regencies of Demak and Grobogan. The Association intends also to promote a system of agricultural instruction for the natives. This plan meets with much opposition, both from the leading Liberal and the Conservative press.

There is much talk here of a congress of "journalists," which can only be an illusion. Our editors and "colaborators" are too fond of quarrelling for such a congress to give a satisfactory result; in the meantime it is stated that a medal has been engraved by Mr. Charles Wiener in remembrance of the abolition of the "tax upon knowledge," a fact which is still much lamented by the Conservative papers.

The "Batavia letters" published by the *London and China Telegraph* are still a subject of discussion in the daily press. In Conservative circles rumours are still circulating about alterations in the Cabinet. I, however, doubt very much if there is the least foundation for them. H.M. has approved of the appointment of Mr. R. A. Mees as Consular Agent for Italy at Yedo.

PRODUCE MARKETS.

Quietness has continued to prevail in the demand for most of the leading articles of colonial produce, and hardly any changes of note have occurred in their market value, but the firmness generally evinced by holders causes the tone of the market to remain pretty healthy.

Coffee.—In anticipation of the Trading Company's public sale of about 72,200 b. Java and Padang to be held here to-morrow, there has continued to be but little stirring in this article, but the demand for actual requirement is nevertheless evidently increasing. Sales have been closed since my last report:—320 bags Java, ex Gerredina Wilhelmina, at 30c. to 40; 331 b. Padang, ex Henriette, Maria, Sarah and Zaanstroom, at 31⅜c. to 33½; 361 b. Java, ex Waterloo; 1,500 b. Java, ex Geredina Willemina and Waterloo, at 27⅜c. to 38; 2,402 b. Java, ex Waterloo, at 31¼c. to 36; 2,600 b. Java, ex Bulwark, at prices not named.

Sugar.—Raw looks very quiet, and the transactions are limited. The following parcels have changed hands:—747 mats Samarang, ex Eva Johanna, No. 13¾, fine and moist quality at 35f.; 1,543 mats Sourabaya, ex Antelope, No. 13¾, on secret terms. A very firm tone pervades the close of the market, and prices range in the proportion of ¼f. to ¾f. below the currency of the July sale.

Tea remains in a healthy position, but transactions are on a limited scale. The following are the figures of the brokers' valuations of the Java teas, to be put up at the public auction at Amsterdam on the 8th proximo:—Dust, 85c.; Bohea. 65c. to 90c.; Pouchong Bohea. 90c.; Souchong Bohea, 95c.; Congou, 78c. to 100c.; Campoy, 80c. to 92c.; Souchong, 80c. to 125c.; Pouchong, 92c. to 95c.; Pekoe Souchong, 95c. to 170c.; Souchong Pekoe, 140c.; Pekoe, 200c. to 500c.; Skin, 90c.; Twankay, 110c. to 115c.; Hyson, 150c. to 170c.; Young Hyson, 150c. to 170c.; Imperial, 170c.; Gunpowder, 180c.

Tobacco.—The public sales of Java to be held here on the 2nd of September will include a total quantity of 6,308 b. Java, whilst at Amsterdam will be offered on the 27th inst. 7,644 bales. On the 12th inst. were sold in auction:—355 bales Java Kepandjen Blitar, in average at 32c.—3 lots bought in at 30c. to 40c.; 220 b. Tanah Wangie, in average at 39c.; 2,157 b. P. A. Malang, in average at 24c.; 439 b. Kederie Kotta/P, at 31c.; 90 b. Kederie, at 26c.; 226 b. M. S/K., at 20c.; 241 b. M. D. P., at 40c; 42 b. Blitar, at 28c.; 1,270 b. B. D. R., at 29½c.; 140 b. Nicot, at 19½c.; 33 b. A. and L. Penawangan, at 20½c. The prices are all in average. Sales have also been closed by private contract of 275 b. Java, ex Sourabaya Packet, and 440 b. Java Tempeh, ex Glenclune.

Arrack.—Sales have been closed by private contract at Amsterdam of 180/1 and 82/2 casks Batavia, ex Dunedin, which were put up to tender a fortnight back, without being then adjudged.

Java Indigo.—The only transactions to report are 30 cases, which have changed hands at full rates. 153 cases of recent importation are to be put up to tender this day week, which will again impart more activity to the market.

Spices.—The advertisement of the Trading Company's annual sale has not exercised much influence on the position of Nutmegs and Mace, which continue firm at former prices, but there is little actual business doing. I have to report the sale of 18 cases Mace, ex Henriette, at 153c., and in addition 24 cases private of importation have been disposed of at prices which were kept secret. Immediately after the Trading Company's sale, to be held on the 31st inst., about 200 casks Amboina and Zanzibar Cloves will be offered.

Rice.—Prices continue firm. Sales have been closed of the shipment of Indramayoe Table, ex Triton, of which 2,244 bags were sold at 9¾f., and 5,833 bags at 8½f. The cargo of 8,761 b. Java table, ex Johanna Cornelia, has been disposed of at 9¾f. and 8¾f.

Tin.—The tone of the market has not improved. Banca has been sold on the spot at 79½f. to 78½f., and for delivery, ex the next spring sale, at 69½f., which establishes a further decline of ½f. Billiton changed hands at 77¼f. to 77f.

Rattans.—A shipment of 489 piculs, ex Triton, has been disposed of at a price kept secret.

Kapok.—306 bales have changed hands here at prices that did not transpire.

Drugs.—A steady demand prevails for Cassia Vera; but the advanced prices demanded by holders are but reluctantly submitted to, which checks business; stocks, however, are but small, which assists the holders in displaying great firmness. The article is held on the spot for 48c. to 51c. according to quality. Gambier is offered at 11¼f., and lower bids are refused. Cutch in cubes is on sale at 15¼f. Our small stock of Long Pepper remains on sale at 20c. Siam Sago is offered at 12½f. About three tons Gutta Percha changed hands by secret tender, without the price having been allowed to transpire. Gum Damar of fine quality cannot be purchased under 57c.

Tortoiseshells.—I have to record the sale of 5 cases of late importation from Macassar ex Neerlands Vlag, at a price kept secret.

Hides.—A few small lots, Sourabaya Cows and Buffaloes, ex Wyk aan Zee, have changed hands.

SHIPPING INTELLIGENCE.

Arrivals.—Aug. 19, at Texel from Batavia, Gerard Pieter Servatius; 21, at Texel from Banjoewangie, Staarsraad van Ewyck.

Departures.—Aug. 17, from Texel for Batavia, Anna Digna; for Samarang, Zes Gezusters; 20, from Texel for Batavia, Ymuiders; for Samarang, Anna Maria Wilhelmina.

Passengers Inward.—From Java, per Gerard Pieter Servatius: Messrs. Timmermans and family, Schaefer and family, Van Uytenhoven and family, and Van Ham and son. Per Staatsraad van Ewyck; Messrs. Motta and family, Dumont, Veenhuiser and family, and Miss Abbink.

Passengers Outward.—For Java, per Anna Digna: Messrs. L. Vermandel and G. Burlett, Mrs. Raedt van Oldenbarneveldt and two children, the officers Raedt van Oldenbarneveldt, Raaymakers, and 125 soldiers.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—"The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks.—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be accompanied by the name and address of the writer.

*Any information required by Subscribers, in reference to Commercial or General Matters in* China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

The applications for this journal from the Straits, China, Japan, &c., having lately become more numerous, a supply is now sent to the Agents of the London and China Express in those countries. The subscription is $8 per annum.

THE LONDON AND CHINA EXPRESS,

PUBLISHED on the departure of the Fortnightly English Mails *via* Marseilles, and Monthly French Mails, contains a Summary of English, American, Continental, and General News, Commercial and Shipping Reports, and Special Notices of Trade with the Far East.

Subscriptions, 54s. per annum, including Postage. Export Supplement, 12s. extra.

# The London & China Telegraph.

*LONDON, MONDAY, AUG. 30.*

## MORE TELEGRAPHIC SCHEMES.

After having unceasingly advocated, for some years, the construction of a direct line of telegraphs between England and China, we have had no little satisfaction in announcing the series of undertakings whereby an independent chain of communication, in English hands throughout, is secured as far as Galle. We long since noticed two or three projects for the extension of the system to the Straits, China, and Japan, but from various causes these hung fire, until it began to seem as if the idea had on all hands been indefinitely postponed. Suddenly, however, quite a number of competing companies have presented themselves to the public for the purpose of constructing telegraphs between Ceylon, the Straits, Siam, Saigon, Java, Australia, China, and Japan. These projects are so numerous, and have been brought out so suddenly, that we have neither time nor space for a close analysis of their respective merits; all we can do just now is to give a brief description of each, merely remarking, *en passant*, that some of them have very powerful support, and that there is not the slightest doubt that one or more will be rapidly carried into execution.

The one that is most prominently before the world just now is known as "The India, Australia, and China Submarine Telegraph," which proposes to lay a series of light cables on Mr. Varley's plan (which we have described on former occasions), to connect Ceylon with the Straits Settlements and China (Hong Kong, Amoy, and Shanghai) with a branch from Singapore to Java and Australia. It is proposed to commence forthwith the section between Ceylon and Penang, which is to be completed in the course of next year, at a cost of £350,000. The cable is to be constructed by the India-Rubber, Gutta-Percha, and Telegraph Works Company, and most encouraging reports are published as to its efficiency. According to this plan, the system would be extended to all the principal ports without the use of any land lines.

Yesterday there appeared the preliminary announcement of "The China Submarine Telegraph," which does not propose to deal with Australia, but limits its operations, at all events for the present, to the Straits and China. The promoters, instead of taking up the Indian system at Ceylon, propose to start from Rangoon, laying a submarine cable thence to Penang, Singapore, Hong Kong, Amoy and Shanghai. There is also a short link to join Singapore with the Java lines, which would ultimately form a connecting link with Australia. These cables would be similar to that now being manufactured for the "British Indian" Company, with portions of extra thickness in the neighbourhood of the points where it is landed. This project, like the first-mentioned, depends entirely on submarine cables, except for the approach to Shanghai, to which point it is proposed to carry it from Yangtsze Cape, a distance of thirty miles, overland. Here the promoters are boldly facing the difficulty of introducing telegraphs into the Chinese Empire—a difficulty that must be grappled with sooner or later, and the sooner the better. The capital required for the whole series of cables from Rangoon to Shanghai is estimated at £1,110,000, on which a dividend of ten per cent. is expected. It is thought the entire plan may be carried out within twelve months.

The plan brought forward last year, for an extension of the land lines already existing as far as Rangoon, on to Bangkok, Saigon, and thence by cable to China, is of course perfectly familiar to our readers. This scheme, we believe, was to have been brought out under the name of "The Eastern Asia Telegraph Company," but the promoters were deterred for a time by the terribly depressed state of the commercial world. Now that this difficulty—at least as far as telegraphic schemes are concerned—is removed, the prospectus is likely to be issued very shortly, and, we understand, under most favourable auspices, the Indian Government having expressed its willingness to extend the Indian system from Rangoon to any convenient point on the Siamese frontier, to meet the lines of the new company. Here, it will be observed, we have a combination of land and sea lines.

In our last issue we noticed the intention of the "East India, Asiatic, and American Telegraph Company" to issue a prospectus in this country shortly. The proposals of this company are nothing less than gigantic. Starting from Vancouver Island, a series of cables would be laid to Sitka, Kodyak, the southernmost point of Alaska, one of the Aleutian Islands, the Kuriles, and so to Hakodadi, Yokohama, Shanghai, and thence southward. The capital required is stated at £3,000,000, of which a considerable portion is said to be already promised in America, England and Russia. That which seems the most formidable portion, namely, across the North Pacific, does not really present any great physical difficulties, for although the total length of the cables would be something like 4,000 miles, it would be in sections, the longest of which would be shorter than some cables already successfully laid; and these short lengths, moreover, have to be submerged in smooth seas of moderate depth.

There remains one more scheme to notice—that of Messrs. Pollard, Kresser, and Heard, of Hong Kong, which we have already described at some length. We now hear that this is being actively pushed forward, a large portion of the *materiel* for the land line between Rangoon and Saigon having already been sent out, while the remainder is being rapidly prepared for shipment. No prospectus has yet been issued, as the concessionaires themselves are finding the money for the land lines; but they will come before the public when these are completed, and the cable to connect them with Hong Kong is proceeded with. The projectors of this scheme consider it prudent not to make any immediate attempt to land a cable on the coast of China, and therefore intend to stop at Hong Kong. With this we close our record for the present.

## THE END OF THE BURLINGAME SHAM.

In March, 1868, we strongly blamed Lord Stanley, then Secretary for Foreign Affairs, for being so easily persuaded into entering into negotiations with Mr. Burlingame. "Whatever concessions," we then remarked, "Lord Stanley "may make to the Chinese, as represented by Mr. Bur- "lingame, must of course be faithfully carried out; on the "other hand, whatever undertakings Mr. Burlingame "may enter into on behalf of his slippery clients will "inevitably be treated by them as waste paper." Our prediction has been verified to the letter. The Peking Government, we are informed by a telegram dated Hong Kong, August 3rd, has actually refused to ratify the Convention entered into with the United States Government; and had a similar Convention been concluded with England, that would undoubtedly have been treated as "waste paper" also. The Chinese text of Mr. Burlingame's credentials, it seems, differed materially from the English version, the former being framed as if appointing him envoy to a tributary nation. The sham, and a barefaced sham we have pronounced it from the beginning, is exposed at last. According to our notions of decency, the only resource Mr. Burlingame has, is to resign his position at once; should he retain it, after this exposé, the only conclusion the world can come to will be that he was cognisant of the fraud all along, and connived at it in consideration of the handsome terms offered. Whether we regard Mr. Burlingame as the accomplice, or the dupe, of the wily Chinese, Lord Clarendon certainly figures in the latter capacity, together with all who put their faith in the "shining cross" humbug. It is fortunate for Her Majesty's Ministers that they cannot now be questioned in Parliament as to the effect this disclosure is to have on our relations with China.

A paragraph has appeared in several of the home papers announcing the approaching marriage of the Rajah of Sarawak with Miss de Windt, daughter of the late Clayton de Windt, Esq., of Blunsden Hall, near Swindon.

## THE STRAITS SETTLEMENTS ASSOCIATION.

Up to the close of the Session, the Committee of the Straits Settlements Association carried on their efforts with unabated vigour, and, not content with the good they had undoubtedly achieved in securing an inquiry into the expenditure of the local Government, strove to do more. But the official exodus that instantly followed the prorogation brought their labours to an end for the present. The committee intended to have had an interview with Lord Granville before he left town, but we understand that a letter has been addressed to the Secretary of the Association, from the Colonial office, intimating that his lordship is as yet unable to discuss the question of expenditure by the Straits Government, in consequence of not having received sufficiently full replies to his inquiries. As regards the changes proposed by the Association in the Legislative Council his lordship requires a "more definite" proposition,—unaccountably as it seems to us, for anything more definite than the suggestion in the "Memorandum No. 2," issued by the Association, which appeared in our issue of June 10, it would be hard to frame. Equality in the numbers of the official and non-official members of the Council, and further that such equality should be attained by a reduction in the strength of the former, is surely a definite enough proposal, and is the only one which will meet the wishes of the colonists. Lord Granville, we regret to learn, declines to interfere to prevent the Judicial office becoming a thing of contempt by its subjection to the caprice of a local Governor. This is so serious a matter that attention cannot be too often called to it. Most Englishmen will be incredulous when informed that in many of our colonies the judges in the Supreme Court are practically in the position of inferior members of the Executive Government, while few but will be horrified at the instance brought before Lord Granville's notice of a wealthy native in Penang who had a claim on the Government for stores supplied by him, but who did not dare to press it in the Law Courts *because* "the judge was only a servant of the Governor!" And yet Earl Granville is to be found defending a system which allows of such stains as these on the administration of justice, on the ground, not that it is right or reasonable, but that it is the practice in all other Crown colonies! No stronger argument could be stated to show the need of a Colonial Union such as we understand is likely to be arranged before next session, and which may be able to bring sufficient influence to bear in the House of Commons to induce a consideration and reconstruction of the system of government in Crown colonies generally. We are glad to note that our suggestion for such an union of the forces of the various colonial associations has been favourably received both at home and in the East.

## THE MISSIONARIES AGAIN.

The China Missionary controversy is not over yet. A letter signed "Veritas," dated from Shanghai, has appeared in *The Times*, wherein the writer, who proclaims himself "A Three Years' Resident in China, Formosa, and Japan," makes a furious and undiscriminating onslaught on the character of all Protestant Missionaries. After an enthusiastic tribute, the justice of which we cheerfully acknowledge, to the self-denying life of hardship and peril voluntarily led by the Romish Missionary in China, the writer goes on to paint, in glowing and very far from truthful colours, the easy and luxurious existence, as he thinks it, of the Protestant—his "comfortable bungalow . . . his well-stocked table and full cellar . . . his wife and children (the last certainly above the proportion usually allotted to man), perfect immunity from all personal danger, with the inevitable gunboat under his window." This is malicious and one-sided enough, and the allusion to the children is in especially vile taste; but, not content with a deliberate misrepresentation of the mode of life of the Missionaries, "Veritas" (who could hardly have chosen a more inappropriate signature) pours upon their devoted heads a string of opprobrious epithets, such as "the sleek, typical, under-educated class"—(by-the-way, what does "typical" mean in this connection? something dreadful, we suppose)—"narrow-minded," "bigotted" (with two t's), "over-fed, illiterate persons," "*soi-disant* proselytarians, wandering about the country with their price-list and samples in "three pockets, a Bible and tracts in the fourth"—and so on, *ad nauseam*. A more vindictive, libellous attack it would be hard to imagine; and we are at a loss to understand how *The Times* could have been induced to afford space to such a tirade of vulgar abuse. "Veritas," however, has been ably, but temperately, answered by the Rev. George Moule, who shows by a brief, but succinct sketch of the labours of some of the leading Protestant Missionaries in China, how grossly untrue are the charges indiscriminately brought against them. We printed both the letters in our last issue.

## OURSELVES.

Not very long ago, in the course of some remarks on the colonial press, we had occasion to advert to the fact that, although the system of anonymous journalism which obtains in England is supposed to extend to British possessions abroad, it practically does not do so, for in small colonies or settlements in the Far East it becomes impossible for the editor to conceal his individuality. Our own journal, although published in London, is necessarily to a certain extent governed by the same rule, and it is therefore no secret to our readers that our senior proprietor, Mr. Angier, has recently made a tour round the world, devoting considerable time and attention to Japan, China, Java, the Straits Settlements, and Ceylon, with the view of improving the position of this paper and the *London and China Express* in those countries, and at the same time increasing their utility to subscribers. This journey and its objects being, as we have said, a matter of notoriety, we shall probably not be wrong in assuming that many of our readers will hear with pleasure of Mr. Angier's safe return; and this announcement affords us an opportunity of tendering our acknowledgments to the many friends at the different ports visited, from whom he has received much courtesy and hospitality, together with valuable facilities for obtaining information. For this generous treatment our thanks are due alike to Government and Consular officials, merchants, planters, and, in fact, all who have directly or indirectly aided our representative in his arduous undertaking. We are happy to be able to add that the results will be mutually profitable to ourselves and our subscribers; for while on the one hand we are assured of an increased measure of support, on the other our sphere of usefulness is widely extended, and we have been enabled to make arrangements whereby the value of both papers will be largely increased.

## OUR TELEGRAPHIC EXTRA.

It is hardly necessary to inform our readers that notwithstanding the numerous projects on foot for the extension of telegraphs to China, some time must yet elapse before any of them can be completed; and that in the meanwhile telegrams to and from ports eastward of Ceylon must continue to be forwarded by the mail steamers. Having ascertained that the want of a regular, complete, and thoroughly reliable budget of telegraphic news is greatly felt at the various ports in the Straits, Java, China, Japan, &c., the proprietors of this journal have commenced the publication, at Galle, of a "Telegraphic Extra," and by last mail received intimation that the first number had been issued, and supplies forwarded to all our agents in the above-named countries. In addition to the ordinary telegrams of political, general, and commercial news received at Galle up to the day of the steamers' departure, the "Extra" will contain the London and New York prices of the leading articles of China, Japan, Straits, and Java produce, as well as special telegrams of news relating to the affairs of those countries. The "Extra" will be forwarded by each P. and O. and French mail steamer, and orders for it will be received at any of our agencies, or at the head office in London; the subscription is, to subscribers to the *London and China Express*, 6 dols., or 27s., per annum; to others, 12 dols., or 54s.; payable in advance. Our agent at Galle is instructed to supply the "Extra" to all homeward-bound passengers who purchase the *Express* there.

---

The Brindisi route is slowly but surely increasing in favour with travellers to and from the East. The Italian railway companies have now made arrangements to run through trains between Brindisi, Turin, and Susa, in connection with the arrival and departure of the Adriatic and Oriental Company's steamers at the former ports.

## THE COLONIES.

A meeting of influential persons connected with the colonies has been held at the Westminster Palace Hotel, to consider the tendency of the recent discussions in Parliament on colonial subjects, and of the policy now being adopted by the Government in reference to the colonies. This has resulted in a letter being written to the Governments of all the principal colonies, wherein it is stated that this policy, as recently applied in the case of New Zealand, threatens, as an ulterior result, a severance of the connection between the colonies and the mother-country, perhaps hurriedly and in an unfriendly spirit, disastrous alike to the mother-country and the colonies. To avoid such a catastrophe, and at the same time to discuss the whole question, it has been suggested that a conference of colonial representatives, duly authorised by the respective Governments of those colonies in which responsible government has been established, should be held in London. As the Imperial Parliament will meet probably in February next, it is thought the proposed Conference may conveniently be held about that time. Various suggestions are enumerated for remedying the evils pointed out; as, for example, to obtain representation for the colonies in Parliament; to constitute an Imperial Congress, charged with special functions, in which the colonies should take part; to place those colonies in which responsible government has been established upon the footing of Foreign Governments as regards diplomatic intercourse; to place the administration of colonial affairs under the management of a board constituted somewhat upon the model of the Indian Board. At present, the only Governments that have been communicated with are those of Australia, Canada, and South Africa; but, should anything come of the movement, our Eastern colonies will be interested also. The Honorary Secretaries of the Committee are Messrs. James Youl, Henry Sewell, and H. Blaine, and they date their manifesto from the Westminster Palace Hotel.

## THE SUEZ CANAL.

M. de Lesseps has presented his report for the year 1868, and once more confidently assures the world that the Canal will be opened, as announced, in November next. Of the seventy-five millions of cubic metres of soil to be excavated there remain to be yet taken out (says the report) only about five millions, and this can be effected by the month of October, so that there was no hesitation in fixing the 17th of November for the inauguration, and, which is much more definite, the commencement of the working of the Canal. Port Saïd is said to be completed, and the dredging machines are now occupied in increasing the depth of the channel from seven to nine metres; this work, it is said, will be finished by the 1st of October. From Port Saïd to the Bitter Lakes, upwards of sixty-two miles, the Canal is completed, with the exception of the dredging, on which forty-nine machines are at work; half the final deepening is said to be done, and the whole will be finished in good time. The whole twenty-two miles of Canal which lie between the Lakes and the Red Sea was executed dry by means of the spade; the last truckloads of earth are now being carried away, and the waters of the Red Sea have, according to the promise of the report, been by this time let in to meet those of the Mediterranean in the Lakes. Of all the doubts and adverse prognostications which have been expressed not one has, according to M. de Lesseps, proved to have any foundation; the only one which has not yet received practical contradiction being that of the filling of the Lakes. He says, however, that the engineers of the company know exactly the extent, configuration, and composition of the bed of the Lakes, that they have carefully calculated the maximum effect of the heat and dry air of Egypt upon the water, and that the effects of absorption and evaporation since the water of the Mediterranean has been let into the Lakes has been much less than they anticipated. The daily rise in the level of the water in the Lakes has been from an inch to an inch and a-half, and when the water of the Red Sea is introduced this increase should be doubled. The embouchure of the Canal and the channel of the Gulf of Suez are all but terminated, eleven machines being employed there in the dredging, and the entrance is protected by a stone breakwater 5,000 feet long, and by the artificial elevation of certain shallows formerly only visible at low water.

The report assures the world that the whole of the arrangements connected with the lighting and navigation of the Canal, beacons, buoys, mooring posts, &c., will all be completed before the day of opening. A chart of the whole work has been prepared and published by the company. The Egyptian coast will also shortly be lighted by four new lighthouses, erected by the company, on the Viceroy's order; three of these to be placed at the points of Rosetta, Damietta, and Burlos, and the fourth at Port Saïd itself. The Canal, or rather Port Saïd, was commenced in April, 1859; and certainly the completion of such a gigantic work as the connection of the Red Sea and the Mediterranean (or, as M. de Lesseps picturesquely terms them, the Sea of Pearls and the Sea of Coral) in the short space of ten years and a half, must be set down amongst the most remarkable achievements of the nineteenth century.

So much for the report of M. Lesseps. But great as is the confidence therein expressed, the opinions of well-informed persons are far from being unanimous with regard to the actual opening of the Canal in November. To the eye of a careful observer the works, a fortnight ago, seemed by no means sufficiently advanced to justify the sanguine anticipations of M. de Lesseps; in fact, all appeared confusion and uncertainty. To evolve order out of this chaos, in so short a time as three months, will require not only great exertions, but the expenditure of a large sum of money, and here is the weakest point of all. Every device has been resorted to, at various times, to raise the "sinews of war"—the last was a lottery, and what new scheme will be tried to procure the funds still wanting we are unable to imagine. Should matters come to a dead lock, it is possible that some of the European Governments may be induced to subscribe or guarantee the balance required; but even with this aid we should not be surprised to see the actual opening of the Canal, for the transit of large vessels, deferred until February or March.

---

Mr. Mitford's translation of a Japanese sermon, which was briefly noticed in our last issue, has formed the text of an article in the *Saturday Review*. The reviewer attempts to throw a doubt on the authenticity of the translation, and writes throughout in a spirit of captious incredulity that is almost tantamount to accusing the translator of having perpetrated a hoax. Hereupon, Mr. Mitford's father, who resides in London, writes to the *Saturday Review*, vindicating his son's honesty, and offering proof of the genuineness of the translation, which it seems is also vouched for by Mr. Ernest Satow, who is now in Europe, and himself corrected the proofs. Here is clearly evidence enough to convince the *Saturday* Reviewers of the injustice of their article, but with characteristic unfairness they refuse to print the letter of Mr. Mitford, senior, or to make the *amende* in any way. This little incident shows the true value of the information disseminated by such journals as our lively contemporary. The "Japanese Sermon," being something out of the common way, served as a convenient peg whereon to hang a bit of "smart" writing. Whether the inferences drawn therein were true or false, did not matter a straw; the smartly-written article once in, its effect must not be spoiled by any corrections or emendations merely intended to serve the cause of truth or justice. The reviewers, however, are foiled after all, for *The Times* has printed a letter from Mr. Mitford, in which the scurvy treatment he has met with is fully exposed.

---

We understand it is in contemplation by the authorities at the General Post-office to abolish the system, which has been in practice for ten years, of sorting the correspondence from India, China, Australia, &c., on board the P. and O. Company's steamers between Alexandria, Marseilles, and Southampton. This change would certainly appear desirable, not only on the score of economy, but because the value of the labour so performed (by the employment of a Post-office staff on board, at a large annual outlay) has been practically nullified since the new contract with the P. and O. Company has been in existence. The company's steamers have kept such good time that, as a rule, there is ample time for the sorting to be done on shore in time for the due delivery on each Monday morning. Besides, the system has many objectionable and dangerous elements about it which should only be encountered for a very unmistakable advantage. Opening letter-boxes by Post-office sorters on board ship is a dangerous power, to say nothing of the risk of a sea washing into the sorters' room and carrying the letters overboard.

# Monetary and Commercial.

The prospectus has been issued of the International Mid-Channel Telegraph Company, which has been formed for the purpose of establishing a system of telegraphic ships connected by telegraph cable with the main land, and moored in the fairway of the great streams of vessels passing through the British seas, with the view of afterwards extending operations to other parts of the world The first station is to be at a point in the English Channel, midway between Scilly and Ushant, where the company's vessel will be moored by mushroom anchors, and, by means of a submarine cable, be in communication with the telegraph at Penzance. The Telegraph Construction and Maintenance Company have contracted to provide and lay a suitable cable, about sixty-five miles in length, between the telegraph ship and Penzance. The services which the company will render consist of telegrams for and from passing ships, newspaper information, Government Post Office telegrams, towage, agency for supply of stores to ships, salvage services, landing of homeward and putting on board outward-bound passengers and mails, &c. The nominal capital of the company is £125,000, of which it is at present intended to raise only £25,000, in shares of £10 each.

A joint meeting has been held at Leeds of the creditors of three failed firms in that town—Messrs. Newsome and Wailes, mill-owners and spinners, whose liabilities are about £15,000, and who offer 13s. 4d. in the pound; R. and J. Newsome, cloth manufacturers, whose liabilities are £12,000, and who offer 7s., and Mr. John Wailes, cloth manufacturer, whose liabilities are £5,000, and who also offers 7s. As these proposals were not accompanied by any offer of security, the creditors adjourned to give the respective debtors an opportunity of finding guarantors.

A circular has been issued announcing that Mr. Benjamin Gott Kinnear, late of China, has joined the firm of Messrs. Hawes and Hertz, tea brokers, of 27, Fenchurch-street, and that the business will in future be conducted under the style of Kinnear, Hawes, and Hertz.

The *Syria* has taken £140,700 in Mexican dollars to China and the Straits. The market is flat, at a decline of at least ¼d. on last mail's prices, the present quotation being 4s. 11½d. per oz.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Aug., 1869, compared with the corresponding periods of the two preceding years:—

### HONG KONG AND WHAMPOA.

Plain Cottons.—Export for the month ended 16th Aug., 1869, 4,343 293 yards; for the twelve months 1869, 47,401,390 yards; for the twelve months, 1868, 68,560,511 yards; for the twelve months 1867, 86,599,221 yards. Decrease for 1869 against 1868, 21,159,121 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 249,560 yards; for the twelve months 1869, 1,450,539 yards; for the twelve months, 1868, 2,085,157 yards; for the twelve months, 1867, 2,422,008 yards. Decrease for 1869 against 1868, 634,618 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 12,960 yards; for the twelve months 1869, 1,162,482 yards; for the twelve months 1868, 1,879,069 yards; for the twelve months, 1867, 786,875 yards. Decrease for 1869 against 1868, 716,587 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 487,600 lbs.; for the twelve months 1869, 5,243,750 lbs.; for the twelve months 1868, 7,469,188 lbs.; for the twelve months 1867, 4,836,716 lbs. Decrease for 1869 against 1868, 2,225,438 lbs.

Value.—For the month ended 16th Aug., 1869, £123,167; for the twelve months 1869, £1,286,689; for the twelve months 1868, £1,860,453; for the twelve months 1867, £1,216,462. Decrease for 1869 against 1868, £573,764.

### SHANGHAI.

Plain Cottons.—Export for the month ended 16th Aug., 1869, 8,243,507 yards; for the twelve months 1869, 247,626,075 yards; for the twelve months 1868, 224,369,983 yards; for the twelve months 1867, 111,663,872 yards. Increase for 1869 against 1868, 23,256,092 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 1,215,554 yards; for the twelve months 1869, 11,115,837 yards; for the twelve months 1868, 8,523,422 yards; for the twelve months 1867, 10,640,323 yards. Increase for 1869 against 1868, 2,592,415 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 502,028 yards; for the twelve months 1869, 3,213,514 yards; for the twelve months 1868, 5,259,495 yards; for the twelve months 1867, 5,891,159 yards. Decrease for 1869 against 1868, 2,045,981 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 90,000 lbs.; for the twelve months 1869, 482,423 lbs.; for the twelve months 1868, 256,000 lbs.; for the twelve months 1867, 286,932 lbs. Increase for 1869 against 1868, 226,423 lbs.

Value.—For the month ended 16th Aug., 1869, £191,218; for the twelve months 1869, £4,529,730; for the twelve months 1868, £3,978,040; for the twelve months 1867, £2,664,944. Increase for 1869 against 1868, £551,690.

### JAPAN.

Plain Cottons.—Export for the month ended 16th Aug., 1869, 781,986 yards; for the twelve months 1869, 19,904,783 yards; for the twelve months 1868. 23,536,176 yards; for the twelve months 1867, 16,446,677 yards. Decrease for 1869 against 1868, 3,631,393 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 284,328 yards; for the twelve months 1869, 1,499,385 yards; for the twelve months 1868, 2,047,485 yards; for the twelve months 1867, 3,036,738 yards. Decrease for 1869 against 1868, 548,100 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 74,324 yards; for the twelve months 1869, 833,788 yards; for the twelve months 1868, 580,007 yards; for the twelve months 1867, 829,592 yards. Increase for 1869 against 1868, 253,781 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 666,210 lbs.; for the twelve months 1869, 6,218,534 lbs.; for the twelve months 1868, 4,285,621 lbs.; for the twelve months 1867, 1,949,799 lbs. Increase for 1869 against 1868, 1,932,913 lbs.

Value.—For the month ended 16th Aug., 1869, £67,192; for the twelve months 1869, £793,473; for the twelve months 1868, £734,960; for the twelve months 1867, £597,664. Increase for 1869 against 1868, £58,513.

### SINGAPORE AND PENANG.

Plain Cottons.—Export for the month ended 16th Aug., 1869, 5,672,455 yards; for the twelve months 1869, 47,002,912 yards; for the twelve months 1868, 62,092,869 yards; for the twelve months 1867, 52,256,430 yards. Decrease for 1869 against 1868, 15,089,957 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 368,313 yards; for the twelve months 1869, 4,895,774 yards; for the twelve months 1868, 5,355,141 yards; for the twelve months 1867, 10,114,839 yards. Decrease for 1869 against 1868, 459,367 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 460,791 yards; for the twelve months 1869, 3,041,859 yards; for the twelve months 1868, 2,782,500 yards; for the twelve months 1867, 4,633,098 yards. Increase for 1869 against 1868, 259,359 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 122,387 lbs.; for the twelve months 1869, 1,350,318 lbs.; for the twelve months 1868, 2,621,536 lbs.; for the twelve months 1867, 2,095,471 lbs. Decrease for 1869 against 1868, 1,271,218 lbs.

Value.—For the month ended 16th Aug., 1869, £116,814; for the twelve months 1869, £1,037,250; for the twelve months 1868, £1,339,649, for the twelve months 1867, £1,575,176. Decrease for 1869 against 1868, £302,399.

### BATAVIA.

Plain Cottons.—Export for the month ended 16th Aug., 1869, *nil;* for the twelve months 1869, 14,373,386 yards; for the twelve months 1868, 17,750,351 yards; for the twelve months 1867, 24,906,485 yards. Decrease for 1869 against 1868, 3,376,965 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, *nil;* for the twelve months 1869, 6,625,882 yards; for the twelve months 1868, 7,576,368 yards; for the twelve months 1867, 15,681,650 yards. Decrease for 1869 against 1868, 950,487 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, *nil;* for the twelve months 1869, 4,856,873 yards; for the twelve months 1868, 7,975,656 yards; for the twelve months 1867, 14,962,024 yards. Decrease for 1869 against 1868, 3,118,783 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, *nil;* for the twelve months 1869, 466,530 lbs.; for the twelve months 1868, 623,140 lbs.; for the twelve months 1867, 739,163 lbs. Decrease for 1869 against 1868, 156,610 lbs.

Value.—For the month ended 16th August, 1869, *nil;* for the twelve months 1869, £544.431; for the twelve months, 1868, £744,826; for the twelve months 1867, £1,308,515. Decrease for 1869 against 1868, £199,395.

### MANILA.

Plain Cottons.—Export for the month ended 16th Aug., 1869, 1,593,476 yards; for the twelve months 1869, 15,788,000 yards; for the twelve months 1868, 16,794,128 yards; for the twelve months 1867, 18,244,868 yards. Decrease for 1869 against 1868, 1,006,128 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 621,682 yards; for the twelve months 1869, 12,998,473 yards; for the twelve months 1868, 12,962,284 yards; for the twelve months 1867, 19,557,138 yards. Increase for 1869 against 1868, 36,189 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 119,045 yards; for the twelve months 1869, 1,287,405 yards; for the twelve months 1868, 869,217 yards; for the twelve months 1867, 1,234,499 yards. Increase for 1869 against 1868, 418,188 yards.

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 4,000 lbs.; for the twelve months 1869, 211,764 lbs.; for the twelve months 1868, 359,113 lbs.; for the twelve months 1867, 156,194 lbs. Decrease for 1869 against 1868, 147,349 lbs.

Value.—For the month ended 16th Aug., 1869, £45,002; for the twelve months 1869. £607,211; for the twelve months 1868, £744,140; for the twelve months 1867, £987,719. Decrease for 1869 against 1868, £136,929.

### CEYLON.

Plain Cottons.—Export for the month ended 16th Aug., 1869. 3,596,194 yards; for the twelve months 1869, 20,654,125 yards; for the twelve months 1868, 22,879,915 yards; for the twelve months 1867, 20,708,348 yards. Decrease for 1869 against 1868, 2,225,790 yards.

Coloured Cottons.—Export for the month ended 16th Aug., 1869, 219,778 yards; for the twelve months 1869, 978,311 yards; for the twelve months 1868, 806,343 yards; for the twelve months 1867, 1,398,857 yards. Increase for 1869 against 1868, 171,968 yards.

Printed Cottons.—Export for the month ended 16th Aug., 1869, 988,897 yards; for the twelve months 1869, 3,020,969 yards; for the twelve months 1868, 1,797,901 yds.; for the twelve months 1867, 3,008,518 yards. Increase for 1869 against 1868, 1,223,068 yards.

Digitized by Google

Cotton Yarn.—Export for the month ended 16th Aug., 1869, 18,300 lbs.; for the twelve months 1869, 275,560 lbs.; for the twelve months 1868, 506,577 lbs.; for the twelve months 1867, 372,608 lbs. Decrease for 1869 against 1868, 231,017 lbs.

Value.—For the month ended 16th Aug., 1869, £92,921; for the twelve months 1869, £443,882; for the twelve months 1868, £464,082½; for the twelve months 1867, £592,577. Decrease for 1869 against 1868, £20,200.

## ARTICLES OF IMPORT.

—o—

### TEA.

The steamer Agamemnon arrived on the 25th inst.—seventy-one days from Hankow—with 2,474,010 lbs. new season's teas. A portion of this cargo has since been placed on offer, and about 10,000 packages have been sold at full rates, the prices realised having ranged from 1s. 9d. to 2s. 7d. per lb. The following report upon the market for old Teas is from Messrs. Capel and Co.'s Circular:—

Congous.—Siftings continue in demand at full prices. Broken-leaf kinds command a steady sale at previous rates. Fair to good common have sold to a moderate extent at 1s. 1½d. to 1s. 1¾d. per lb. Fair to good flavoury kinds show no alteration. Good Kaisows have been saleable at the late advance in small quantities. In fine to finest there is no change to notice. Paklins remain as before. Amoys, in half-chests and boxes, have sold at 1s. 1d. per lb. Common to fair black-leaf kinds have been in moderate request, and prices firmly maintained. Fair to good medium have been steady at former rates. Fine to finest show no alteration. New-make Canton kinds have sold at rather better prices at public auction for fair quality. In Oolongs there is no change. Souchongs and Flowery Pekoes have met with but little attention. In Scented Teas there has been rather more inquiry, and prices have ruled rather dearer. Fair to good Capers show an advance of ½d. to 1d. per lb. Orange Pekoes: Fair to good Foochow kinds have been more saleable at the advance last quoted. Canton kinds, under 1s. 6d. per lb., have been in request at rather better prices. In Uncoloured Japans there has not been much done, and prices remain unchanged. Green Teas: In these there has been a moderate business done at about previous prices; fine Moyunes, perhaps, selling rather higher. Canton Greens show no change.

### SILK.

The following is from Messrs. Kilburn, Kershaw, and Co.'s Circular:—

The chief feature of the market this month has been the first arrivals of the new China Silk, of which about 1,200 bales have come to hand, and nearly all of which changed hands steadily at about 6d. and occasionally 9d. advance over the previous ruling quotations, say 28s. 6d. to 29s. for best No. 3 chops, and 27s. for No. 3 Flags, good to best chops of 3¼ at 25s. 6d. to 26s. 6d., and "Red Peacock" and best chop 4 at 23s. 6d. and 24s. to 24s. 6d. Several parcels of Fatmow Hainin No. 2 chop were also among the arrivals, and some have been sold at 25s. There is little to say of other classes of China Silk beyond the fact that desirable Tsatlees below No. 4 are scarce, and inquired for at from 22s. 6d. to 23s. for 4½, and 20s. to 21s. 6d. for common Silk. The market has not improved in tone during the month, and, so far as general orders are concerned, especially from the Continent, continues extremely quiet, while holders maintain great firmness, and demand full rates in nearly every instance. Canton Silk is unchanged, and there is less choice for buyers, who will not pay over 19s. 6d. for ordinary No. 1 Tsatlee reel. A few Loong Kongs of the new season have arrived, but they are so mixed in size that they have not at present found buyers, being unsuitable for manufacturers' wants, who require regularity of size in these Silks especially. Japan Silk is perhaps a shade better, and Bengal Silk has experienced another sharp fall in price within the last few days, some large parcels of bright "bund" Surdah filature, S & F, having been sold at 26s. 6d. and do. "M" at 26s. Other classes are unchanged and almost neglected, because of the unsuitable assortments offering. The deliveries of Silk from the London warehouses from 1st to 25th inst. have been very small, say:—China Silk, 2,203 bales; Canton Silk, 279 bales; Japan Silk, 571 bales; Bengal Silk, 277 bales; total 3,330 bales.

East India and China Silk Piece Goods.—There is nothing new to report, and the trade await the usual public sales on the 1st September; the quantity of all goods will be very small There has been a fair delivery of Corahs this month, say 8.590 pieces from 1st to 25th inst.; and of Bandannoes and Choppahs 228 pieces.

London Quotations, August 26.

The Continental Silk Markets.

The Lyons manufacturers have of late been busier than for some time previously, and this fact has naturally had its effect on the Silk market. The conditioners registered last week 57,237 kilogrammes of silk, viz., 14,549 kilogrammes Trama, 20,956 kilogrammes Organzins, and 21,822 kilogrammes raw silk. This was an increase of more than 10,000 kilogrammes as compared with the previous week. In spite of this, quotations showed a decided tendency towards a fall.

At Marseilles the market has been quiet, the principal sales recorded being—six bales Syrian spun, 88f. to 98f.; four bales Canton, at 54f.; 2,000 kilogrammes Portuguese, for delivery, f.26 50; 4,500 kilogrammes Japanese, at 22f. The country markets have been flat, the holders not being willing to accept the diminished prices offered.

In Italy prices are maintained. Some lots of raw silk have changed hands at 102f. to 103f. at Turin. At Milan the demand is chiefly for old current merchandise of good quality. The last are the most recent quotations:—

| | Per kilo. |
|---|---|
| Lyons:— | |
| Trams, 20/28 1st order ... ... ... ... | f.128 to 130 |
| 2nd order ... ... ... ... | 123 to 127 |

Cotton.—The favourable tone of the Liverpool market continued from the date of our last report until the 21st inst., when the inquiry slackened, and prices receded about ⅛d. per lb. The market has since been quiet, and a further fall of ⅛d. per lb. has taken place. The past few days, however, have been unattended with any change. The current quotations are:—Surat, 10¼d. to 12⅛d.; Bengal, Scinde, &c., 9⅛d. to 9⅜d.; fair Dhollerah, 10⅜d.; fair Oomrawuttee, 11d.; fair Broach, 10⅛d.; fair Bengal, 9⅛d.; fair Egyptian, 14¼d.; fair Pernam., 13⅛d.; middling Boweds, 13⅛d.; middling Orleans, 13⅛d. The demand in the London market, which up to the 21st inst. was active at extreme prices, has become dull, at irregular rates. A lower range of quotations has, however, been generally established.

Coffee.—There has been but little change during the fortnight in the market for Plantation Ceylon, all offers of which at the auctions have gone off with fair spirit at unchanged rates, while the private demand has been steadily active. The quantity of Native Ceylon offered at the public sales has been very small, as the bulk of the stock is withheld from the market, but by private contract a larger business has been done than for some time past, on improved terms. Plantation East India has been brought forward rather freely, but consisting for the greater part of good quality it excited competition, and realised about 1s. per cwt. advance. The improvement in the market generally has been partly occasioned by the favourable result of the Dutch sale of Java Coffee.

Digitized by Google

COIR GOODS.—In the absence of any public sales, no business is reported.

CAMPHOR.—The business is still extremely limited, both in China and Japan descriptions, and prices are again slightly lower.

COCOA-NUT OIL.—There have been large transactions in Ceylon at an advance of 20s. per ton; in other descriptions business has been moderate.

GALLS.—The transactions in China and Japan during the fortnight have not been of great importance, but there is a steady enquiry at the low rates now ruling.

GUMS.—Benjamin: Continues steady; of 63 cases Siam at auction one-half sold at £16 10s. per cwt. for fair 2nd quality, and £7 to £7 15s. middling dark Gum; of 200 cases Sumatra half sold at £7 10s. to £7 17s. 6d. for false packed 2nd quality, and £3 to £3 5s. for 4th. Copal: Nothing doing; good quality would sell well. Damar: Steady; 33 cases at auction sold at 81s. to 85s. per cwt. for fair in sorts. Gamboge: Nothing of any interest doing.

INDIA RUBBER.—There is a better inquiry, but the only transaction in East India descriptions has been a sale of 7 tons Batavia at the low price of 1s. 4½d. per lb.

JAPAN WAX.—The market is quiet, the business having been very moderate; at auction of 62 boxes offered two-thirds sold at 73s. per cwt. for good saucers.

MANILA HEMP.—We have again to report an absence of public sales, but there is an improvement in the private enquiry, and transactions to a fair extent have transpired at £46 to £52 for common and good roping.

MUSK.—Has slightly gone back in value: 44 caddies Tonquin at auction sold at 30s. to 31s. per oz. for good, and 16s. 6d. to 18s ordinary.

PLUMBAGO.—The improvement reported in our last for Ceylon descriptions has been steadily maintained, and of 1,299 barrels at auction, half sold at 16s. to 23s. 6d. per cwt. for middling to very good lump; 15s. 6d. chips, and 8s. 6d. to 14s. dust.

PEPPER.—Black: Rather dearer, with very good demand, and a large business privately for arrival as well as on the spot; of 4,043 bags Singapore at auction, the bulk sold at 4½d. to 4¾d. per lb., and 568 bags Trang sold at 4⅝d. White, is also dearer; 1,939 bags Singapore at auction, nearly all retired; 76 bags Penang sold at 5½d. per lb.; large business done privately up to 6d. per lb. for Singapore.

RICE.—The improvement noted in our last report was maintained for some days after the departure of the mail, and prices advanced 3d. to 6d. per cwt., but in consequence of a decline in the Corn Market and the setting in of fine weather the inquiry has become less active and the market is again quiet. The sales afloat have comprised 9,000 tons soft grain, of which the greater portion was Rangoon at 9s. 9d. to 10s. Liverpool, ex quay, 9s. 6d. to 9s. 9d., ex ship, London and the Continent; Nakrenzie and Bassein at 9s. 9d. for the Continent; and Siam Garden Rice in bags at 9s. 3d. Liverpool.

RHUBARB.—We have to report China descriptions flat and cheaper; of 178 chests at auction, one-third sold at 1s. 3d. to 3s. 2d. per lb. for ordinary to fair.

RATTANS.—Firm; 5,958 bundles Penang, 1,662 bundles Singapore, and 7,696 bundles Java, sold at auction at 3s. to 6s. per 100.

SUGAR.—The market during the interval has been firm, but quiet. The inquiry has gone principally upon West India descriptions, but of East India a better inquiry has led to sales at 3d. to 6d. advance, about 2,000 bags Clayed Manila having sold at 29s. 6d. to 36s., 3,000 bags superior (duty 9s. 7d.) at 32s. 6d., 100 tons unclayed Zebu at 26s. 10½d. including washed (part resold on higher terms), and 100 tons do. at 27s. 3d. Of 2,105 bags from Singapore, of Penang appearance, 160 bags (duty 10s. 6d.) sold at 37s. 6d., the remainder, brown and yellow (duty 9s. 7d.) being bought in at 33s. 6d. to 37s.

SPICES.—Cassia Lignea: Continues firm, with limited trade. Buds: Sell slowly upon former terms. Cinnamon: We quote 1st sort 1s. 8d. to 3s. 6d. per lb.; second, 1s. 6d. to 3s. 5d.; 3rd, 1s. 4d. to 3s. 2d.; 4th, 5th, and Jungle, 10d. to 2s. 5d.; very firm; only 28 bales at auction sold at high prices. Cloves: Penang firm; nothing doing; Zanzibar very firm; 275 bags at auction sold at 2¾d. to 3d. per lb. for middling. Limited trade privately upon corresponding terms. Mace: Has risen in value as much as 6d. per lb. 5 cases Penang sold at auction at 3s. 2d. to 3s. 11d. per lb. for middling to fair palish, and of 8 casks Batavia half sold at 2s. 6d. to 2s. 11d. for middling. Nutmegs: Are again 1d. per lb. dearer; of 16 cases Penang and 11 cases Batavia at auction, two-thirds sold at 2s. 3d. to 2s. 7d. for fair to very good medium; good business also done privately at the advance.

TERRA JAPONICA.—Cutch: Firm, with enquiry: business reported privately at 27s. per cwt.; and at that price about half of 1,758 pkgs. at auction were said to be sold. Gambier: Quiet, with most limited business within our quotations; 81 bales at auction sold at 16s. 9d. to 17s. per cwt.; 380 bags Cubes sold at 18s. to 20s. 6d. ordinary blocky to fair.

TURMERIC.—There has been an entire absence of China descriptions at the sales.

TIN.—There has been a moderate amount of business effected in Straits Tin during the fortnight, but as the supply has been equal to the demand there has been little change in prices. The current quotations are:—Banca, £136; fine Straits, on the spot, £131 to £131 10s., afloat, £126 to £130 per ton.

## ARTICLES OF EXPORT.

### METALS.

IRON.—The market is very steady. Considerable business has been done in Scotch Pig, and the price has advanced to 52s. 3d. cash.

LEAD.—Business during the interval has been very limited; prices are unchanged.

SPELTER.—Market dull at previous prices. Copper: The principal feature to note in this market is the rise in the value of Chili Bars. On the 23rd inst. a telegram was received reporting the charters from the West Coast to be 500 tons fine Copper, say 200 tons Bars to France, and 300 tons in Ore and Regulus to England. On receipt of these advices a brisk demand ensued, and business was done at £69 spot, and £70 three months' prompt. At these prices the market closes sellers. For English, smelters demand full rates, but Tough Cake and Ingot in second hands are to be obtained under list prices.

### MANCHESTER GOODS.

During the entire fortnight the sales have been extremely limited, in fact, quite of a retail character, and chiefly in Goods adapted for the Bombay and German markets. In Goods suitable for China scarcely any business has been transacted. Prices which on the 17th inst. had slightly advanced have again receded, and are now nearly on a par with those current at the date of our last report, the market being governed to some extent by the small clearances and easier tone of the Liverpool Cotton market. Yarns show somewhat more firmness than Goods, but slight concessions on current prices are here and there obtainable, according to the position of spinners. Several makers of fabrics suitable for China have decided to commence running short time directly, and others talk of adopting a similar course.

FREIGHTS AND CHARTERS.

We have no change to note in freights to the Eastern Ports.

Current rates of freight for vessels on the berth:—To Yokohama: 30s. weight or meast. To Nagasaki: 40s. weight or meast. To Hiogo: 35s. weight or meast. To Shanghai: 30s. weight or meast. To Hong Kong: 30s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £43. For Hong Kong: £32 10s. For Singapore: £25. For Galle: £25. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 13s. For Singapore: £1 6s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of 117 tons stores from London to Trincomalee, and of 14 tons small stores to Singapore.

The Admiralty have invited tenders for the conveyanceof 950 hhds. of malt liquor from England to Hong Kong.

MISCELLANEOUS.

At St. Vincent, C. V.—Erl King, str., from China, and left Aug. 10 for London.

At Table Bay.—July 22, Veronica, Greene, sailed for Batavia.

At Mauritius.—July 24, Souvenance, Brunetean, sailed for Singapore, after repairing.

CASUALTIES.

A cable message from Havana states that the A. Lloret (Spanish ship), from Manila to the United Kingdom, had put into St. Thomas', making much water, and with masts damaged.

The Nemis (?) (Dut barq.), 51 days out, from Java to Falmouth, was spoken with on the 6th July, making for Simon's Bay to refit, having lost jibboom and foretopmast and thrown cargo overboard in a gale on the 27th June.

LAUNCH.

On the 23rd inst. there was launched from the shipbuilding yard of Messrs. Henderson, Coulborn, and Co., Renfrew, a handsome screw-steamer of about 600 tons and 120 nominal horse-power, classed at Lloyd's. She is built to the order of a Singapore house, and her accommodations for passengers are elegantly fitted, and well adapted and ventilated for the East. As she moved off the ways she was gracefully named the Bangkok, by Miss Haffenden, sister of the gentleman who represents the firm at Glasgow.

THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

F. BRABY & Co.
(LIMITED),

BRABY'S GALVANIZED IRON HOUSES.

FITZROY WORKS, EUSTON ROAD, LONDON; AND AT IDA WHARF, DEPTFORD, S.E.

THE LONDON AND CHINA EXPRESS,

A NEWSPAPER SPECIALLY ADAPTED FOR READERS IN CEYLON, CHINA, JAPAN, AND OTHER EASTERN SETTLEMENTS.

THE "London and China Express" is published in time for transmission by each outward mail, *via* Marseilles, to Ceylon, the Straits Settlements, Java, Siam, Manila, China, Japan, &c. Each number contains a well-selected digest of the news since the preceding mail, English, Continental, and American; extra space being devoted to subjects having a special interest for residents in the above countries. It also includes the fullest Commercial and Shipping Reports, and the same Leading Articles and Special Correspondence as appear in the "London and China Telegraph."

Merchants and others who wish their Correspondents or Agents in the Eastern Settlements to be kept well supplied with General, Mercantile, and Shipping news from Europe, are recommended to order the "London and China Express" to be sent to them regularly.

Terms of Subscription (including postage), 54s. per annum, payable in advance; or with Export Supplement (similar to that issued with the "Telegraph"), 12s. extra. Subscriptions payable to any of the Agents abroad (see list in separate advertisement), and in London to James West, publisher, at the head office,

2, COWPER'S COURT, CORNHILL, E.C.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks and at average spring tides can receive vessels of 16 to 17 feet draught It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, ontaining a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES, A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c , &c. A large stock of Woods, Metal, &c., &c , always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

THE MANAGER,

CHINA & JAPAN AGENCY,

2, COWPER'S-COURT, CORNHILL, LONDON, E.C.

## HOLLOWAY'S PILLS and OINTMENT.

—DEBILITY, CONSUMPTION.—In no diseases are the results of the alterative and tonic influence of these invaluable remedies more apparent or more gratifying than in that feeble condition of the body which precedes consumption. A change for the better is observed ere this treatment has been followed for a week, and the improvement steadily progresses; the encroaching emaciation and mental depression gradually gives place to health, strength and cheerfulness. The Ointment should be rubbed most diligently between the shoulders, on the chest, and left side at least twice a-day. Two Pills should be taken nightly; the air should be sought, solids eaten, slops avoided. This treatment duly followed will soon arrest both cough and feverishness.

### THE MAILS, &c.

The present inward mail is delivered one day after its due date—a rare departure from the usual punctuality of the P. and O. Company's service.

By delaying for a few hours the publication of to-day's issue, we are enabled to give some very important news just received by the Pacific mail, which brings three days' later news from Shanghai, and fifteen days' later from Yokohama than that of the Overland Mail. The dates in the above Table apply to the P. and O. Mail only.

The next inward mail will be due here on Monday, the 20th inst., and brings Yokohama dates to July 28; Shanghai, July 30; Hong Kong, Aug. 5; Ceylon, Aug. 24.

Telegrams in advance of the succeeding mail (Hong Kong, Aug. 12) were received *via* Galle on the 31st ult. From Shanghai, *via* Kiachta, we have telegrams to Aug. 12, received this day.

*(For Latest from China and Japan see page 412).*

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O steamer *Delhi*, arrived Sept. 4.—From Hong Kong: Messrs. Petree, Peral, Dols, Marcor, Don Jose Francis. From Singapore: Mr Baumgarten, son, three children and servant, Mr. Seare. From Batavia: Mr. and Mrs Sempster, four children, and two servants. From Galle: Mr. Swenton.

To Southampton, per P. and O. steamer *Delta*, expected to arrive Sept. 11—From Shanghai: Mrs. Wise and two children. From Hong Kong: Mr. F. Jones Mr. W. Mackay. From Singapore: Captain Beven, Mr. W. T. Wright, Mrs. Hallowes and three second-class passengers. From Penang: Major Georges, Mrs. and two Misses Scott, Lieut. James. From Galle: Mr. Carry, Messrs. T. and F. Naughten, Dr. and Mrs. Hume and two children.

### PASSENGERS OUTWARD.

Per French mail steamer *Peluse*, from Marseilles, Sept. 4 (booked from London).—To Shanghai: Mr. J. D. Campbell and servant

Per P. and O. steamer *Poonah*, from Southampton, Sept. 4.—To Shanghai: Mr. Russell, Mr. and Mrs. J. Hart, Miss E. Hart. To Hong Kong: Mrs Hackin, Dr. Franklyn, Mrs. Morrison. To Ceylon: Mr. and Mrs. G. W. R. Campbell, Miss A. Carey.

Per P. and O. steamer *Delhi*, from Marseilles, Sept. 12.—To Shanghai: Mr. J. Maitland, Mr. Fulton Smith. To Singapore: Mr. T. F. van der Plas. To Ceylon: Mr. and Mrs. Lee Viner and child.

Per P and O. steamer *Ceylon*, from Southampton, Sept. 18.—To Yokohama: Mrs. Campbell and child. To Hong Kong: Mr. J. Y. V. Shaw, Mr. Head. To Ceylon: Mr. M. Finch, Miss Horn, Mrs. Sinclair and three children.

Per P. and O. steamer *Syria*, from Marseilles, Sept. 26.—To Yokohama: Mr. R. Johnstone. To Hong Kong: Mr. J. Smith, Mr. T. A. Tonks. To Penang: Mr. and Mrs. H. Frohlich. To Ceylon: Mr. and Mrs. R. B. Laurance.

Per P. and O. steamer from Southampton, Oct. 2.—To Hong Kong: Miss M. Crichton, Mrs. E. Arthur, Mrs. Wilberforce Wilson. To Singapore. Mr. J. W. Witham. To Ceylon: Mr. C. Buchanan, Miss Macartney, Mr. J. Duncan's two children, Mr. and Mrs. W. Carver, Capt. Skottowe, Mr. H. S. Master.

Per P. and O. steamer from Marseilles, Oct. 10.—To Hong Kong: Mrs. Mellish and child. To Ceylon: Mr. and Mrs. M. H. Thomas, Miss Creswell, Mr. J. W. Gossett, Mr. Stanley Daniell, Miss Sconce, Sir J. Elphinstone, Mr. H. W. Ridley.

Per P. and O. steamer, from Suez, Oct. 17.—To Ceylon: Mr. Duncan Davidson.

Per P. and O. steamer from Southampton, Oct. 16.—To Penang: Miss Napier. To Ceylon: Mrs. Wilson, Mr. J. Hamilton.

Per P. and O. steamer from Marseilles, Oct. 24.—To Shanghai: Mr. John Fraser. To Ceylon: Miss Payne, Mrs. Longley.

Per P. and O. steamer from Southampton, Oct. 30.—To Shanghai: Rev. J. E. and Mrs. Moule and two children, Miss Lawrence. To Ceylon: Mr. and Mrs. Carson.

## Summary of News from the Far East.

(BY P. AND O. MAIL, VIA MARSEILLES).

### JAPAN.

#### YOKOHAMA.

The present mail brings advices from this port to the 13th July. The outward mail of May 21st arrived on the 8th July; this was the first received direct from Hong Kong, and the new arrangement of the P. and O. Company was regarded with great satisfaction. The following items are from the *Japan Times*:—

The important question of the paper currency has been the topic of public and private debate during the past fortnight. Sir Harry Parkes convened a meeting of British merchants at the Legation on the 10th July to confer with him upon the present condition of the Japanese currency, the ways and means of improving it, and the effect the issue was likely to have upon foreign trade. He gave us a quantity of useful information on the subject, setting our minds at ease as to the amount of the issue and the probable term of its currency, showing us how and where the Japanese had been influenced to good by foreign advice, and gave us also two *verbatim* translations of Notifications to add to our collection.

It is not probable, apparently, that the increase in the duty on Silk, with which we were threatened last year, will now take place. A question was asked at the Legation the other morning about the Simonoseki indemnities, and we were glad to learn that the four Ministers who occupy the unenviable position of the late Shiogoon's creditors on this account—those of England, France, America and Holland—have referred the question, whether the Mikado should pay, home to their respective Governments. The Mikado's advisers intimated that if the money was exacted they should be reduced to the disagreeable necessity of doubling the duties on tea and silk. As the increase in these duties, properly collected, would pay the Simonoseki indemnities in about a year and a-half, we seem to have got the best of the bargain. As we have said, there seems good reason to believe that the increased duties will not be imposed.

We have to discharge the painful duty of announcing the death of Lachlan Fletcher, Esq., Her Britannic Majesty's Consul, which took place on the 8th July. For some time sinking under an incurable disease, he died unexpectedly, for it was impossible to say how long he might linger. Her Majesty has lost a good and faithful servant, and many of his fellow-countrymen in Japan a loyal and stedfast friend. His industry in the attempt to fulfil the difficult and multifarious duties of the office of a consul in the Far East was perhaps the most remarkable point in his character, but it was a consequence of the conscientiousness and devotion to "duty" which in every phase of life was his guiding principle. Hence the tenacity with which he clung to an opinion—in other men's eyes right or wrong—once formed upon the basis of a matured deliberation. We have lost a man who had enough of the judicial faculty to frame a judgment and the useful quality of persistence in giving action to his thought. Such men are not common. His funeral took place on the following afternoon. The band of H.M.'s 1-10th Regiment marched at the head of the procession, playing the Dead March,

Digitized by Google

after which came the corpse, borne on a gun-carriage drawn by British seamen, followed by H.E. Sir Harry Parkes, K.C.B. (as chief mourner), and the other Foreign Ministers, the Commander-in-Chief of H.M.'s forces in China and Japan, the Admirals of the different fleets at present in Yokohama, and chief officers of the armies and navies of all the different nations now here. The principal Japanese officers also testified to their esteem for the deceased by joining the procession, and at the various cross streets guards of Japanese soldiers were drawn up, who saluted as the procession moved past. The funeral service was read by the Rev. M. Buckworth Bailey, assisted by the chaplain of H.M.S. *Ocean*. From the church to the cemetery the band of H.M.S. *Rodney* relieved the band of the 10th. The great number of private residents in Yokohama who followed the deceased to his last resting place testifies to the esteem in which he was held by all classes.

Hakodadi is in the hands of the Imperial troops, the civil officers have returned to their posts and the foreign Consuls and residents have resumed residence in the place. Enomoto and the chiefs who were his accomplices are on their way down overland to Yedo, where they will be tried and punished. It is too much to expect that their lives will be spared, though the new government has shown itself in a very favourable light by its treatment of its defeated enemies. Seldom has a revolution anywhere, certainly never in the East, been followed by so few political executions. But Enomoto's crime has been enormous; he is a traitor to his sovereign, a traitor to his chief, a regenade from his clan, and a robber of the public. He has caused much bloodshed and great loss to the country, and his punishment will doubtless be signal. It is probable, and sincerely to be desired, that the destruction of the Tokugawa pirates in the North will prove to be the end of the civil war and of the unproductive expenditure of the resources of the Empire.

It may not be generally known that the Japanese Government proposes to claim from France five millions of dollars as indemnity for the trouble caused by M. Brunet and his friends—a good set-off against any claim for Simonoseki expenditure.

Mr. Adams, the Secretary of the British Legation, has just returned from a lengthy tour in the silk districts, having travelled nearly three hundred miles; and not only has he brought us back no complaint of attack or insult, but reports most favourably on the apparent good feeling and manifest civility of all classes. Not only were the lower orders of the people uniformly polite and hospitable, but the official class were in every instance as attentive and courteous. The information sought was, in all cases, given most freely, and never was the difference between Chinese and Japanese in this respect more markedly shown. Mr. Adams's report will be of great value to merchants interested in Japan Silk. He was accompanied by three gentlemen of great experience in all the practical details of the trade, and the districts of Joshiu, Koshiu, and Sinshiu were all carefully examined. One of the most noteworthy circumstances they have recorded is the increase of the mulberry cultivation; they were everywhere told that during the last ten years this had been great and steady. Several native merchants with whom Mr. Adams's companions were acquainted were met with, and afforded valuable assistance to the party.

H.M.'s Consul and a bench of assessors were occupied on the 7th, 8th, and 9th July in deciding the action brought by the Pacific Mail Steam Ship Company against the owners and master of the British steamer *Ocean Queen* for damages caused by collision between that vessel and the *New York* on the night of the 1st June last. After patiently hearing a mass of evidence the Court decreed the *Ocean Queen* solely to blame for the collision, and pronounced accordingly; damages 10,218 dollars, and costs.

A Foreign resident, we are glad to say, succeeded in shooting a Japanese thief who was plundering his house in the middle of the night. We are without police protection, and must be allowed to protect ourselves.

### THE FALL OF HAKODADI.

The following takes up the story of the recapture of Hakodadi at the point where it broke off in our last issue. It is, in fact, a continuation of the same correspondent's letter:—

HAKODADI, June 24, 1869.

Yesterday evening a message was sent from Ennomoto to the authorities here stating the terms on which he was prepared to evacuate Kamida. The terms were rejected, and the fire of their guns in rapid succession made us aware of the intended resumption of hostilities. This morning it transpired that supplies had been sent into the fort in the bay during the night by the Chosiu men of the Mikado's party—some rice, charcoal, water, and fish.

It seemed at first impossible that such a tale could be true, but on inquiry it was confirmed as beyond all doubt. Communication had also been permitted between the fort and the outposts of Kamida, the object of which was to ascertain Enomoto's views in regard to the continued holding of the fort. The representations made to the authorities here were, that so long as it was held the merchants, tradespeople, and peasants were liable to continual disturbance and damage from the fire of the two parties, and as the tenants of it were unwilling to perpetuate this state of things they desired to ascertain the wish of Ennomoto on the subject. The message returned from Kamida was to the effect that the fort should still be defended.

There was some sharp firing this morning into the fortress, but with little result, and in the afternoon the tenants of the fort hoisted a pair of shears and placed another gun in position without the slightest molestation from the troops outside or their apparent wish to prevent their doing so. This is on a par with the sending of supplies into the fort, and may be dictated by a kind of childish generosity, which prevents one party from taking what they may consider a mean advantage of the other: "these poor fellows in the fort," they say, "are starving, and have small means either of offence or defence: it is inglorious to starve men out of a place and a shame to interfere with their placing another gun in position; let orders be given to send them in supplies, and don't interfere with them while at work on their gun." Of course this is very absurd, but then the Japanese are in some things very absurd—an ultimate fact which must be resorted to in explanation of very many difficulties here. What the Japanese have to say on the other side is another matter into which I will not enter.

Friday, 25th June, 3 A.M.:—Heavy firing towards Kamida and a few guns from the fleet into the fort. A sharp attack on the redoubt outside, and about a thousand yards from Kamida, which is held by the Tokugawas—continued musketry for an hour and all still again. Two hours later it was evident that the Mikado's troops had taken the redoubt, as fire was opened upon it from Kamida. We afterwards understood the loss on the Mikado's side was 200 killed and wounded.

News now spread rapidly that the fort in the Bay had surrendered during the night, and proved — curiously enough — to be true. I say "curiously enough" because as the imagination elsewhere has its beliefs, so here it has its facts. To the certain knowledge of six different individuals Ennomoto must have been on many occasions in as many different places at the same time — he was in Kamida — he was in the fort in the Bay—he was in the field—he was killed—he was treating with the Mikado's officers—all at the same time, utterly violating the great philosophical doctrine that no one can be in two places at one time, unless of course he is a bird Like the Athenians of old, we, during these stirring events, spend our time in nothing else than in hearing or telling some new thing. I fear that Laplace's celebrated calculation of the eighth of error which may be presumed to lurk in all statements of fact would require much modification if applied to Hakodadi reports, which, so far as I have analysed them, seem, like the medicines of the early homœopaths, to contain truth only in infinitesimal quantities. "The mixture of the lie doth ever add pleasure," says Bacon profoundly in his essay on Truth. "That is not our fault," my Uncle Toby might say, "but the fault of our nature." "The fact remains the same," my father would reply. But I am digressing. The report, as I have said, proved to be true, and the Tokugawas, to the number of 211 (I believe), were taken charge of by the authorities. On Friday all was quiet, and on Saturday Kamida surrendered, the Tokugawas being allowed to march out with the honours of war.

Sunday, 27th June:—The Tokugawas were all disarmed to-day—as each man gave up his weapons he wrote his name on a tally, which was then tied to them and the whole were removed to the Custom-house. They were indeed a motley crew—many of them lads of seventeen or eighteen, all very young. Their dress exhibited every possible variety of what seemed English slops of the worst description, in the dirtiest possible condition, and *apropos* of this, it seems a matter for regret that the Japanese soldiery and officials are taking to European costume, without the smallest idea of what is becoming in it or the harmony and congruity of different parts of our costume. Those who look best dress entirely in black, which gives them the appearance of recent converts to some extremely low form of dissent. Those who look worst are wholly indescribable. Falstaff's soldiers were paragons compared with them; they do, indeed, look like scarecrows or the bodies from unloaded gibbets pressed into service. Put a bad hat on the head of a well-dressed man in Bond-street, and the beggar-boys will hoot him. But such hats and caps as these new converts to European dress wear never were seen but on the passage from Wardour-street to the final dust-bin. At its best our modern dress suits Asiatics extremely ill, and, accustomed as we are to see our own races in it, with all the advantage they derive from a perfect realisation of its details and appropriateness to time, place, and circumstance, the sight which the Japanese present, who have no such knowledge or experience to guide them, is sorry enough. The stolid conservatism of the Chinese has stood them in good stead in such matters, and prevented their ever making of themselves the ludicrous figures which the Japanese innocently cut, with the unswerving conviction that, in enduing themselves with slops from the Minories, they are dressing like Englishmen.

I grieve to say that the town is full of wounded men bestowed in twenty different quarters and exhibiting every phase of gunshot wound, some of which are of a truly frightful nature. By permission of Captain Ross, of H.M.S. *Pearl*, Assistant Surgeon De Meric is appointed to superintend the hospitals, and is working hard and heartily there, assisted by natives, one or two of whom have studied medicine in Europe. The patience and cheerfulness of the poor fellows is wonderful, and must be recorded in their praise, in spite of a certain insensibility to pain which characterises the organisation of these temperate rice-eating Asiatics. It is said that a porter-fed London drayman is the worst patient in the world, a mere scratch on his skin being sufficient to induce violent

Digitized by Google

inflammation and erysipelas. Surely these rice-fed men are the best patients in the world. A wound which would infallibly prove mortal to an European soldier, fed as he is on beef, and accustomed to the freest use of spirituous liquors which his purse permits, heals with ease and almost without perceptible inflammation among these people, and a surgeon is fairly puzzled at the sight of a limb which, according to all European experience, ought to come off and which yet obstinately insists on being allowed to remain on without danger to the patient. Meanwhile, lint and bandages are in great demand, diachylon is priceless, and even "parmaceti, the sovereign'st thing on earth for an inward bruise," is worth its weight in silver.

Steamers have been despatched for Awamori Bay with troops; three leave within four-and-twenty hours for Yedo, taking nearly three thousand men, and we shall soon be left with the small garrison necessary for the safety of the town. The new Governor is installed, and the Consular body made their congratulations to the Governor last week upon the re-establishment of the Mikado's power. It only remains to re-establish trade.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, July 15.

The P. and O. steamer *Ottawa* arrived on the 5th inst. with the London mail of 21st May and telegrams to the 11th ult. On the following day a Chamber of Commerce telegram, *via* Kiachta, and a Transmongolian telegram (Grant's line), each to the 15th ult., arrived *via* Tientsin, and on the 12th a Chamber of Commerce telegram to the 22nd ult. was received. On the same day the steamer *Suwonada* brought up telegrams to the 18th June, received at Hong Kong *via* Calcutta.

The S.S. *Ajax*, which left this on the 9th inst. for London, took no less than 3,000 tons of teas.

The P. and O. Company have determined to resume their service between Shanghai and Yokohama. It is said that the steamers will call at Nagasaki and Hiogo.

A small iron steamer, 55 feet long with 12 feet beam and estimated draught of 3½ feet at the stern, and 2 feet at the bow, is rapidly approaching completion at Muirhead's foundry. Her engines are 16-horse power, with tubular boilers working up to 100 lbs. Her propeller is 4-bladed, with a diameter of 3 feet and pitch of 9 feet 6 inches. When completed she will be the first steamer constructed in China altogether out of the raw material. But this is not her only peculiarity; her crank shaft and fittings, including excentrics, have been entirely forged out of solid iron—a feat I am told never before successfully attempted in the East.

A new steamer, the *Walrus*, has arrived here for the S.S.N. Company. This vessel is of the river class, with walking beam, length 255 feet, beam 42 feet, with 16 feet depth of hold. She is provided with the new "Manley" wheels, of which the peculiarity is that the floats are so connected with the excentric that they always remain vertical, whether entering or leaving the water or above water. The result in the case of the *Walrus* is said to be highly satisfactory.

COURTS.—The records of the Foreign Courts for the past fortnight furnish little of interest. Some of your readers perhaps remember a swindler who in 1862 represented himself to be the celebrated Wyndham on his travels, put up at the Astor House, obtained unlimited credit everywhere in Shanghai, and finally disappeared. He was, however, captured and tried, and expiated his follies by a long residence in Hong Kong gaol. A gentleman of the same kidney, calling himself "Major Evan Lawrence, of the Royal Engineers," has recently succeeded in swindling the proprietors of Astor House and various trusting persons in this usually suspicious community. Doubts were raised by his constant borrowing, and finally he was had up at the Supreme Court at the suit of his landlords. Judgment was given against him, and a judgment summons issued, but before a writ could overtake him he was safely on board a steamer bound for Hong Kong, leaving some worthless luggage behind him. I would not mention this case in detail but that it seems probable that Major Lawrence may try his little game on with some of the old China hands at home, and influence them by his apparently intimate acquaintance with life in this country.

As a pendant to this story, I may mention that a young man who some weeks ago surrendered himself at Chefoo as a deserter from the English navy and the son of an English admiral, and who was very handsomely treated by the young naval officers at Chefoo, has been identified as a rogue who was on several occasions convicted of obtaining goods under false pretences, and who some time since broke out of one of Her Majesty's Consular gaols in China. He is now here awaiting trial.

A case, in which the Hong Kong and Shanghai Banking Corporation were the plaintiffs and Messrs. Glover, Dow, and Co. the defendants, was decided on the 9th inst. by Sir Edmund Hornby. The defendants had drawn on Messrs. Morgan, Lambert, and Co., of Hong Kong, against some copper. The bill was accepted, but the godown in which the copper was stored took fire, and the contents were damaged. The bill was dishonoured, and the copper still remains unsold. The bank had not instructed Messrs. Morgan, Lambert, and Co. to insure. The defendants pleaded that through the negligence of the plaintiffs the security had been rendered unrealisable, and in this they were sustained by the Court.

MUNICIPAL.—It was officially announced some weeks ago that the Revised Land Regulations for the Anglo-American Settlement at Shanghai had been approved by all the important Powers, and there was in consequence every hope that the new code would be in operation before the end of the year. However, the fact was that all the consents were conditional; France assented provided Great Britain and America recognised the regulation for the French Concession; America assented provided Great Britain and France did the same, and so on. But as all the conditions fulfilled one another, the matter was regarded as settled. Now, the American Government have withdrawn their recognition of the territorial sway claimed and exercised by France, and as this step makes the inauguration of the new code dependent upon France conceding what she never will concede, it seems likely that our old Land Regulations must remain in force for an indefinite period longer. But as these regulations are obviously insufficient for the requirements of the place some bitter feeling has been excited, and on the 13th inst. a pamphlet was circulated calling on the other European Governments to exert their influence on the French Cabinet to remove this dead lock.

GENERAL.—By last mail you heard of the suicide of Captain Cooper, master of a Chinese gunboat, and formerly in the employ of the S.S.N. Company. A curious fact in remote connection with his death has just come to light. The Chinese attribute his insanity to the influence of the *Feng Shui* outraged by the stern of his vessel having been built in a curved form, after the model, they say, of the back of the tortoise. The authorities are now debating whether the vessel may not, in consequence of this unfortunate stern, be unsafe and unfit for further use, and pending the decision of this important question they have altered the model of a vessel proposed to be built at the Kiangnen Arsenal, replacing a curved roof over a portion of the deck by a covering less likely to stimulate the evil influences of the *Feng Shui*.

Mr. Markham has presented the local branch of the Royal Asiatic Society with an account of his recent tour through the Province of Shantung. Of course his paper abounds with descriptions of places and cities utterly unknown to us even by name. But the gist of his observations lies in the fact that everywhere he found the pitiable effects of a weak yet oppressive Government, and of the blindly persistent opposition offered to every proposal to develop wealth and industry.

The rumours prevalent here some months ago that a foreign agent of one of the evangelising societies had been murdered in Honan have been carefully inquired into by Dr. Porter Smith, of the London Missionary Society at Hankow, and have proved baseless. This gratifying result has been communicated by Dr. Smith to the papers here.

Hitherto private baggage at the open ports has been held sacred against the inquisitive fingers of Custom-house officers, but this immunity is to cease. The first step towards the introduction of a system as annoying as that which prevails in the West has been taken by the issue of a notification setting forth that no private baggage is to be landed or shipped without examination and marking, on pain of fine and confiscation. The measure will, of course, be unpleasant, but no doubt has been rendered necessary by the system of smuggling by native passengers, which lately has proved seriously detrimental to the revenue. The 4th of July having this year fallen on Sunday, the great American anniversary was held on the following day, when the ships in the harbour were gaily dressed, Her Majesty's ship *Zebra* and the gunboat being conspicuous as exceptions. This was due, I am told, to there being no American man-of-war in the river, and to the American Consul-General not having sent any official notice of the anniversary to the English senior naval officer. The whole thing went off very quietly. There were of course a few dinner parties, but the streets remained tranquil.

By last mail I told you of the enormously increased cultivation of the poppy in China, and the practical recognition of the trade, by the levy of a definite duty upon it, in spite of Imperial fulminations. It is to be noticed, moreover, that the import of Indian opium for 1868 was 35,827 chests, against 40,615 chests imported in 1867, or a falling off of 4,788 chests. Notwithstanding this, or, perhaps, in ignorance of it, cultivation in India is, it appears, to be largely increased, judging by the following statement in the *Bombay Gazette*, which, as you may chance to miss it, I take the liberty of reproducing:—

"The cultivation of poppy, says the *Indian Daily News*, is to be largely increased in the Bengal Presidency, and at once, in consequence of the proclamation of the Emperor of China, prohibitory of opium cultivation in any part of the Imperial dominions the issue of which we lately notified to our readers. The abandoned agencies of Seetapore and Rohilkund are to be immediately reopened at a net increased charge of Rs. 4,000 a month. The fixed annual quantity of provision opium is to be 48,000 chests, with, in addition, a reserve of 10,000 chests to be gradually provided. The consequent necessary orders have been issued in time for the cultivation of 1869-70."

Digitized by Google

On the 12th inst. his Excellency J. Ross Browne, U.S. Minister to Peking, with his family, arrived here *en route* for the States. Public opinion among the Americans resident in China is very strongly against his recall, and it is intended to signalise his departure by a banquet or some other public ceremonial.

The scientific commissioners attached to the Austro-Hungarian expedition charged with the task of making treaties with the Eastern States, have presented the local branch of the Asiatic Society with a number of specimens of Austrian and Hungarian manufactures. These are now on view at the Shanghai Club. They comprise condensed provisions, candles, wines, wearing apparel, fancy wares, and in fact everything necessary either to comfort or convenience. The prices quoted are wonderfully low, and some newspaper writers anticipate a panic among the storekeepers in consequence of the hints thus given to intending importers of domestic luxuries.

## HANKOW AND KIUKIANG.

A Kiukiang correspondent writes:—The river has risen so high that the water is into the court-yards of all the houses on the Bund, and over the basement of some houses in the back street. The Mandarins are chinchinning joss violently, proclaiming a fast, &c., to propitiate the dragon who is swelling the river—but ineffectually as yet. Grain of all kinds is getting dear, and prospects are not pleasant.

Hankow, too, has been visited with the most disastrous rains—it having rained in torrents without intermission for a week. The result now is that the Settlement is under water, there being three feet of water on the bund, over which sampans and canoes are now to be seen sailing. All the hongs and godowns are surrounded by water, and the residents can only go about in boats. The club is flooded, and the alleys in the bowling-saloon are taken up to prevent their being destroyed. The destruction to foreign property will be most serious, and what the merchants will do for the safety of their goods remains to be seen. By Monday the Chinese predict the water will have risen four feet higher than it is to-day; in that case the godowns will be flooded. The pretty new church is quite surrounded, and will also be flooded by to-night. Business, of course, is at an end, and nothing will be done now for a month or six weeks, as this great flood will last fully that time. The Chinese say it will be the most disastrous flood Hankow has ever been visited with. At present the place presents a sight rarely seen in any country. When the rain ceases great heat is expected, and doubtless there will be a good deal of sickness amongst the residents. It is feared that some of the Foreign property, especially at the back of the settlement, may fall down whenever the water begins to subside, as the foundations will be so thoroughly undermined. It is not unlikely that goods will have to be shipped back to Shanghai, if the water rises so high as the Chinese predict.

## HONG KONG.

From this port our advices are to the 22nd July. The outward mail of June 4 was received there on the 13th July. Some of the news contained in our present despatches was anticipated by the French mail. The following items are chiefly from the *China Mail*:—

We are able to authoritatively confirm the rumour in circulation that Sir R. Alcock has fully approved the conduct of Mr. Gibson in the Formosa affair, including the capture of Amping. We must however confess that we are considerably puzzled to account for the fact of the British Minister acting apparently in a manner so diametrically opposed to the published instructions of the Foreign Office. Is it possible that a change has come over Home policy, and that subsequent despatches written in the light of fuller information at home have authorised Sir Rutherford Alcock to substitute blessing for cursing and praise for reproof? There is but one other theory tenable—that the Minister is so firmly convinced of the injustice done to Mr. Gibson that he has elected to mark his personal approval in spite of the Foreign Office. Such a course would be honourable in the extreme, if not very judicious. His former despatches certainly showed that he is by no means personally indifferent to the position of his countrymen in China, and he has risen immensely in popular estimation in consequence. Still we are at a loss to account for this new development of the question.

H.R.H. the Duke of Edinburgh is expected at Yokohama about the end of August. Admiral Keppel will then proceed with the *Salamis*, *Galatea*, and *Adventure*, by way of the Inland Sea, to Tientsin, where Sir R. Alcock will embark in the *Adventure*, visiting the ports down the coast to Hong Kong. From Peking the *Galatea* will proceed to Shanghai and Hong Kong, arriving at the latter place about the middle of October. The *Rodney* was to leave for England on arrival of the *Juno* at Yokohama, and the *Ocean* would temporarily become flag-ship.

We have good reason to believe that several girls shipped by the Californian steamer which sailed on the 19th had been sold, some willingly and some unwillingly by t eir guardians to prostitution agents, who will recoup their investment when they reach San Francisco. But we have also satisfied ourselves that every female on board expressed her willingness to go. In one case, any interference broke down by the invincible determination of the victim to say what she had been told to say, and the officials must be acquitted of any laxity. But what is to be done? The law is powerless. Yet here is the sale of girls for shameful purposes by Chinese being carried on under our eyes; but so long as the victim says she is willing to go, and a ship is willing to take her, interference is prohibited.

That emigration from China to California is increasing will, doubtless, be readily admitted by all who have paid any attention to the subject, but we doubt whether many are aware of the enormous ratio in which this increase is taking place. The *Bulletin* of May 21st states that the steamer just arrived had brought 1,250 Chinese passengers—a number which, even if we allow for a certain number of women, is unprecedented. It is with regard to these latter only that it would seem necessary to effect some change in the existing regulations, most of those leaving Hong Kong hitherto having been taken for shameful purposes. At all events, the matter is becoming of sufficient importance to claim the earnest attention of the local government. The last Pacific Mail Steamer from here took 850 Chinese passengers to San Francisco.

There is, we believe, an intention among the American community to present an address to Mr. Browne, before his departure, expressing their appreciation of his policy during the time he has held the office of U. S. Minister at Peking. A correspondent suggests that the English community should join in the expression, and we endorse his suggestion. "Spectator" says, "Mr. Browne has from the beginning honestly opposed the idea that the Chinese were progressing, or were likely to progress, and for this persistence in the face of the well-known views of his Government he has received his recall. He has refused to be silent; to be representative of the United States at Peking, and at the same time to be a party to keeping back from his countrymen the knowledge that there was no hope of satisfactory relations with China except under continual moral pressure. He has undoubtedly performed the work which lies before a diplomatist at Peking with all the conscientiousness and independence of a man who sacrifices everything to the truth. He has done for the Foreign community all that they have not done for themselves. He has vindicated the cause of a firm and energetic policy, and has not even shrunk from the position that the true policy is one which looks to armed interference as a last resort."

We understand that the census returns will have been completed, and will be published in an early *Gazette*. The decrease is said to be almost nominal, the total population of Victoria and adjoining villages being represented as less than last year by something between three and four hundred. One would have thought that as many as the number stated had disappeared on account of gambling embarrassments alone; but it would appear that Hong Kong does not lose its position in spite of "circumstances over which it has no control."

In the Supreme Court, on the 8th July, in the estate of Douglas Lapraik, deceased, Mr. H. C. Caldwell, Proctor for the executors, applied for probate of the will to be granted to Mr. Robert Ellis Baker, the executor in Hong Kong. The application was granted, with power to the other executors to come in and apply for the like probate. The property in Hong Kong was sworn to under 350,000 dols., and the stamp duty on the probate will amount to 700 dols.

Messrs. Dent and Co.'s Foochow property, which was sold by public auction on the 15th, fetched the following prices:—Lot 1, Dwelling House and Grounds, put up at 4,000 dols., knocked down to Mr. Pollard, Q.C., for 5,000 dols. Lot 2, Offices and Godowns, was put up at 5,000 dols. and ran up to 10,100 dols., 15,000 dols., and finally to 27,500 dols., *bona fide* bids. It was eventually bought in by the trustees at 30,000 dols.

We are glad to be able to publish a denial of the very circumstantial rumour that prevailed here some months ago of the murder of a Foreign missionary in Honan.

## REFUSAL OF THE CHINESE GOVERNMENT TO RECEIVE THE DUKE OF EDINBURGH.

We (*China Mail*) learn upon the best authority that Prince Kung has declared to the British Minister that he will not receive his Royal Highness the Duke of Edinburgh upon his expected visit to Peking. Mr. Burlingame will be pleased when he hears of Prince Kung's decision. An interesting subject of speculation is afforded by this item of news. There is no doubt of its authenticity, and it is withal so extremely probable that we can readily accept it as true. The refusal of "Prince Kung" to receive his Royal Highness seems at first sight unimportant, until it be recollected how great is the objection entertained by the Chinese to permitting a "barbarian" to see the Emperor. Any official interview with Prince Kung on the part of H.R.H. the Duke of Edinburgh could only have for its object the arrangement of an interview with the young Emperor himself. To effectually prevent any such appeal, Prince Kung gives a notice which he hopes will have the effect of keeping his Royal Highness out of Peking altogether, and so preventing the discussion of this much-dreaded question.

We hope that the intelligent party who now govern the politics of Great Britain towards Chinese will take note of the attitude assumed by the Chinese Government in this matter. Any Chinese official of "respectable" position may, if need be, see the Emperor. Dirty coolies, unconnected with the Palace, ar: at

Digitized by Google

liberty to walk, drive, or lounge past the Palace gates in Peking (which a minister may *not* do). Pin, the teacher, and his tag-rag and bobtail of youthful coolies converted into English and French scholars, were, in London and other cities, admitted to audiences with crowned heads. Mr. Burlingame's "Associated Envoys," not one of whom occupied the social position accorded to a European colonel in the army, have been not merely received by crowned heads, but have been feasted and caressed while literally lying abroad for the benefit of their paymasters; crying peace and progress on Chinese behalf in the States and Europe when obstruction and outrage to Foreigners were rampant in China itself. And yet the Government (?) whose so-called representatives have been received in a manner befitting the position of envoys rather than those of inferior officials, or suddenly-promoted coolies, has the insolence to refuse not only the privileges invariably yielded to Ministers and Ambassadors, but the courtesy extended throughout the world to a Royal visitor!

Let us contrast the conduct of the Japanese upon the same matter. Not only will the Mikado receive his Royal visitor in person with the attentions due to his rank, but he has at great expense actually sent down to Hong Kong for two carriages and six horses (which have just left in charge of the proprietor of a well-known horse-breaking and carriage establishment), in order to accord him a more comfortable mode of progress than that in vogue amongst the Japanese. Yet the wretched little boy of sixteen, with the harem of fifty odd wives and concubines, who is supposed to occupy the throne once filled by such as Kienlung and Kang-hi, is, forsooth, too sacred to be viewed by the "barbarian eyes" of a son of the Queen of Great Britain and Empress of India! We trust that this latest development of China's idea of "entering into the comity of nations." will open the eyes of those at home, whose incomprehensible gullibility has brought about the present state of affairs in this country. She scouts the idea of coming as a learner. Rather as a superior will she at times unbend to glean a little information from the European world. And this is the practical outcome of the blatant trash so freely spouted at the dinners of California and the interviews of New York. China invites us! Every lofty hill and every lowly valley longs for a shining cross to be planted thereon! China is the Barnum of nations and flourishes on humbug. Whether we shall continue to aid her in that commendable course remains to be seen. But possibly the latest slap in the face may cause a little reflection as to the wisdom we have hitherto exhibited.

### THE HONG KONG ASSOCIATION.

A meeting of members of the above Association was held in the Chamber of Commerce rooms on the 8th July, for the purpose of receiving the report of the committee, and for the transaction of any business necessary. There were present:—Messrs. Pollard, Linstead, Delbanco, Duncanson, Kresser, Walker (R. S.), Dennys, Dulcken, Sharp (G.), Overbeck, Kaye, Moss, Arnhold, Zimmern, Norton, Francis, Rowett, Coxon, Whyte, Pyke, and Dr. O'Brien. Mr. Pollard took the chair.

The report having been taken as read, it having been circulated, the chairman (after a pause) observed that if nobody was inclined to say anything, the sooner they went away the better. The committee had resigned, and it was a question whether there was any Association or not. (Another pause.) For the second time he would ask if anyone had anything to say. From the discussions in the local press and the luminous correspondence which had appeared therein, he thought that some one might have had something to say as to the past.

Mr. Whyte then rose, and originated a discussion which ran to considerable length, as to the management of the London branch of the Association, and the causes of its inaction and apparent collapse.

To this succeeded a controversy on the question whether the Association was competent to deal with the general question of British policy in China; a position that in the end was repudiated by a vote of ten to five.

Eventually the following resolution was agreed to, which terminated the proceedings:—"That a general meeting of the Association be called within a month to consider its future scope and objects, and that meanwhile the committee and hon. secretary be requested to continue."

---

BANKRUPTCY COURT.—*In re* LYALL AND OTHERS, *ex parte* HENDERSON.—This was a motion before the Chief Justice, very ably argued by Mr. Whyte for the motion and by Mr. Hayllar for the official assignee, on the 14th and 21st days of June last, whereby Messrs. Henderson and Co., of Manchester, coming in under Sec. 96 of Bankruptcy Ordinance, asked that their title to divers trusses of goods in the hands of the official assignee, to which they claimed to be entitled, might be declared. The property claimed is as follows:—

No. 1.—15 trusses Long Ells, part of — trusses which arrived in Hong Kong on 13th February, 1867, per *Behar*.

No. 2.—21 ditto, part of 50 ditto which arrived in Hong Kong on 23rd February, 1867, per *Benares*.

It seems that on the bankruptcy these 36 trusses came to the hands of the official assignee, and realised a net sum of 4,321 dols. 50 cents, which sum is now in his possession.

No. 3.—5,396 dols. 25 cents, a sum handed to the official assignee on 17th July, 1867, by Mr. Caldwell. This sum the claimants allege to be part of proceeds of goods consigned by Henderson and Co. under trusts for sale sold for specified purposes for their benefit, and by the bankrupts before their bankruptcy, and the proceeds of which were not so employed.

As regards the 36 trusses of goods included in claims 1 and 2 his lordship decided in favour of Messrs. Henderson and Co. With reference however, to the sum of money forming claim No. 3, he held that it had become so amalgamated with the general property of the bankrupts that it can no longer be identified, and Messrs. Henderson and Co. have no other remedy but to come in as general creditors and prove for the amount of the loss.

## PHILIPPINES.

—o—

### MANILA.

From a Manila correspondent we learn that the steamer *Prim* has been chartered at 600 dollars per diem, and 10 per cent. of value of cargo, to bring to Manila the British barque *Ann Wood*, which had got ashore on the "Isla de Fortun." The vessel was bound to Manila from Cebu to complete her lading for Europe.

The *Porvenir Filipino* of 3rd July mentions that the President of the Executive Council at Madrid had nominated to the Post of Envoy Extraordinary and Minister Plenipotentiary of Spain to China, Senor Don Adolfo Patxot y Achaval.

## BORNEO.

—o—

### LABUAN.

We hear that the Oriental Coal Company, in addition to the *Vine*, are about to run two new steamers to Labuan—one called the *William Miller* and the other the *John Pope Hennessy*. Both will be larger than the *Vine*. We also learn that Mr. Lumsden, the manager of the mines, will henceforth bring all Chinese coolies to Labuan in the *Vine* and other vessels of the company free of all charge. The company have also resolved to make the railway from the mines to Victoria Harbour, and the site of the terminus close to the deep water is now marked out. The railway will probably be made by convict labour; and in the meantime Mr. Lumsden has signed a provisional contract with the Governor for utilising the road from Coal Point, so as to make it suitable for running traction engines upon it.

The barque *Samson* and the *Vine* are now carrying full cargoes regularly from Labuan to Singapore; and the barque *Admiral Protet*, chartered by a Chinese firm in Labuan, is running regularly between that place and Hong Kong. The briskness of Labuan trade does not seem to have been much influenced by the alarming rumours of piracy. At the same time we think the Governor acted very prudently in taking a trip along the coast as Consul-General, and ascertaining from his own observations the actual facts about the alleged pirates.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Our advices from Singapore extend to the 30th July. The outward mail of June 18 reached there on the 21st July. There are few items of interest; the following are from the *Straits Times*:—

A meeting of the Legislative Council was held at Government House on Thursday, the 22nd July, the Governor being unable to attend the Council Chamber; but the business done was not important. The Attorney-General obtained leave to introduce a fresh Bill for the better protection of the town in cases of fire. The four following Bills were introduced at the same time:—A Bill to Amend the Prison Ordinance of 1869, a Bill to Amend the Laws relating to Promissory Oaths, a Bill to Provide for the Support of Volunteer Corps, and a Bill to Amend Conservancy Act No. 14 of 1856. All these Bills were read a first time, and ordered to be printed.

The Governor left for Penang on the 26th July, in very indifferent health; it seems he received some hurt to his foot while at Batavia, or on the way up, and that from neglect the injury has very much increased. He had to be carried on board the steamer on leaving, his medical attendant having prohibited his removing from a recumbent position.

From Johore we learn that the Maharajah has commenced a line of rail to connect the seaport of Tonjong Putri, or New Johore, with Gunong Pulai—a hill some twenty-five miles in the interior, which was at one time recommended as a sanitarium for the Straits. If this undertaking be completed it will not only greatly benefit the Maharajah's territory, but be a valuable boon to the people of Singapore.

In response to an earnest appeal from the Association in London, the Straits Settlements Association here are, it is believed, about to take some action in regard to the political situation of the colony. It is not probable that they will extend their remonstrances over quite such broad ground as has been done at home. The idea prevails here largely thrt the more closely our complaints and demands are concentrated the better, and that the first and foremost effort should be towards a reconstitution of the Council, by which the unofficial and representative element

Digitized by Google

shall be made as strong as the official. It is most probable that whatever action is adopted on this side will take the form of a petition from the inhabitants to the Secretary of State for the Colonies, and it will not likely include anything in addition to the prayer for the desired reformation of the Council beyond a recommendation that the appointments of chief-justice and judge in the Settlements should be as independent of the Executive as they were under the Indian rule.

---

PENANG.

From Penang, we learn there are considerable fears of a fresh rising of the Chinese, not from any cause of complaint on their part, but merely because the headmen of the opposing factions in the last riots are likely again to meet, the term of their deportation having expired. It is to be hoped the Executive will take timely steps to prevent this.

The *Penang Gazette* of July 31st says:—Two years have now nearly elapsed since the conflict of August 1867 closed. The deportation by the Governor of one of the most active and dangerous leaders of each of the two Chinese societies, and the severe sentences passed by the Judge on Khu Tien Teck and the other convicts, struck a wholesale terror into the minds of the members of all mischievous societies. A number of the Malay and Jawi Pakan head men fled in alarm from the Island, concealing themselves in the remoter villages in the Province occupied by their followers, or retiring into the Malay territory; yet, at the end of two years, we find that matters have come round to where they were here before the outbreak.

One of the deported leaders has returned to Penang, in defiance of the order of deportation and the refusal of the Governor to comply with a petition for its recall, his triumph culminating in the decision of the Court, that the Legislative Council had inadvertently deprived his Excellency of the power of enforcing the order. The friends of the other deported leader have not lost a mail in writing to him to return from China. The sentences on the convicts for murder, arson, and other crimes committed during the riots have been commuted by the Governor, and these men—several of them leaders—will soon be again in Penang with the dread inspired by their sentences replaced by a very different feeling, which is shared by all their countrymen. Their co-conspirators, who were scared away by the severe and inexorable action of the Government, in both the executive and judicial departments, have, as the natural effect of this change of attitude on its part, returned to Penang, and the quarrels and affrays of the last few weeks between two sections of the White Flag, leading to bad blood between the Ghi Hins and the Ho Sengs, may prove to be the precursor of an outbreak that will find Government as unprepared as ever, as the long promised Act for controlling the Chinese and Mahomedan societies has not been passed, and no means have been taken for enrolling the *posse commitatus*, so as to make it available at a moment's notice in aid of the police against bands of rioters.

## CEYLON.

—o—

GALLE.

(FROM A CORRESPONDENT.)

AUGUST 3, 1869.

The only matter at present agitating our quiet little community—and no great agitation either—is the prospect of Point de Galle being made a safe and commodious harbour. The project has not even been broached from head-quarters, for our Governor is very reticent, and I presume he intends to surprise us at the opening of the Legislative Council by a full *exposé* of his future policy, and an announcement of the good things in store for us, the result of his recent visit to the mother country. Somehow or other, however, it has leaked out that the Home Government are to advance £200,000 sterling for the purpose of improving the Galle harbour, charging this island with the money at 3 per cent. interest, and allowing our Government to recoup themselves by imposing port dues on the vessels frequenting the harbour, sufficient to repay the money in about thirty-five years. For this purpose a sinking fund is to be created from the above source. The Ceylon Government are to carry out the improvement and receive the benefit. All the Home Government agree to do is *to provide the money*, on the understanding that it shall be repaid in the way and time stated. Advantageous as this offer seems to be for Ceylon, opposition has already been manifested, and that too from a quarter where it should have been least expected. A gentleman, who has heretofore been distinguished for his liberal views and progressive tendency in all matters wherein the welfare of this colony is concerned, has thrown down the gauntlet. He sees in it an attempt to make Ceylon provide harbours for Imperial purposes; to take our revenues, which ought to be employed in making roads and railways, to build harbours for the British navy, with the sure prospect that we will be in the end annexed to India, which would be equal to being swallowed up by it. He forgets, however, that it is not *our* money at all that is to be spent, and he predicts that the great steam companies, such as the P. and O. and the Messageries Imperiales, will not use the harbour if made—consequently that there will not be the means of repaying the loan, except by squeezing out the life-blood of the present colonists, in the shape of further and excessive taxation. Fortunately for the country, the gentleman in question is as yet single in his opposition, while the part he lately took in a political demonstration in favour of his quondam opponent and declared enemy of progress, the retiring Colonial Secretary, is not calculated to secure him a following in his present unpopular raid. A harbour for Ceylon is a want greatly and increasingly felt. It is, in fact, growing into a necessity. And Galle is the most convenient spot where that want can be advantageously supplied. At the apex of the Indian continent, at the southern extremity of our own island, on the highway to India, the Straits, and China, and but little off the course, and at all events easily reached by traders to the Australian colonies, what spot could be selected that would be so extensively useful? It is true we have Trincomalee, one of the finest natural harbours in the world; but it is a two days' sail from Galle, or going and returning, four days off the course of vessels bound for any of the places named, and in this age of expedition that would not suit. Galle at present is very unsafe; at night it is unapproachable by steamers. Much valuable time is lost, and valuable steamers and other vessels freighted with costly cargoes have been lost there before; and the wonder is that wrecks have been so few. It is doubtless owing to the great care and extraordinary precautions adopted by the various steam companies frequenting that port that much more loss has not occurred. But these precautions involve delays, and time is money. With the proposed breakwater outside, and wharves and other conveniences inside, vessels will be able to enter the harbour and depart from it at all hours, night and day. And the great steam companies referred to will be but too glad to avail themselves of the increased accommodation and safety thus provided for them. Surely all this is worth paying for. It is computed that the saving in time alone would more than repay the steamers and other vessels calling there for all the dues that will necessarily be imposed, and this is independent of their diminished risk, cost of boatage, and other savings.

The Imperial Government, it is true, would benefit by Galle being made a safe anchorage and a good harbour, for they would, doubtless, on occasions send their squadrons there; but they would pay for it in the same way as others would, and Ceylon would get the benefit. In the meantime our little island would derive great advantage from the spending of so much money among us—a thing sadly missed since the completion of the railway; for surely £200,000 cannot be expended in a small colony like this without leaving some mark. This, however, will be but our first advantage. Our second will be the money put in circulation, not by fits and starts, as at present, but by the constant, steady, and frequent arrivals and departures of vessels of all sizes, and bound for all countries eastward of the Red Sea; and not less than either of these will be the advantage accruing to the trade of the place, for there can be no doubt that immediately Galle is found to be a safe anchorage and a commodious harbour, docks, wet and dry, will be established for the benefit of vessels arriving in want of repair—as well as other improvements that at present we do not think of. The scheme ought, therefore, to receive, as I trust it will, the support of every well-wisher of Ceylon.

---

# Commercial Report.

—o—

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN

### IMPORTS.

(*For Dates see First page.*)

YOKOHAMA.—The tone of the market continued weak and dull, with excessive stocks and unsatisfactory deliveries of sold goods. Yarns had declined a dollar and were quoted 16-24s, $46.50 to 47.50;—28-32s, $47 to 48;—38-42s, $49 to 50. At these quotations a few sales had been made of 16-24s, which, at the price, were still in enquiry at the close; the other counts were neglected. Gray Shirtings had fallen in the same proportion, and were quoted 7lbs. at $2.35 to 2.40, and 8lbs. 4 to 8 at $2.75 to 2.80. Moderate sales had been made at these very unsatisfactory figures, and there was a full year's consumption in stock. A few small sales of Turkey Reds and Velvets at last prices are all we have to report in fancy goods, and all other quotations for cottons were nominal. Woollen remained dull, very small sales of Black Camlets, Black Lastings and Blankets at former quotations being all we have to note. There was nothing doing in Metals; the Empress, J. C. Textor, Cedric, and Aurora Australis had come in from London, and the Empress, Dora, and Kirkland, from Liverpool. Several coal ships from Cardiff had also arrived.

TIENTSIN.—For Gray Shirtings holders were asking higher prices, but dealers declined to purchase at an advance, and the market was consequently quiet, 8¼lbs. Tls. 2.1.3 to 2.1.7. T-Cloths: Mexican 7lbs. were quoted Tls. 1.8.0 to 1.8.6. White Shirtings, genuine 64 reed were wanted, at Tls. 2.1.0 to 2.4.5; other qualities quiet.

SHANGHAI.—Piece Goods: The market for all classes of English goods had been steady, but quiet; and the sales had been simply the result of day to day enquiry. Gray Shirtings: Sales reported from first hands had been 150,000 pieces, these being entirely of 7 lbs. and 8.4 lbs. weight. Rates had shown little variation from those last current, though at the close there was an upward tendency in 7 lbs. Quotations: Tls. 1.95 to 1.98 for 7 lbs., Tls. 2.16 to 2.20 for 8.4 lbs., and Tls. 2.60 to 3.05 per piece for 9 lbs. to 9.12 lbs. These latter weights had been very difficult to place. Second-hand goods had been offered to some extent, and their

Digitized by Google

presence on the market had tended to keep down rates. At the close there were still some of these goods seeking buyers, but only very low figures were offered for them. Some trouble was likely to be caused in this market from one of the leading Manchester houses having recently elected to place a new "chop" on the "Eagles" formerly so well-known. A sudden change of this kind is apt to cause distrust among the native dealers, notoriously averse as they are to change of any description, and it will take some time before they are reconciled to the innovation. The same remark applies to T-Cloths of the "Dewhurst" stamp. T-Cloths: Transactions in these goods had taken place to the extent of 85,000 to 90,000 pieces, and a slight improvement may be noted in the classes ranging from good to fine. Of the finest Cloths only small sales were reported at previous figures. Quotations: 6 lbs., Tls. 1 44 to 1.72 per piece; 7 lbs., Tls. 1.65 to 1.92 per piece; and 8 lbs., 36 in., Tls. 2 to 2.55 per piece. White Shirtings: Only limited sales were reported, and prices were slightly weaker, mainly owing to some second-hand sales. 9,000 to 10,000 pieces had been placed from first hands. Quotations: Tls. 2.12 to 2.15 for 56 reed, Tls. 2.20 to 2.25 for 60 reed, Tls. 2.40 to 2.43 for 64 reed, and Tls. 2.50 to 2.53 for 66 reed. Drills: Continued auction sales of damaged goods had materially tended to keep down prices, and both American and English makes had suffered in consequence. A small sale of the former class (best chop) was quoted at Tls. 4.27 per piece, showing a decline of 6 cents per piece, while the latter class could not be quoted over Tls. 3.65 to 3.85 per piece for ordinary classes. Best goods of 16 lbs. weight were dull, at Tls. 3.95 per piece. Dutch Drills had found buyers to the extent of about 4,000 pieces, at Tls. 3.70 to 3.75 per piece. Sheetings: Sales of American had transpired at Tls. 3.70 per piece for common makes, while slightly damaged goods of the same class had been placed at Tls. 3.60 to 3.62 per piece. English Sheetings had found buyers to the extent of 3,000 pieces at Tls. 3.20 to 3.30 per piece, the highest figure being Tls. 3.35 per piece for full weight. Jeans: Just before last mail left holders gave way, and some American goods were placed at Tls. 3.65 per piece. Since then there has been no inquiry, the auction sales of damaged goods being sufficient to supply local wants. English Cloth quiet at Tls. 3.10 to 3.20 per piece. Dyed Spots and Brocades had been in very limited demand at lower rates. Gentian Shirtings had also declined in price, and about 4,000 pieces had been placed at Tls. 3.05 to 3.10 per piece; the tendency of these goods was still downwards, owing to over supplies. In Chintzes a fair business had been done at lower rates, sales amounting to 5,500 pieces. Velvets and Velveteens had changed hands to a limited extent, and a slight decline in value has to be noticed. Camlets: Only a few sales had transpired, and rates for Scarlet, Gentian, and Dark Blue show a fall. Long Ells: Transactions in H. H. Assorted quoted at Tls. 6.50 per piece, and in C. P. H. at Tls. 6.60 to 6.65 per piece. Nail Rod Iron: Sales of small sized Rods had been made at Tls. 2 to 2.10. In Bar Iron little was doing, owing to the firmness of holders. Quotations:—Nail Rod, small size, Tls. 2 to 2.10; fair to good assorted, Tls. 2.15 to 2.20; Hoop, Tls. 1.80 to 1.90; Flat and Round, Tls. 2.30 to 2.40. Lead: No buyers in Shanghai; it was being shipped freely to the northern ports to find a market. Coal: The market had continued depressed, increasing receipts from Great Britain had rendered the rates very unfavourable for cargoes from that quarter. Cardiff: Demand languid, and importers obliged to land and store cargoes. English: Full receipts had caused prices further to decline, and sales had been made at Tls. 6.40 per ton. American: Sales from ship had been effected at Tls. 10.85 for small lots, to arrive Tls. 10.45 was noted.

HANKOW.—Prices for Gray Shirtings and T-Cloths had given way about 5 candareens per piece, while the supply of Drills, being in excess of wants, had led importers to realise at a reduction of 1½ mace per piece. Fancy Cottons had been unsaleable. Woollens had been principally disposed of in barter. Camlets had been sold at a decline of 3 mace per piece. Lastings had been neglected. Assorted Long Ells were dearer, and in good demand. Lead had been only saleable in barter for tea. The following were the current quotations:—Gray Shirtings, 7 to 7¾ lbs., per piece, Tls. 1.95 to 2.05; 8 to 8¾ lbs., Tls. 2.07 to 2.22; 9 to 10 lbs., Tls. 2.60 to 3; Gray T-Cloths, Tls. 1.30 to 2.40; Gray Twills, 40 yards, Tls. 3.75 to 3.90; American Drills, 40 yards, Tls. 3.95 to 4.15; White Shirtings, Tls. 2.15 to 2.16; Camlets, SSS, Tls. 10.50 to 11.56; SS, Tls. 11.50 to 12.50; Lastings, Tls. 10.50 to 11.50; Long Ells, Scarlet, Tls. 6.20 to 6.50; Assorted, Tls. 6.40 to 6.80; Metals—Quicksilver, per picul, Tls. 50 to 51; Tin, Tls. 28 to 29; Lead, Tls. 5.90 to 6.10; Nail Rod Iron, Tls. 2.70 to 2.90.

FOOCHOW.—The transactions during the fortnight had comprised 1,400 pieces 8¼ lbs. Gray Shirtings, at $3 to 3.05 per piece; 800 pieces 7½ lbs. do., at $2.85; 2,000 pieces 7 lbs. T-Cloths, at $2.50 to $2.60; 1,300 piculs lead, at $8 to 8.25 per picul.

HONG KONG.—Messrs. Olyphant and Co.'s Circular, dated 21st July, is as follows:—Piece Goods: Business has been unsettled, and broken into in many instances by holders accepting offers under the market values, and by the sale of considerable quantities of perfectly sound goods at auction, thereby betraying to the Chinese dealers a lack of firmness, which has been immediately turned to their own advantage. Arrivals of 7 lbs. Gray Shirtings have been fair, but rates are unchanged; holders of 8.4 lbs. are weak, and quotations are 2 to 3 cents lower; the settlements comprise in part sales of goods at auction bearing not the least blemish. White Shirtings are not enquired for. Assorted Spotted Shirtings are 10 cents lower. T-Cloths are unaltered in values, though the demand has materially slackened for all weights except 6 and 7 lbs., which find buyers upon former terms. English Drills are weak, and not wanted. Dutch are in large stock, and meet with no demand. Supplies of 40-yard American have been considerably increased of late, and rates have to be quoted down 10 cents; no sales have been made, and no offers are reported. No arrivals of 30 yards have taken place, and the quotation for these is nominally unchanged. Cotton Yarn: A large business has been done, but rates have undergone no quotable change. Arrivals have been trifling, and stocks are becoming reduced, and, notwithstanding these facts, holders have not maintained the firmness that was looked for, but have in many instances given way to dealers' offers. A fair demand exists, and at present quotations dealers are ready to continue operations. Woollens: No improvement can as yet be reported in the market, as in nearly all cases where dealers' offers are anywhere near holders' views they are accepted at once, and in this way the market has had no chance to rally. Scarlet Long Ells are quoted 5 to 10 cents lower, while Assorted show no change. Spanish Stripes have again declined. B.B.B. Camlets are weaker, and Dutch are down 50 cents. Lastings are without change. Metals: Nail Rod Iron is in very full supply, and has declined 10 cents per picul; Square, Round, and Flat Bar is not inquired for, and has receded 10 to 20 cents per picul in value; Hoop is in very limited quantity, and is much wanted at a rise of 35 cents per picul. Further arrivals of Lead have taken place, and quotations are 20 cents lower. The market is again bare of Tin, and a sudden rise of $3 per picul has taken place. Coal: Arrivals have been, 900 tons English; 600 tons Anthracite; 1,850 tons Welsh, and 1,816 tons Australian; of the latter about 600 tons come to consumers. Sales have been, 1,000 tons English, at $8 per ton. Ginsing: There were no sales to record, and no offers had been reported. The market is quiet, and inquiry seems to have subsided. Holders of Clarified are firm. The following were the current quotations:—Cotton Yarn, Nos. 16 to 24, per bale, $130 to 136; Nos. 28 to 32, per bale, $140 to 145; Nos. 38 to 42, $145 to 150; Gray Shirtings, 7 lbs. per piece, $2.45 to 2.50; 8.4 lbs., $2.75 to 2.85; 9.12 to 10 lbs., $3.75 to 3.90; White Shirtings, $2.50 to 5.10; T-Cloths, $1.88 to 2.85. American Drills, 40 yards, 15 lbs., $5.50 to 5.60; Dutch Drills, 40 yards, 14lbs., $4.80 to 4.90; Spanish Stripes, Scarlet, per yard, $0.77 to 0.80; Assorted, $0.75 to 0.77; Medium, Ladies, and Habit Cloths, $1.15 to 2.00; Long Ells, Scarlet, per piece, $7.90 to 8.20; Assorted, $8.00 to 8.20; Camlets, SS, $16.50 to 17.00; Lastings, 30 yards, 31 in., $13.20 to 15.25; Blankets, per lb., $0.45 to 0.60. Metals, Iron, Nail Rod, per picul, $2.76 to 2.78; Round, Square, and Flat Bar, $2.60 to 2.80; Lead, $7 to 7.25; Steel, per tub, $4.25 to 4.50; Quicksilver, per picul, $63.50 to 64. Coals: English, per ton, $8.50; Welsh, $10.

SINGAPORE.—The business done in most staples had been small, owing chiefly to the firmness of importers, who, in face of advices from home and the comparatively small stocks, declined to part with their goods at the prices which had ruled during the previous months. A speculative demand had, moreover, shown itself, still further disinclining importers to quit their stocks. In Gray Shirtings the business had been small, but the sales all evidence an upward tendency; transactions in these goods were reported—6 lbs., at $2.10 to 2.20; 7 lbs., at $2.45 to 2.52½; and 8½ lbs., $2.86 to 2.90 per piece. T-Cloths had shared in the advance in Gray Goods generally. Sales reported of 4½ lbs. at $1.50 to 1.55; 5 lbs., $1.60 to 1.62½; 6 lbs., $1.80 to 1.88; 6½ lbs., $1.95; and 7 lbs., $2.10 to 2.15 per piece. White Shirtings continued neglected, and purchases were only for special orders. Irish Imitation linens in fair inquiry; sales at $2.16 to 2.22½. Cambrics of the finer qualities in better request; sales of No. 15 to 16s reported at $32½ to 33½; No. 24s, at $19¾ to 20¾ per corge. Figured Shirtings, Spots, sold at $2.85 to 2.90 per piece. In Dyed Cottons the business had been more than usually small. In Coloured Shirtings the only sales reported were of assorted Figured at $3.56 to 3.60, of Blue Spots at $3.80, and of Pink Figured at $6.20. Gray Yarn had shared the improvement to even a greater extent than Gray Cloth. No. 40s Twist had been sold as high as $145 per bale and Nos. 20 to 22 at $122—an advance of about 10 per cent. T. R. Yarn in small stock. Coloured Yarns firm. Woollen goods slow of sale. In Metals the business done had been small. The sales of Iron confined to two small parcels of round at $2.52½ and 2.70, and of Nail rod at $2.55. Swedish steel sold at $3.65 to 3.72½. Pig Lead to the extent of about 100 tons at $6.25 to 6.40 per picul. Yellow Metal at $22¼ to 23⅜, and Copper Sheathings at $27 per picul. Coals continued to arrive from Europe in more than average supply; but prices had, notwithstanding, considerably improved. Sales reported 1,600 tons Cardiff at $7.25 cash; 620 tons West Hartley at $7 3 m.c.; 940 tons Scotch at $5½ cash.

PENANG.—The business had been very unimportant. Stocks of almost all staples were very light, and holders had every chance of advancing prices, excepting in Coloured Goods, which were in very heavy stock, and meeting but a light demand. Gray Shirtings, 6 lbs., in very light stock; sales at $45 per corge, with a rising tendency; 7 lb. goods opened at $49½ per corge, but gradually increased in price to $51 per corge, at which latter quotation the market closed firm; 8½ lb. goods sold at $55½ per corge for cash, and at $59 and $60 usual credit. In the heavier weights no business. Gary Long Cloths and Madapollams had not been inquired for; stocks of both very light, quotations nominal. The market was not overstocked with Gray T-Cloths, especially those of the higher numbers. The quotations ruling at the departure of last mail would not be accepted by holders. White Shirtings had not met with good demand, and only a few sales were reported—fine at $95, medium at $65 per corge. The stock of these goods had not been increased.

CEYLON.—The interval had been characterised by considerable animation in Gray goods and Twist, and the market closed at an advance, with a steady demand. Gray Shirtings in all weights and widths had been in demand, but the run has been most in 45-inch; 9 and 10 lbs. stock were all very moderate. Gray Long Cloths had had good inquiry, and been taken at an advance. Gray Mule Twist in very moderate stock, and had met good inquiry. White Shirtings and Cambrics in steady demand. T. R. Cambrics, steady. T. R. Twist maintained fair position. Regatta Prints of good cloth and pattern steady. Red Madder Prints in good inquiry. Thread, without inquiry.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

(*For Dates see First page.*)

### TEA.

YOKOHAMA.—The market had been fairly supplied, and it was remarked that the quality of the leaf was superior to what had hitherto been received at the commencement of a season, very little, if any, old tea being mixed with it. About 1,500 piculs had been settled for the American market, consisting of medium to finest grades. Arrivals about 2,000, which had increased the stock to nearly 2,800 piculs. The P. M. S. S. Co.'s steamer Japan sailed on the 29th June for San Francisco with 119,817 lbs. Total export of the season of 1868-69, 10,674,139 lbs.

Digitized by Google

SHANGHAI.—Black: Business had been on a very large scale, but as supplies had come forward more slowly, the available stock had been materially reduced. Prices, as a rule, were fully up to last mail's quotations, and in many instances showed an advance; this was especially the case with common and inferior descriptions, which had been eagerly sought after. The market closed firm, with an upward tendency. Settlements for the fortnight, 61,090 chests. Re-shipments on owners' account New Tea, 24,962 chests. Stock, 193 chops, or 60,484 chests. Quotations (duty paid, exchange for credits, 6 months' sight, at 6s. per tael, and freight at £2 10s. per ton):—Hohow, common, 1s. to 1s. 1¼d.; Oanfas, 1s. 4d. to 1s. 7d.; Oonam, common to fair, 1s. 0½d. to 1s. 2¼d.; Ningchow, fair to good, 1s. 3d. to 1s. 7d.; Oopack, 1s. 2¼d. to 1s. 8½d. Green: Considerable settlements of new Pingsueys had been made at full rates, mostly for shipment to England by steamer. Prices ranged from Tls. 33 to 40 per picul. Settlements for the fortnight, 12,298 half-chests Pingsuey; 1,447 half-chests Shanghai packet. Re-shipments on owners' account, nil. Stock, or 8,720 half-chests Pingsuey.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s Report, dated 10th July:—The business of the fortnight has been limited to 12,000 chests and 1,800 half-chests, of which 6,200 have been taken in barter against Piece Goods. So large a proportion of the business being in barter, it is difficult to arrive at a correct idea of the run of prices; we think, however, that some of the bona fide settlements show an advance of quite two taels on last mail's quotations, but as there has been little or nothing doing for the past few days, we could now perhaps buy rather cheaper. During the last few days we have had a continuance of rain, which has prevented Teas coming forward so readily as they otherwise would have come, and as some chops have on arrival been sent on to Shanghai without being shown here, our market has for nearly a week been very barely supplied. We have scarcely seen a chop of Shuntam packed throughout the fortnight, as the price paid for this class of tea in Shanghai is above the range of price at which they opened here, viz., Tls. 12½ to 13. This demand for low grades has already had its effect on our coming supply, as since the news of their ready sale has reached the country the price of leaf has advanced in some districts from 260 to 320 cash per catty. Some few musters of second crop have been shown; they are much later this season than last, when, at corresponding date, some 10,000 packages had been settled. From what we have seen of them they are inferior to the previous crop. We hear that taels 19 proportion has been offered for two chops; last year they realised taels 23½ to 24½ per picul. Shipments to Shanghai on native account have again been large, amounting to 23,241 pkgs., making a total of 120,589 packages, or more than the quantity shipped by them during the whole of last season. Settlements for season are 166,515 chests, 20,993 half-chests, and 7,233 boxes, against in previous seasons 201,056 chests, 11,168 half-chests, and 4,288 boxes. We quote medium to good medium Oopacks, 18½ to 21; fair to good Oanfas, 19 to 21; Oonams, 15 to 16½; Shuntam packed, 13 to 13½ nominal, none on offer.

KIUKIANG.—Black Tea: Business on the spot had been of the most trivial nature, only two small chops having been settled during the fortnight. Arrivals had been on a much smaller scale than during any previous fortnight since the commencement of the season, or during the corresponding period last year, and consequently the export was much under that of last season. Quotations were, Ningchows, Tls. 19 to 22½. Export from 1st Jan. to 10th July, 1869, 8,118,681 lbs.; do. 1869, 9,376,813 lbs.; stock, 444 packages. Green Tea: One chop (old tea) Moyune had arrived; no further information regarding the new crop. Export from 1st Jan. to 10th July, 1869, 1,757,142 lbs.; do. 1868, 686,846 lbs.; stock, nil.

FOOCHOW.—Messrs. Odell and Co.'s Report, dated 17th July, contains the following:—Congous have been in very active demand throughout the fortnight, both on English and Australian account, settlements amounting to about 129,000 chests. Prices have ruled somewhat irregularly; the common grades were cheaper during the early part of the interval, but are again firmer, and we quote an advance of one tael per picul on all grades except dust and broken leaf. The supply of fine and finest kinds is now almost exhausted. Arrivals from the country have only been 14,000 chests, of which about 3,000 chests are second crop teas; the native merchants still show the greatest disinclination to purchase these teas in the country, their losses on first purchases having been so very heavy; and it is reported that the crop will be small in quantity and poor in quality. Souchongs have found buyers to a small extent at very full prices, quality considered. Oolongs: The Teamen have been willing to meet the views of buyers, and about 13,500 half-chests fine kinds have been taken at prices showing a reduction of Tls. 10 to 12 per picul on last season's opening rates. Scented Teas have only been in moderate inquiry, and a few parcels Flowery Pekoe have found buyers at full rates. Settlements for the fortnight have been:—Congou, 129,039 chests, at Tls. 8.05 to 31.8 per picul ship off; Souchong, 4,026 chests, at Tls. 20.08 to 38.8 per picul ship off; Oolong, 13,497 half-chests at 19.8 to 26.8 per picul ship off; Scented Teas, 14,625 boxes, at Tls. 8 8 to 21.3 per picul ship off; Flowery Pekoe, 754 chests, at Tls. 30.08 to 67.8 per picul ship off.

## SILK.

YOKOHAMA.—The arrivals of new Silk had been only moderate, the weather being against transit. The quality was much the same as usual, but prices were from $50 to 60 lower than at the opening of last season. In spite of a general impression that the European crop will be considerable buyers had been operating freely, and settlements had reached 240 piculs. Stocks were not estimated at more than 80 piculs. Prices: Best Mybash offering $750 to 780; best Sinchiu offering $680 to 730. In Silkworm Eggs the market had not yet been opened, and reports from the country were unfavourable, the "ougi," a parasite of the chrysalis, which, after destroying it, destroys the cocoon, having been unusually common this year.

SHANGHAI.—The following is from Messrs. C. J. Skeggs and Co.'s Circular:—The French steamer took 505 bales, settled at about the current prices of the previous mail. Since then buying has gradually gone on, notwithstanding discouraging telegrams, at rates which show no marked difference, some purchases of Medium Silks being perhaps a shade easier, whilst others, including chops, are slightly higher. The continued high cost in the interior, combined with the impression that there will not be more than 45,000 bales available for export, gives the dealers confidence in holding, although the market is still in such a wavering state that lower prices may confidently be anticipated should later advices check business a little; in fact, at the close there is evident willingness to accept a decline on medium Tsatlees. The following are a few of the more notable settlements:—In Tsatlees, Koo-fong-sings, No. 3, Tls. 562½; Choopings, Tls. 560; Dragons, Tls. 557½; Donkey, Tls. 545; Incense, Tls. 535; Blue Flag, Tls. 515; Elephant, Tls. 490; and Red Peacocks, Tls. 460. In Hainins, No. 2, Fat Mows, at Tls. 477½, and a few extra fine Yuenfaas, at Tls. 510 to 520. In Kahing Taysaams, Pangling has been sold at Tls. 437½; Ching-yuen-sings and Ka-chu-fongs, Nanling, at Tls. 430 to 435. Chin-cums are very scarce and proportionately dear. A few Re-reeled Hainins have been taken at Tls. 570 to 600, and some common Trams at Tls. 480 to 510.

## STRAITS AND CEYLON PRODUCE.

SINGAPORE.—Malacca Tin: There had been no purchases for Europe or America. Gambier: In good demand, with a scarcity of supplies; about 16,000 piculs contracted for at $3.07½. Black Pepper: In demand for Cochin China; about 1,800 piculs had been placed for that destination at $6.80 to 6.85; 700 piculs Acheen brought $6.32½ to 6.35. White Pepper: In very limited supply; small parcels bring $9.95 to 10¼, according to quality. Pearl Sago: Firm and in good demand at former prices; contracts to some extent had been made at $3.15 for small grain and $3.20 for large grain. Sago Flour: In very active inquiry; a cargo of 8,500 piculs Borneo brought $2.52½ to 2.55, and 1,700 piculs Sarawak sold for $2.56; Singapore had been contracted for at $2.55. Tapioca: In good demand, and arrivals readily taken at $4.65 to 4.90 for flake, and $4.70 to 4.75 for Pearl. Buffalo Hides: Had been taken at $10½ to 10⅞. Buffalo Horns: Very scarce and wanted at $9½. Gum Dammar: Almost out of supply, worth $16 to 16½. Rattans: Very scarce, good quality worth $5 to 6; Coti and Palembang worth $3 to 3½. Camphor: Last sold at $18½, and offered at 18 without buyers. Cassia Lignea: In no demand, supplies offered at $18. Cubebs: A sale of 60 piculs at $7¾. Coffee: A cargo of Zamboanga sold at $9½ to 9½ for 2,000 piculs picked, 1,600 piculs unpicked brought $6.50 to 6.75. A few small lots of Bontyne had arrived for which $14 was asked. 1,000 piculs Bally held for high prices. Nutmegs: No arrivals. Mace: Worth $52 to 55 according to quality.

CEYLON.—The market was weak, moderate quantities continued to go forward on manufacturer's account, and the necessity of finding dead weight for chartered vessels influenced shipments, as the only other dead weight available was likely to meet but limited demand. Cinnamon: The quantity of desirable chips on offer was small and commanded 4d. per lb. unpicked; quilly bits, 6d. Coir: Yarn of desirable description was in fair demand. Rope in good inquiry. Fibre of the better quality also sold freely. Plumbago of fine bright kinds met a ready sale at £15 to £16 for lump; £7 10s. for chips; and £5 for small bright dust. For the lower qualities there was no demand. Deer Horns: Small parcels could be bought at £10 10s. to £11. Buffalo Horns: In only small supply. Essential Oils neglected. Coals: Unsaleable.

## LATER MARKET ADVICES BY PACIFIC MAIL ROUTE.

IMPORTS.—YOKOHAMA, July 26.—During the early part of the past fortnight some demand existed for Yarns and Gray Shirtings at previous rates, and sales were made; but heavy auction sales had since checked this, all the dollars the native dealers could scrape together being devoted to the purchase of damaged goods. The market consequently closed quiet. There had been some small re-exports. Quotations:—Cotton Yarn, 16-24, $46.25 to 47 per picul; 28-32, $47 to 48; 38-42, $49 to 49.50. Gray Shirtings, 7lbs., $2.35 to 2.40; 8lbs., $2.75 to 2.80. Metals were dull.

TEA.—YOKOHAMA, July 26.—There was not much business to report; advices from America were unfavourable, and dealers had declined to give way. Only about 1,000 piculs, consequently, had been settled, the bulk of which had been for New York. Unfavourable weather had checked arrivals, and stocks were consequently light. The Glenclune, the Mary Lee, and the Doon, were on the berth for New York; the latter has been entirely taken up, and will sail in a few days. Prices: Finest, $36 to 37; Fine, $31 to 33; Good Medium, $27 to 30; Medium, $25 to 26; Good Common, $22 to 23.

SILK.—YOKOHAMA, July 26.—The telegrams received from London reported depressed markets, in consequence of the anticipated crop of European Silk; but buyers had not been deterred from operating, and a fair amount of business had been done, amounting to about 300 piculs. Arrivals had not been very free, but it was considered more than probable that the sole cause for this had been rainy weather, and consequently difficult roads. A decided anxiety to sell had been shown by the dealers, and concessions of $10 per picul had been obtained from them; bringing prices down to $80 lower than at the same time last season. There had been no fine Silk down, arrivals being composed almost exclusively of medium hanks. Stocks were little over 100 piculs. Prices: Mybash; best offering $750, say at 4s. 7d., worth 30s. 6d. in London. Ditto; medium $700 to $730, say 28s. 6d. to 29s. 8d. in London. Ditto; inferior $650 to $680, say 26s. 6d. to 27s. 9d. in London. The market for Silkworms' Eggs still remained unopened, only about 10,000 to 15,000 cards having been offered for sale. Buyers at home were hit so hard last season that the graineurs had come out this year with greatly reduced limits, and would do nothing at anything like the prices asked, while, on the other hand, natives were for the time quite firm in their demands.

## ARRIVALS.

At SHANGHAI.—From London, July 11, Sir Harry Parkes; from Sunderland, 11, Argonaut; 12, Evelyn Wood; 13, Fluellin; from Penrath, 14, Prudhoe.

At HONG KONG and CANTON.—From London, July 13, Cecilia; from Liverpool, 8, Adler; Veronica (reported by telegram); from Cardiff, 10, Sebastian; 14, Alvares; from Hamburg, 12, Valador; from Callao, 18, Uncowah; from New York, 8, Game Cock; 13, Benefactress; from Boston, 18, Bunker Hill.

At YOKOHAMA.—(Reported by telegram), from London, June 29, Empress; July 4, C. J. Textor (str.); from Cardiff, June 29, Emelia.

At MANILA.—From Cardiff, July 5, Vincenza; 10, Oriana.

At SINGAPORE.—From London, July 24, Sree Singapura; from Glasgow, 23, Doune Castle; from Cardiff, 16, Utinia; from Newcastle, 18, Triton; from Sunderland, 18, Ulleswater; from Penrath, 25, Flora; from Swansea, 26, Aimo; from Bourbon, 18, Gustave; from Newport, 25, Madura; from New York, 25, Moneka (steamer).

At PENANG.—None.

## DEPARTURES.

From SHANGHAI.—For London, July 9, City of Aberdeen, White Adder, Ajax (str.).

From FOOCHOW.—For London, July 4, Thermopylæ; 5, Spindrift; 9, West Indian (str.); 13, Ziba, Taeping; 16, Achilles (str.).

From HONG KONG and CANTON.—For London, July 16, Ajax; 6, Deerhound; 9, Belted Will; 16, Douglas Castle; for Falmouth (f.o.), 7, Ceres; 12, Unkel Braesig; 15, Falke; for Callao, 7, Fray Bentos.

From MANILA.—For London, July 7, William Fruing; for New York, 9, Zephyr.

From SINGAPORE.—For London, July 22, Sultan; 28, Blenheim; for Liverpool (*via* Mauritius), 24, Ajax (str.); for Boston (*via* Padang), 24, Borneo.

From PENANG.—For London, July 18, Ceylon.

## VESSELS LOADING.

At SHANGHAI.—For London, Melbreck, Maiden Queen, Dilkoosh, J. R. Worcester, Weymouth, Wild Deer, Geraint, Star of China, Juanpore, Hopewell, Charmain, Conqueror, Decapolis (str.), Miranda.

At FOOCHOW.—For London, Nile (str.), Black Prince, Kaisow, Clara, Min, Serica, Windhover, Sir Lancelot, Falcon.

At HONG KONG and CANTON.—For London, Maitland, Dunmail, Scawfell; for New York, Peter Rickmers, Eurique, Game Cock.

At MANILA.—For London, Ringleader, Verena, Carin; for Cadiz, Conchita, Maria Fidela, Pepita; for New York, George Peabody, Formosa, Cleopatra; for Boston, Wild Rover.

At SINGAPORE.—For London, Niger (str.), Sree Singapura, Canning; for Liverpool, Bothwell Castle, Doune Castle; for Bordeaux, Mondelli; for Marseilles, Rachel; for Boston, Jungfrau.

At PENANG.—For London, Dharwar, Mofussilite, Albion, George Treat.

## FREIGHTS AND CHARTERS.

At SHANGHAI.—Rates home remain without change; for coasting purposes there is but little inquiry for tonnage.

At FOOCHOW.—To London, per sailing vessel, £3 10s. per ton; per steamer, £3 to £4 10s., according to the length of passage home.

At HONG KONG and CANTON.—To London, £3 per ton; to New York, £3 per ton of 40 feet.

At MANILA.—To London, Sugar, £2 10s., hemp £3 10s.; to New York, $11 gold, hemp, and sugar.

At SINGAPORE.—There has been some inquiry for tonnage to load at Bangkok for China; beyond this little has been done in the freight market. The steamer Ajax took about 100 tons cargo from this for London at £2 for tin, and £3 for other goods; the steamer Niger is now here, and will take about 1,000 tons at £2 for dead weight, and £2 10s. to 15s. for light stuff. By sailing vessel the rate for England remains unchanged.

At PENANG.—The Mofussilite and Albion have been laid on the berth for London at the following rates:—Tin, £1 15s.; Pepper, £2; Tapioca, £2 5s.; hides in bales, £2 2s. 6d.; Measurement, £2 10s.; Rum, 3½d. per gallon. The bulk of her cargo has been engaged.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 2, at Deal, from Maulmain, Catherina; 1, at Plymouth, from Batavia, for Rotterdam, Haamstede; Aug. 31, off Folkestone, from Java, for Amsterdam, Nieuve Waterweg II. (not as before reported); 30, off Beachy Head, from Saigon, for Bremen, Carmelita and Ida; 31, from Rangoon, for Hamburg, Frederik Petersen; Sept. 2, off Falmouth, from Bangkok, Carl August; Aug. 31, off Dunmore East, from Rangoon, for Liverpool, Centaur; Sept. 3, at London, from Penang, Ilmari; Aug. 31, off the Eddystone, from Batavia, for Amsterdam, Ocean; 30, off the Lizard, from Penang, Ulva; Sept. 1, at Belle Isle, from Saigon, for Havre, Nonpariel; 2, off Dover, from Saigon, for Bremen, Amoor; Aug. 31, at Crookhaven, from Philippines, Milton; 19, at New York, from Manila, Bengal; 20, from Yokohama, John Norman, with damage; Sept. 3, at Falmouth, from Rangoon, for Schiedam, Blair Athol; from Rangoon, Stormy Petrel; 4, from Saigon, for Bremen, Johanna; Mathilda, from Bangkok, for Bremen, Contest; from Rangoon, for Bremen, Trowbridge; 3, from Batavia, for Amsterdam, Nicolas Wilsen; Aug. 23, at San Francisco, from Hong Kong, Mary; Sept. 6, at London, from China, Singapore, &c., Nestor (s.s.); from Colombo, Royal Minstrel; from Rangoon, St. Vincent; 4, at Plymouth, from Colombo, for Havre, Sarepta; 3, at Falmouth, from Rangoon, Henriette; 4, from Maulmain, Orion, St. John; 3, at Crookhaven, from Rangoon, Albert Edward; Aug. 24, at San Francisco, from Hong Kong, Akbar; Sept. 6, at London, from Colombo, Teviot; at Deal, from Manila, Sarah Scott; from Bassein, Sterling; from Ceylon, Ellenborough, Oribe; from Penang, Ilione; from Rangoon, Beatrice; 1, off Scilly, from Colombo, Sattara; 3, from Saigon, for Rotterdam, Ocean Empress; 4, at Kinsale, from Rangoon, Patrician; 4, at Deal, from Manila, Sir H. Havelock.

DEPARTURES.—Sept. 2, from London, for Hiogo, Yokohama, Corsair; from Rotterdam, for Batavia, Batavia; Aug. 28, off Dungeness, for Java, Gravenhage; Sept. 3, from London, for Hong Kong, Cleta; for Shanghai, Carrick Castle; for Singapore, Antipodes; Aug. 25, from Shields, for Galle, Freya; 23, for Singapore, Portlaw; for Manila, Olivia Davis; Sept. 2, from Glasgow, for Singapore, Loch Ken.

LAID ON.—At London, for Singapore, Burton Vale; at Glasgow, for Singapore and Penang, Bangkok (s.s.).

CASUALTIES.—Advices from Cape Town, August 4, state that the Nereus den Broeder, from Saigon to Falmouth, put into Simon's Bay, July 25, with loss of foretopmast, jibboom, bulwarks, sails, &c., having experienced severe weather on the coast, June 18; she had thrown 700 bags of rice overboard.

The Gustar, Schulte, from Hamburg to Shanghai, put into Table Bay, July 29, to repair rudder.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

# LATER FROM CHINA AND JAPAN.

## (BY THE PACIFIC MAIL.)

The Pacific mail steamer *China* reached San Francisco on the 18th ult., bringing Yokohama news to July 29, or a fortnight later, and Shanghai advices to July 19. Our despatches of these dates came to hand this afternoon, and the news being highly important, we have delayed publication for some hours in order to present our subscribers with a full report.

The *China* brought 1,000 passengers, of whom 850 were Chinese; 289 packages of tea and 16 packages of silk for San Francisco; 6,320 packages of tea and 94 packages of silk, for New York.

The passengers by the *China* for New York are as follows:—Mr. Hooker and family, Paul Frank, and the following United States naval officers—J. W. Seville, F. W. Kennedy, Captain F. P. Carter, Lieutenant-Commanders A. R. Yates and B. P. Smith, Dr. C. H. White, J. G. Dieterich, P. Miller, J. H. Blakely, and C. M. Burchard.

### JAPAN.

Great preparations are making in Japan for the reception of the Duke of Edinburgh, now on his way to Yokohama. He is to be given quarters in the Shiogoon's old palace in Yedo, which is being fitted up in gorgeous style; and horses and carriages for his use have been ordered from China.

The civil war in Japan is entirely ended. Prince Satsuma has been appointed Treasurer of the Government, and the charge of the army has been conferred on Prince Chosiu. Prince Tosa takes command of the Imperial navy. Their revenues are largely increased. They have issued a manifesto requiring all the other Daimios to disarm immediately, and several Daimios have left Yedo in consequence. Trade is resumed with Hakodadi under the auspices of the Mikado's Government. Ennomoto, with the leading actors of the late disturbances, was daily expected at Yedo, where they will be tried and punished. Echizen will be made Regent, according to reports. Stotsbashi, now in Yedo, has accepted a position under the Government, which fact caused an advance in Government paper. Everything was quiet in Hakodadi.

The *Japan Times* of July 26th says, "Ennomoto has not yet arrived in Yedo, nor has any decision been as yet come to as to what is to be his punishment. Clearly he has deserved the severest, but the policy of the Mikado's government, since its accession to power, has been one of mercy and conciliation, and best-informed people say that the probability is that his life will be spared. As we think we have before remarked, this revolution is remarkable for the absence of political executions or proscriptions. Surely no dynasty in the East was ever replaced by another so quietly and with so little bloodshed. But for M. Brunet and his French accomplices, who ought to have been all hanged at the yardarm of the *Cordogan*, instead of being received as guests, a great many of the lives that have been sacrificed on the field of battle would have been saved to the country. It is much to the credit of the successful party that none have been taken on the scaffold. We are strongly of opinion that the punishment of Ennomoto and his companions will form no exception to the general lenient treatment by the Mikado of his defeated rebels.

"The guards furnished for different posts about the Settlement by the Foreign forces here were withdrawn on the 17th July, which we may interpret as meaning a final acknowledgment of the Mikado's supremacy in the country. The resumption of his authority in Hakodadi has been signalised by the withdrawal of the Notification of the 15th January last, by which British subjects were forbidden to land or embark, at Hakodadi, troops, arms, or munitions of war."

A letter from Japan states that Rev. Mr. Verbeck, long an American missionary at Nagasaki, has gone to Yedo, to take charge of a school recently established by the Government for the education of the sons of its officers. It also states that the severe laws for punishing natives who may embrace Christianity are about to be repealed.

EXCHANGE AND BULLION.—Sterling rates have, contrary to general expectation, continued to fall; the banks have been more or less eager buyers of any credits on the market, which has had the effect of inducing sellers to hold off for more and more favourable rates, which have now reached 4s. 6¼d. to 4s. 6⅝d. for six months' paper. The amount settled for this mail has not been so large as might have been expected, considering the quantity of silk going forward. It has been very difficult to obtain Bank Drafts for merchants' remittance; we may therefore readily presume that the bulk of the silk by this mail goes in lieu of Bank bills.

---

### CHINA.

SHANGHAI, July 19, 1869.

There is a general expression of dissatisfaction at the removal of Mr. J. Ross Browne. The English and Americans in China have united in drawing up an address expressing their sense of his energy and admirable fitness for the position of Envoy of the United States in China. Mr. Browne states that he is willing to return to his post if the Department of State approve of his course in China. He has heard that Mr. Howard, who was appointed to the mission, has decided not to accept.

### MR. J. ROSS BROWNE ON MATERIAL REFORM IN CHINA.

LEGATION OF THE UNITED STATES.

PEKING, Nov 23rd, 1868.

SIR,—On Monday last, at the joint interview of the British Minister and myself with your Highness and members of the Tsungli Yamen, I took occasion to submit a few considerations in connection with the growing intercourse between the citizens of the United States and China, upon a clear understanding of which I think important results depend.

It was scarcely practicable in a desultory conversation, and with the difficulties of verbal interpretation, to make every point as intelligible as the gravity of the subject demands; and I now, agreeably to promise, submit my views in writing.

The present seems an opportune occasion for a candid interchange of opinion, since some of the changes proposed in the British Treaty, now under consideration, cannot fail to affect the interests of the United States.

The policy of my Government is doubtless well understood by your Highness. It is the policy of peace, based upon reason, justice, and humanity; seeking no advantage inconsistent with the general welfare, its cherished object is to promote fraternal intercourse between nations.

Influenced by a natural interest in the oldest of living nations, hitherto deemed the most exclusive, it was with extreme gratification the Government and the people of my country learned, near the close of last year, that the Government of China had determined upon sending an Embassy to the Western Powers.

The reception of this Embassy in the United States may be regarded as an epoch in the history of diplomatic intercourse. From the day of its arrival at San Francisco, to the day of its departure for Europe, demonstrations of respect and honour were lavished upon its members. Its approach was heralded by the press of the country as a great advance in the march of modern civilisation; and its arrival was the signal for generous expressions of welcome from the statesmen and orators of our land.

The President of the United States received the Embassy with marked cordiality, and expressed his appreciation of the sagacity with which the enlightened Chinese Government had responded to the amicable policy adopted by Christian nations.

Both Houses of Congress gave your ambassadors an enthusiastic official reception. The Speaker of the House of Representatives availed himself of the occasion to say that this Embassy, which had attracted such universal attention, had been hailed throughout our land, not only as marking an onward step in the world's history, but as being of peculiar interest to the Republic.

These friendly sentiments, officially expressed, may be regarded as the unanimous voice of the nation.

Considering the growth of American commerce with China, the rapid extension of our Pacific steam navigation, the approaching completion of our great trans-continental railroad, and the enterprising character of our people, this gratifying movement on the part of a great nation with which we have such important relations, could have but one interpretation. Everywhere, and by all classes, with singular unanimity, it was understood to mean the abandonment by China of its former exclusive policy, and the substitution of one more in accordance with the progressive spirit of the age.

Reference is made to these facts to indicate some of the grounds upon which a liberal policy in the future may reasonably be anticipated.

Upon a perusal of the correspondence and minutes of proceedings in connection with the proposed revision of the British Treaty, I find every point upon which differences of opinion exist fully considered.

It is extremely gratifying to observe the courtesy, intelligence, and ability with which the propositions of the British Minister are discussed by the members of the Tsung-li Yamen. Before a final decision, however, is rendered upon the questions still at issue, it is earnestly to be hoped that the Government of China will not permit so favourable an opportunity to pass without placing upon record a substantial guarantee of its disposition to make a forward movement. Future misunderstanding may be prevented by a distinct declaration of policy at this time.

So far, the few points conceded are of minor importance, and can scarcely result in any practical good, either to natives or foreigners, without those substantial concessions upon which the prosperity of commerce and all mutual advantages of intercourse depend.

The abolition of interior transit passes and institution of an increased import duty will not, I apprehend, prevent those abuses which now form so serious an impediment to trade. The course of proceeding necessary to secure indemnity for illegal taxation is liable to give rise to vexatious delays by opening new fields for litigation.

Undoubtedly, the true solution of this problem lies in the removal of unnecessary restrictions upon foreign merchants. If permitted to reside in the interior, rent or purchase warehouses, and carry on their business without unnecessary checks and hindrances, they would soon come to a good understanding with

Digitized by Google

the mandarins and people; mutual prejudices would gradually be removed, and confidence established. If the trade continues, it must come to this sooner or later; and the question for the consideration of your Highness is, whether it is well to prolong indefinitely existing causes of dissension.

There can be no equality among nations without mutual advantages of intercourse. At this time, there are sixty thousand Chinese on the Pacific Coast, who are engaged in almost every branch of industry open to our own citizens. They are permitted to travel or trade, rent or purchase houses, wherever their inclination may lead them. Local prejudices, which, from want of knowledge of their true character, formerly existed against them, are rapidly disappearing; and they are now regarded by intelligent classes of the community as an orderly, industrious, and valuable part of our population. Might not similar good results attend the extension of increased facilities for intercourse to the few foreigners in this country? Those who seek to trade and purchase, or rent property in the interior, are generally men of responsible character, who have large pecuniary interests at stake. No better guarantee could be given against lawless and disorderly proceedings.

On this point, it was understood to be remarked by several members of the Yamên, at the interview of Monday, that the Chinese in the United States are under American law, and that if Americans would consent to subject themselves to China law in this country, they might reasonably expect equal privileges.

This question has been discussed for many years, and it is unnecessary now to repeat the argument advanced. When the Government of China shall deem it expedient to establish a code of laws based upon principles of justice, recognised and accepted by the comity of Western nations, and to which the Government of the United States can safely give its assent, then this cause of complaint will doubtless be removed.

An important question, upon which no agreement has yet been reached, is the proposed extension of steam navigation on the inland waters. All experience has demonstrated in Europe, America, and India, and to some extent in the waters of China, that without the use of vessels and machinery propelled by steam, no extensive systems of trade can now be carried on in any country with profit. In Mexico, Central and South America, and other countries through which railroads had been constructed only to a limited extent, steam navigation on the coast and inland waters is now making considerable progress. These countries, however, are still very far behind the times, and the consequence is they are poor, and their trade is small compared with their capacity for production.

The use of small steamers, or even steam-tugs, on the upper waters of the Yang-tze-kiang, on the Poyang Lake, and on the Pei-ho River, from Tientsin to Tung-chow, would greatly facilitate the transportation of merchandise and domestic products, and would dispense with unnecessary and unprofitable labour, which could well be devoted to the opening of coal mines, building of roads, and other works of internal improvement. This need not be done so rapidly as to produce distress among the labouring classes, who now earn a subsistence in the old way; but if any change is contemplated, what advantage is gained by indefinite postponement? Why should not a beginning be made now as well as half a century hence? The people cannot adapt themselves to a new condition of things before anything new is attempted. If they were now undergoing a course of preparation, some definite results might be anticipated; but merely to hold back when all the rest of the world is advancing, is to invite that foreign interference which is so much deprecated.

If the employment of a large number of men, where a few only are necessary to do the work, could be regarded as advantageous, then there would be good reason why the freight boats now hauled by hand up many of the rivers might be dispensed with, and the cargoes carried by coolies. By such a course, although it would furnish employment to many who probably need it, would not increase the means of subsistence. It cannot be denied that freight boats have already dispensed with much unprofitable labour; and small steamers, or steam-tugs, would only be another step in the same direction.

A similar argument may be used in reference to railroads. Nearly all the land transportation is now carried on by means of coolies, camels, wheelbarrows, and small wagons. No system more difficult, tedious, and expensive could be devised. It is a draft upon labour without adequate result. Nevertheless, it could not be expected, much less desired, by a friendly Power, that sudden and extraordinary changes should be made. An experiment on a small scheme, say from Taku, Tientsin, or even Tunchow to Peking, would test the advantage of railroads, where the work could be directly under control of the Government. There are private capitalists who would be willing to take all the pecuniary risk, and receive their compensation upon any equitable basis that might be agreed upon as not injurious to the interests of China. Even a tramway from the coal mines in the vicinity of Peking to the city walls, or to the river, would be a reasonable beginning. The supply of coal now depends upon the growth of grass, for in bad seasons the camels starve, and coal becomes scarce and dear. This is a very uncertain dependence for so indispensable an article.

It is earnestly to be hoped that this great empire, abounding in so many natural resources, and with a people so industrious, so skilful in mechanics, so peculiarly qualified in all respects to avail themselves of modern inventions, will not oppose all experiment in this direction. Already ample proof has been furnished that the labouring classes of China, constituting so large a proportion of the population, are not inimical to these new contrivances for saving time and making labour profitable. Ten thousand Chinese have aided in building the great central railroad across the continent of North America; and there is not an instance in which they have refused to work for fair compensation, because of any prejudice or superstition. The Arsenal at Shanghai, in which seven hundred native workmen are employed, presents conclusive evidence of their readiness and ability to perform any kind of mechanical labour, even to the manufacture of engines and building of steamers, which they have already done with complete success.

The commerce of the vast interior might be greatly increased by these new methods of communication. Agriculture has been carried to great perfection, and now yields very nearly its maximum. But so dense a population cannot derive a subsistence from this source after an enlarged foreign intercourse has once commenced. New demands are made, new wants are created; and a greater diversity of pursuits becomes necessary. Mining, manufactures, and various internal improvements furnish additional and profitable occupation; and nations become rich and prosperous as they adopt the use of steam and improved methods of labour, while all countries in which these have not been introduced find it difficult to maintain an existence.

The question of opening the coal mines has been considered without any satisfactory result. No real concession has been made. There is a great demand for coal at the principal commercial marts on the coast. It is well known that coal seams of great extent and richness exist near the banks of the Yang tze-kiang and in the province of Shantung, also in the vicinity of Peking. Mr. Raphael Pumpelly has fully demonstrated this in his report recently published. By the use of proper machinery for working the mines, and suitable improvements for transportation, there can be no doubt this indispensable article could be delivered at the ports for less than half its present cost. This would be a source of large revenue to the Chinese Government, and a great advantage to commerce; yet objections are made to the only means by which either natives or foreigners can avail themselves of this natural resource. A willingness is expressed to try the experiment of working certain mines by means of foreign machinery, under official direction and on Government account. It will be of very little avail to get the coal out of the mines unless some cheaper methods of transportation are adopted. The cost of carrying it to the place of consumption is now the principal item of expense. Besides, no mining enterprise has ever been known to succeed in this way; and failure now would be very discouraging to all parties. Governments cannot, from the precarious nature of the pursuit, work mines successfully. It is for individual enterprise to make them profitable. In all countries where mining of any kind is carried on extensively, it has been found expedient to allow the mines to be worked by private companies or individuals, who either purchase them in fee simple, as in the United States, or pay a share of the proceeds to the Government. This has been done to promote individual effort without subjecting the public revenues to unnecessary risks; and it has always been found most conducive to the development of the natural resources of the country.

To lease the coal mines, or a few of them, by way of experiment, to whomsoever may offer the best terms for the privilege of working them, would seem to be a very reasonable way of making a beginning, and avoiding all risk by leaving the matter of success or failure to those individually concerned. It would not throw any of the labouring classes out of employment, or introduce a large foreign population. The work would be done by Chinese under proper direction; and thus a new field for native industry would be opened, while commerce would be greatly benefited.

At the interview of Monday, it was understood to be argued, in response to some of these suggestions, that the Government of China sees quite clearly the advantages to be derived from the introduction of foreign improvements, but that the country is not yet prepared for such changes as those recommended; that different interpretations may be given to the word "progress;" what is thought "progress" in our country might be something very different in another; that here there are great difficulties in the way of changes—they must be gradual and based upon sure foundation; that all progress which is not voluntary, or which comes from others, is spurious, and must fail to be beneficial. In short, it was contended that China is willing to advance, but must do so in her own way, and at her own discretion.

Nothing can be more reasonable than this, as a fundamental principle. No friendly Power can desire to impair the self-respect or detract from the independence of another. The Government of the United States simply adheres to its established policy in disclaiming any right or intention to interfere in the administration of the domestic affairs of China. The best possible proof of the soundness of that policy, and of its thorough appreciation by the Chinese Government, can now be given to the world. In entering into the family of nations it is impossible that China can postpone, indefinitely, all responsive movements upon which equality and friendly intercourse depend, without disregarding an essential element in the compact. Modern enterprise has penetrated the exclusiveness of this ancient empire, and it now be-

Digitized by Google

comes a question for the consideration of your Highness whether progress, as understood by Western nations, can be arrested by arguments, however specious, or by Governments, however pacific in their intentions.

There can be no question as to the object of the commercial world. It desires an extension of trade; but no trade with any nation can be profitable or enduring which is not of mutual advantage. It is a fallacy, therefore, to suppose that because Foreigners may be governed by motives of self interest, all the facilities and concessions they ask must be injurious to China.

I have thus frankly and in a spirit of true friendship stated my views. Results of inestimable magnitude and of profound interest to the welfare of this Empire depend upon the action taken at this time. It is manifest to my mind that steam on the navigable waters, the proper working of coal mines, residence, and all the rights of trade in the interior, and the gradual establishment of telegraphs and railroad systems, are essential measures of modern intercourse; and that some earnest of beginning, without unnecessary delay, would avert much future misunderstanding. An irresistible spirit of progression is effecting great changes everywhere. Modern nations under the general impulse move rapidly, and will not be likely to leave the work of the present generation to posterity.—I have the honour to be, Sir, with consideration and respect, your Imperial Highness' Obedient Servant,

J. Ross BROWNE.

His Imperial Highness, Prince Kung, Chief Secretary of State for Foreign Affairs.

---

*The Address of the Citizens of the United States, resident in Shanghai, presented to the Hon. J. Ross Browne, Envoy Extraordinary and Minister Plenipotentiary of the United States at Peking, on his departure from China.*

SHANGHAI, July 14, 1869.

To his Excellency the Hon. J. Ross Browne, U.S. Envoy Extraordinary and Minister Plenipotentiary to China.

SIR,—Your withdrawal from the administration of the affairs of the United States in China, and the cause of that withdrawal, seem to us, your fellow-citizens resident in this Empire, sufficient reason for an expression of our opinion in favour of the policy which, we understand, you have advocated, and of our regret that your adherence to that policy has been followed by the loss of your valuable services to American interests in China.

The true policy of the United States in this country we believe to be one that looks toward the extension of its trade and intercourse with Western nations, and by means of that extension the raising of China in the scale of civilisation.

We claim that China, as she stands, is low in civilisation as she is in wealth and power; that her history teaches us little worth knowing except maxims of morality, long reduced by Western nations to actual practice, but by China neglected and forgotten; that her present state, so far from being an example, is a warning of the results of a false system and a vicious policy.

We claim that the presence of Foreigners is a protection and a blessing to the people; that this presence is their only chance of improvement, save through desolating wars; and that, in all probability, it is at this day the chief cause of the existence of the present Government, and perhaps of any central government in the country.

We believe that the advancement of China, without anarchy and rebellion, cannot be had by waiting until her own Government is content to move.

We believe it can be got only by the pressure of Western opinion, in forming new terms of treaties, and by the pressure of Western Power in sustaining those treaties when formed.

We claim that not only is there a right on the part of Western nations to insist on steps that will further the cause of civilisation in China, but clear duty in that direction.

We believe that while Western Governments are bound to act a friendly, just, and generous part towards China, they cannot forego the advantage of the moral influence of their greater material power.

As China has not arrived at that stage where she will spontaneously accept, and firmly discharge her part in the reciprocal obligations of States, and advance in a career of discreet progress, the withdrawal of pressure would be disastrous to Foreign and native interests, and even threatening to the safety of the State.

We have understood the chief cause of your recall to be, that, in the conscientious discharge of your duty, you found yourself compelled to dissent from the declarations of Mr. Burlingame.

We believe, for our part, that the misapprehensions created by Mr. Burlingame's mission tend to dangerous issues and complications. We are, many of us, Mr. Burlingame's friends. We supported and rejoiced in the mission when we had reason to believe that it was in the interests of progress, and that its members would further those interests by representing, in the Western world, the true state of China, and how she could best be raised and supported in a new career.

We were surprised and disappointed, when we found it only used to represent China as an example of strength, goodness, and wisdom; to give the impression that she had abandoned her old pretensions of superiority, and, with an eager desire for improvement, was ready to press forward upon the path of reform; that she needed no other inducement to improve than her own moral instinct; that all pressure, even moral pressure, was a wrong and a mistake, and that, in fact, the nations of the West had more to learn than to teach in their intercourse with this, so called, polite and intellectual people of the East!

We are deeply interested in the promotion of the peaceful development of China, and in its maintenance of harmonious relations; and we may presume that our direct and intimate acquaintance with the Empire renders us not altogether untrustworthy witnesses. As such we do not hesitate to express our opinions, and we believe that time will justify our conclusions.

We can assure you, with sincerity, that you will leave these shores regretted by all your countrymen, with a respect which could only have been created by an impartial administration of the duties of your high position.—We have the honour to remain, Sir, your Excellency's most obedient Servants,

*Address of the British Community of Shanghai to the American Minister, upon his Departure from China.*

SHANGHAI, 17th July, 1869.

To His Excellency The Honourable J. Ross Browne, Envoy Extraordinary and Minister Plenipotentiary from the United States to China.

SIR,—We cannot allow you to depart from China without availing ourselves of the opportunity of your presence at this port—the principal seat of Foreign commerce, to express to you the sincere regret which the British community feel at the circumstances under which you return to the United States.

It might have seemed sufficient for your own countrymen to convey to you an expression of the regret so universally entertained; but the interests of Great Britain and the United States in China are so completely identical and their affairs are so intertwined in all parts of the Empire, that we feel we are addressing one of the most earnest and most conscientious advocates of our own rights and privileges.

We are further prompted to address you, in testimony of the perfect cordiality which has always subsisted between the American residents in China and ourselves. We all enjoy the same rights and privileges, and we are all united in hostility to the creation of any exclusive interests. Unfortunately, however, in the press, both of Great Britain and the United States, attempts have been made to produce jealousy and unfriendly feeling, by ignorantly raising hopes of special advantages being accorded to one or other of those nations. We can only trust that increasing knowledge of China will lead to more accurate views of the complete co-operation which makes us, for all purposes of trade and municipal government, one single community.

It is with the liveliest satisfaction that we recognise the unanimity existing between yourself and Sir Rutherford Alcock, on the main questions of Foreign policy, a unanimity which is shared in by the whole of the Foreign residents in China. We cannot but admire the unanswerable vindication by Sir Rutherford of his and our views, which is contained in his despatch to Lord Clarendon of 5th February last. If reasonable counsels could prevail with the Home Governments, we might hope for a just consideration of the merits of the new policy towards China which has been inaugurated by the principal Western Powers, but as there are no indications of a desire for impartial judgment, it only remains for us to await the course of events.

We believe you owe your recall to the persistent manner in which you have continued to express views contrary to those which your own Government have adopted at the instigation of Mr. Burlingame. You have refused to remain silent when you were convinced that your Government were being misled; and as you have taken up this disinterested attitude from a sense of duty, it is a matter of sincere pleasure to us to have this opportunity of assuring you that, in thus boldly proclaiming the truth, you have, the entire and unanimous approbation of the British residents.

In view of the importance of foreign interests in China we have in common with your countrymen here, the very strongest reasons for protesting against the precipitation with which a new policy has been adopted by both Governments.

It is unnecessary for us to dwell upon the numerous objections which we all feel to be fatal to its success. Both the American and the British Governments have assumed that there is a desire, on the part of the Chinese Government, which we know does not exist. Lord Clarendon has laid down rules of action for our Minister, our Con-

Digitized by Google

suls, and our community which would prove utterly inadequate if any crisis occurred, demanding extraordinary measures. But while the policy will, in our opinion, be a failure, so far as the purposes it contemplates are concerned, we cannot look forward without considerable anxiety to the unfortunate effects it will produce on the Chinese mind. It is almost impossible for us to convey to our fellow countrymen at home a just idea of the utter inability of the Chinese to comprehend any motives for forbearance, other than our own powerlessness, or a fear of their growing strength. It is our candid opinion that if the British and American Governments were in a position to estimate all the dangers that are involved in their new policy, they would abandon it at once, in a state of alarm, at the probable consequences.

It is our most earnest wish that, when you return to the United States, you may endeavour to enlighten the public mind upon the real issues that are raised by the existence of Foreign intercourse with China, and upon the most efficient and advantageous means of introducing Western civilisation into this vast Empire.

We tender to you our most sincere thanks for your exertions to promote truth and justice; and, in expressing to you our best wishes for your future welfare and prosperity, we beg to take leave, feeling regret that your career in China should have thus been so suddenly cut short.—We are, Sir, your obedient servants,

## MR. BROWNE'S REPLY.

GENTLEMEN, SHANGHAI, 17th July, 1869.

I have read with great pleasure the communications which you have had the kindness to address to me in relation to Foreign policy in China. The generous manner in which you have expressed your approval of my official course, as diplomatic representative of the United States at Peking, will be gratefully remembered by me long after my departure from these shores. I need scarcely assure you that my homeward voyage will be cheered by the reflection, that however unavailing my efforts have been during my brief sojourn at the capital to extend the limits of commerce and friendly intercourse with this Empire, they have been generously appreciated by the class who have laboured most persistently, and most effectually, to promote everywhere throughout the world the great cause of civilisation.

Fully concurring in the views expressed in your addresses, respecting the policy essential to the maintenance of our treaty rights in this country, I take pleasure in stating that, since the day of my arrival in Peking to the present time, I have strenuously advocated every proposition which you have advanced. The conclusions to which you have been led by long practical experience have been reached, on my part, through the simple process of reason aided by a careful study of the history of Foreign intercourse with China. It is gratifying to feel that this unanimity of opinion is founded upon an enduring basis of truth, and that principles, in support of which there is such a concurrence of testimony, will not require to be maintained by fanciful and delusive theories.

It would be impossible, in the multiplicity of my engagements, and the brief time intervening before my departure, to give you a complete exposition of my views on the questions suggested in the addresses. These papers cover so broad a field for the expression of opinion, and embody so many important questions of international policy, that a mere glance at the leading points would require more time, and certainly more careful consideration, than I can now bestow upon them.

A brief review of the recent history and present attitude of China towards Foreign Governments, from a stand point differing in some respects from that of the Foreign residents at the ports, may not be altogether devoid of interest.

It has been alleged that the so-called new policy means justice to China, and as such, means progress. Speaking in behalf of the American Government, I must say that the inference from this is utterly unwarranted by facts. So far as I can glean from the published correspondence of my predecessors during the past ten years, the policy of the United States has been fair and conciliatory; and I am quite sure there has been no departure from a similar policy on the part of Great Britain. No new system has been adopted, and no new revelation has been made.

Justice in our dealings with this nation, as with all others, cannot be too highly commended; it is right in itself, and whatever is right is expedient. Accepting this as the basis of all advantageous intercourse between nations, I still think there is room for question as to matters of fact, and difference of opinion as to the deductions to be drawn from lessons of experience. While there are few who will be unreasonable enough to deny the propriety of justice towards China, there are many who may conscientiously desire to know what it means. If Christian nations are to give a construction to treaties ased upon rules of international law, adopted in the interest of civilisation, and China, on its part, is to construe them according to the lights, or the interests of Paganism, there is certainly room for inquiry as to the practical duty of each, and the means by which injurious complications may be avoided. It is manifest to my mind that the superior cannot enter upon a course of retrogression to adapt itself to the inferior; and if any relations at all exist, they must exist upon such equitable terms as the stronger may elect to adopt. It surely would be a singular policy for any civilised nation to relinquish its own interpretation of justice and accept that of China. There is an irreconcilable difference between the pagan and Christian faith, upon which the whole difficulty of our relations impinges. The one is based upon isolation and repulsion, seeking the good of none beyond its own limits; the other is broad, generous, and humane, seeking the good of all. In order to be true to our own faith, we can only concede so much as may be reconcilable with the sacred duties which it inculcates; for, if we go beyond that, we admit the right of any nation, however degraded, to enjoy the privileges and immunities of a civilised Power, while it persistently rejects the obligations imposed by the community of nations for the general welfare. In other words, we lend our influence to the maintenance of false and superstitious systems, and the degradation of our fellow creatures.

The principle laid down by the Government of the United States is, that nations like China or Japan may "enter into the sphere of our public law in the relation of Government to Government, but not in the relation of Government to men;" and the reason given for this is, that full interchange of international rights must be based upon unity of legal thought.

Experience in China has furnished ample evidence of the difficulties to be encountered in observing this distinction. Nearly all our relations are commercial, and there is scarcely a case that comes up, which does not involve, to some extent, both the relations between the Governments, and those between each Government and its people.

The rights underlying the principle of ex-territoriality are so far from being clearly defined, or even susceptible of a satisfactory definition, that all attempts at elucidation must end in the admission that they are incongruous and irreconcilable, and that nothing short of perfect equality can remedy the difficulty. How then is this end, which all must desire, to be attained?

The essential provisions of existing treaties have been extorted from China by force, and doubtless she considers them unjust. The anomaly is presented of nations holding forcible intercourse with a people, against the will of the governing authorities, yet professing to respect their prejudices, and abstain from all interference in the administration of their internal affairs. It is clearly an interference to force the opening of ports and wrest from a Sovereign State jurisdiction over its own soil; to secure a diplomatic representation at Peking at the cannon's mouth, and hold it there against the will of the Government; to establish a customs system, and place a Foreigner at the head of it, with Foreign subordinates at the ports; in short, to inflict compulsory relations upon a nation, the whole tendency of which is to derange and ultimately destroy its most cherished institutions. Mere words cannot check the consequences of such intercourse. To continue it is simply to carry on with force in the back-ground what was commenced with force in front. If China had the power, there can be no question that she would restrict the intercourse of Foreigners to the sea-ports, if not expel every Foreigner from the country. Not being able to do this, she attempts to evade, by the subtleties of diplomacy, what she cannot avert by force.

If the view I have taken be correct, it would not benefit China if we were to relinquish all privileges extorted from her, and carry out the Comtist doctrine of ideal justice—withdraw steam navigation from the Yangtsze and Peiho, refuse exterritorial protection to our citizens, forcibly prevent our missionaries from entering the country and preaching the Gospel, and resign all rights which may conflict with pagan superstition and Asiatic ignorance and conceit.

I think, therefore, our duty is plain. We should do the best that can be done under such anomalous circumstances; treat China with the forbearance, consideration, and respect due to a Power Sovereign in its political aspect, but possessing an organisation incompatible with absolute equality. Believing our civilisation to be superior to theirs, we should endeavour to elevate the Chinese to our standard. But, surely, that can never be done by an unqualified acceptance of their claim to the independence enjoyed by Christian States. They do not possess it in point of fact, and there is no wisdom in proceeding upon false premises. If they were independent, they would cease to hold relations which give them perpetual trouble, and break down, one by one, the barriers of isolation which have so long enabled them to maintain their peculiar and degenerate form of national existence. Before they can hold a position of equality in the community of civilised nations they must cease to cripple all intercourse; they must throw open the country; adopt the improved systems of industry and means of communication urged upon them by the Western world; and thus, by co-operation, strengthen and elevate themselves to an actual equality. Such an advance seems to me to be an essential condition to friendly intercourse. We have no right to compel them to construct railroads, or tele-

Digitized by Google

graphs, or to extend steam navigation, open coal mines, or accept any of our modern inventions for saving time and developing material resources; but we have a perfect right to compel them to observe their treaty obligations; and if in doing this all the rest becomes necessary to their continued existence as a nation and their elevation as a people, it will be all the better for China. I question whether it is good policy to proclaim, in the solemn form of a treaty, that we will not interfere in the internal affairs of the Empire, when our very presence is an interference; or whether anything is to be gained by an unconditional admission of the right of the Chinese Government to determine the time and manner of introducing improvements. If the Central Government can, without the introduction of modern inventions, preserve order, enforce the execution of treaties, restrain the corrupt practices of its provincial officers, and render prompt redress for all grievances, we cannot justly complain if the rulers should elect to retain their own systems in preference to ours; but this being impossible, reciprocity in freedom of trade, residence, and travel, becomes an essential condition to amicable and mutually advantageous relations. Abstract principles of international law, put forth in the form of a pledge, without exacting any reciprocal conditions, are unnecessary and unmeaning, if not insulting. There could be no possible objection to these general principles, except in so far as their embodiment in a treaty might be considered an expression of contempt, if China would place herself in the same relation to us that the nations of Christendom hold towards each other. But she has not done so yet, and what guarantee is there that she ever will? What is there in the history of Foreign intercourse with her, or in her entire career of two thousand years, to indicate that she has the slightest intention of making any voluntary change in her system. The fact that, since the Imperial Government received the first intelligence of the successful operations of its Embassy, it has been more determined than ever to resist all experiment in the line of progress, certainly gives no encouragement to the hope that a change is contemplated. China is not going either to be seduced by fair promises into making concessions repugnant to her established policy, or to make them of her own accord. In that respect she has been consistent from the beginning, and so, I doubt not, will continue to the end. Of this we have no right to complain. All I contend is, that having forced obligations upon her, we must compel her to observe them, or recede from the position which we have undertaken to maintain.

I believe an unreserved recognition of the right of an ignorant Pagan nation to do as it pleases, however retrogressive its action may be, or injurious to the cause of human progress, to be not only impolitic, but absolutely pernicious in its tendency. During the past year, since it has become known that the Governments of the United States and Great Britain have pledged themselves unconditionally to this course, a greater number of outrages have been perpetrated upon foreigners than during the previous eight years. Merchants and missionaries have been assaulted, and missionary converts murdered in Formosa; a brutal attack has been made upon an unoffending missionary establishment at Yangchow, which had not even attempted to preach the "objectionable" faith; an American missionary has been stoned and grievously wounded at Wuchang; violent assaults have been made upon converts at Kiukiang and near Foochow; a Catholic priest and many of his proselytes have been murdered in the province of Szechuen; the crew of a British gunboat, in the peaceful performance of their duty, and within the limits of a treaty port, have been attacked; and other outrages, not necessary to enumerate, have been perpetrated in various parts of the country.

In all these cases to which my attention has been called, I have, as my despatches will show, taken the most liberal view that the facts would justify. I believed it to be my duty, regardless of any personal opinions, to carry out faithfully the policy of my Government. But I am satisfied now that this policy will not, without a rigid exaction of all the rights granted by treaty and the presence of force to maintain them, produce the desired results in China. It is simply pandering to the bigotry and self-conceit of the Chinese rulers to treat them, under all circumstances, and without any reservation, as independent and intelligent beings. I feel perfectly assured that no redress, in any of the cases enumerated, in which satisfaction has been obtained, would have been granted, or, if granted, carried into practical effect, without the presence of force. The Imperial authorities are free enough in promising redress, because they know the provincial officers are adroit enough to evade it, and have but little regard for truth.

It does not devolve upon us, and we would be recreant to the teachings which have elevated us about barbarism if we undertook it, to perpetuate, by a blind submission to such outrages, a political fabric founded upon paganism, however long it may have endured, or, however well it may have subserved its purposes.

What I consider most objectionable in the course pursued by the subordinate officers of the British Government and sustained by our own, in the recent cases which led to bloodshed is that so good an opportunity was lost, of demonstrating beyond question the utter insufficiency of the policy declared both by the Government of the United States and that of Great Britain.

The danger to the Foreign community was not imminent, and the action of the Consular and naval officers prevented what all experience had shown to be inevitable—failure to obtain redress by diplomatic means unsustained by force.

I have enjoined upon our own Consuls the utmost forbearance in their dealings with the native authorities. But there is a limit in this direction beyond which, I feel assured, forbearance would lead to war. Peace is not to be maintained by yielding everything and exacting nothing. Reference of all important questions back to the Home Governments, before a single gun boat can be used and where telegraphic communication is rigidly prohibited, is, simply to nullify, and bring into contempt, all diplomatic power in China. How can any case of local difficulty be settled where there is a premium offered for procrastination? Chinese testimony in Washington, London, or Paris is not likely to be received with the same distrust as it is here, where its value is known; so that in all future controversies falsehood will be placed upon an equality with truth.

The policy of seeking refuge on board of war-vessels is both impracticable and humiliating. No community of Englishmen or Americans at any of the treaty-ports will desert their hard-earned vantage-ground in the presence of danger. It is not a national characteristic of either to seek safety in flight. No wonder the bare suggestion of an alternative so degrading should be received here with incredulous amazement. There is something in Anglo-Saxon blood that burns at such a thought. The naval officer in command of a vessel, who would see a defenceless community of merchants or missionaries beleagured by a host of semi-barbarians, and not expend the last grain of powder in their defence, would merit the contempt of all honourable men, and dismissal from the service which he had disgraced. What American, what Englishman, holding a commission, would not sacrifice it, should the folly or imbecility of his superiors assure him of such a fate for doing his duty, rather than bear thenceforth the braud of infamy upon his brow.

I am happy to believe that in China there is no such division of opinion as to the relative merits of American and English policy, and no such jealousy between the citizens of the two nations on this coast, as that recently shown by the newspaper press of the United States. The interests of each are regarded as concurrent; and I have not yet heard a single American merchant make invidious reflections upon the "throat-policy."

Without going back into the history of treaties made prior to 1858, and the advances gained step by step under the pressure of British and French arms, up to the residence of Foreign Ministers at Peking, it will not be accounted strange that I should accept the facts of history in preference to unfounded theories of Chinese progression. Whether more advantageous results might not have been obtained by peaceable means; whether the fault of our unsatisfactory progress may not be traced to the unjust and iniquitous conduct of Foreigners in China since the days of Kang-he; whether it would not have been better had justice, moderation, and good faith been observed on both sides, are not questions that can now be determined. If we undertake to go back and make reparation for all the crimes and errors committed throughout the past, I fear we will not advance much in the future. We can only accept the present, and profit by experience; and if experience teaches anything, it is that neither forbearance nor persuasion has ever advanced the cause of civilisation a single step in this country.

In all the important conflicts with China which culminated in the treaties of Tientsin, the Government of the United States in conformity with its established policy, maintained a position of neutrality. This position, however, furnished no ground for rejecting the concessions gained by the use of force. Mr. Reed in his despatches to Lord Elgin, frankly acknowledges the services rendered to our citizens and our commerce by Great Britain; and in a letter to Mr. Cass says: "Nothing is more likely to defeat the true aims of American statesmanship here than a distempered jealousy of English or French progress, seeing as I do in the ports and markets of China, wherever English enterprise goes, ours is quickly alongside of it: that every dollar Great Britain spends on its postal service, or in maintaining its naval force, is for our benefit." Similar acknowledgments were repeatedly made by Mr. Burlingame, who, in referring to the liberal course pursued by Sir Frederick Bruce and others who had preceded him in the inauguration of the co-operative policy, said: "There can be nothing more unmeaning than antagonism between the United States and Great Britain in China." Mr. Williams, referring to the revision of the British Treaty in 1868, bears testimony to the efficiency and general justice of the British Government and its officials in China.

It is by no means certain that the Chinese are disposed to accord to Americans, because of their forbearance, a higher degree of respect and confidence than they accord to other nations. The impression has obtained in the United States that they are exceptionally friendly to us. I have discovered nothing, during my residence in Peking, to warrant such an assumption. They regard Americans as they do all Foreigners—with distrust. What was said by Tsung-ling and his associate Commissioners in 1854, that "the England barbarians are full of insidious schemes, uncontrollably fierce and imperious;" that "the American nation does no more than follow their direction;" that "every movement is the conception of the English;" may possibly have undergone some modification since that date; but, if so, I fancy it is rather in form than in substance. The experi-

Digitized by Google

ence of Mr. Reed in 1858 was, that "stedfast neutrality and consistent friendship make no impression on the isolated obduracy of this Empire." "I never thought," said he, "that there was on the part of the officials any such distinction; I am now sure of it." Mr. Williams expressed similar views in 1859: "The principle of conduct to all Foreign nations which this Government adopts is isolation. "Keep them at as great a distance as possible, and get into no quarrels with them if it can be avoided," is their rule. It is quite a mistake to suppose that the rulers of China have any regard for one nation more than another; that they are more friendly, for instance, towards the Americans than towards the English; they may, perhaps, *fear* the English and Russians more than they do the Americans, but they would be glad if none of them ever came near."

The Emperor Hienfung, on the occasion of Mr. Ward's humiliating attempt to reach the Imperial presence, expressed himself still more decidedly in an official rescript.

"What this Foreigner (Ward) remarks, that he respects the Great Emperor as much as he does that President [a contemptuous way of referring to the President of the United States] is nothing less than to class the Middle Kingdom with barbarous tribes. Such wild exaltation of himself can only be relegated to subjects which make one laugh."

There has undoubtedly been a change in their estimate of Foreigners since that date. The logic of arms has compelled respect. But if we suppose a change in their opinions and policy, we must suppose a cause. There has been no war since 1860; no act of flagrant wrong has been committed by any Foreign Power; no new policy has been eliminated; justice and moderation have been observed by all the Treaty Powers; the influence of Great Britain, as well as of the United States, has been freely given to the maintenance of the Imperial Government against a rebellion which would probably have crushed it but for Foreign intervention. In effect, since the establishment of diplomatic relations at Peking, there has been a perfect accord between the Foreign Ministers on all subjects of general interest. No special cause for preference has existed, and the best proof that no exceptional influence has been obtained, may be found in the fact that all advances made, all recommendations for the introduction of Foreign improvements, all applications for grants, concessions or privileges of whatever character and from whatever source, have been rejected with the most rigid impartiality.

In the United States the sending forth by China of an Embassy to treat with the Western Powers was hailed as one of the grandest progressive movements of modern times. Sensible of the importance of encouraging foreign intercourse, China, it was alleged, had now, of her own accord, abandoned her policy of exclusion, and entered upon a career of improvement. She did not wait to be pressed, but took the initiative. All she desired was fair treatment and time to adapt herself to the new order of things. A proposition so reasonable as this, and so accordant with the generous sentiment of the civilised world, could not fail to be received with great favour. It was what everybody desired, and was considered in America as furnishing gratifying evidence, not only of the progressive spirit of the age, but of American influence in China.

The movement, however, was not indigenous; nor does its object yet seem to be thoroughly understood. It is quite clear to my mind that it was not intended by the Chinese rulers as a progressive movement. None of the Foreign Governments were bringing any undue pressure to bear upon them. If they desired to adopt our improved systems of inter-communication and industry, who was preventing them? They were surrounded by the intelligent representatives of the Western Governments, who had contributed to the establishment of a pacific policy, and who had given evidence of their sincerity and friendship. What the Imperial authorities wanted, in reality, was to *arrest* progress, into which they found themselves drifting by the sheer force of circumstances. But it is a curious feature in the history of foreign intercourse with China, that every attempt made by the Chinese to force back the current of change has had precisely the opposite effect from that intended. Every measure taken to restrict the advance of an aggressive civilisation has resulted in an additional step forward. That this Embassy will contribute to the cause of progress I have no doubt. That Mr. Hart co-operated in bringing about the Embassy to the West is generally acknowledged. In fact, there is no room for doubt on the subject. Not only did he persistently urge the appointment of an Embassy, but he very plainly demonstrated to the rulers that the nations of the West would eventually, in the execution of existing treaties, compel them to advance, if they did not do so voluntarily. All the measures of progress urged upon them as essential to friendly intercourse and to their own safety, by the Ministers at Peking, were urged with great vigour and clearness by Mr. Hart. He frankly pointed out the inherent defects of their political system—the corruptions of their provincial officers; the utter lack of accountability in their fiscal system, and earnestly endeavoured to convince them that their only salvation lay in a forward movement. If they manifested a sincere desire to accept the ameliorations proposed by Western nations, then they would meet with generous support, and be aided in all their struggles to overcome the inherent difficulties of their position. A contrary course would produce dissatisfaction, and pretexts would be found to overcome their obstinacy by force. This was wholesome advice, and it seemed for a time to be appreciated. But the astute mandarins had no idea of advancing. They were chiefly concerned to know how they could prevent innovations upon their established system, and at the same time avoid the troubles that threatened them. Beset by difficulties on all sides, concious of their own weakness, unable to determine how far they could evade the responsibilities which had been forced upon them, ignorant of the ultimate designs of Foreign Governments, and incompetent to deal efficiently with the questions at issue, the rulers adopted the only alternative that promised relief from change; an alternative in which, since the beginning of Foreign intercourse, they have invariably sought refuge—procrastination. They sent forth an Embassy to the Western Powers, ostensibly to explain their embarrassment; to deprecate unfriendly pressure, and to ask that the principles of international law should be observed towards them; in short, to establish their right to manage their affairs in their own way, and to determine for themselves the time and opportunity for making any changes which they might deem expedient, or conducive to the welfare and happiness of their people.

No denial of these rights, that I am aware of, has been made by any Foreign Government or representative since the Treaty of Tientsin, in 1858. On the contrary, they have been maintained in the utmost good faith by the whole Diplomatic Corps at Peking.

But a faithful observance of existing treaties has been insisted upon, and these treaties have provisions regarding transit dues, monopolies, missionary privileges, &c., which involve changes in the fiscal, commercial, and social systems of the Empire.

Here, therefore, were irreconcilable conditions, about which it was important there should be a better understanding.

There is no central authority here capable of observing, or if capable, willing to enforce, its obligations. There are no means of checking abuses on the part of the provincial authorities; no facilities for intercommunication or appeals to organised courts of justice, as in other countries.

Between the two positions of non-interference, and the execution of treaty rights lies the whole difficulty. It is for the Western Powers to determine how far they will insist upon the observance of treaties, rejecting of course as untenable the position that these rights embrace others not necessarily following or intended to be granted.

The Embassy to the West has been received in a manner creditable to the generous spirit of the age. Whatever errors may be committed through misconception of facts or excess of zeal, the cause is one which appeals to the highest sentiments of the Christian world; and truth will ultimately be eliminated. The stubborn logic of results will dissipate all illusions. I look upon the movement, therefore, whatever its design may have been, as abounding in promise for the future. We of the West see that paganism, and the isolation necessary to its existence, must give way in the natural progression of events. Doubtless they, too, see that a great change, beyond which all seems in their ignorance dark, and disastrous, is being forced upon them, but they cannot see the justice of it. Instead of attributing to them either capacities or motives irreconcilable with their whole history, and with their present condition and limited intelligence, it is our duty to enlighten and to elevate them. But it is not by pandering to their superstitions or their weaknesses that this is to be done. The strong hand of pressure may be more humane in the end than empty flattery. No reliance can be more uncertain than that based upon the forbearance or magnanimity of the Treaty Powers. They may be separated by diversity of interests or by the accidents of war. The best friends of China will undoubtedly prove to be those who can induce her to strengthen her organisation, and render herself able and worthy to maintain an independent position. There is no security in procrastination. Nothing upon earth, or in national or individual life, is absolutely stationary. Either retrogression or advance is inevitable. How far the one may be justifiable, if it be possible to avert it, or the other be insisted upon as essential to friendly intercourse and the maintenance of existing rights, remains to be determined by the dominant Powers.

If the citizens and subjects of Western nations must be content to limit their intercourse to the Treaty ports, and depend for protection upon an impracticable policy, there is no guarantee that the limitation will not have to be carried still farther. All experience shows that a retrogressive movement once commenced in this country inevitably leads to war. Neither the United States nor Great Britain can desire this. Our present relations with China are friendly, and peace and good understanding can easily be maintained by a policy at once equitable and firm. There is no occasion for disturbance of these amicable relations; nothing but a criminal disregard of existing conditions can lead to war; and the best way to avoid it is to insist upon the execution of our treaties.

And now, gentlemen, with many thanks for your kindness, and my best wishes for the success of your cause, I am very truly, your friend and servant,

J. ROSS BROWNE.

The London & China Telegraph.

*LONDON, TUESDAY, SEPT. 7.*

## THE BURLINGAME TREATY.

THE telegram stating that the Government at Peking had refused to ratify the Convention concluded by Mr. BURLINGAME with the United States, has not been allowed to pass unchallenged. The Paris papers assert, on the contrary, that Mr. BURLINGAME (who is still in Paris) has received a despatch from the Chinese Government "expressing its cordial "recognition of the Treaties he has concluded on behalf of "China with *European Governments and* the United States." On this text, that section of the English press which supports Mr. BURLINGAME and the CLARENDON policy speaks out. The *Pall Mall Gazette* (by the way, we are sorry to observe that this journal, usually so reliable and impartial, persists in taking a most wrong-headed view of China affairs, and that it grows increasingly inimical to the interests of our merchants there), has received a communication from a correspondent of "special knowledge and experience," who entirely discredits the recent China telegram, as well as all others from the same quarter, and considers it quite refuted by the statement of the French papers that we have quoted above. The writer asserts that the question of ratification has never arisen, as no ratification was expected until Mr. BURLINGAME'S return to Peking; that although he has a fair knowledge of Chinese, he has failed to find in the Imperial Edict constituting the mission a single phrase which can be construed into an attempt to place the Chinese Empire in the position of a sovereign State dealing with its tributaries; and that as Mr. Ross BROWNE, the U.S. Minister at Peking, was under orders of recall, his utterances could have no official significance. This reasoning is plausible, but we decline to accept it as conclusive. In the first place, as regards the reliability of the China telegram alluded to. We have observed that lately Mr. REUTER'S agent at Galle has taken the substance of his China telegrams from the "Summary" of the *Overland China Mail*, a journal that is generally reliable. The correspondent of the *Pall Mall Gazette* says that of late a series of startling telegrams from Hong Kong have proved inaccurate or grossly exaggerated. Some have, certainly, especially those referring to popular outbreaks, sanguinary engagements with rebels, &c. But these have mostly commenced with "It is reported," "It is stated," "It is generally believed," or some such qualifying phrase, being on topics confessedly difficult to procure information on. Whereas this particular telegram is unusually clear, concise, and positive; and we are therefore inclined to believe that there is at least some foundation for it. Secondly, as to the question of ratification not having arisen. It is certainly not unlikely that the formal and final exchange of ratifications may have been intended to take place on Mr. BURLINGAME'S return to Peking, but as the Convention was concluded in 1868, and he cannot again reach China before 1870, it is hardly likely the United States Government would wait so long without requiring, through its Minister at Peking, some recognition of the arrangement. They would be justified in asking at once for an assurance that the Convention was duly sanctioned by the Peking Government, and that its spirit should be adhered to in all dealings between the contracting parties: such requisitions have doubtless been made by Mr. Ross BROWNE, and refused. As regards the framing of the Imperial Edict, we know how sinologues will differ in opinion on such points; besides, did Mr. BURLINGAME'S credentials consist solely of a copy of this Edict? Again, the statement that Mr. Ross BROWNE'S utterances are worthless, on account of his being under orders of recall, is a very poor argument. Mr. HOWARD, who was nominated as Mr. BURLINGAME'S successor, has we believe declined the post, and Mr. BROWNE, who has signified his willingness to resume it, will probably be requested to do so; even were it otherwise, so long as he remained in charge of the United States Mission his utterances must have had an official significance, and the telegram before us details some of his expressions too precisely to be mere invention. As for the counter-statement from Paris, it bears inconsistency on the face of it; even now, Mr. BURLINGAME has visited only one European country besides our own, and has made no treaty except that with America, yet he is represented as having already received from Peking an approval of "the treaties concluded with European Governments.' Moreover, the date of the despatch conveying this approval is wanting.

We must not be too hard on the Paris papers, though; for if they give no reliable news about the China Mission, they afford us a good deal of amusement. Here is a very funny bit:—"Sir ANSON BURLINGHAMES, who touches about "200,000 francs a year for promenading the Chinese Am- "bassadors from Court to Court, is about to carry them off "to hyperborean regions. . . They are now about to visit "in succession the Courts of Prussia, Germany, Sweden, "Denmark, Holland, Russia, and, perhaps, Belgium and Italy. "They will return here by New Year's Day, when it is expected "the numerous vessels loaded with presents for the Parisian "Press will have arrived." We believe that the Mission is really preparing to quit Paris; but if "Sir ANSON BURLINGHAMES" manages to "do" all the European Courts here enumerated in about one-fifth of the time he has devoted to America, England, and France, he will make up for a good deal of lost time.

---

THE *Morning Post* is authorised to state that Mr. BURLINGAME has received a despatch from Prince KUNG, expressing his entire satisfaction with, and acceptance on behalf of the Chinese Government of the treaty negotiated with the United States. Very probably Mr. BURLINGAME has received such a despatch—but what is it worth? We would ask anyone conversant with the wiles of Chinese statesmanship whether the actions of the Peking Government, and its despatches to a distant representative, are likely to be in strict accordance with one another? No doubt, as long as Mr. BURLINGAME is in Europe, they will write him despatches calculated to keep him, and the Courts he visits, in good humour; all the while pursuing their old obstructive policy at home. Mr. BURLINGAME of course relies on being able to put everything straight on his return to Peking. We shall see.

---

"THE TIMES" of last Thursday had an article on the subject of Mr. BURLINGAME'S Convention, which we reprint in the present issue. It generally endorses the article of the *Pall Mall Gazette* above referred to, but contains a few remarkable admissions—among others that Chinese statesmen "would be likely to exert to the utmost the subtlety they undoubtedly possess, in discovering flaws in a treaty negotiated on their behalf by an 'outer-barbarian'"—that "the zeal of converts is proverbial, and a citizen of the United States turned Chinese Ambassador is a convert on a large scale"—and that "we are as convinced as Mr. BROWNE himself can be of the danger to peace from anything like a yielding attitude in the Western Powers." We suppose *The Times* does not consider that offering an abject apology for having been kicked, implies a "yielding attitude."

---

THERE is constantly a most unreasonable delay in the delivery of the inward French mails, which seems to be attributable both to needless detention *en route* from Marseilles, and to dilatoriness on the part of our own postal authorities. Even when the Messageries steamer reaches Marseilles in good time on the Friday, it is frequently past noon on Monday before we get the bulk of our despatches. By a strange sort of perversity, the French mail has all along been regarded, both here and in the East, with a certain degree of indifference; as though it were a kind of supplementary affair that came and went "promiscuous-like" (as Mrs. BROWN would say), and need not be attended to with the same scrupulous regularity as the English mails. Some people—as we repeatedly find, to our great inconvenience—ignore the French mail altogether. This state of things will not do when the service is doubled, or converted into a fortnightly one, as we are positively informed it will be in July next. From that time we hope, too, that the dates of departure from both ends will be assimilated to those of the P. and O. Company's steamers, so that we shall have a weekly mail leaving, and as far as practicable arriving, on a given day of the week. If we are to have a weekly mail at all, such regularity is manifestly most desirable; but we cannot help speculating—with some little amusement—on the way in which this further development will be received by some of the old China residents, who, when the semi-monthly mail was first projected, regarded it as a most undesirable innovation—in fact, an "awful bore."

ANOTHER step towards the completion of the Canal has been achieved. We hear from Suez that the dyke which kept the waters of the Red Sea out of the hitherto dry section of the Canal that extends as far as Chalouf has been cut through, and that this section is expected to fill in about a week. The water will then be let into the Bitter Lakes, when, for the first time, the waters of the two seas will really mingle. Although the Lakes are five metres below the level of the Mediterranean, the flow from the latter sea has been so slow that the rise of water in them has only averaged three centimetres a day; the flow from the Red Sea is however expected to be stronger, so that the filling of the Lakes will then go on at more than double the present rate. Even then, the operation is likely to occupy a hundred days, and it is almost certain that the complete opening of the Canal cannot take place until some time after the appointed date. This information quite confirms the opinion that we have already expressed, that although some sort of ceremony may be gone through on the 17th November, it will not include the permanent opening of the Canal to its full depth throughout. The proposed visit of the Empress EUGENIE is generally regarded in Paris as entirely abandoned, even the semi-official journals admitting that it is doubtful. The Canal Company have issued some regulations for the traffic, a summary of which will be found elsewhere.

IN our last issue we noticed a circular letter addressed to the Colonial Governments, inviting them to send representatives to a Colonial Congress to be held at Westminster next year. It appears that the colonists who originated this movement are members of the recently-formed "Royal Colonial Society;" that their meeting was held at the Society's rooms, and the circular dated from the same address. Lord BURY, the President of the Colonial Society, was absent from England at the time the circular was issued, and on his return, finding what had occurred, thought it necessary to write to Lord GRANVILLE, as Secretary of State for the Colonies, explaining that the Society was in no way connected with the movement or responsible for the views advanced. To which Lord GRANVILLE replies, that being himself a member of the society, he was already aware of the circumstances attending the affair. The correspondence was published in *The Times* of the 2nd inst. We some days since addressed a communication to the gentlemen who signed the circular letter as "Honorary Secretaries," begging to be informed whether they intended to invite representatives from Ceylon, or any other Eastern colony; and have been favoured with a reply to the effect that the circular has not been forwarded to any of the Crown Colonies, but only to those having responsible Governments.

THE manner in which the French allies of the TOKUGAWA party in Japan have abandoned their flag, after having incited them to active rebellion, cannot fail to have a most injurious effect on the military reputation that France is so anxious to preserve unsullied. It is hard to say in which quarter they have incurred the bitterest contempt; with the Imperialists, for so readily taking service as mercenaries among the rebels, or with the latter, for their base desertion of a losing cause. Whatever we may think of the motives by which ENNOMOTO and his adherents were actuated, we must give them credit for an amount of pluck and gallantry that would have won them the respect even of a powerful European adversary. How little was it foreseen years ago, when our own Government presented the *Emperor* yacht to the TYCOON, and later, when the United States sold the *Stonewall* to Japan, that these vessels would take opposite sides in such a fearfully destructive encounter as that before Hakodadi! The account of it, putting aside some of the (to English ears) uncouth sounding names, reads like an episode in some great contest between two nations long skilled in naval warfare.

IT seems that we have not yet heard the last of the case of *Regina v. Saint.* The undeniably just verdict of Judge SMALE is not to rest undisturbed if Mr. SAINT'S persecutors can help it, for application has been made to the Privy Council for leave to appeal against it. The Crown Solicitor, in communicating this fact to the defendant's attorney, gives as his first reason for appealing that "an important question of prerogative is involved," but follows this with the rather inconsistent statement that the appeal is "*more particularly* as to "that portion of his Honour's judgment *by which the Crown "is condemned in costs.*" The Crown—as represented by its law officers in Hong Kong—is anxious to defend its prerogative, but "*more particularly*" to avoid paying the costs of a most oppressive and vexatious action, brought against an honest and upright journalist for doing that which he believed to be his duty. We are surprised that Sir R. MACDONNELL should have sanctioned any further proceedings. A-it is, perhaps the right to appeal will be granted, but we cans not for a moment doubt that the Judicial Committee wil-confirm Judge SMALE'S decision in every particular.

THE memory of Admiral PROTET, who was killed in China, is to be honoured by the erection of a monument at Saint Servan, his native town. It is stated that the EMPEROR has presented the marble for the work, and that the Chinese Government has subscribed £240 towards its erection. The latter report seems to require confirmation.

## THE BURLINGAME CONVENTION.

(THE TIMES, SEPT. 2.)

It will be remembered that yesterday week we published a very extraordinary telegram from Hong Kong. It contained two principal statements—one, that the Peking Government definitively refused to ratify the Convention concluded by Mr. Burlingame in its name with the United States, and the other that the American Minister in China had emphatically denounced Mr. Burlingame's policy. The former part of the telegram was less surprising than the latter. It was an experiment for China to appoint an ambassador of any kind; it was yet more experimental—however indispensable under the actual circumstances of the Empire—to select a Foreigner for the novel office. The capacity, moreover, of Chinese statesmen for raising curious questions as to the meaning of their own compacts with other countries has been tested on former occasions. They would be likely to exert to the utmost the subtlety they undoubtedly possess in discovering the flaws in a Treaty negotiated on their behalf by an "outer barbarian" with "outer barbarians." The circumstances that the people in whose favour the provisions were happened to be the adopted diplomatist's own countrymen would naturally supply an additional motive for scrutinising their effect narrowly and jealously. The latter part of the telegram was less comprehensible, but still, taken by itself, hardly incomprehensible. The zeal of converts is proverbial, and a citizen of the United States turned Chinese Ambassador is a convert on a large scale. Mr. Burlingame's nomination, it is true, excited apprehensions in various quarters in Europe that its results might be to cause American interests to be unduly consulted in China, and his Convention between the two Powers was criticised somewhat severely, with a view to detect indications in it of such a bias. But, nevertheless, it was at the same time just intelligible that he should have donned his new nationality so completely as to have disappointed the expectations or affronted the susceptibilities of the old. A dozen good reasons might, indeed, be given for either half of this Delphic despatch; but whatever explained the one branch would seem to contradict the other. An easy, but the least satisfactory, solution was that a peculiar theory of diplomacy had found acceptance at the Court of Peking, to the effect that its Envoys had full powers to bind other Governments, but not their own. A more favourable interpretation of the mystery was that Mr. Burlingame had construed his appointment as constituting him a sort of arbitrator between China and the Western World, rather than a simple delegate of the former, and that both parties had, as usual, quarrelled with the award. But this, too, would have implied as complete a failure practically of the Mission as the other view. Mediation between the West and China could be conducted much more readily at Peking than in London or New York; and to Mr. Burlingame, as a simple agent of the Chinese Government, European Cabinets would not be very eager to open their policy or offer terms. His appointment was welcomed cordially as a symptom that the Chinese Empire was become alive at last to the expediency of placing itself in the same direct and personal relation with Foreign States that they occupy in regard to it. It would be as fatal to the success of the experiment that the character of the arrangements concluded by its envoy should allow room for a suspicion that he represented any interests but Chinese as it would be difficult for a barrister to plead impartially in the same suit for plaintiff and defendant.

Recent information, however, of more undoubted authenticity, contradicts the more serious of these telegraphic statements. We are enabled to assert that Prince Kung has in no way repudiated the Treaty concluded by Mr. Burlingame with the United States. If there has been delay in the exchange of the formal ratifications, it has arisen only from a desire to bring to a point first the negotiations with the European Powers to which the Mission is equally accredited, and from no plan of evading the engagements made in the name of the Empire. It does not yet appear in what the false report originated. If the intelligence could have been set forth more fully than ordinary telegraphic limits allow, its dubiousness would have probably been seen from the first. This is the price we pay the manifold advantages of telegraphic communication, that the colour and circumstances which furnish means of testing the credibility of a report cannot be given. The latter portion of the telegram is more likely to be true. According to it Mr. Ross Browne, the American Minister in China, has emphatically denounced Mr. Burlingame's policy "as evidence of the Chinese disinclination to progress." He appears to have taken the same opportunity to inveigh against the British policy also, on the ground that "equality in the relations of the Foreign Powers with the Chinese Government was impossible at present," and

Digitized by Google

that a yielding attitude on their part would tend to produce war. But, in the first place, the final view the United States Government itself might choose to take of a Treaty it has negotiated with China must be of much less importance to the other Treaty Powers than the question whether or no the Chinese Government can be trusted when it authorises Envoys to negotiate for it abroad; and, in the second place, there is, after all, nothing to show that the United States Minister, in denouncing the Treaty agreed to by his Government, has been uttering any but Mr. Ross Browne's private sentiments with the frankness an American citizen, Minister or not, can employ. His doctrine that equality in political relations between China and its allies is impossible would be of great practical importance were he, in enunciating it, his Government's spokesman. There would be difficulty in referring every petty grievance of British merchants or missionaries to Peking when the Chinese saw like claims of American subjects redressed on the spot by the guns of an American frigate. But an expression of the personal opinions of a retiring American Minister on the matter carries no weight but their own intrinsic reasonableness. It is not impossible that Mr. Browne may also have suffered from telegraphic conciseness. If he has been correctly reported, it is hard to follow the reasoning by which he seems to have persuaded himself that a desire on the part of Prince Kung's Government to establish direct and equal relations with the Powers which exercise so material an influence over its fortunes can indicate an aversion in China from progress. We ourselves believe that a policy of equality is for the honour and interests of China and the West alike. We are as convinced as Mr. Browne can be of the danger to peace itself from anything like a yielding attitude in the Western Powers; but we are at a loss to conceive how to impose on the Government of a country the responsibility of making good its engagements, instead of taking the burden on ourselves of forcing its subjects to respect our treaty rights, can be confounded with want of spirit and resolution.

Mr. Burlingame's Mission could scarcely have recovered the confidence which it would have lost by the failure on the reported grounds of its first negotiation. We think such failure would have been much to be lamented, and equally whether the treaty repudiated had been one with Great Britain or one with the United States. Whatever draws China into direct relations with other States benefits the civilised world at large. It does not matter what the particular Power is for whose immediate advantage Mr. Burlingame may be at the moment negotiating; the negotiation has in any case the same general effect of bringing the Chinese Empire out of its isolation. The merits of this particular Treaty with the United States are out of the question. The great point is that the Chinese Empire should recognise its capability for being, as it were, impersonated in a Mission, and thus represented at Foreign Courts, and bound by agreements concluded by its representatives in its name. Had it been true that the American Treaty had been repudiated, it would have appeared that the Chinese Government had not as yet learnt to appreciate the significance of its own decision to appoint Ambassadors. For much the same reasons we are glad to receive a contradiction of the last item of the same telegram, in which it was alleged that the Chinese text of Mr. Burlingame's credentials differed from the Foreign version, and appointed him Envoy to a tributary nation. On the face of it it may seem a silly thing to be solicitous about the disavowal of absurd pretensions, such as this reported claim of the Chinese Government to style all other Powers its vassals. If the Chinese were, indeed, all possessed of common sense, the presence of British, French, and American warships on their principal rivers might be left to purge away gradually the delusion. But, if they were all possessed of common sense, their Government would not be apt to make such claims. As it is, names and titles are of real significance to the provincial Chinese mind, as appears from the pertinacious clinging of their rulers to the pettiest ceremonial distinctions; and what any nation attaches great importance to other nations cannot afford to leave out of sight in regulating their relations with it. It was not, in fact, at all impossible that the politicians of Peking might have ventured to make the Chinese text of the Mission's credentials a channel for representing to the provinces the Western Powers as tributaries of the Empire, and their fleets as mere auxiliaries. Probably the plausibility of the story is its origin. The object of the present policy of the Western Powers, which is to compel the Chinese Government to enforce of itself respect for their flags among its subjects, would, at all events, have been defeated or greatly prejudiced by the propagation of such a fiction with the apparent assent of the Treaty Powers themselves. It is a matter of serious congratulation, therefore, that the authority of various most distinguished Anglo-Chinese scholars, who have collated the Chinese text and the translation, agrees in asserting the accuracy of the version and the absence from the original text of the suspected pretension.

## CHINESE COOLIES IN PERU.

(MORNING STAR.)

The American Government, as is well known, looks with an unfriendly eye on the Coolie trade, as distinguished from the free emigration of the Asiatics; and we are therefore not surprised to find its representative in China interfering on behalf of the Chinese who have been induced to settle in Peru. The latter have managed to make their condition known to Mr. Hovey, the American Minister to that Republic; and we have seldom read a more pathetic document than that in which they set forth their grievances. During the last twenty years some 30,000 Chinamen from the province of Canton have been induced, under various specious pretexts, to emigrate to Peru. The movement began almost contemporaneously with the great rebellion. Want of food impelled this multitude to listen to the fine promises of lying agents, who promised them good wages and kind treatment if they would only cross the sea. Their experience, as described in the memorial of Mr. Hovey, is well calculated to excite commiseration. Their lot would be a hard one, even if they had not to complain of a positive breach of faith. Their physical powers are largely overtaxed, and they frequently suffer from personal brutalities for which they have no means of redress. But they complain, not so much of incessant toil as of insufficient food and clothing. These, they say, "are doled out to us in the most meagre manner, so that we are weakened for want of food. . . If we cry out from our griefs and wrongs we are made to suffer more reproaches and outrages, so that at times we bear the violence which ends in death, and everywhere see the grief that drives people to make away with themselves."

Mr. Hovey, not being able to read the petition, forwarded it to Mr. Ross Browne, the American Minister at Peking, who transmitted one copy to Prince Kung and another to Mr. Hamilton Fish, the Secretary of State at Washington. Mr. Browne attaches credit to the charges which the luckless emigrants have made against their Peruvian taskmasters, and expresses his belief that "the enlightened Peruvian Government" will take prompt measures for the suppression of the grave abuses which have been brought to light. We fear that his confidence in the "enlightened Peruvian Government" does not rest upon a more stable foundation than his own diplomatic courtesy, for the cruelties which have been for many years perpetrated under the eye of the authorities of Peru are only too notorious. The Chinese, who have given audible expression to their complaints, are the least unfortunate of their countrymen. There are many others who work in the mines or on the guano islands whose condition is infinitely worse. The guano labourers especially are not only hardly used, but suffer from loathsome diseases, generated by the offensive atmosphere which they are compelled perpetually to breathe. The guano kills them in time, but only after months and years of intolerable misery. These wretched beings can of course make no complaint, but if representations are addressed to Peru by the Government of the United States, it will be well if they are not forgotten. Mr. Browne states that there is now a better regulation of the emigration system in the ports of China, but he truly says that no regulations adopted there will avail to make the trade a decent one unless the emigrants are put under the efficient protection of the law in the countries to which they are despatched. Prince Kung replied to Mr. Browne in a very fairly-spoken letter. The Celestial statesman exhibits an amount of humanity which might well put the Peruvians to the blush. He expresses his sympathy with his unhappy countrymen and his desire to serve them; but, conscious of his own weakness, he prays that the American Minister in Peru may be moved to make the necessary inquiries into their actual treatment, and employ his good offices on their behalf. That Mr. Hovey will act upon this suggestion, and that too with the full authority of his Government, we cannot doubt; and we hope that, as a consequence, the condition of the docile and industrious Chinese will undergo a change for the better.

## CHARGE AGAINST PROFESSOR RISLEY.

At Marlborough-street Police Court on Wednesday last (September 1), Richard Risley, better known as Professor Risley, proprietor of the Japanese troupe, was placed at the bar before Mr. Knox, on a warrant charging him with assaulting Maria Mason, a girl about eleven years of age. Mr. West, on behalf of the Society for the Protection of Women and Children, appeared for the prosecution. Mr. West said the defendant was charged with following about a little girl, with asking her to go with him into various houses, and with otherwise frightening her. The prisoner was first seen in the neighbourhood of Leicester-square. He was seen to follow a little girl. He tried on several occasions to get her into different coffee-shops. He asked her to go with him to his rooms, promising to give her a present. He showed her a ring, and attempted by all sorts of inducements to get her to go into places with him. On several occasions while passing shops the prisoner made strong efforts to force her in. This went on until the little girl reached Greek-street, where she went in, and was found in an almost fainting state. These facts did not rest alone on the evidence of the child. The prisoner was followed by a gentleman (Mr. Hales) who had seen him with the child, and perceived that something was wrong. This witness watched his proceedings for a long while. He subsequently returned to Leicester-square. Mr. Hales said: "I saw him accost two young ladies—one about fifteen, the other about twelve — one after the other. They looked disdainfully at him and walked on. The prisoner then went round the slums at the back of the Alhambra, and when he got into Castle-street he went into an oyster-shop and had some oysters. The prisoner then went up the street, and, when at a photographer's, there was a little girl about seven years of age looking in at the window. The prisoner spoke to her, but she did not seem to understand. The child had her school-bag with her. The prisoner looked round to see if any one was watching. I got behind a group of men, and he did not notice me. I kept my eye on the child, and saw him lay hold of her, but she left him and went into a house. The prisoner, as he passed the house, had some water thrown over him. The prisoner seemed very much annoyed, and said he would go and look for a policeman. I went and looked for a policeman also, and seeing Police-constable C 201 turning into the street, I went forward and met him. I had seen the prisoner accost several young girls. I demanded the prisoner's name, and I told him why I wanted his name. There were then a great many people gathering round us. The prisoner said, 'I will tell you,' and called me aside. I objected to hold any conversation with him except in the presence of the constable, as I did not wish to lay myself open to a charge of extortion. The prisoner at first would not mention his name, then he said his name was Ricardo, that his address was in the Strand; that it was at 45, Surrey-street. I asked him for his card; he had no card, nor an envelope. I said I must know whether he had given a correct name and address. The prisoner offered to write his name, and he did write something beginning with 'Ris' on a small piece of paper, but I could not make out the rest, it was so indistinct, as the prisoner's hand trembled so much. I told the prisoner I could not read his writing; the prisoner, speaking low, evidently not wish-

Digitized by Google

ing the crowd to hear, said, 'I am the professor.' The prisoner told me his name was Ricardo, Surrey Theatre. The prisoner wished to follow me; I told him not to do so, and that he should hear from me." The witness, being cross-examined, said, I am on the staff of the *Morning Post* and *Star*. I was passing down Coventry-street on my way home when I first saw the prisoner and the little girl. I had been to Broadwood's on business. I watched the prisoner and the little girl about an hour, I think. I now know that his name is Risley, but he told me distinctly his name was Ricardo. I inquired for 45, Surrey-street, but there was no such number. George Clarke, detective, said,—I found the prisoner at the theatre, Nottingham, yesterday morning. I called him aside and read the warrant, and explained the charge. The prisoner said, "If I did touch the girl it was with no bad intention. I am fond of children, and I might have spoken to her in a fondling manner." I made inquiry at Surrey-street, and could not find 45, and also at the Surrey Theatre, and ascertained that the prisoner was known as Professor Risley. The prisoner was then remanded, and at a subsequent examination was committed for trial, bail being taken for his appearance at the sessions, himself £400, and two sureties £200 each.

# Foreign Intelligence.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept 3.

The day on which the Parliamentary session will be opened is approaching, and the papers are even now publishing particulars of the budgets to be laid before the members. I need not add that these items of news must be regarded as more or less apocryphal, but, nevertheless, they deserve some attention. The *Dagblad*—the ultra-Conservative paper—says that the net balance in favour of the mother country in the East India Budget is valued at ten millions of guilders. Now India has to pay us a yearly interest of 9,800,000f., so that the *Batig Slot*, the golden calf, should be reduced to the trifling amount of 200,000f. a-year, because, the *Dagblad* says, the Minister intends to make a fixture of these ten millions. The Conservatives are indignant upon this point, and foretell that Holland is on the eve of its fall. Another rumour says that our Minister of the Financial Department intends to propose an increase in the taxes to cover the expenditure. I hope to be able to say in my next whether these rumours are well-founded, or merely the lucubrations of some anti-ministerial penny-a-liners.

Some days ago we heard from the Hague that Princess Maria, second daughter of H.R.H. Prince Frederick of the Netherlands, had been betrothed to Prince William Adolph Maximilian Karel of Wied, now residing at Neuwied. This Prince is a lieutenant in a Grenadier regiment of the Prussian Guard. The Princes of Wied belong to those of the former German Empire, who have right upon the title of "Durchlaut." It is also reported that the Prince will be appointed officer in our army, and that after the marriage they will reside at the beautiful seat "*het huis de Paauw*," in the neighbourhood of the Hague.

In my last I gave you some particulars of a meeting held at Amsterdam, at which the question was discussed of establishing a communication by steamers between Holland and Java, *via* the Suez Canal. Prince Henry of the Netherlands has shown himself a firm promoter of this scheme, and at his instigation a commission has been appointed, consisting of the Amsterdam merchants, Messrs. Boelen, Bunge, and Bienfait, to report upon the plan. The Chamber of Commerce in our metropolis has addressed a memorial to the Minister of the Financial Department in support of the project, and will cooperate with the commission in every way. The report published by the last Java papers, that six steamers were already building at the yards of Messrs. van Vlissingen for this route, is a *canard*. The question remains—will our capitalists provide the money? I do not know. In my last I said that they prefer to buy and sell "metals" rather than invest their money in commercial speculations.

Several sections of the Association for Promoting the Welfare of the Javanese have held meetings, in order to consider the proposal of Mr. H. de Bruyn, ex-director of public works in India, viz., that the Government should grant to the Association 20,000 bouws of waste ground in Java. The larger majority of the sections declare themselves against this plan, so that it will, without doubt, be rejected.

Riots have again taken place here; but they were not of a serious character. The Lord Mayor of London and the Lady Mayoress are at the Hague. They have visited the Exhibition at Amsterdam, and are being duly entertained at the Royal residence and in the capital.

Belgium has lost one of it most celebrated artists. Baron Henri John August Leys died some days ago at the age of fifty-four. Leys may be said to have stood at the head of the Belgian pre-Raphaelites. His productions realised enormous prices.

### SHIPPING INTELLIGENCE.

DEPARTURES.—Aug. 25, from Brouwershaven, for Melbourne, Garibaldi; 28, from Texel, for Batavia, Maria Elise; from Brouwershaven, for Batavia, 'sGravenhage (s.s.); 31, from Brouwershaven, for Java (via Cardiff), Louise, Kroonprinses van Zweden.

ARRIVALS.—Aug. 31, at Brouwershaven, from Sourabaya, County of Berwick.

LOADING.—Vessels on the berth at Rotterdam, for Batavia, Noach III., Rotterdam, Lichstraal, Cornelis Wernard Eduard (will convey 125 soldiers), Triton, Jacoba Cornelia; for Batavia and Sourabaya, Maria Adriana, Jonge Cornelis; for Macassar, Neerlands Vlag; for Melbourne, Cornelis Gips; for Samarang, Friesland; for Singapore and Hong Kong, Huydecoper Isaäc da Costa.

PASSENGERS OUTWARD.—For Java: Per Maria Elise, Misses H. Peters and W. D. Bosch; Per 'sGravenhage, Messrs. Goldman and family, de Bruyn and family, van Zandwyk and family, v. d. Scheer, Pellikaan, van Bosch, Bosch, Reuling and family, Miss Homburg, v. d. Scheer, Mrs. Radys and family, Messrs. Vissman, Muller, Clifford and family, Blair, 125 soldiers, and several officers.

# Monetary and Commercial.

The Suez Canal Company have issued, in London, officially, the terms and conditions upon which vessels will be allowed to navigate the Canal in passing from one sea to the other, in compliance with the Act of Concession, dated Jan. 5, 1856. There are altogether eleven articles. By the first the navigation of the Canal is open to vessels of all nations, provided they do not exceed a certain draft of water. Special conditions are imposed upon steamers; and as to speed, upon all vessels; and provision is made for the employment of the company's pilots, whose directions are to be followed, but the captain's responsibility for the conduct and movement of his vessel remains. Certain forms have to be gone through at the offices at Port Said or Suez on ships' arrival; and every vessel is to observe certain rules during the passage, one of which relates to lights during night time. The rules as to vessels meeting seem to be clear and definite; and if they are carefully observed, accidents at such times are apparently impossible. Provision is made for cases where vessels from any cause may be detained in the Canal; and commanders, among other requirements, are forbidden to anchor unless upon superior order, or upon the request of the pilot, or to cast into the water any filth, ashes, rubbish, or, indeed, any object whatever. If any article does happen to fall into the Canal, a declaration to that effect is to be at once made to the pilot, who must transmit it to the agent at the nearest station; and the commander of the vessel is prohibited from searching for the object without the direct sanction of the company's agents, and the salvage, however it may be effected, is always to be made at the expense of the ship, to which the recovered article will be restored. The dues payable are to be calculated on the real tonnage of the ship, which will be determined according to the ship's papers; and it will be 10f. per ton, and 10f. per passenger. Towage 2f. per ton; pilotage according to draft of water. If the pilot is detained, he is to be paid 20f. per day; but vessels anchoring are to have a reduction of 25 per cent. upon the pilotage dues. Such are the principal rules, which seem to include every contingency to which the navigation is exposed.

The 10th of November is the date now fixed for the departure from the Medway of the *Great Eastern* with the Indian cable on board, for laying down between Aden and Bombay. The *Great Eastern* having undergone her refit, and the necessary repairs to her large iron cable-tanks effected, the shipment of the cable was commenced last week, the quantity stowed on board up to the 29th ultimo being close upon 300 miles. The cable is similar to the last laid down between France and America, with some slight improvements to adapt it for the higher temperature of the water in which it will be deposited.

The tenders for £325,000 in bills on India were received on the 1st inst. at the Bank of England, and the amounts allotted were—to Calcutta, £282,000, and Madras £43,000. The minimum price was fixed at 1s. 11d., being 1 per cent. higher than on the last occasion, and tenders on both Presidencies at 1s. 11¼d. will receive about 30 per cent. These results show an increase in the demand for means of remittance to the East.

The *Leeds Mercury* states that Messrs. William Brayshaw and Son, of Grove Mill, Birstal, have called a meeting of their creditors. The circular issued on behalf of the firm states that time only will be required to pay the creditors in full.

There has been more demand for silver for the East, chiefly on account of parties who failed to obtain Government bills on India, and the price of bars rose ¼d. per ounce, viz., to 5s. 0¼d. On the other hand, Mexican dollars are flat, in consequence of a decline in the China exchanges, and the supply by the last West India packet was sold at 4s. 11¼d., being a ¼d. lower.

The amount of bullion by the P. and O. Company's steamer *Poona*, from Southampton on the 4th inst., was in gold, to Galle, £20,000; to Bombay, £72,00; to Madras, £11,300; to Calcutta, £20,000; in silver, to Bombay, £19,500; to Hong Kong, £26,895 16s. 8d.; to Shanghai, £1,940; total in gold, £123,300; in silver, £48,335 16s. 8d.

### BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and seven months ending 31st July last have been issued. If the results they show may be relied upon our export trade has fairly entered on a course of progressive prosperity. The declared value of the exports for July was £17,394,951, against £15,748,269 in July, 1868, and £15,562,430 in the corresponding month of 1867. The total for the seven months was £108,880,216, £100,349,426, and £103,175,914, in 1869, 1868, and 1867 respectively. The increase for the month has been in most of the chief articles; the most conspicuous being beer and ale, cotton yarn, earthenware, hardwares, linen yarn, machinery, iron and steel, copper and brass, silk manufactures, wool, woollen and worsted manufactures, and unenumerated articles. There is a falling off in coals, cotton manufactures, linen manufactures, and woollen yarn.

The imports returned to the 30th June exhibit the following

Digitized by Google

figures:—Month ending 30th June, 1869, £20,385,565; 1868, £20,637,327; 1867, 21,176,332; for the half-year ending 30th June, 1869, £107,062,638; 1868, £110,857,665; 1867, £109,767,986. This return shows a falling off in the present year of £251,762 for the month, and £3,795,027 for the six months. The quantities imported are returned to the end of July. Wheat shows an increase of 33 per cent., flour of 100 per cent., and cotton of 6 per cent. Wool appears to have fallen off 33 per cent. The quantities of articles subject to duty entered for home consumption shew some considerable changes. Fruit, molasses, tea, and tobacco have augmented, while there is a heavy decrease in cocoa, coffee, spirits, sugar, and wine. The falling off in coffee, when we compare either the month or the year, is so great that it is perhaps best to treat it as arising from some unaccountable mistake in the transference of the totals. According to the tables the quantity of this article taken for home consumption in July last was only 2,428,938 lbs., against 10,818,614 lbs. in July, 1868, and 16,020,078 lbs. in July, 1867. The total for the seven months of the present year is given as no more than 17,201,280 lbs., against 82,234,208 lbs. in the corresponding period of last year—a statement the absurdity of which the most cursory examination should have made apparent.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## IMPORTS.

## ARTICLES OF IMPORT.

### TEA.

The public sales of China Teas commenced on the 31st ult., on which day 8,303 packages passed, 5,972 being "without Reserve." This quantity included 1,915 chests of New Season's black leaf Congou, ex Agamemnon (str.), offered "without reserve." On the day of sale compared with prices paid at the opening of the market good medium qualities showed a decline of fully 3d. per lb.; Fine Onfas sold at relatively fair quotations, and common red and black leaf Congous were a shade lower. The sales were concluded next day, when 5,407 packages passed, 5,100 packages being "without reserve." A chop (508 chests) of new black leaf Congou, per Agamemnon, sold at an average price of 1s. 9¼d. per lb., and new make Congous, in boxes, realised 1s. 2d. to 1s. 2¼d. per lb.

SILK.—There is no alteration to report in this market.

COTTON.—The depression in the Liverpool market has increased, and prices have experienced a further fall, being about ¼d. per lb. lower than those current at the date of our last. The supplies are liberal, and there is considerable pressure to effect sales. Quotations: Surat, 8¾d. to 12⅜d.; Madras, 10¾d.; Bengal, Scinde, &c., 8¾d. to 9¼d.; all other descriptions nominal. The London market is without change.

COFFEE.—The business in Ceylon during the week has been limited, but the tone of the market is unaltered.

COCOA-NUT OIL.—The market remains steady at our quotations.

COIR GOODS.—At the public sales of Yarn 38 bales and 151 tons in dholls were offered, nearly all Ceylon, which met a good demand, and chiefly found buyers at £1 per ton advance for common to £4 higher for fine quality. Fibre mostly bought in. 86.571 dholls and ballots (136 tons) Ceylon Yarn nearly all sold—low coarse, £25 to £25 10s.; common to good common, £26 to £29; medium to good medium, £30 10s. to £33 15s.; good, £36 10s to £38 15s.; fine, £42 10s. to £49. 5,016 bundles and ballots (20½ tons) Ceylon Fibre were chiefly withdrawn, only a few lots fair selling at £22 to £22 15s. per ton. Privately 300 bales Singapore Mattress Fibre have been sold at £14.

MANILA HEMP.—The market continues firm, and prices are again higher, the sales have been about 1,000 bales, common brown to good roping at £47 to £52 10s.; Boluzan £55. In auction 77 bales damaged Manila sold, Boluzan at £53 10s. for first class, Sorsagon at £52 15s. for the same, and fine white at £59 to £61 10s. for fresh water damaged.

RICE.—The market is extremely dull, and there has been little or no business since our last report.

SUGAR.—The demand for all descriptions is inactive, but holders remaining firm, former prices are maintained. There have been no sales of East India qualities.

TOBACCO.—Japan: No sales to report, there being no stock to deal with. Two small cargoes may shortly be expected. Prices remain without change. Java: There has been a good demand for the dry husky qualities, well feathered and fair colour, of which, however, there is but little offering. Some sales have been made of the more coloury descriptions of the new crop purchased at the last Dutch auction. Manila Leaf: A portion of a recent importation was offered in the market, and in some instances business done. The quality of the new shipment does not prove so good as the previous one. The trade, however, is well supplied for some time to come. Manila Cheroots and Cigars: The recent arrivals of both descriptions having been well made, although rather heavy in weight, were taken to a fair extent, particularly the former, and previous prices fully maintained. Heated and common qualities have sold at corresponding rates.

TIN.—An improvement in the demand for Straits has resulted in considerable sales being effected at £132 per ton cash, showing an advance of 10s. to 20s. For arrival sales have been made at £128 to £130, according to distance.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern Ports show no improvement, and the arrivals have been rather numerous. Coal freights from the Northern outports remain unaltered.

Current rates of freight for vessels on the berth:—To Yokohama: 30s. weight or meast. To Nagasaki: 40s. weight or meast. To Hiogo: 35s. weight or meast. To Shanghai: 30s. weight or meast. To Hong Kong: 30s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear o Tyne per keel.—For Shanghai: £43. For Hong Kong: £35. For Singapore: £25. For Galle: £25. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. To Chefoo: £2 2s. For Shanghai: £2 2s. For Hong Kong: £1 13s. For Singapore: £1 5s. For Galle: £1 4s.

## CASUALTIES.

The Nemis (?) (Dut. barq.), 51 days out, from Java to Falmouth, was spoken July 6, making for Simon's Bay to refit, having lost jib-boom and foretopmast and thrown cargo overboard in a gale on the 27th June.

The Queen of India, Ware, from Singapore to London, put into Mauritius, July 30, and reported that from 20th to 30th June, about five hundred miles east of the Cape of Good Hope, she experienced very heavy weather from the NW., lost all bulwarks and stancheons on the port side, started covering board, lost a man overboard, and shipped very large quantities of water; the vessel was making eighteen inches of water per hour, and the leak gaining six inches per hour with all hands pumping. On the 28th June ran down to a vessel to leeward, and asked her to take the crew off; five men got into the longboat, with the ship's papers and chronometer, but the boat's bow got stove, and the men in her cut the rope and drifted away; the Queen of India had then seven feet of water in her, but the weather abating she was pumped dry, and was found to be tight below the water line. On the 3rd July, in lat. 32 S., lon. 32 E., she spoke the Shannon, Mauritius to London, which supplied her with a chronometer. The cargo was being discharged, and the vessel repairing afloat

## MISCELLANEOUS.

At RIO DE JANEIRO.—Aug. 3, Zeebloem, Gadard (?), sailed for Batavia.

At MAURITIUS.—July 9, Orlando, Clarke, from Celebes; 21, Nestor (s.s.), Drenning, from Shanghai, and left 22 for London; 4, Silence, Dugona, from Cardiff, sailed for Singapore; Jasmin, Ortige, sailed for Singapore; 14, Joshua Loring, Loring, from Boston, sailed for Singapore.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

CANADIAN NEWS, every Thursday, contains all the latest news fro the New Dominion.

Price 2d., post free, 3d.

Office: 11, Clement's-lane, Lombard-street, E.C.

DOUBLE YOUR INCOME; or, RESOURCES OF THE MONEY MARKET. Just published, price 1s. Can be ordered through any Bookseller, or post free for twelve stamps, from E. HAY, 83, Lombard-street, London.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, ontaining a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE,
DRILLING AND SCREWING MACHINES,
A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## COMPTOIR D'ESCOMPTE DE PARIS.

HOLLOWAY'S OINTMENT and PILLS.—ULCERS, WOUNDS, SPRAINS.—Bad legs, old wounds, and sprains, whether recent or chronic, yield with surprising celerity to the cooling, healing, and curative properties of this invaluable Ointment. It may be relied upon in all such cases as have baffled the skill of our best hospital surgeons. No matter the length of time the malady has endured, this Ointment, assisted by a course of Holloway's Pills, will quietly but certainly reach the core of the complaint, and thoroughly eradicate it without additional impediments to pleasure or business. These remedies will overcome the worst forms of disease and the foulest state of the blood. They never fail in extirpating noxious humours, the first step towards renewing soundness.

### THE MAILS, &c.

THE present Mail is delivered on its due date; but a large portion of our despatches were not delivered until between twelve and one o'clock. All the Japan news, and the more important news from China, was anticipated by the Pacific mail, received on the 7th.

The *Delta*, with the Southampton portion of the last inward mail, arrived on the 11th instant.

The next inward mail will be the French, due here on Monday next; the dates will be, Yokohama, August 3; Shanghai, 6; Hong Kong, 12; Singapore, 21; Ceylon, 31.

THE latest telegrams from Hong Kong, *via* Galle, are dated Aug. 19, and were received on the 7th inst. The line is now out of order. The Kiachta line has suffered a brief interruption, owing to the Russian wires having been damaged by floods; it is now working again, Shanghai telegrams to the 30th Aug. having been received this morning.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Syria*, arrived Sept. 18.—From Swatow: Mr. R. T. Lent. From Hong Kong: Mr. T. O. Lent, Capt. Soames, Mr. J. C. Rassell. Per P. and O. steamer *Bangalore*, from Marseilles, Nov. 7.—To Hong Kong: Mrs. Pauncefote. To Ceylon: Mr. and Mrs. St. Albin.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The advices brought by the present mail from Yokohama are to the 26th July, and have of course been anticipated by those received a fortnight since per Pacific mail, which extended to the 29th. We have therefore no news of importance, but the following extracts from a correspondent's letter will be found interesting:—

H.M.S. *Rodney* and *Juno* have left for England. The demands of the Japanese for silkworms' eggs have much increased, and the price is now four dollars per card. They are said to be scarce. The harbour of Yokohama is fuller than ever known; no less than one hundred vessels of all descriptions.

Sir Harry Parkes now resides chiefly at Yedo, where a general improvement has taken place since the conclusion of the war. The late Shiogoon's grounds, Hamogoten, are being prepared for Prince Alfred, who is daily expected. The Japanese now have the entire traffic which was opened up by Foreigners for daily communication by coach between here and Yedo. Steamers are also running daily from Yokohama to Yedo. The new hotel at Yedo continues to be well patronised. The new British Consulate is nearly finished, with its curious three towers, which are a standing joke against Major Crossman, the architect. The lots on the bluff have been built on, and most of the residents reside there, using the settlement for business purposes only.

No signs of railway yet. The kinsats may assist it on, as with this paper money (all extra) on this country the holders may require employment for it, and would sooner hold a share in a railway which must pay than a piece of paper which might be burnt or robbed. The kinsats are much abused by the Foreigners, but if they are understood rightly I think the Government have acted well in circulating them. War has to be paid for, and the Mikado's Government, having no money, had to issue paper money, and is confident of redeeming some day. When issuing it they inform the native public that it must pass at par with silver; so with this as law everybody is safe, and in Yedo it passes freely for everything—cup of tea, labour, boat or chair hire, picul of rice, &c., and is used by everybody. The doings of the Parliament are kept rather secret; they still continue their meetings. The present Government are anxious to encourage companies, and want to carry through a grand farm scheme, which will occupy many of the Shiogoon's followers.

The *Japan Gazette* gives currency to a rumour that the other day two steames left with Satsuma and Chosiu troops for the Island of Tsusima, lying between Shimonoseki and Corea. The same paper mentions a report that Echizen is to be made regent, and that Stotsbashi will accept office under the Mikado's government. A letter recently received from Hakodadi says: "The War is over. The army and navy are on their way home. In one month Yedo will be quiet, and we shall probably have peace in Japan for some time to come."

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, July 29.

By the American mail which left this on the 19th inst. I forwarded you copies of the addresses presented to H.E. J. Ross Browne, late U.S. Minister to Peking, by the American and British communities respectively, with the replies thereto.*

On the 17th inst. the P. and O. steamer *Sunda*, with the English mail of the 4th June, arrived, three days before contract time. She brought Reuter's telegrams to the 27th June, being four days later than those published in the *Straits Times*. On the 22nd two telegrams, bearing date of June 29, were received, one *via* Galle, the other by Grant's Trans-Mongolian line. As usual, the differences between them were so material as to render both almost useless. On the 26th the French mail of June 10 (from London) arrived, with telegrams to the 2nd inst., which were supplemented yesterday by Trans-Mongolian and Kiachta telegrams to the 6th inst. These are now our latest advices.

The foreign Consuls have jointly addressed the following letter to the Taoutai with reference to the proposed telegraph from Shanghai to the Kiu-toan Beacon :—

The undersigned Foreign Consuls in Shanghai have received a letter from the Chairman of the Chamber of Commerce as follows :—

"This Chamber is informed by the Commissioner of Customs that there are materials now at the Custom House sufficient for the construction of a line of telegraph from Shanghai to the Kiu-toan Beacon, and that while there would be little difficulty in the working of such a line by the Customs and Harbour Master's departments those services would be materially aided by it, as affording a means of rapid communication with the light-house or light-ship in case of accident, or of their requiring stores or assistance; and for reporting the arrivals and departures of vessels. The general shipping of the port would be equally benefited by these advantages; but the most important use of the telegraph would be to make known wrecks or the grounding of vessels, which the dangers of the entrance to the Yangtsze renders sometimes unavoidable.

"The channel between the Block-house shoal and the south shore is very narrow, and the shoal is rapidly growing, and in thick or even hazy weather it is almost impossible to judge accurately of the distance from either shore; vessels are consequently frequently grounding, causing delay, straining of the ships, and liability to loss by damage of cargoes, and in some instances to total wreck, with a sacrifice of life. In these cases, timely assistance would be the means of saving much valuable property, and on some occasions the lives of the crews.

"During the present year tea vessels have grounded in the neighbourhood; in one case four lives were lost.

"It is doubtless needless for the Chamber to enlarge further upon the utility of the establishment of the communication, as its advantages will be fully recognised by the Consular body; the Chinese authorities may not be alive to them unless the matter is urged upon them in a manner calculated to engage their attention.

"The undersigned (Consuls) approve and commend the sense of this letter. Many vessels, both native and foreign, frequent this port. The expanse of water at the mouth of the Yangtsze is great. In some places there are shoals, and in other places the channel is narrow and the navigation intricate. It thus happens that some vessels are wrecked, and that others are saved only by great exertions, or the timely arrival of aid. The proposed telegraph would strike the river at a point distant more than forty miles from Shanghai, and where the navigation is peculiarly difficult. At the point proposed, moreover, there already exists a lofty light-house known as the Kiutoan Beacon, from which a wide view of the river can be had. By using the telegraph, Shanghai would be brought into instantaneous communication with the Beacon, and beyond doubt much property and many lives would be saved in consequence, for in this way succour would be instantly despatched; while, as matters now are, hours are likely to elapse before news of disaster reaches us. We therefore ask you to co-operate with us in procuring the permission of the Government for the erection of such a line of telegraph.

"Whether this should be done at the expense of the Government or of the foreign community, or conjointly, and the character of the regulations are minor matters, which may be determined after the Government has accorded assent in general terms.

"You will understand that this proposition should stand or fall on its merits, as all other propositions should. The grant of permission in one case does not bind the Government to give assent in another case.—We have, &c."

I may remark that the materials for this telegraph were purchased four years ago, and have since lain in the Customs godowns, the Chinese authorities having persistently refused to permit their use. The Taotai has replied to this last representation by a curt and decisive refusal – translation of which I append. May his shadow never be less!

Tu, the Tautai, acknowledges receipt of a joint despatch, on the 7th of 6th month (July 15, 1869), from the various foreign Consuls residing at Shanghai, setting forth the representation of the Chamber of Commerce on the necessity and advantages of a line of telegraph from Shanghai to the vicinity of the Kiu-toan Beacon, &c.

The Tautai finds, upon investigation of this subject, that in the 6th month of the 3rd year of Tung-che (July, 1864) the Commissioner of Customs, Mr. Dick, recommended the laying down of a telegraph line from Shanghai to Wusung; and at that time Ting Futai, being then Tautai, represented the matter to Lee Futai, who made reply that:—"The application for the erection of a telegraph line is a matter entirely without precedent, and as it does not find any place in the treaty stipulations the discussion of such a matter is not to be lightly entered upon—wherefore, he orders that any proceedings in the matter be at once arrested." Afterwards, in the intercalary 5th month of the 4th year of Tung-che (July, 1865), an English merchant of Lee-fu hong clandestinely erected telegraph poles at Pootung (East of the Whampu river), which were pulled up by some persons; and the district magistrate of Shanghai, and the Ting Magistrate of Chuen Sha, having been ordered to inquire into the matter, they replied :—

"That Foreigners to erect wooden posts in the interior is injurious to the Fung Shui and to the agricultural interests of the people, and already it has resulted in the death of some of the people—whose loss of life cannot be accounted for on any other grounds; and the whole body of the people—rushing on like a flood—appeal to us to arrest such proceedings," and having received the orders of the Imperial Commissioner Lee, stating :

"That the erection of foreign telegraph wires in China is a matter attended with great obstacles to the Fung Shui and to the agricultural interests of the people, and must lead to great dissatisfaction on their part. And besides, the various foreign Ministers at Peking have already made application to the Board of Foreign Affairs at Peking for permission to have telegraphs established, and repeatedly has the Board reasonably refused such applications, which is on record."

The Tautai Tu thus finds that there is no provision whatever in the Treaties for the erection of telegraphs, and that it would be a great offence to the feeling of the people; and besides, Chuen Sha belongs to the interior sea coast, and is not a place for foreign commerce, and it could not be peaceably erected there; and the preceding cases may be considered as showing how the present application would be received; so that the Tautai finds it not convenient to send up the application; wherefore the Tautai makes this reply to the Consuls, requesting them to inform the merchants that there is no occasion for a telegraph wire in China.

To the Consuls for U.S. of America, England, France, Prussia, Sweden, Portugal, Italy, Denmark, Spain, Russia, Holland—eleven countries.

Tung-che, 8th year, 6th month, 11th day—19th of July, 1869.

The committee of the Chamber of Commerce have issued a circular to their members proposing the establishment of an Association in England to agitate China questions, and represent generally the interests of merchants engaged in the China trade. Each member is requested to state the amount of the donation he would be disposed to give to forward the scheme. I have not yet heard the result.

The first of a series of quarterly reports by the Watch Committee has been published. It announces the attempts of the council to put down many minor nuisances, such as the exercising of horses in the public streets, and the like. Besides these matters the committee have taken in hand the repression of certain opium houses, "wherein women are kept for purposes of forced prostitution." You will hardly believe that the committee have it in contemplation to order the muzzling of dogs during the hot weather, which has now, after long delay, come upon us in a tremendous outburst. I hope, however, that the lessons taught in London last year, as well as the scientific opinions which have been placed at the disposal of the committee, will prevent this dangerous barbarity from being put in operation.

On the 13th and 19th inst. meetings of the Treaty Consuls were held to consider the alterations in the proposed revised code of land regulations, which alterations were approved at the land renters' meeting of the 27th and 28th of May. All the amendments were accepted by the Consuls, with the exception of that which provided that municipal questions of a legal character shall be tried in the British Supreme Court. It is almost needless to say that such an arrangement would soon be found not to work, and, therefore, it seems wise for the Consuls to have referred the matter to the Ministers.

The Indian named George, against whom a verdict of wilful murder was returned at a recent investigation into the death of a Chinese, deliberately shot by him, was on the 16th inst convicted, and sentenced to death. Execution is stayed until the pleasure of Her Majesty's Minister shall be known. Meanwhile, the prisoner's counsel, Mr. Hansen has raised objections to the conviction, on the grounds that the jury did not consist of twelve persons, and that native testimony was taken. His arguments are now under consideration.

Meetings of the creditors of Messrs. Rowley Miller and C. T. Jones were held on the 23rd inst. At the former, an additional dividend of 0.239 per cent. was declared, bringing the total of the dividends paid to a little over 12 per cent. At the latter some further claims were proved, and the official assignee announced that the available assets would produce a dividend of 4½ per cent. This was declared, and the bankrupt was ordered to file his accounts, which he has hitherto neglected to do. On the following day a second dividend meeting in the bankrupt estate of Mr. K. R. Mackenzie resulted in the declaration of a dividend of 0.365 on the debts proved, which amount to Tls. 36,000.

A serious fire, by which about twenty houses were destroyed, broke out on the morning of the 16th inst. in Smith's-market. The origin of the fire is variously attributed to incendiaries interested in a neighbouring pawn office, and to accident occurring in an opium den. Others, again, state that it began in a paper shop, where some religious ceremony was being conducted, with the usual amount of crackers, illumination, &c. However it arose, comparatively little damage was done, and this gratifying

* These documents appeared in our last issue, a fortnight since. This morning they appear in the daily papers as the latest China news!

Digitized by Google

fact is solely due to the efficiency of the police and fire-brigade arrangements and the great power of the municipal steam fire engine.

The new British gaol buildings on the Soochow Creek are slowly approaching completion. It is thought that within three months they will be roofed; but nearly a year will elapse before the necessary fittings will have been put up. Sanitary precautions have been taken, securing ventilation, and so forth. The prisoners will, therefore, be kept in as perfect a state of health as is compatible with confinement.

The Bubbling Well-road, hitherto the resort of pedestrians, equestrians, and carriage folk, has lately been "metalled," and this, though very welcome to drivers, has dismayed riders solicitous about their ponies' feet. But representations on the part of the equestrians have had no effect, and, accordingly, an opposition riding course, uniting the Bubbling Well-road to that leading to the Stone-bridge, will shortly be opened. The land has already been bought for the sum of Tls. 300, and will be paid for by subscription.

Some inconvenience has been caused by the retention here of English mail matter intended for Nagasaki, Hiogo, and Osaka, although a Pacific steamer left for these ports since the arrival of last English mail. The reason is that the U.S. Consul-General has been informed from Washington that the international postal arrangements apply only to the lines from Hong Kong to Yokohama for British mail matter, and from Yokohama to Shanghai for American. Hence mails sent by either the English or American postal authorities over other lines between China and Japan must be paid for in the usual way. Mr. Seward offered to send the mails from Shanghai by last Pacific steamer, on the understanding that the customary postage should be collected on delivery, but Mr. Mitchell would not consent, and directed the British postmaster here to wait for another opportunity.

The weather has for the last ten days been hotter than at the corresponding periods during the past six years. Consequently, sunstroke has been very common, chiefly, however, among sailors and others exposed during the heat of the day. Several deaths have been reported; amongst the rest, Mr. Major, the venerable and highly esteemed manager of Messrs. Jardine, Matheson and Co.'s silk factory, has succumbed. Mr. Major was one of the Waterloo veterans, having commanded a troop of Prussian horse under Blucher on the memorable 18th June, 1815. Mr. Nash, Paymaster of the *Zebra*, was struck down on the 22nd inst., and the sick list on board that ship has been so heavy that the commander took her to sea last Sunday.

Mr. Jamieson, Consular Assistant at Chinkiang, has been appointed Acting Law Secretary in the Supreme Court, vice Mr. Mowat, who goes to England on leave in September, for the purpose of qualifying for the bar. Mr. Jamieson will be succeeded at Chinkiang by Mr. Stronach. Fever has been raging at Chinkiang. The people, both native and foreign, living on shore have suffered severely, and on the river the English gunboat *Firm* has had so heavy a sick list that it was deemed advisable to send from here the surgeon of the *Zebra*.

I told you some mails ago of a murderous assault committed by certain Chinese upon a German constable in the employ of the Taoutai of Chefoo. The man recovered from his injuries, and returned to duty. The other day he received a warrant to arrest a Chinaman who had threatened the life of his master. On approaching him he saw that he was armed with a knife, and the man, further, refused to give himself up. The constable then fired over his head; but this having no effect, he fired a second shot, which went through his heart. No blame is attached to the constable. A Roman Catholic church has just been opened at Chefoo.

The following items are clipped from the *Overland Express*:—

Our New Trinity Church is to be opened for divine service on Sunday next. It is entirely finished now, and has several very handsome memorial windows already set up. Tls. 3,000 or Tls 4,000 are still wanting to free the building from debt, and this amount the committee are making every possible endeavour to collect.

The *London and China Express* received by last English mail, in announcing that a peal of bells (four in number) has been presented by an ex trustee to the Hong Kong Cathedral, states that this will be the only peal possessed by any ecclesiastical building in China. We must correct this mistake and remind our London contemporary that the Seamans' Church at Pootung has already a peal of three bells, presented also by the liberality of an ex trustee, a German gentleman, who took a great interest in the little edifice across the water.

Velocipedes are apparently coming into use amongst our Celestial fellow residents, amongst the number; we notice especially, the manager of the Yang-tae Cargo-boat Company, who daily makes his rounds on a Licycle, and has already attained great proficiency in its use.

---

Our Tientsin correspondent writes, under date July 10:—The Austrians have arrived, and gone up to Peking on passports furnished by the British Consul here; so they do not appear there in their official capacity. To have done so would have necessitated waiting for instructions from Peking, entailing considerable delay, and time being precious they went at once, and will be the guests of Sir R. Alcock while in the Capital. Lady Alcock has been unwell—it is rumoured a slight paralytic attack, but she i recovering.

---

## HANKOW AND KIUKIANG.

A letter from Hankow, under date July 21st, says:—

With regard to business matters, they are almost the same, little or nothing doing, in consequence of the floods. I do not think that there has been a chop of tea settled for some days; large quantities of oil are being shipped off; this, of course, is fo native consumption, and also considerable quantities of nativ produce.

The water stands at the time of writing 4ft. 6in. above the level of the bund. The ground floors of many of the Foreign hongs are under water, and the inmates obliged to find refuge in the rooms above; at the club the water is over 5ft. in the lower rooms, and as we sat in church on Sunday last several of the congregation were compelled many times to change their places as the water rose, to prevent getting wet feet; in fact every place is in a sad state, crops destroyed, starvation and famine literally staring the unfortunate country-people in the face, and they have neither means nor courage to combat its effects.

The river also wears the same appearance all the way down its banks, which are many feet under water, until we come to the high country, or rather the range of hills through which the river passes. When going down the river a day or two ago I was struck with the green and fertile appearance of this locality compared to the vast inland sea which we had just passed through. The peasantry prosecuting their daily labour, tilling and ploughing the land, apparently unconscious of the misery, want, and famine prevailing with their own country people only a few miles further along the river, on either side of them; these people appear contented and happy.

Now we arrive at Kiukiang, a terrible scene presents itself here, the settlement and every place around being under water; but I did not remain more than a few minutes, and proceeded about eight or ten miles further down the river, where the embankment has given way, the country on the other side being some feet lower than the surface of the river; through this gap the water raged and foamed like a cataract. This is the embankment which has given way, and which is erroneously stated in one of your contemporaries as being opposite Kiukiang. The vast extent of low flat country beyond this embankment extends for at least thirty miles to the hills, and might be called the valley of the Yangtzse. All those who have the means are making tracks for the opposite bank of the river, where many hundreds have landed in safety.

The river still continues to rise about 2½ inches daily, with no visible appearance of its stopping. If it still continues at this rate, it will soon find the level of the great flood of 1848, the greatest the Chinese have on record; the water then reached as high as eleven feet above the level of the bund.

(FROM A CORRESPONDENT.)

HANKOW, July 24, 1869.

It may perhaps be of interest to you to know that this flood is the worst to which the place has been subjected since Foreigners have been here, being now one foot higher than in 1866. The water is three to four feet deep in any part of the Concession, and in many places much deeper.

We were obliged last Sunday and the Sunday before to go to church in sampans, and to-morrow service is to be held in a private house, as the church is flooded. For two days the rise has been very small, so there is some chance of its taking a turn in the right direction, but it must be a long time before so large a body of water can get away.

To-day we hear that one of the great water walls, of which there are many on the Yangtsze, has given way, and about forty square miles of country have been flooded, causing great loss of life and property, as all the houses were below the water level before the wall broke, and are now therefore quite covered. All the way from this to Chinkiang the water is unusually high, flooding the country for miles on either side of the natural course of the river. At Kiukiang it is four feet higher than Foreigners have ever seen it.

---

## FOOCHOW.

From this port we have advices to the 30th July. The English mail of June 4 arrived out on the 22nd July. The principal topic of interest is an interchange of letters between the British Consul and the residents concerning the "Sharp Peak" difficulty, copies of which have been forwarded us by a correspondent.

FOOCHOW, 22nd July, 1869.

SIR,—We, the undersigned British subjects residing at this port, having read with surprise the published despatch of H.M.'s Minister for Foreign Affairs, dated 23rd April last, censuring your action with regard to the Sharp Peak difficulty, are desirous of expressing our great regret at the course H.M.'s Government has taken in this matter.

We are of opinion that the measures you adopted were judicious, and such as to promote the safety and permanent interests of foreign residents in China, as we are convinced that the only way to avert such an accumulation of outrages as must lead to a

Digitized by Google

general war is to deal promptly and on the spot with each difficulty as it arises.

Having for so long a period received every possible assistance and consideration from you as our Consul, and knowing as we do the respect in which you are held by the authorities of the province, and the amicable relations between ourselves and the Chinese which have resulted therefrom, we feel it our duty to express our sympathy with you on the present occasion.—We remain, with much respect, your obedient servants,

(Signed by fifty-one British residents).

To Charles A. Sinclair, Esq., H.B.M.'s Consul, Foochow.

British Consulate, Foochow-Foo, 27th July, 1869.

GENTLEMEN,—I am deeply sensible to the expression of sympathy which you have conveyed to me in your letter of the 20th instant, in reference to the censure which it has pleased the Earl of Clarendon to pass upon me for my action in the missionary difficulty on Sharp Peak Island.

It is very gratifying to me to find that my humble efforts to do my duty, in advancing the interests of my fellow countrymen in this distant part of the world, have been appreciated by so large and respectable a portion of our worthy community.

Allow me to add with reference to the subject itself, that Her Britannic Majesty's Minister at Peking has not yet conveyed to me his Lordship's displeasure, but which, in common with yourselves, I read in the Home newspapers, and that I have the hope that when the noble Earl shall become acquainted with the difficulties I had to contend with, his Lordship may relent in his judgment on this matter.

I beg you will each of you accept my sincere thanks for the generous manner in which you have alluded to my public services at this port.—I have the honour to be, Gentlemen, your obedient servant, (Signed) CHAS. A. SINCLAIR.

R. F. Hamilton, Esq., W. Paterson, Esq., A. W. G. Rusden, Esq., and other gentlemen of the community of Foochow-Foo.

## AMOY.

### (FROM A CORRESPONDENT.)

Aug. 2, 1869.

On the 28th ultimo a great gloom was cast over this community by the melancholy death of Mr. Gibson, late Acting Consul at Taiwan. He arrived here from Formosa about six weeks ago, on his way to Canton, where he was going to act as Interpreter during the temporary absence of Mr. Mayers; but he was too much broken down in health to proceed. The late troubles in Formosa, and the unfavourable light in which his actions had been viewed by the Foreign-office, preyed upon his mind, and brought him to a low state of health, and on exerting himself more than usual about ten days ago he broke a blood-vessel, after which he never rallied. In Mr. Gibson the Consular service has lost an able officer, and one of great rectitude and straightforwardness of conduct, and, above all, one who had the honour of his country always at heart. I believe his greatest enemies among the Chinese officials inwardly admired him for his firmness and rectitude of purpose, for on his departure from Taiwan for Amoy a high Court official said with warmth to a European bystander, "There goes a good man." Chinese are not in the habit of casting eulogium upon Foreigners unless deserved.

Nothing of note is stirring here; the American steamer *Fung Shui* lies a complete wreck upon the rocks where she struck about a fortnight ago. All her cargo has been saved—very little of it damaged.

Purchases of Congous for the London market are being made in small quantities. The *Gleam*, a British barque of 291 tons, is on the berth for London.

### (FROM ANOTHER CORRESPONDENT.)

Aug. 2, 1869.

Amoy is such a quiet, out-of-the-way place, that our news generally is of a very unexciting and uninteresting character. During the last week a gloom has been thrown over our community by the death of Mr. Gibson, late Vice-Consul at Tai-wan-fu, Formosa. Although he died of a disease which would ultimately have proved fatal, there is no doubt that his death was hastened by the troubles in Formosa. There is a peculiarity about the condition of things in that island that renders residence by Foreigners there much more difficult than in perhaps any part of the mainland. A great number of the people that live there are immigrants, and these are such as have failed either in trade or in character, and have been compelled to flee their native places. The consequence is that the habits and morals of the people are of a much lower standard than are to be found along any part of the coast of China. The people moreover are less under the control of the mandarins, and whether the prevailing atmosphere has affected those in authority or no, it is a fact that the officials go to greater lengths in wrong than their brethren on the mainland. Now, it must be remembered that when Mr. Gibson arrived in Formosa the troubles that ultimately culminated as they did had been in existence for a considerable length of time. It was, even then, becoming difficult for Foreigners to reside in the place, and it was only the prompt action of the Consul that secured a tolerable amount of safety to either missionary or merchant. It must be remembered, too, that Mr. Gibson's battle was with the mandarins, the constituted authorities, who were bound, not simply by treaty right, but by the laws of China, to see that justice was administered; and it was because he compelled them to recede from a line of conduct which arose out of an intense hatred of Foreigners that his action has been disapproved of by the English Government. Of all the late proceedings of the Government, in reference to Consular matters generally, there is none that has excited so much indignation as its action in the Formosa case. Mr. Gibson was a man of very chivalrous and noble character. It was in no tyrannical spirit that the last appeal was made to force; it was because every other plan had failed to repress the violence of those in authority. He has passed away with the disapprobation of the Government resting upon him; but his memory is held in the deepest respect by those who know the facts of the case, and it may not be assuming too much to say that future events will prove that Mr. Gibson's action in Formosa was the right and the honourable one.

For the last few weeks the heat has been intense in Amoy. There has been no rain, too, for a long time, so the farmers are getting very anxious about their crops. The mandarins have issued orders that for three days no pigs must be killed. They hope by this act of mercy to propitiate the idols, and thus obtain rain.

## HONG KONG.

Advices from this port are to the 5th August. The English mail of June 18 arrived out on the 27th July, with London telegrams to the 10th July. The Colonial papers are chiefly occupied with the correspondence between the Shanghai residents and Mr. Ross BROWNE, and there is little local news of interest. The following is from the *China Mail*:—

The statistics supplied by a correspondent to our contemporary tell a melancholy tale of extravagance in the cost of administering local government, and supply a text on which the Hong Kong Association may dilate with more real hope of success than if they confine their efforts at reform to the Military Contribution. The expenses of the Local Government are absolutely frightful in comparison with the work that has to be done. So much is admitted in private; why is it not insisted on *in* public and *by* the public? Why leave it to the newspapers to growl alone? We will give one hint which may not be useless to the meeting on Thursday. A circular appears in the Colonial-office Regulations issued at the commencement of the present year, dated Dec. 5, 1865, relative to the system of furnishing Government houses in those of Her Majesty's colonies not possessing Representative Governments, of which Hong Kong is most certainly one. At present (the circular says) the usual rule is that the reception rooms are furnished by the public, and the rest of the rooms by the Governor. Certain modifications of this rule are permissible, but the Circular concludes with the following significant paragraph:—"The rule would, of course, only apply to a house used as the customary and official residence of a Governor (as Government-house and offices here), and would not be applicable to any country residence to which a Governor might occasionally retire for his health and amusement"—such, for instance, as the pretty, substantial, and very healthily situated gubernatorial hermitage at the most pleasant, breezy, and commanding spot on the summit of the Victoria Peak, Hong Kong. Has the expense of making the retreat been defrayed from the public revenue of the colony? If so, to what department is it charged? Most likely—if charged upon the revenue at all—to Public Works. We do not object to a Governor getting hold of a "residence to which he might occasionally retire for his health and amusement;" but when it is not paid for openly, but its cost is smuggled into other items where it escapes detection, we may regard it as the evidence of a bad system of book-keeping, by which expenditure may be swelled at discretion, and the evil example extend through all departments of the State. It is in this system that we believe the secret of our unduly large outlay may be found, and we hope the Association will look into it.

The census of June 30th shows a decrease of 393 souls since that last taken.

The *Daily Press* gives the following account of the opening of a new slip:—Messrs. McDonald and Co., of the West Point Patent Slip, made their first essay on the 29th July by hauling up their own hulk, a vessel of some 250 tons burthen. It was gratifying to see so many of our authorities in matters nautical, and merchants interested in shipping matters, present on the scene—amongst whom may be named the Harbour-master and the officers of his department, the surveyors to Lloyds and French Lloyds, and the manager of the P. & O. Company, with several of the commanders in the service of that influential company. Everything went off as well as could be expected or hoped for in the essay, by which it is not to be understood that there were not several of those hitches which in the use of entirely new machinery, for the first time, by a gang of men totally uneducated to machine labour, must necessarily occur. Rather was it marvellous to see how quickly the presiding genius, Mr. A. McDonald, met and overcame them as they occurred.

In consequence of the loss of the steamer *Fungshui*, there is no private steamer running to Manila; but it is said that one of Messrs. Landstein and Co.'s steamers is preparing for the line

Digitized by Google

## HONG KONG SUPREME COURT.

(Before the Acting Chief Justice.)

IN CHANCERY.

COMPTOIRE D'ESCOMPTE DE PARIS V. RODGER AND OTHERS.—MOTION TO CONTINUE INJUNCTION.

Mr. Hayllar appeared for the bank, Mr. White for the Manchester firm, and Mr. Pollard (Acting Attorney-General) appeared on the official assignee's behalf.

The motion was for the continuation of injunction to stay execution in the matter of the *Min* case, adjudged by the Hon. the Chief Justice, who had likewise granted the injunction for a week. It may be remembered that the money decreed in the jugdment of the Chief Justice to go to the Manchester firm was afterwards claimed by the official assignee for the behoof of the general body of Messrs. Lyall, Still, and Co.'s creditors. A portion of the sum decreed was also appealed against by the bank, and the money (the principal) is still in the hands of the Court in consequence of the injunction. An interpleader bill has been filed by the bank; and now, on the motion for an extension of the injunction, the official assignee appeared by Mr. Pollard, his counsel.

Mr. Whyte objected, saying that the present case was not one for an interpleader, and that it was not fair to saddle his clients with unnecessary expense in the matter. He also objected to the appearance of the official assignee by counsel.

It was, after some further conversation, agreed that the injunction would be extended for a fortnight, and that the defendants would have an opportunity of applying for a dissolution of the injunction in the meantime, if they so chose.

## THE MACAO LIBEL CASE.

A. F. M. PEREIRA V. A. DE SOUZA.—SPECIAL JURY CASE.

The Acting Attorney-General appeared for the plaintiff, and Mr. Hallyar for defendant.

The facts of the case being already well-known, we do not give the evidence, more especially as the leading features were reviewed in his Lordship's charge to the jury, of which the following are the chief passages:—"The plaintiff in this case is a public officer, the defendant is a public writer, who accused the plaintiff of the crime of bribery, extortion and corruption in the discharge of his public functions. The defendant pleaded not guilty and justification; that is, that the libel is true. If there had been sufficient evidence of its truth, defendant would be entitled to a verdict; but if there had been no such evidence in support of the libel, the verdict must be for the plaintiff. A very gross libel it was, unless circumstances justified it. But there were none. The witnesses for the plaintiff had most unmistakably sworn that there was not a scintilla of truth in it, and there had not been a single witness produced in its support.

The jury then retired, and in a few minutes returned with a verdict for the full amount of damages claimed, 5,000 dollars, adding a rider as follows:—'From the evidence produced in this Court the jury consider that the plaintiff, Mr. Pereira, is entitled to general sympathy, as having been subjected to the most serious annoyance from a thoroughly unsupported and malicious charge."

The special jurymen then received their fees and the Court rose. As the jury were departing, Mr. Rowett, one of them, addressing Mr. Pollard, asked if the fees were to come out of the plaintiff's pocket.

Mr. Pollard replied that he supposed so.

Mr. Rowett (tossing a note, or notes, on the table) exclaimed: Then I'll have none of it.

Other jurors followed Mr. Rowett's example, and with this little dramatic incident the proceedings closed.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

From this port we have dates to August 13. The home mails of July 2 and 8 were received on August 4 and 9 respectively, the latest London telegrams being to August 2. The *Straits Times* sums up the fortnight's news as follows:—

The shorthand report of the proceedings of the last meeting of the Legislative Council, held on the 22nd ult., and which were shortly alluded to in our last, has now been issued, and some important points seem to have come under notice to which our previous remarks did not refer. The Governor, in the first place, explained that the additional expenditure on Government House of 40,000 dols., which was voted by the Council in the early part of the year, had been sanctioned by the Secretary of State, but that an intimation had accompanied the sanction that no further expenditure under this head would be confirmed. This cannot fail to be satisfactory to all parties, in so far that we can now, with some degree of confidence, estimate the exact extent of the burden which this work is to impose on the resources of the colony. Accompanying this announcement is an assurance on the part of his Excellency that the revenue promises to be quite adequate to a liberal outlay on public works of general utility, and that the council will have very shortly to consider how this outlay can be best applied. It is to be hoped that if the Governor's views of the revenue prove correct a very careful consideration will mark all the money votes that are given in future.

The presence of the Governor at Penang and of several of the official members of Council seems to have been availed of by the community there to strengthen the hands of the Executive, in view of the possible disturbances indicated in our last, which they believe to be imminent, and a supplementary ordinance has been introduced at an extraordinary meeting of the Council held at Penang for that purpose. In the present tone of the public mind here in Singapore any extension of power to the Executive is looked upon with jealousy, and no doubt the new ordinance will meet some outspoken criticism.

News from the outports is of no particular interest. Locally the fortnight has been a more than ordinarily stirring one. On the 31st ult. two of our largest and best esteemed Chinese merchants gave a public luncheon at the opening of their new gunpowder magazine, on the east coast of the harbour. About two hundred guests were present, including the Lieutenant-Governor, the Chief Justice, and most of the residents; two steamers conveyed the guests to and from the magazine, and the entertainment was one of the most brilliant that has taken place here for a long time. On the 4th inst. the Pacific Mail Company's new steamer *America*, 5,000 tons, arrived from New York on her way to her station on the San Franciscan and China route; and on the 9th inst. the residents were entertained to a very handsome luncheon on board, to which over a hundred and fifty people sat down, the Lieutenant-Governor and Chief Justice among the number.

Messrs. Jardine, Matheson, and Co.'s new steamer *Glenartney*, Captain Bolton, arrived from Calcutta with opium, &c., for Hong Kong, on the 31st July.

The *Straits Observer* says:—A case arising out of the charge of arson against Messrs. Locke and Hong Ghee, has for some days occupied the attention of the Police Court. Locke and Hong Ghee charged Geok Teat, another storekeeper, with subornation of perjury. The counsel for the accused elected to reserve his defence, and after the witnesses for the prosecution had been heard, Geok Teat was committed for trial at the next criminal session; he was admitted to bail in 1,000 dols.

The steamer *Nile*, with a cargo of new season's tea from Foochow, arrived on the 30th July. [By advices from Anjer she passed through the Straits of Sunda on August 5. Several other vessels will be found in our Sunda list not mentioned in the Singapore papers.]

## CEYLON.

—o—

### COLOMBO.

The dates from this port are to the 23rd August, the London mail of 30th July being due on the same day. The *Colombo Observer* has the following:—Sir Hercules Robinson, Lady and Miss Robinson, Mr. Irving, the Colonial Secretary; Captain Chapman, A.D.C.; Mr. Cameron, Private Secretary, and Dr. Charsley arrived in Colombo on the 14th August after their tour through Badulla, and Haldumulla, and then by Ratnapura homewards.

The *Examiner* says the Governor will remain at Colombo till the close of the Legislative Council Sessions, which are expected to be opened without further delay. Only one draft of a proposed ordinance has as yet appeared in the *Gazette*, and we can only speculate on the character of the measures to be brought forward. Chief among these will be a Bill sanctioning the Galle Harbour improvements, on the terms offered by the Home Government, and a Bill to assimilate the currency of the island to that of India.

Major-General Rennie, the recently arrived commander of our troops, does not seem to let the grass grow under his feet. Since he assumed the command he has been everywhere looking into everything. We now hear of him from Trincomalee as inspecting the garrison, awarding praise to some and taking others to task. General Rennie travelled overland by the Great Northern Road.

Our railway is again in complete and perfect working order, and the glut of goods at the several stations in consequence of the recent block on the line has kept the engines on the move some four or five times a day. The returns from the traffic, therefore, within the last two weeks, are so much in excess of what used to be the ordinary collections, that they are expected fairly to make up the loss incurred during the cessation of traffic. In connection with this subject we may mention another project, that of extending the railway to the Customs premises; the project in itself is a very feasible one, and we may even say a necessary one, but we happen to be so suspicious of the quarter from which it has emanated, that we refrain from pronouncing an opinion until it is fairly before the public, with all the details which its author can place before them.

The Colombo municipality seems to be on the verge of insolvency, and has been under the necessity of appying to Government either for additional sources of revenue to enable it to meets its wants, or for increased powers of taxation.

A telegram from India announcing the suspension of payment by the Albert Insurance Company, an event for which most of the policy-holders were prepared by the ugly rumours previously current, has yet fallen on the people affected by it like a calamity.

A branch of the Oriental Bank will be opened at Haldamulle.

Digitized by Google

This arrangement will, no doubt, be appreciated by the Haputale planters, for whose special benefit it is made.

We are informed that the scheme for the improvement of the Galle harbour will take in a breakwater and an inner wharf, the latter connected by a tramway with the Fort. Facilities will also be afforded for the erection of coal-sheds, warehouses, &c.

We have received from Mr. Lawton, of Kandy, a photograph of the railway at "Sensation Rock," taken after the rock-slip that occurred on the 14th of July. It gives a very good idea of the magnitude of the slip, notwithstanding that it had to be taken from the side, a front view being impossible, owing to the steepness of the precipice.

# Commercial Report.

## CEYLON, STRAITS, JAVA, AND CHINA IMPORTS.*

(*For Dates see First page.*)

SHANGHAI.—Piece Goods: A good business had been done in the chief staples, but at prices which had simply depended on the idea of buyers. Gray Shirtings: A steady daily business was reported in these goods—at prices much on a par with those current last Mail. Sales reported from first hands amounted to 170,000 to 180,000 pieces—chiefly of 7 lbs. and 8.4 lbs. weight. In addition to these there had been several auction sales of damaged goods—which had enabled the local trade to supply its wants at comparatively cheap figures. Floods at Hankow and a dull market at Tientsin had also had some effect in keeping prices down, while the former losses incurred by speculators had to a great extent prevented them from operating on the chance of a rise. Quotations were, for 7 lbs., Tls. 1.93 to 1.97; for 8.4 lbs., Tls. 2.15 to 2.19; and for 9 lbs. to 9.12 lbs., Tls. 2.50 to 3.0 per piece. T-Cloths: Fair sales of this class of goods were quoted at unchanged prices; but at the close there was rather less inquiry, and rates were slightly weaker. Transactions in all weights were stated at 90,000 to 100,000 pieces, and the classes sold had again been chiefly those from good to fine. Quotations: 6 lbs., Tls. 1.40 to 1.72 (the latter figure being for chop-dollar goods) per piece; lbs., Tls. 1.65 to 1.92 per piece; and 8 lbs. to 8.4 lbs., 36 in., Tls. 1.95 to 2.45 per piece; this last price being, as usual, for a special chop. White Shirtings: Sales had been to a very moderate extent, and prices tended downwards. A better state of affairs was looked for when the Northern demand sets in. Quotations (more or less nominal), 56 reed, Tls. 2.10 to 2.12 per piece; 60 reed, Tls. 2.25 per piece; 64 reed, Tls. 2.35 to 2.43 per piece; 66 reed, Tls. 2.50 to 2.60 per piece. Drills, &c.: There had been very few sales of sound American goods, and quotations must be taken as nominal; the demand was very slack, even at reduced figures. English Cloth of 14lbs. to 14½lbs. was wanted at Tls. 3.70 to 3.75 per piece, with few sellers, unless from Chinese second hands. Dutch Drills had declined about 5 cands per piece, and were not readily saleable. Woollens, &c.: Some sales of Long Ells had transpired, but arrivals were sufficient for immediate wants. A few parcels of Spanish Stripes had also changed hands, and there was some chance of the low values inducing more business. All colours of Camlets showed a decline, and sales of assortments were not easy to effect. Figured Orleans had been placed to a moderate extent at a slight decline on former quotations. Metals.—Nail Rod Iron: Had been disposed of to the extent of 16,000 bundles at Tls. 2.05 to 2.10 per picul, leaving in stock some 80,000 bundles. There had also been an inquiry for Bars, and sales consisted of 3,000 piculs at Tls. 2.20 to 2.35 per picul. The market for both classes was fairly firm. Lead: 3,204 piculs had been exported to the Northern and river ports during the fortnight; rates may be quoted lower; L. B. offered at Tls. 5.10. Coal: There had been no particular change. Cardiff—a cargo had been resold at Tls. 7.75; English—lower rates offered but not accepted; American—a cargo to arrive placed at Tls. 10.25.

HANKOW.—Business in Piece Goods had been on an extremely limited scale, owing to the flooded condition of the whole of the foreign settlements, and a great part of the native city. Gray Shirtings: A few sales of 8¼ lbs. had been effected at slightly lower prices, but at the close there was a somewhat better feeling in the market. 7 lbs. goods and heavy makes had been neglected. Closing quotations:—Tls. 1.95 to 1.97 for 7 lbs., Tls. 2.14 to 2.18 for 8¼ lbs., and Tls. 2.90 to 3.08 per piece for 9¾ lbs. goods. White Shirtings 5 candareens per piece lower, and without inquiry. T-Cloths: Traders from the interior marts had taken a few parcels, but there was little business. Drills: Common qualities had been in some demand, but full supplies had come to hand, and prices had given way to the extent of 5 candareens to one mace per piece. Fancy Cottons had not met with much attention. Woollens and Worsteds: Camlets dull of sale at last quotations; Lastings not wanted; Long Ells: Demand very trifling; Spanish Stripes and Medium Cloth: Hardly any transactions had taken place. Figured Orleans: All inquiry had fallen off. Lead: Sales had been made for parcels taken for barter in Tea at Tls. 5.60 per picul for LB mark, but the demand was very trifling. Quicksilver: Tls. 52 per picul had been obtained for a small quantity, but there were few buyers at that price. Tin firm at Tls. 28 per picul.

HONG KONG.—Cotton Yarn: Good demand for Nos. 16 to 24, at improved prices; quotations, 16 to 24, $132.50 to 137.50. Gray Shirtings, hardly any demand for 7 lb., small inquiry for 8.4 lb. at $2.80 for best chops; in heavy goods business confined to auction sales at $3.50 to 3.70, for 9¾ to 10 lbs. goods. White Shirtings, nothing doing. T-Cloths, some business in ordinary makes of 6 and 7 lb. imported from Singapore and Bombay; fine qualities quite neglected and lower; nothing doing in 36 inch goods; quotations, 6 lbs., $1.85 to 2.10; 7 lbs., $2.15 to 2.45. Spotted Shirtings, no demand. Turkey Red: Auction sales at $2.60 to 2.66; unsaleable privately. Brocades: Auction sales at $2.95; quite out of demand. Damasks, unsaleable; quotations nominal. Chintzes, small demand for assorted. Velvets, little doing. Handkerchiefs, much depressed. Drills, no demand; a few Dutch, spotted, sold at auction at $4 60. Spanish Stripes, heavy stocks; no demand. Long Ells continue much depressed. Camlets: Best assorted in limited demand; quotations, SS, $16 to 17. Lastings, little business, demand subsided. Blankets, in oversupply and declining; quotations, 45 to 60 cents per lb. Metals: Nail Rod Iron in demand; heavy sizes most wanted. Bar in better inquiry. Hoop and Wire, nothing doing. Lead dull, rates weaker, $7 to 7.10. Tin in good demand; no stocks, supplies expected, $35 to 36 per picul. Coals: Only one arrival during the fortnight from England, and that for consumers; several cargoes from Australia, a portion of which had been placed at $6 per ton ex ship, a chance sale being reported at $7 per ton. No demand existed for English or Cardiff.

BATAVIA.—Gray goods in very little demand for local consumption, the market having been pressed with a bankrupt stock from which sales had been made from time to time at very low rates. These supplies were nearly exhausted, but second hands were still full, and no immediate improvement could be looked for either in demand or prices unless assisted by an inquiry from the outports. A little buying had been done for Singapore at about f.7 for 8¼ lbs. Shirtings, and f.2¾ for 3 lb. Madapollams in bond. Drills in fair request; English f.7 to 7.50, Dutch f.8.50 to 8.75. White Shirtings in better inquiry, and sales practicable to a moderate extent, the medium descriptions attracting most attention. Quotations:—64 to 66 reed f.8.50 to 9.25. White Madapollams dull of sale; White Cambrics also neglected; Dyed Cloth sold slowly; Yarns, both Gray and Coloured, were saleable in moderate quantities at the rates last quoted; Sewing Thread was occasionally saleable; Woollens generally in very little request. There had been some demand for White Woollen Blankets at f.6 to 6¼ each. Metals: Copper Sheathing dull; supplies in first hands ample. All other Metals, with the exception of Tin Plates, which were scarce, and in some request, were overstocked and difficult of sale.

SINGAPORE.—39 inch Gray Shirtings: 6 lb. are in limited demand at $2.10 to 2.15. 7 lb. had been placed at $2.50 to 2.52½, and 8¼ lbs. had been disposed of to a small extent at $2.90. 45 inch were in fair request at $2.80 to 3.30. 32 inch Gray T-Cloths: These goods had been in but small inquiry, a few sales were reported at $1.60 to 2.15. 32 inch Gray Madapollams: Small sales reported at $21¾. 36 inch Gray Long Cloths without alteration. 36 inch White Shirtings of most kinds were in very limited demand, with the exception of Low qualities, which were more enquired for. White Spots: Sales at last rates. White Brocades: The market had been cleared at $3. White Cambrics: 15s and 16s moving slowly at $32 to 33. 24s in demand and worth $19½ per corge. White Jacconets very little inquired for. White Madapollams saleable at last prices. Dyed Shirtings unaltered. A sale of Pink Spots of common description at $4.20. Brocades without change. Last sale of Black Velvets at 20 cents per yard. Turkey Red Cambrics: Low weights of these goods had been inquired for and a few sales of 2 lb. 4 oz. were reported at $2 25. Mulls in no demand, stocks large. Prints in better demand. Bandana Handkerchiefs hard to move at last rates, stocks being heavy. Most descriptions of Sarongs very difficult to place, stocks continuing to increase considerably, 1st quality rather more inquired for, but at rates which holders were not prepared to accept. Camlets worth last rates. Scarlet Long Ells, a small sale of 8 lbs. at $6.25 had been made. Scarlet Spanish Stripes sold at 65 to 70 cents. All Wool Lastings: Assorted wanted and worth about 40 to 42½ cents. Black are hard to move at 40 cents per yard. Gray Yarn: 18s to 24 in demand and worth $120 to 145 per bale. 30s out of stock. 40s worth $140 to 145. Turkey Red Yarn held for an advance. A sale of 10 lb. reported at $150. Green in demand and sales made at $85 to 90. Copper Sheathings dull of sale. Yellow Metal had been placed to some extent at $22¼ to 23. Zinc Sheathing wanted; none in stock. Iron extremely dull and depressed. The only sales reported were of Nail Rods at $2.55 to 2.60, of Round at $2.40, and of Square at $2.30. Sales of Pig Lead at $6.25 to 6.30 for large slabs.

PENANG.—There had been a little more demand for imported goods, with but little improvement in prices. Gray Shirtings of light weights continued scarce, and some quantity had been disposed of at a slight advance in price. Quotations: 6 lbs., $45; 7 lbs., $52 per corge. For 8¼ lbs. as high as $62 had been paid for very fine quality, but of inferior numbers some important sales had been made at from $58 to $59 per corge. In 45-inch goods no business had been done. In Gray Long Cloths and Gray Madapollams there had not been a single transaction, and quotations were nominal. For Gray T-Cloths the demand had been somewhat better, but holders did not feel inclined to let the goods go except at an advance on the prices offered. For all other plain cottons the business had been but small, and prices had not altered. Immediately after the arrival of the steamer from Burmah, the Rangoon traders came on the market, and were large purchasers of yarns; a considerable quantity of Gray Mule was disposed of at $130 per bale for No. 30, and at $140 per bale for No. 40. There was also a considerable demand for the same market for Turkey Red Cambrics, and a considerable quantity of 18/24 was sold at the advanced price of $122 per bale. Imperial Red, No. 40, had also advanced slightly, the last sale being reported at from $78 to 79 per bale.

COLOMBO.—The animation reported in our advices by the last mail has continued to characterise dealings in staple goods throughout the fortnight, and the market closed firm. Gray Shirtings, Long Cloths, and Mule Twist had been dealt in freely. White Shirtings and Cambrics continued well placed. White Victoria Lawns in moderate stocks, with good inquiry. T. R. Twist is steady, and for Orange and Green there was a good market. Coloured Goods remained generally rather slow, but for Madras Prints there was a fair inquiry. T. R. Wove Handkerchiefs were getting down in stock, but the market did not show any effect therefrom.

## CEYLON, STRAITS, JAVA AND CHINA EXPORTS.

(*For Dates see First page.*)

TEA.

SHANGHAI.—Black: A good business had been transacted during the fortnight, at irregular but hardening prices. Taking the quality of the Teas settled into consideration, prices on the whole had advanced from Tls. 1½ to 2 on last mail's rates. The market closed quiet. Settlements

* The report of the Japan Markets, in advance of the present Mail, appeared in our issue of the 7th inst.

Digitized by Google

for the fortnight, 40,241 chests. Re-shipments on owners' account New Tea, 15,397 chests. Stock, 77 chops, or 20,750 chests. Quotations (duty paid) :—Hohow, common to good, Tls. 17.1.0 to 23.7.5 ; Oanfas, Tls. 23 to 28.2.5 ; Oonam, common to fair, Tls. 18.5.0 to 23 ; Ningchow, common to medium, Tls. 20½ to 26 ; Oopack, Tls. 22 to 26½ ; Redried Shanghai-packed, Tls. 9½ to 9¾. Green : A moderate steady business had been done in Pingsueys, at about previous rates. The first of the Fychows had arrived, but no business had been transacted in them. The market was quiet, and stocks were accumulating rapidly. Settlements for the fortnight, 6,474 half-chests; Re-shipments on owners' account, 431 half-chests; Stock, 15,942 packages. Quotations :—Pingsuey Gunpowder, 1s. 5½d. to 3s. 5d. ; Imperial, 1s. 1¾d. to 2s. 10d. ; Young Hyson, 1s. 0½d. to 2s. 11d. ; Twankay, 9½d. to 1s. 1¾d.

HANKOW.—The following is from Messrs. Drysdale, Ringer, and Co.'s Report :—Business has throughout the fortnight been much curtailed by the flooded state of the country, which has prevented supplies coming forward, and made buyers more or less disinclined to operate owing to the difficulty of storing and preparing Teas for shipment, as many godowns have water in them. Settlements since date of our last are 7,765 chests, 1,750 half-chests, and 1,150 boxes, at Tls. 14 to 21, nearly all of which are second crop Teas. Prices have been well maintained, closing rates showing a slight advance on our former quotations. We are now able to judge fairly of the second crop ; we consider it much inferior to that of last year, and under the average. But few chops have any attractive character. It will, we think, without doubt, be short of the former growth ; at the moment it shows a great falling off compared with the quantity to hand at corresponding date last year, but a good quantity has of course been kept back by the high state of the water. The chops are much smaller this year than last, but few exceeding 800 chests. Present rates give teamen from 1 to 2 taels profit ; this has encouraged some teamen, who had previously closed their hongs, to begin again, which is to be regretted, as it will doubtless increase the quantity of third crop which will be prepared for foreign markets. Our present export is a million in excess of what it was at same date last year, but in our next circular will in all probability show a decline, as during the corresponding fortnight five millions were then shipped, and we do not see much chance of more than half that quantity going forward this season. Shipments to Shanghai for sale on native account have now reached about 130,000 packages more than the 10,000 in excess of the quantity they sent during the whole of season 1868-69. We quote fair to medium Oopacks, 16½ to 20 ; common Oanfas, 14½ to 16 taels ; Oonams, 15 to 16¾ ; Shuntam packed, 13¼ to 14 nominal. Settlements from 9th inst. to date :—350 chests 750 half-chests at Tls. 14 to 15¾ ; 4,000 chests 690 half-chests at Tls. 16 to 18 ; 3,400 chests 310 half-chests at Tls. 18¼ to 21.

FOOCHOW.—For a few days after the last mail's departure settlements were made on a less extensive scale, but on the receipt of the 4th June mail from England, with somewhat improved accounts of the home market, the demand for Congous again became active, and prices had since further advanced. Congous : All grades, excepting "dust and siftings," which were only a shade higher, showed an advance of one to two taels, and although settlements had been more moderate, there appeared every indication that prices will be maintained, the teamen being firm holders, in view of the reduced stock, and the moderate extent of supplies of second crop teas, which continued very inferior in quality. We quote—Medium, Tls. 23 to 25, equal to 1s. 6¼d. to 1s. 7½d. per lb. ; Flavory, Tls. 17 to 22, equal to 1s. 2½d. to 1s. 5½d. ; ordinary to good common, Tls. 14 to 16, equal to 1s. 0½d. to 1s. 2d. ; broken-leaf, Tls. 10 to 13, equal to 10d. to 11¾d. ; dust and siftings, Tls. 6 to 9, equal to 7¼d. to 9¼d. Souchong : Settlements were made early in the fortnight, on more favourable terms, and the demand had since been more general, resulting in a rather extensive business at the following prices :—Fine, Tls. 28 to 30, or 1s. 9½d. to 1s. 11d. per lb. ; good medium, Tls. 24 to 27, or 1s. 7d. to 1s. 9d. per lb. ; fair, Tls. 20 to 23, or 1s. 4½d. to 1s. 6¼d. per lb. ; common, Tls. 15 to 19, or 1s. 1¼d. to 1s. 3¾d. per lb. Oolongs : Business in this description had been very small, and the few settlements reported were doubtless for the English market. We quote : Fine, Tls. 21 to 23, or 1s. 5¼d. to 1s. 6½d. per lb. ; fair to medum, Tls. 17 to 20, 1s. 2½d. to 1s. 4½d. per lb. Supplies to date were still considerably under those of last season. Flowery Pekoes had again been purchased to some extent at about previous rates, say :—Finest, Tls. 50 to 60, or 3s. 0¼d. to 3s. 6¾d. per lb. ; fine, Tls. 40 to 45, or 2s. 6d. to 2s. 9d. per lb. ; medium, Tls. 26 to 35, or 1s. 8½d. to 2s. 2¼d. per lb. Scented Teas have been taken to a moderate amount without change in value.

## SILK.

SHANGHAI.—The following is from Messrs. Skeggs and Co.'s Report :—After the departure of last mail a slow dragging business forced prices of medium and common silks rather lower, and a considerable business has ensued at a reduction ranging from 5 to 10 taels on these descriptions, although Red Peacocks have maintained their position at Tls. 460. Fine Silks are firmly held for previous rates, and chops in one or two instances are a shade higher. The following are a few of the leading quotations :—Choopings, No. 3, Tls. 560 ; Dragons, No. 3, Tls. 557½ ; Donkey, Tls. 550 (Yakee's being held for the same) ; Blue Flag, Tls. 515 ; Blue Peacock, Qui-sute-fei, Tls. 492½ ; and Red Peacocks, Tls. 460. Hainins and Kahing Taysaams are unchanged, and the same applies to Chincums, although a few very common lots have been settled at a nominal decline. Skeins have been taken at Tls. 360 ; best Long Reels at Tls. 390 to 400 ; and a considerable quantity of English fashion Throwns at Tls. 470 to 520. The market closes weak, and with continued depressing advices from Europe, we still anticipate a further decline being established here. Settlements for the fortnight are estimated at 2,700 bales.

## JAVA PRODUCE.

BATAVIA.—Arrack, 4 per cent. overproof : In inquiry at f.118 to f.122 per leaguer of 133 imperial gallons. Coffee : For Ordinary Green Java, f.33 to f.34 per picul was offered, but planters were disinclined to realise except at higher rates. Blue Bean worth f.37 to f.38 per picul. Padang : None in the market. Cassia Vera : Only small quantities procurable. Cubebs : No transactions. Last sale at Samarang at f.18 to f.20 per picul. Gum Damar maintained its value. Indigo : Sales had taken place at Samarang at f.5.25 to f.5.35 per Dutch pound for first quality. India-rubber scarce, and worth f.90 to f.100 per picul. Gutta-percha : Small quantities procurable ; worth f.60 to f.120 per picul, according to quality Tin : 5,000 piculs Billiton at auction realised f.71.42 per picul. Nutmegs in good demand, at f.110 to f.115 per picul. Mace very scarce, and wanted at f.95 to f.100 per picul. Pepper : None to be had. Nominal value f.18.50 to f.19 per picul for Black, f.30 for White. Rattans : Sales reported of Padang at f.8 to f.8.50, and of Borneo at f.11 to f.12 per picul. Sugar in keen demand, and sales made at f.15.50 to f.16 per picul for No. 14. Sugar making was being actively carried on.

## STRAITS AND CEYLON PRODUCE.

SINGAPORE.—A moderate business had been done in produce during the fortnight. Gambier continued at $3.07½ until near the close, when the price advanced to $3.12½ ; about 950 tons had been contracted for—one-half at the lower, and one-half at the higher quotation, at which the market closed firm. Black Pepper in good demand, but there was none coming forward, and dealers refused to contract. White Pepper more active, and a good many purchases, chiefly, it is believed, for the Continent, had been made. In Sago Flour the business had been small, and supplies were not large. Pearl Sago and Tapioca had been bought at slightly easier rates. Hides in larger request, and considerable purchases had been made. Gutta-percha neglected, and no supplies of first quality India rubber were in the market.

PENANG.—The produce market had not been well supplied during the fortnight, and prices of the principal articles of export had hardened, on account of an incressed demand for the Indian and Chinese markets. Close on the departure of the last mail Tin was secured at $29.15 per picul, and at a slight advance on that price ; but since the arrival of advices from China and Bengal the native traders had raised the price as high as $29.40 per picul. Advices had been received that some 4,000 slabs of Tin had left Tongkah for Penang, but European houses would not give the high price asked by the agents of the shippers—say $29.40. It appears that this demand for China had sprung up in consequence of the Chinese Tin Mines having failed—so that now all the tin required in China must be imported, necessitating a supply from the Straits settlements or from Banca, and, of course, causing an advance in the price. A small lot of West Coast Pepper that arrived just after the departure of the mail was secured at $5.90 per picul, but since then none had come forward, and what was expected could not be obtained at less than $6.30 per picul. Of East Coast and Acheen Pepper the supply had been much restricted, and prices had hardened. Some 2,000 piculs were offering at $6.30. The price, $6.20, had been offered and refused.

COLOMBO.—With regard to Coffee, there is little to report ; tails of crops were arriving, but for them there was no demand—crops for later delivery continued on offer at 11s. 6d. to 12s. 6d. Native only arriving in parcels of a few hundred weights ; the price was 42s. picked and dried, but very small quantities to be had. Cocoanut Oil depressed. Cinnamon rather easier. Coir not in much inquiry, but good qualities of Yarn and Fibre sold without difficulty. Plumbago continued to be taken freely ; fine bright lump at £15, chips £7, dust £4. 10s.

☞ *The picul is equal to 133⅓ lbs. avoirdupoise.*

## ARRIVALS.

At YOKOHAMA.—From London, July 20, Phæton ; from Cardiff, 13, Senator Webber ; 16, Renoun (reported by telegram) ; from New York, 19, Carobel ; from Liverpool, July 6, Edward Nerber.

At SHANGHAI.—From London, July 15, William Melhuish ; 18, Famerlane ; 25, Mary Moore ; from Cardiff, 19, Windermere ; 20, Dovercourt ; from Sunderland, 25, England's Glory ; from New York, 18, Yokohama ; 25, Lanercost.

At HONG KONG and CANTON.—From London, July 22, River Clyde ; from Cardiff, 27, Dr. Peterman ; from Amsterdam, 24, Iduna ; from Baltimore, 29, Competitor.

At MANILA.—From Liverpool, July 15, Dos Hermanos ; from Cardiff, 24, Hope.

At BATAVIA.—From Liverpool, July 11, Fanny Kirchner ; 21, Mary Spencer ; from Amsterdam, 19, Koning Willem II., Baron v. P. v.

Digitized by Google

Rosendaal; from Rotterdam, 19, Kosmopoliet II., Tonia; 22, Grootmeester Nationaal; from Glasgow, 19, County of Stirling; from Bordeaux, 23, Hindostan; from Boston, 19, Rainbow.

DEPARTURES.

From YOKOHAMA.—For Callao, July 22, Belvedere.

From SHANGHAI.—For London. July 16, Guinevere, Melbrek, Decapolis; 18, Maiden Queen; 19, Weymouth, Miranda (str.); 24, Juanpore; 27, Wild Deer; 29 (cleared), Star of China.

From FOOCHOW.—For London, July 17, Black Prince, Kaisow; 21, Windhover; 24, Serica; 26, Falcon.

From HONG KONG and CANTON.—For London, July 29, Maitland.

From MANILA.—For London, July 20, Ringleader, Verena; via Cebu, 18, Elizabeth Cushing; 29, Dilbhur; via Iloilo and Cebu, 17, Merwanjee Framjee.

From SINGAPORE.—For London, July 29, Niger (str.); 31, Nile (str.); Aug. 9, Miranda; for Liverpool. 3, Bothwell Castle; for Marseilles, 8, Rachel; for Boston, 7, Jungfrau.

From BATAVIA.—For Holland, July 8, Utrecht; 20, Medea, Honigby; 28, Henrietter Geertruida; Aug. 3, Constantia; for United States, July 30, Anna.

From COLOMBO.—For London, Aug. 16, Aboyne; 18, St. Magnes; 19, Susan Pardew, from Amsterdam; 14, Caroline.

VESSELS LOADING.

At SHANGHAI.—For London, Hopewell, Geraint, Conqueror, J. R. Worcester, Joseph Sprott, Charmian, Challenge, Dilkoosh.

At FOOCHOW.—For London, Clara, Corona, Chusan, Min, Silver Eagle.

At HONG KONG and CANTON.—For London, Dunmail, Scawfell, Grasmere; for New York, Chattanooga.

At MANILA.—For London. Vincenza, Carin; for Liverpool, via Ilo Ilo, Magallanes; for Cadiz, Conchita, Maria Fidela, Pepita; for New York, George Peabody, Formosa, Cleopatra, Sonora; for Boston, Wild Rover.

At SINGAPORE.—For London, Canning, Flora, Sree Singapura; for Liverpool, Ottawa, Doune Castle; for Marseilles, Emma, Favourite; for Bordeaux, Mondelli.

At COLOMBO.—For London, Shooting Star, Star of the South, War Cloud, Comus, Skimmer of the Waves, Hollinside, Carnilot; for United States, Maid of Glanwern.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—There is no vessel loading either for London or United States.

At SHANGHAI.—Vessels on the berth for London are loading at £2 to £2 10s. A few coast charters have been effected, but at low rates.

At FOOCHOW.—The rate for London has declined to £2 15s. per ton.

At HONG KONG and CANTON.—To London, £3 per ton.

At COLOMBO.—To London, nominally the same as last mail.

At MANILA.—To London, the settlements since last mail have been as follows:—Elizabeth Cushing, 888 tons, has been chartered to take on the Egeria's cargo, from Cebu to London, at £3 per ton for sugar, and £3 10s. for hemp; Magallanes, 356 tons, from Ilo Ilo to Liverpool, gets a full cargo of sugar at £2 15s. per ton; Vincenza, 525 tons, a chartered vessel, has engaged some outside cargo at £3 10s. per ton for hemp, and £4 for light freight. The tonnage in harbour is larger.

At SINGAPORE.—To London, £1 15s. to £2 per ton all round.

At BATAVIA.—To Holland, f.67.40 to f.69.75 per last. Tonnage in harbour abundant.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

ADAMSON—On the 31st Aug., at Ruston Park, Sussex, Mrs. W. R. Adamson, of a son.

BLACK—On the 25th July, at Yokohama, Mrs. J. R Black, of a daughter.

BRAGA—On the 15th July, at Shanghai, the wife of Mr. J. Braga, of a son.

CAYLEY—On the 6th Aug., at Colombo, Ceylon, the wife of Richard Cayley, Esq., of a son.

DAVIDSON—On the 14th Sept., at 42, Portsdown-road, Maida-vale, London, the wife of Wm. M. Davidson, Esq., of a daughter.

DUNLOP—On the 19th August, at Colombo, the wife of R. V. Dunlop, Esq., Oriental Bank Corporation, of a son.

HANCOCK—On the 1st July, at Hong Kong, Mrs. Alfred Hancock, of a daughter.

LEVESON—On the 3rd Sept., at Newlands, Sydenham, Kent, the wife of Edward J. Leveson, of a son.

MAGNIAC—On the 28th Aug., at 36, Hertford-street, Mayfair, the wife of Arthur Magniac, Esq., of a daughter.

MCCARTHY—On the 20th July, at Shanghai, the wife of J. H. McCarthy, of a daughter.

MCDOUALL—On the 21st July, at Shanghai, the wife of John McDouall, Esq., of a son.

MEDEN—On the 28th Aug., at Ashwood-villas, Headingley, near Leeds, the wife of Mr. A. von der Meden, of a daughter.

PEREIRA—On the 30th Aug., at Villa Pereira, Porta Legni, Messina, the wife of F. E Pereira, Esq., barrister-at-law, F R G.S., recently a Municipal Commissioner for the town of Singapore, of a daughter.

ROBINSON—On the 13th July, at Shanghai, the wife of Alfred Robinson, Esq., of a daughter.

### MARRIAGES.

BRUNE—WHITING.—On the 2nd Sept., at St. James's, Piccadilly, by the Rev. J. W. Marshall, vicar of Trinity Church, Birchfield, near Birmingham, Charles Julius, youngest son of the late Henry Brune, Esq., to Louisa Maria, youngest daughter of W. H. Whiting, Esq., late of the Ceylon Civil Service.

BULLER—SORTAIN.—On the 31st Aug., at St. George's, Hanover-square, by the Rev. R. Buller, rector of Lanreath, assisted by the Rev. Henry J. Buller, rector of West Parley Charles Reginald Buller, late of H.M.'s Civil Service, Ceylon, and now of Erle Hall, Plympton, to Bridget Margaret Sortain, widow of the late Rev. Joseph Sortain, of Brighton, and daughter of the late Sir Patrick Macgregor, Bart.

*LONDON, MONDAY, SEPT. 20.*

## MR. ROSS BROWNE ON BRITISH POLICY IN CHINA.

That Mr. Ross BROWNE has emphatically denounced the BURLINGAME policy can no longer be denied. In our last issue we were enabled to publish the full text of his reply to the addresses of the residents at Shanghai; and its tenor affords the most complete confirmation of at least one item of news in the telegram that has formed the basis of such an animated controversy. Mr. BROWNE states that the allegation that the "new policy" means justice to China, and therefore progress, is "utterly unwarranted by facts." This is indeed emphatic. By this new policy, says Mr. BROWNE, we admit the right of any nation, however degraded, to enjoy the privileges and immunities of a civilised Power, while it persistently rejects the obligations imposed by the community of nations for the general welfare. In other words, we lend our influence to the maintenance of false and superstitious systems, and the degradation of our fellow-creatures. Nothing could be more forcible or more true. The despatch is a voluminous one, and we must be content with a few more short quotations "Believing our civilisation to be superior to theirs, we should "endeavour to elevate the Chinese to our standard; but surely "that can never be done by an unqualified acceptance of "their claim to the independence enjoyed by Christian "States."—"I believe an unreserved recognition of the "right of an ignorant Pagan nation to do as it pleases, how-"ever retrogressive its action may be, or injurious to the "cause of human progress, to be not only impolitic, but "absolutely pernicious in its tendency. During the past "year, since it has become known that the Governments "of the United States and Great Britain have pledged "themselves unconditionally to this course, a greater "number of outrages have been perpetrated upon Foreigners "than during the previous eight years."—"It is simply "pandering to the bigotry and self-conceit of the Chinese "rulers to treat them under all circumstances, and with-"out any reservation, as independent and intelligent beings."—"The Imperial authorities are free enough in promising re-"dress, because they know the provincial officers are adroit "enough to evade it, and have but little regard for truth."—"Reference of all important questions back to the Home "Governments before a single gunboat can be used, and "where telegraphic communication is rigidly prohibited, is "simply to nullify, and bring into contempt, all diplomatic "power in China."—And here is something still more to the point:—"The policy of seeking refuge on board "of war vessels is both impracticable and humiliat-"ing. No community of Englishmen or Americans at "any of the treaty ports will desert their hard-earned "vantage-ground in the presence of danger. It is not a na-"tional characteristic of either to seek safety in flight. No "wonder the bare suggestion of an alternative so degrading "should be received here with incredulous amazement. There "is something in Anglo-Saxon blood that burns at such a "thought. The naval officer in command of a vessel, who "would see a defenceless community of merchants or mis-"sionaries beleagured by a host of semi-barbarians, and not "expend the last grain of powder in their defence, would "merit the contempt of all honourable men, and dismissal "from the service which he had disgraced. What American, "what Englishman, holding a commission, would not sacri-"fice it, should the folly or imbecility of his superiors assure "him of such a fate for doing his duty, rather than bear "thenceforth the brand of infamy upon his brow?" These last sentences are worthy to be written in letters of gold. A more withering, yet just, denunciation of the "folly and imbecility" (terms only too well deserved) of English policy in China, could not have been framed. Speaking of the BURLINGAME Mission, Mr. BROWNE says:—"It is quite clear "to my mind that it was not intended by the Chinese rulers "as a progressive movement. . . What the Imperial "authorities wanted, in reality, was to *arrest* progress . . "the astute mandarins had no idea of advancing; they "were chiefly concerned to know how they could prevent in-"novations."

Comment upon these remarkable utterances is almost needless. They express the honest convictions of a man of undoubted probity, of generous sympathies, and of long experience; whose estimable qualities have won him the sincere respect and admiration, not only of his fellow-citizens, but of Foreigners of all nationalities in China. Read, once more, the testimony of our own countrymen in Shanghai:—"We "believe you owe your recall to the persistent manner in "which you have continued to express views contrary to "those which your own Government have adopted at the in-"stigation of Mr. BURLINGAME. You have refused to remain "silent when you were convinced that your Government were "being misled; and you have taken up this disinterested "attitude from a sense of duty." It is useless to contend against such evidence as this. Mr. BROWNE'S words carry conviction with them, despite the puny efforts of Mr. BURLINGAME'S organs to throw discredit on them. When the combined folly and imbecility of Mr. GLADSTONE'S Cabinet shall have landed us in another China war, the value of these truths will then, too late, be recognised.

---

WE have to note a curious circumstance connected with the publication of Mr. Ross BROWNE'S despatch. The telegram wherein its purport was foreshadowed raised quite a controversy in the columns of the daily papers, and many "leaders" were devoted to it. It was therefore to be expected that when the full text of the document was published it would have attracted a good deal of attention. But this was by no means the case. The day after it appeared in the *London and China Telegraph* it was noticed by the *Star* and the *Manchester Guardian*, but, as far as our knowledge goes, these are the only two journals that have thought it worth even a paragraph!

---

THE Philadelphia correspondent of *The Times* writes that Mr. Ross BROWNE, by a telegram from San Francisco, contradicts the report that the Chinese Government contemplated rejecting the treaty concluded between the United States and China by the BURLINGAME Embassy. It is quite impossible that Mr. Ross BROWNE, or any other Foreigner, can know what the Chinese Government "contemplate" doing, and most unlikely that Mr. BROWNE would pretend to such knowledge. Probably what he really telegraphed was, that the Chinese Government had not avowed to him any intention of repudiating the convention.

---

THE question whether the MIKADO is to be held liable for the balance of the Simonoseki indemnities due from the late SHIOGOON'S Government to England, France, America, and Holland, has been referred home by the Ministers of those countries to their respective Governments. Here is a dilemma for Mr. GLADSTONE. On the one hand, the pocket of the British tax-payer to be protected—on the other, a grand opportunity of extending to Japan the policy of conciliation and self-sacrifice applied to China. Probably some plan of joint action will be determined on. We cannot afford to be less generous than our allies.

---

THE movement in favour of importing Chinese labour into the Southern States still goes on, though the apprehensions with which the threatened influx is viewed in California are rather on the increase. It is argued that the immigration might easily reach half a million in one year, which would be equal to the entire population of the State; so that in a very few years the white inhabitants would be "buried under an Asiatic avalanche."

## LICENSED GAMBLING.

IT is rumoured that a proposition is likely to be brought forward for the introduction of the system of gambling licenses into Singapore, of course for the same reasons as those which induced its adoption in Hong Kong. Both for purposes of revenue, and for the promotion of good order and morality, we should be disposed to advocate a measure which would place gambling under the surveillance of the police. Our reasons for taking this view were put forth with sufficient explicitness when the system first came into operation in Hong Kong, and need not be repeated here; but it is to be feared that the ideas of the majority of our legislators are not sufficiently far advanced to admit of such a proposal being favourably regarded by the House of Commons. Public opinion however, shows a growing tendency to discard these old-world notions, based on a false delicacy that would rather ignore vice than recognise its existence with a view to impose such restrictions as are expedient for moral and sanitary purposes. What cannot be cured must be endured; but many incurable evils admit of being rendered more endurable by some modification, which cannot be applied without legal recognition. There was at first a great outcry against the "Contagious Diseases Act," although it involved but a partial recognition of the evil it was directed against, and its operation was restricted to certain seaports and garrison towns; but its action has proved so unmistakably beneficial that already there is a movement on foot for its extension to all large towns. We tax, for purposes of revenue, some necessaries of life, most luxuries, and (in the shape of fines) even some crimes—or at least, those minor breaches of the law known as misdemeanours. Why not tax men's vices too? Practically, the thing is done here, in England, already. Drunkenness is as much a vice as gambling—twin vices we might call them in fact, for the one so constantly leads to the other that they too often go hand in hand. The gin-palace and the beer-shop are the centres of drunkenness, and consequently of crime; yet here, in civilised England, where any allusion to a licensed gaming-table is received with a shudder of outraged morality, we have an organised system of licensing these "drunkeries," as Mr. Alderman LUSK, with more force than elegance, lately termed them. But then there is such a wide difference between the two cases. The big brewers and distillers are a powerful force in the House of Commons, and their interests must be taken care of; whereas, who would benefit by extending the system applied to public houses here to gaming-tables in an Eastern colony? Nobody of any importance; only the colonists! We presume the question will claim attention from the Straits Settlements Association at no distant date.

---

"ABOVE all, gentlemen," said a great general, "let us have no zeal." In other words,—Perform your functions with the regularity and precision of a well-oiled machine, but never deviate, by a hair's breadth even, from the prescribed path of duty. Yours is not the brain to originate, but only the hand to execute. This is the condition to which the Consular service in China is now reduced. Consul GIBSON took a higher view of the meaning of duty, and has fallen a victim to his well meant but unappreciated zeal. There is a sort of melancholy satisfaction in learning that he lived long enough to find his conduct fully approved by Sir RUTHERFORD ALCOCK, and the latter deserves all praise for his manly course in awarding his personal approbation in the teeth of the persistent scoldings of the Foreign-office. But it is a sad story altogether, and "*point de zèle*" is the lesson it too plainly inculcates.

---

It is stated that the principal object of the despatches lately received by Mr. BURLINGAME from Prince KUNG was to request him to intercede with the United States in favour of the thousands of Chinese in Peru, who are most brutally treated both in the mines and at the guano "diggings." That Mr. BURLINGAME will at once comply with this request we cannot doubt, and it is to be hoped that his intercession will be successful; but the Chinese Government can hardly look for any very vigorous action on the part of the United States unless they are prepared to give full effect to the engagements made by Mr. BURLINGAME on their behalf with that Power. The treatment of Chinese coolies in Peru is certainly a disgrace to humanity.

## THE SUEZ CANAL.

WHATEVER uncertainty may exist as to the time when the Suez Canal will be completed to its full depth throughout, there is an evident determination that the inaugural ceremony shall come off, with all possible *éclat*, on the appointed day. The VICEROY has issued his official invitations to that effect, and they include a large number of celebrities, political, literary, and artistic. The circular note conveying the invitation informs those to whom it is addressed that railway passes will be presented to them, and cabins secured for them on board the steamers of the Messageries Imperiales or the P. and O. Company, according to their wishes. The hospitalities offered include a trip to Upper Egypt for those who choose to avail themselves of it, and the arrangements are altogether on a scale of generous profusion.

The Canal Company has just issued the regulations for the navigation of the Isthmus. All vessels will be allowed to pass through which have not more than 7½ metres draught (24¾ feet). Steamers can navigate the Canal without assistance, but sailing vessels over fifty tons must employ one of the company's tow-boats. The maximum rate of speed is fixed at about six knots, per hour. At this rate the Isthmus will be crossed in fifteen to eighteen hours, time occupied in entering and leaving the Canal not included. Every ship of more than one hundred tons is required to take one of the company's pilots, whose duty it will be to give all the necessary instructions relative to the navigation of the Canal, but the pilot takes no responsibility as regards the conduct or management of the vessel; this remains with the captain. An extraordinary regulation is made respecting anchors or anything else that may fall overboard in the Canal; the crew is not to be allowed to fish anything up, but the captain must leave instructions with the pilot, who will transmit them to the proper officers of the company, who will make the salvage—when the ship is on its way to India or China, perhaps. What can be the object of such a bit of red tape as this? Of course great care will have to be taken of the bottom and sides of the Canal; but surely the pilot's presence would protect the company's interest in this particular. The following are the dues fixed by the company:—Transit fee from one sea to the other, 10 francs per ton, and the same for each passenger on board; towage, 2f. per ton. Port fees at Port Saïd, Ismaïla, or Suez, after the first twelve hours, 5 centimes per ton per diem; maximum time allowed in either port, twenty days. The charge for the pilot is fixed according to the draught of the ship, an 800 ton ship, drawing eighteen feet water, would have to pay £18 for pilotage; but vessels which are towed are allowed a discount of 25 per cent. on the amount of the pilotage. All these charges, excepting that on the passengers, would amount in the case of a vessel of 800 tons to about £400.

---

WE regret to have to record the loss of the *Carnatic*, a fine P. and O. steamer of about 1,800 tons and 400-horse power, on the Island of Shadwan, in the Gulf of Suez. It occurred on Monday, the 13th inst. She had a general cargo, about £40,000 in specie, and the Bombay Mails, all of which went down in the ship; of thirty-seven passengers, five were lost, and of the crew, nine Europeans and fifteen natives are missing. The steamer, we are sorry to say, will be in a double sense a loss to the company, as they are their own insurers; it is however well known that their "underwriting account" is a paying affair. The cargo and specie are insured in London and Liverpool, and it is thought the latter may be recovered. The Mails, it is to be feared, are entirely lost, and we believe this is the first time such a thing has happened to the P. and O. Company. While all will sympathise with the sufferers by this calamity, it will none the less be a relief to our readers to find that it has befallen a Bombay, not a China Mail.

---

MAJOR CHAMPAIN, R.E., left Marseilles by the last P. and O. steamer, accompanied by Mr. LATIMER CLARK and a staff of electricians, for the purpose of laying the second Persian Gulf Cable, which is expected to be completed in November. There will then be two complete and independent lines of telegraph the whole distance from London to Calcutta.

---

WE are able to confirm the announcement recently made as to the approaching marriage of the Rajah of SARAWAK. The event will take place next month, and the RAJAH will proceed to Sarawak in the spring.

---

Digitized by Google

WE have already expressed our profound disgust with the conduct of the French mercenaries who promoted the seditious designs of ENNOMOTO, the Japanese rebel, and basely deserted him in the hour of need. It seems the MIKADO'S Government consider themselves entitled to demand reparation from France—whose accredited representative in Japan connived at the filibustering exploit—for the loss of life and property resulting from it, and that they intend to prefer a claim for five millions of dollars. Clearly the Japanese have as good a right to demand compensation from France for the injury inflicted on them by M. BRUNET and his companions-in-arms, as the French have to require the MIKADO to make good the loss they sustained by Prince CHOSIU'S indiscretion at Simonoseki; and we hope they may get it.

THE question whether a transition period is not simultaneously commencing both in the tea and opium trades affords food for speculation. The cultivation of tea in British India is now an assured success, and, the labour difficulty once solved, there need be no appreciable limit to its expansion. This is the first step towards making us independent of China for our supplies of tea; while, curiously enough, the Chinese are at the same time endeavouring, by a widely-extended cultivation of the poppy in their own country, to become independent of India for their consumption of opium. At present there is no appearance of any falling off in the shipments of China tea, while, on the other hand, a marked decrease is already visible in the sales of opium at the open ports; so far, therefore, the Chinese seem to have the best of it.

SOME remarks that fell from Governor ORD at a late meeting of the Council in Singapore, relative to the steam yacht ordered to be built in this country for his Excellency's use, are calculated to excite renewed apprehensions in the minds of those interested in promoting economy in the Straits administration. We are fortunately in a position to allay any such feeling of uneasiness by stating, on good authority, that the building of the steamer has not even been commenced; and further, that the accounts sent home by Sir HARRY ORD are being subjected to a most searching examination, with the view of restraining expenditure on objects not calculated to promote the general welfare of the colony.

OUR readers are already aware that an Act was passed last Session authorising the severance of the Straits Settlements from the Episcopal See of Calcutta. We understand it has been decided to attach them to the Diocese of Labuan, so that in future Bishop CHAMBERS will have ecclesiastical jurisdiction over the Straits. The change is likely to meet with general approval.

CHIEF JUSTICE SMALE arrived by the last mail from Hong Kong on leave of absence. His name was not announced amongst the list of passengers. We understand that Mr. Pauncefote, the Attorney-General, takes the bench, and Mr. Pollard acts as attorney-general *ad interim*.

## LATEST TELEGRAMS.

(RECEIVED VIA GALLE, SEPT. 7.)

### CHINA.

SHANGHAI, AUG. 15.—Gray Shirtings, 6½ catties, 8¼ lb., $2.18. Cotton: Shanghai, 16½ taels. Tea firmer. Silk, active, but unchanged; settlements since departure of the last mail, 3,300 bales. Export to date (China and Japan), from commencement of season, 17,000 bales. Exchange on London: Bank bills, six months' sight, 5s. 10½d. Freights: Tea, £2.

HONG KONG, AUG. 19.—Gray Shirtings, 6½ catties, 8¼ lb., $2.80. Watertwist, 16-24, $1.36. Cotton: Bengal, fair medium, $17½. Tea: Canton, active and advancing; total export (China and Japan), 63,000,000lb. Exchange on London: Bank bills, six months' sight, 4s. 5½d.

### SINGAPORE.

SINGAPORE, AUGUST 26.—Gray Shirtings, 8¼ lbs., $2.95; No. 40 Mule Twist, $147.50. Cambrics, $33. Gambier, $3.20. Black Pepper, $6.90; White, $10.20. Sago Flour, $2.70. Tin, $32.50. Coffee, unchanged. Arrivals from London, Luzon and York. Exchange, 4s. 5d.

BREAKFAST.—EPPS'S COCOA—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

## Monetary and Commercial.

—o—

According to our last advices from Japan, the threatened increase in the duties on tea and silk was not expected to be carried into effect. On the other hand, we understand that a telegram has been received by the United States Government, stating positively that the increased duties will be levied from and after the 1st of January next. It is said that the rise in the duty on silk will vary from two and a half to fifteen per cent., according to the quality; on tea it will be only about one-half per cent.

The directors of the Agra Bank (Limited) have declared an *ad interim* dividend for the six months ending 30th June last, on the paid-up capital of the undertaking at the rate of 7 per cent per annum, payable on and after the 1st October next, before which date the usual warrants will be issued to the shareholders.

The creditors of Overend, Gurney, and Co. (Limited) have received the last instalment on their debts, completing 20s. in the pound. There now remains nothing to be settled with them excepting the interest (for the delayed instalments), the receipt of which the creditors, on the recommendation of Mr. Charles Oppenheim, have agreed to postpone until the 30th of June next.

The tenders for £325,000 in bills on India were received on the 15th inst. at the Bank of England, when the amounts allotted were—to Calcutta, £315,900, and to Madras, £9,100. The *minimum* price was fixed, as before, at 1s. 11d. on both presidencies, and tenders on the above presidencies at 1s. 11⅛d. will receive about 15 per cent.; those above in full. These results show a diminution in the demand for means of remittance to the East.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 18th inst., was in gold, to Galle, £120; to Bombay, £27,600; to Madras, £1,271; in silver, to Bombay, £19,300; to Calcutta, £30,000; to Hong Kong, £24,729; to Shanghai, £640; total in gold, £28,991; in silver, £74,669.

The following letter, which has been addressed to the Editor of *The Times*, contains a singular and important announcement with reference to the mode of levying Customs' duties upon tea and other articles at New York:—

"3, Lombard-street, London, E.C., Sept. 6.

"SIR,—In July last we shipped, per steamer *Bellona*, to New York, on behalf of a constituent, 216 half-chests of tea, consigned to one of the first mercantile houses. The duty payable on tea from this country is 10 per cent. *ad valorem*, in addition to 25 cents per lb. the ordinary duty on direct importations from China. But the Custom-house authorities at New York have been instructed to demand that the invoice be made up with the English duty of 6d. per pound added to the cost. This is an entirely new provision, and, as has been officially explained to our correspondents, 'grows out of a recent importation of malt from Canada into Chicago, the authorities in Washington having decided that such malt should have been invoiced at the market price out of bond.' Not only, however, is the 10 per cent. on the English duty now claimed, but a penalty of 20 per cent. upon the whole importation has been imposed. Our friends were about to represent to the department the injustice of their proceedings, but they appear to doubt whether their representation will have any effect. We think it well to make the facts known, as we suppose that the levying of Customs' duty upon the duty leviable in another country is without precedent. The tea in question did not, of course, pay English duty here, having been exported in bond.—We are, Sir, your most obedient servants,

"MATHESON AND CO."

Messrs. J. C. Sillar and Co.'s Circular, dated the 8th inst., contains the following allusion to an error committed in returning the stocks of Tea:—

In writing our Tea report we cannot pass over without remark the extraordinary statement made by our fellow brokers as represented by the Tea Brokers' Association, viz., that five thousand tons of Congou Tea have been discovered in the East and West India Dock Warehouse, of which no entries have ever been made, and no notice previously ever been taken. Disgraceful as this transaction may be, had it been the first time such a thing had occurred we should have been inclined to have treated the matter leniently; but as the same thing has so frequently happened before, we cannot allow it to pass unchallenged and without protest. About three years ago the stock of Tea was found to be 15,000,000 lbs. heavier than that stated by the principal brokers, a large proportion of this being Congou. The year following an error of 6,000,000 to 7,000,000 lbs. was discovered; of this 4,000,000 lbs. was Congou, and 1,000,000 lbs. Green Tea. In 1867 there was an error of 1,500,000 lbs., of which 500,000 lbs. was Green Tea, and now we find another error of 5,000,000 lbs. in the stock of Congou, the equivalent of the total cargoes of five vessels of a thousand tons each. We sincerely hope that ere long the suggestions may be carried out of obtaining the actual weights of each description of Tea remaining in the bonded warehouses, with the actual weight of each kind imported and delivered every month. The power of procuring this rests, as we have before stated, with the Tea Brokers' Association, and until such time as this information is procured, and incorrect statistics in Tea have become a thing of the past (as we soon hope to see the other evils of the trade, viz., the false weights rendered to the importer, and the unjustifiable deductions from the purchase money), we have little hope of witnessing a better state of things in this trade.

## FREIGHTS AND CHARTERS.

We can report no improvement in outward freights; the arrivals from the East have been very numerous, and all the berths are well supplied. In coal freights no change has taken place, and rates rule as last quoted.

Current rates of freight for vessels on the berth:—To Yokohama: 30s. weight or meast. To Nagasaki: 40s. weight or meast. To Hiogo: 35s. weight or meast. To Shanghai: 30s. weight or meast. To Hong Kong: 30s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £43. For Hong Kong: £34. For Singapore: £25. For Batavia: £17. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. To Chefoo: £2 2s. For Shanghai: £2 2s. 6d. For Hong Kong: £1 13s. For Singapore: £1 4s. For Galle: £1 4s.

The Admiralty have invited tenders for the conveyance of 336 tons stores to Hong Kong, and 126 tons stores to Ceylon; also from London to Colombo of about 4 officers (including 2 medical officers), 1 staff sergeant, 1 staff sergeant's wife, 157 men, 1 woman, and 3 children (one under a year old); to Singapore of about 4 officers, 2 ladies, 2 children, 2 sergeants, 87 men, 8 women, and 5 children; to Hong Kong about 2 officers (including a medical officer), 1 staff sergeant's wife, 1 staff sergeant's child, 44 men, 10 women, and 9 children (one under a year old); also of sundry small stores to Colombo.

## CASUALTIES.

Advices from Capetown, dated August 4, state that the Nereus, den Broeder, from Saigon to Falmouth, put into Simon's Bay, July 25, with loss of foretopmast, jibboom, bulwarks, sails, &c., having experienced severe weather on the coast, June 18; she had thrown 700 bags of rice overboard.

The Gustav, Schulte, from Hamburg to Shanghai, put into Table Bay, July 29, to repair rudder.

The General Wyndham (Off. No. 33,155) (ship), Croot, from Java to Amsterdam, was abandoned, July 4, in lat. 33 S., lon. 29 E.; crew landed at St. Helena by the St. James.

The Chaturanga, Hardy, from Singapore to New York, put in to St. Helena August 6 with loss of bulwarks, and maintopsailyard and mainyard sprung, having experienced heavy weather off Cape of Good Hope, and sailed 11 for her destination, after repairing.

The Selim (barque), of Leith (Off. No. 54,510), Dick, from Singapore to New York, was destroyed by fire June 5, in lat. 7 S., lon. 104 E.; master and crew landed at St. Helena by the Nederland, van Breen, from Saigon to Falmouth.

The Columba, Ritchie, from Sourabaya to Amsterdam, which arrived at St. Helena Aug. 3, had experienced very heavy gales from the 1st to the 20th July, and had boats stove, and part of bulwarks carried away.

The A Lloret, Gonzalez, from Manila to London, which put into St. Thomas' Aug. 15, leaky, and in a damaged condition, was discharging there on Aug. 23.

The Ribbleton, from Singapore, which arrived at Liverpool Sept. 7, had been in collision in the river the previous evening, and sustained damage.

Advices from Amsterdam, dated September 7, state that the Nicholas Witzen, de Groot, which arrived at Texel, September 5, had experienced heavy gales, May 12 and 17, when east of the Cape of Good Hope, during which she was thrown on her beam-ends, sprung deck seams, and damaged bulwarks, &c.; the master apprehended damage to the cargo.

Advices from Cape Town, dated August 3, state that the Nereus, den Broeder, from Saigon to Falmouth, which put into Simon's Bay, July 25, with damage, was surveyed on the 27th, when it was found that she had seven inches water in her, and was much strained in her upperworks, but tight in her bottom; the cargo in the between decks was badly damaged and much heated; everything was carried away forward, except the foremast, bowsprit, and foreyard; the long boat and bulwarks were stove, and the rudder-head and maintopmast badly sprung.

The Dolores Ugarte (San Salvadorian ship), Saul, from Havana to Macao, put into Rio de Janeiro, August 9, leaky.

Advices from Rotterdam, dated Sept. 13, state that the Gertrude (ship), Dewar, from Saigon, was aground near Helvoet; and would have to discharge part of cargo into lighters.

The Jacoba Cornelia, Jansen, from Rotterdam to Batavia, put into Ramsgate Sept. 13, with loss of sails.

Advices from Amsterdam, dated Sept. 14, state that the Appelina (English brig), from Saigon to Schiedam, was stranded at Velsen, near Wykaan Zee; crew saved.

The Cissy, Spencer, from Manila and Falmouth, to Liverpool, put into Dartmouth, Sept. 14, with loss of sails.

The Marengo, Nicoll, from Colombo, which arrived in London, Sept. 11, had sustained a great deal of damage during gales off the Cape of Good Hope, from June 19 to July 4.

Advices from St. Vincent, C.V., dated Sept. 8, report that the Old England (of Plymouth) (Off. No. 45,694), Bulman, from Cardiff to Galle, was abandoned in a sinking state a few degrees S. of the line; crew landed at Sal Island.

Advices from Port Elizabeth, dated Aug. 11, state that the Turkish Empire, Barclay, from Colombo to London, put in there Aug. 5, with seven feet of water in her hold and rudder-head gone, having experienced very severe weather on the 1st, about sixty miles off Fish River, during which she was hove on her beam ends, lost all boats, and threw overboard about sixty casks coffee; she was discharging.

The Sea Snake, Christophersen, from Bangkok to Falmouth, with rice, put into Port Elizabeth, Aug. 5, leaky, and with part of cargo thrown overboard; she was discharging.

The Hesperia, bound from London to Singapore, which foundered in the Thames, near Gravesend, Aug. 20, after collision, has been raised and towed back to dock to discharge and repair.

## MISCELLANEOUS.

At ASCENSION.—July 30, Parsee, from Colombo, and sailed for London; Aug. 9, Schiedam, from Batavia, with master dead, and proceeded 10 for Rotterdam.

Off ASCENSION.—Aug. 9, Batavia, from Batavia, for Rotterdam.

At ST. HELENA.—July 29, Boyne, Morice, from Colombo, for London; 31, Salamander, Detlefsen, from Saigon; Aug. 1, Eva Johanna, Wertberg, from Batavia, and sailed 2 for Rotterdam; Amber Witch, De la Perelle, from Swatow, and sailed 2 for London; 2, Queen of Devon, Guswell, from Singapore, and sailed for London; 3, Columba, Ritchie, from Sourabaya, and sailed 4 for Amsterdam; Ferdinand Brumm, Voss, from Hong Kong; Pepita, Olivares, from Manila, and sailed 6 for Bilbao; 4, Emily, Caspersen, from Saigon, and sailed 5 for Falmouth; 5, Flatworth, Oxley, from Penang, and sailed for London; Marie Biesthorst, from Batavia, and sailed 6 for Rotterdam; Chaturanga, Hardy, from Singapore, and sailed 11 for New York; Amarinth; Fabricius, from Singapore, and sailed 7 for Havre; Aeroliet, v. d. Eb, from Batavia, and sailed 7 for Rotterdam; 7, Canamore, Gachet, from Saigon, and sailed for Belle Isle; 8, Foxglove, Knott, from Singapore, and sailed 9 for Liverpool; 9, Couranto, Pierce, from Ceylon, and sailed 10 for London; Mongol, Courbe, from Macao; 11, Bernhard Carl, Luders, from Ilo Ilo, and sailed for Falmouth; 12, Nederland, Van Breen, from Saigon, and sailed for Falmouth; 13, Mindora, Allan, from Manila; 12, Jane Sprott, Sprott, from Zebu.

Off ST. HELENA.—August 3, Schiedam, from Batavia, for Rotterdam; 5, Frances, from Singapore, for London.

Off TABLE BAY.—July 16, Sea Serpent, from Hong Kong, for New York.

Off CAPE OF GOOD HOPE.—July 25, Channel Queen, from Philippines, for Falmouth.

At ALGOA BAY.—August 1, Couronnement, from Saigon.

Off CAPE AGULHAS.—July 6, Glencaple, from Manila, for Falmouth.

At TABLE BAY.—Aug. 14, Tycho Brahe (s.s.), Peel, from Liverpool, and left for Mauritius, Singapore, China, &c.

At MAURITIUS.—Aug. 9, Ajax (s.s.), from China, Singapore, &c., and left for London.

A heavy loss on the underwriters and marine insurance companies was reported on the 17th inst., by the receipt of a telegram from Shanghai, via Kiachta, announcing the total wreck of the British ship Hamilla Mitchell, belonging to Glasgow, outward bound, from London to Shanghai, on the Leuconna Rock, within 130 miles of her destination, with a cargo

Digitized by Google

valued at £150,000, and specie to the amount of £50,000. The information came from Lloyd's agent at Shanghai. The Hamilla Mitchell was a first-class iron ship of nearly 1,000 tons, owned by Mr. Thomas Mitchell, of Glasgow, and was commanded by Captain Brandscombe. Lloyd's register describes her as having been built at Dundee in 1864, under special survey. She sailed from Gravesend on the 5th of April last, and passed Anjer on the 15th July. The date of her loss is not mentioned in the telegram, only the spot where it occurred, known as Leuconna Hammocks, a cluster of rocks in lat. 30.25 N., lon. 122.33 E., in the fair way to the entrance of the Yangtsze-Kiang, about 130 miles from Shanghai. The crew appeared to have saved themselves by the ship's boats, and reached the port in safety. There is no doubt that on the intelligence reaching Shanghai the English Consul, with Lloyd's agent, took immediate steps to save as much of the valuable cargo as possible, especially the £50,000 in specie, which was stowed in a strong chest under the captain's cabin; but should the treasure become known to the hordes of Chinese fishermen who frequent these islands, the opinion of nautical men who are well acquainted with the desperate character of those men is, that it will be all plundered unless a war vessel is brought into service to drive them off. There is from nineteen to twenty-five fathoms of water round the rocks where she struck. The London Salvage Association have despatched one of their officers to Shanghai to look after the interest of the underwriters. All the specie is insured, the £50,000 being divided among four of the leading marine insurance companies in the City; part of the ship and cargo is insured at Lloyd's, and the remainder among the offices.

## LAUNCHES.

On the 6th inst. more than ordinary interest was excited among seamen and shipowners at Aberdeen by the launch from the yard of Messrs. Hall of a splendid clipper ship, built expressly to take part in next year's home tea race from China. The vessel is of composite construction, planked with teak, and embraces all the most modern improvements in mercantile naval architecture—the aim of the famous builders being to send out an "Aberdeen clipper" that for sailing speed, strength, and beauty of finish, may match with the most celebrated of this class of ships. The dimensions of the vessel are:—Length, 220 feet; beam, 36 feet; depth of hold, 20 feet; and 1,000 tons register. She was christened the Caliph by Miss Rennie, daughter of Mr. J. T. Rennie, shipbroker, and is the property of Mr. Alexander Hector, London.

There has been launched from the west shipbuilding-yard of Messrs. Chas. Connell and Co., Overnewton, Glasgow, a finely modelled iron sailing ship, named the City of Madrid, of 1,200 tons register, and classed AA at Lloyds. This vessel is a sister ship to the City of Perth, launched last year, and is the eighth vessel built by this firm for Messrs. George Smith and Son's splendid fleet of East India traders.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, ontaining a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE,

DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## HOLLOWAY'S PILLS.—NERVOUS DEBILITY.

—No part of the human machine requires more watching than the nervous system; upon it hangs health and life itself. These Pills are the best regulators and strengtheners of the nerves, and the safest general purifiers. Nausea, headache, giddiness, numbness and mental apathy yield to them. They despatch in a summary manner those distressing dyspeptic symptoms, stomachic pains, fulness at the pit of the stomach, abdominal distension, and overcome loathings, capricious appetite and confined bowels, the commonly accompanying signs of defective or deranged nervous power. Holloway's Pills are particularly recommended to persons of studious and sedentary habits, who gradually sink into a nervous and debilitated state, unless some restorative, such as his Pill, be occasionally taken.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

**LONDON AGENTS.**

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

Per P. and O. steamer from Suez, Nov. 14. To Batavia: Mr. Wilmer

## Summary of News from the Far East.

### JAPAN.

#### HIOGO AND OSAKA.

The following items of intelligence are from the *Hiogo News*:—

A memorial has been addressed to the British Minister by the English residents at Osaka and Kobe, with reference to the proposed removal of Mr. Gower to Yokohama. We cordially endorse the sentiments expressed by the memorialists, and trust that Sir H. Parkes may be induced to reconsider his decision. Should the proposed arrangement be carried into effect, it will make the fourth change in the British Consulate at Osaka since these ports were opened. Apart from other objections to the removal of Mr. Gower, this alone is highly unsatisfactory, as the incumbent of the post must feel his position to be of so transitory a nature that he is discouraged from doing more than simply attending to the mere routine of his office. In this instance, however, Mr. Gower has so thoroughly identified himself with his fellow countrymen, and shown himself so perfectly alive to their interests, that he bids fair to be the most popular British Consul that has been resident here. We understand that Mr. Lowder is to be made Consul for this district, and that Mr. Aston, at present at Osaka, proceeds to Nee-e-gata. By last advices from Nee-e-gata trade at that port was not very lively. The residents, when our informant left, numbered three, all told, viz., H.B.M.'s Consul, Constable, and one merchant.

The communication made by Sir H. Parkes to the meeting of British merchants at Yokohama is a most important one. If the Japanese Government carries out only a portion of what it has undertaken, as regards the much-vexed Kinsatsu question, we may already begin to congratulate ourselves upon returning confidence and the prospects of a flourishing trade. It remains, of course, to be seen how far spontaneous promises (for we have no power to ask for more) will be fulfilled by people who have hitherto shown themselves somewhat lax in meeting their guaranteed obligations, but the British Minister is of opinion that they are really anxious to repair the mischief already done by the issue, and earnest in their wish to foster the foreign trade which this ill-advised measure has brought almost to death's door. We will take it for granted, therefore, that "upon this occasion only" our faithful allies mean what they say, and will indulge for a moment in a respite from our usual scepticism whilst we revel in the brilliant prospect that opens before us.

We are pleased to hear it is the intention of the Japanese Government to establish a Navy Yard at Hiogo. We believe the spot selected is the same place that was chosen a year ago, when Mr. Grinnell, of the U. S. Navy, was engaged to superintend the arrangements. The present works will, we believe, be commenced at once, and are to be conducted by Japanese, entirely unaided by foreign advice or assistance.

Steam communication between Hiogo and Osaka has suddenly ceased, both the *Ohenmaru* and *Grete* having been laid up, to receive a thorough overhauling and repair to their engines and boilers. The newly-arrived steamer *Pahloong* is now being fitted up for this route, and will be ready in about a month. We understand she is admirably adapted for the line.

Trade at Hiogo was very dull, the following prices being almost nominal: Gray Shirtings (8¼ lbs.), boos 10⅛; Red Shirtings (2½ lbs.), boos 10¼. Mousselaine (30 yards 30 inches), boos 24½; Mousselaine (flowered), boos 46 to 48. White Shirtings (64 to 72 reed), boos 9¾ to 9⅞. Small enquiry for Fancies, but at low prices.

## YOKOHAMA.

### MEETING OF THE CHAMBER OF COMMERCE.

(*Japan Herald.*)

The half-yearly general meeting of the Yokohama Chamber of Commerce took place at the rooms of the Chamber.

Present :—Messrs. R. V. Grahame (chairman), Robertson, T. Walsh, Winstanley, Geisenheimer, Hooper, Hughes, Wilkin, Jackson, Barnard, Shand, Marshall, Lemann, Kahn, More, Bovenschen, Milsom, Baker, Dallas, and J. J. Dare (secretary).

The proceedings were opened by the secretary reading the minutes of former meetings, all of which were confirmed, after which the half-yearly report was read as follows :—

During the past half-year the course of trade in Japan, more especially as regards imports, has been of a very uncertain nature, and latterly most unsatisfactory, owing to the disturbed state of the finance of the Government.

Many questions of interest have come before the Chamber, and its members have endeavoured to promote the welfare of the mercantile community, by expressing on all occasions to the Ministers of the Treaty Powers their views on the various subjects which have engaged their attention, and by urging upon them the necessity of the native Government adopting measures to place trade on a better footing.

One of the most important subjects has been the depreciation of the native coin, which was fully discussed at a special general meeting, called to consider that question, and the reports of the majority and minority of a Special Committee appointed to study the matter, as also the memorial of the Standing Finance Committee to the various ministers on the subject, are now published.

Although there has been a difference of opinion among the members of the Chamber as to the remedy to be suggested, there has been a general concurrence as to the disastrous effect of the course the Government has pursued ; and it cannot be doubted that if the issue of such debased coinage has really been stopped, as officially notified, this has been chiefly owing to the agitation on the subject.

A new subject of anxiety has lately arisen in the matter of paper money, called *kinsats*, which are notified by the Government to be received at par value, leading to an almost total cessation in the import trade for the present, and this matter imperatively demands the attention of the Chamber.

The subject of "drawbacks" on re-exports has been followed up by ascertaining the wishes of the members of the Chamber, resulting in the complete approval of the introduction of the system by all interested in the import and export trade ; and the appended report of a special committee was duly forwarded to H.B.M.'s Minister, in accordance with his desire for full information on this point, as yet, however, without any definite result.

At the request of the Consul for the United States of America, a special committee reported upon the most advisable regulations for the landing and shipping of goods at the Custom-house, but as yet the authorities have not communicated their adoption of any special rules.

The system of telegrams from London, *via* San Francisco, not having afforded such ample information as was anticipated, the committee have deemed it desirable to discontinue their receipt during the summer months, and to confine them to the winter, when the Kiachta line is closed.

The Chamber's "Market Report" continues to meet with fair support, the sale averaging 1,780 copies per mail.

With regard to finance, a statement of receipts and disbursements for the half-year, duly audited, is now submitted, exhibiting an income of $7,338.56, including balance of last account, an expenditure of $3,967.36, and a balance of $1,370.70, exclusive of $2,000 deposited at interest with the Oriental Bank.

The usual half-yearly statistics of trade have been prepared in a form calculated to afford the fullest information, and will be appended to this report.

(Signed) R. V. GRAHAME, Chairman.

Moved by Mr. Barnard, and seconded by Mr. Shand :

"That the report and accounts be adopted, and printed and circulated in the usual way."

Carried with one dissentient.

The agent of the P.M.S.S. Company, proposed by Messrs. Findlay, Richardson, and Co., and seconded by Messrs. Walsh, Hall, and Co., was duly elected a member of the Chamber.

The Chairman said the next subject that he would introduce for the consideration of the members was the important one of currency, and that although the memorial of the Standing Finance Committee to the foreign ministers had already appeared in the columns of the local press, and was thus doubtless known to all present, yet perhaps it would be as well to read it again before the present meeting ; before doing so, however, he thought that perhaps some of the members of the Standing Committee who were present would elucidate the question by its further discussion.

Mr. Hooper observed that it would perhaps save the time of the meeting if he stated that the Standing Finance Committee had not, as yet, been able to confer with all the foreign representatives, and were consequently not in a position at present to go fully into the subject ; he would suggest that the consideration of the question should be postponed until the 5th of August, by which time he had no doubt that the Committee would be in a position to furnish the Chamber with an elaborate and detailed report.

In answer to the Chairman as to whether he would bring this suggestion forward as a motion, Mr. Hooper proposed, and Mr. Geisenheimer seconded :

"That the consideration of the memorial of the Finance Committee to the Ministers on the Currency be postponed until an adjourned meeting, to take place on the 5th of August."

Carried, one member only dissenting.

The Chairman said, until he came to the meeting that afternoon he was not aware that any idea existed of a postponement of the discussion of the currency ; but, as the question was one of vital importance to their trade, it would be better for the Finance Committee to be thoroughly prepared with the report before they brought it before the Chamber. Another very important question, as affecting their import trade, was that of the *kinsats*, or paper money, and if any member were in a position to offer any information or suggestion as to how that difficulty might be met the Chamber would be glad to hear them.

Mr. Geisenheimer thought that the *kinsats* question came under the category of the "Currency," and proposed that this subject should be discussed also at the adjourned meeting on the 5th August.

The Chairman expressed his satisfaction that such a course should be adopted, if it were the desire of the meeting. He would now, therefore, proceed to suggest the necessity of the Chamber considering certain questions which affected the import trade generally, amongst which he might name as an item the charges of fire insurance. The present rates were acknowledged by every one to be extravagantly high, and he thought that the gentlemen interested as agents of the companies could but admit the truth of such an assertion. He had recently received a carefully prepared proposal from Kobé, for the establishment of a Fire Insurance Company for Japan, in which all the open ports might be interested. He had read the proposed scheme attentively, and thought it well drawn up, and worthy of attention ; this would be at the disposal of those members of the Chamber who thought the matter worthy of their consideration.

Mr. Wilkin was of opinion that the *kinsats*' question should not altogether be passed over, and that the present moment was a favourable one for its discussion by the members present ; he had been informed, on very good authority, that the paper was gradually slipping into circulation at a discount of 25 per cent.

A short discussion here ensued as to whether the question of the *kinsats* had not already been referred to the adjourned meeting, when

Mr. Wilkin continued : he thought that several gentlemen having come together, a discussion of the question might be beneficial, and understood that the duties devolving on the Standing Finance Committee had reference to *boos* and *niboos*, the *kinsats*' question having been a subsequent one. He had been informed that considerable sales had been effected in *kinsats* at a discount of 25 per cent., and if this were the case, our difficulties would, to a certain extent be removed, as the Japanese merchant would now obtain dollars, as he had hitherto obtained *boos*, for transactions in imports. *Kinsats* were often treated as the cause of the depression of trade ; to his idea this was an erroneous impression, as they were to be regarded rather as the sympton than the cause of evil. The immense sums that Japan had expended in steamers, arms, &c., had imbued us with an idea that the country was an Eldorado, which idea we were now forced to relinquish, and to regard her resources as nearly exhausted. To this exhaustion is due the present issue of a paper currency, followed by the suicidal attempt of the Government to force it to a par value. The extravagant purchases of munitions of war had diverted much money from the legitimate trade in the staple imports, yarn, shirtings, &c., and now the only remedy for the disastrous posture of affairs was — time, which would enable Japan, by her producing power, to replenish her exhausted treasury. He thought, in the meanwhile, the Chamber might afford much useful advice to the Government, which might lessen the evils produced by their injudicious financial measures and, at the same time, the losses that accrued to both the Government and foreign trader by the present system of purchase by means of intermediate and corrupted officials.

Mr. Walsh thought we could not interfere with the Government as to the mode they chose to adopt in their purchases. It was the affair of the Government, and any interference in this respect might be resented. It were better, he thought, to keep to what more closely concerned our interests, as by interfering unduly in matters that did not really concern us we should lessen our influence in matters where we had the right to interfere and remonstrate.

Mr. Wilkin, repeating some of his former remarks, said he did not wish for the Chamber to interfere unwarrantably with the Government, but to point out to them some of the sources of their difficulties, amongst which he considered was the corruption of the native officials.

Mr. Walsh argued that the *kinsats*' question certainly came within the province of the Chamber for discussion, but not so the right of interference regarding the squeezes of the native officials.

A spirited discussion here took place between Messrs. Wilkin,

Digitized by Google

Walsh, and Hughes, regarding the right of the Chamber to interfere in the matter above stated.

Mr. Hughes viewed the matter rather in the light of one of expedience than right, and, quoting the existence of corruption in the Custom-house, was of the opinion that the sooner it was exposed the better it would be for trade.

The Chairman remarked that we had no other rights in Japan but treaty rights, for which we could and should claim the protection of our Ministers. Referring to clause X. of the treaty, he was of opinion that that clause applied to the fraud committed by the officials; he thought the proper course for the Chamber to pursue was to place their grievances before the Ministers, and to look to them to treat with the Government for their amendment.

Mr. Hooper read the clause as referring to the payment of the duties by the Foreigner, and not to the transactions of the officials with the Government.

Mr. Walsh was not opposed to the prevention of fraud under any form, whether perpetrated by the Foreigner or native, but he deprecated the interference of the Chamber in matters that did not concern them.

Mr. Wilkin had mentioned the squeezes of the native officials as an aggravation of an evil. The Government had issued the *kinsats* to pay off some of its large debts, asserting that the paper should be redeemed in a few years; but he did not see how this end was to be attained, unless the extravagant expenditure of the Government with its own officials was reduced. As regards the question of *kinsats*, they had, as he had already remarked, been sold at a discount of 25 per cent., which fact would assist us in the settlement of this difficulty.

Mr. Geisenheimer had seen the *kinsats* sold in Yedo at 75, and knew that in Hiogo and Osaka they had been bought at the same rate and imported to Yokohama at a large profit; *boos* and *niboos* are now scarcely seen at Yedo, *kinsats* being the circulating medium, the circulation of which had so far been enforced by punishment and imprisonment; but he would like to know if we were to exchange our shirtings for such pieces of paper.

Mr. Walsh remarked that in America merchandise was given for paper.

Mr. Geisenheimer was aware of that fact, but the paper there was guaranteed by the Government; but in Japan we have no guarantee.

Some further discussion arose, when Mr. Winstanley remarked that he could not see any benefit to be derived from the present discussion; the whole question was now so involved that no reliable information could be afforded on the subject; he was of opinion that further discussion should be deferred until the adjourned meeting.

Mr. Hughes again referred to the question of corruption amongst the officials, but having no motion to put before the meeting, the matter was dropped.

Mr. Walsh suggested that the cause of the issue of *kinsats* was doubtless the impression of the Japanese Government that the export trade was greater than the import trade, and that the balance being in favour of the former it was immaterial to Foreigners what the internal financial arrangements of the country might be.

The Chairman, referring to the statistics of the Chamber, as to the balance of the trade with Japan, stated that it was decidedly in favour of exports; a short discussion closed the subject, when,

Mr. Hooper gave notice of a motion, to be brought forward at the next meeting, to reduce the price of the circular issued by the Chamber on the ground of the flourishing condition of the Chamber, and the state of business rendering economy an object to the members.

In reply to a question from Mr. Wilkin, the Chairman said that the report of the Italian expedition kindly forwarded to the Chamber by His Excellency the Italian Minister would be embodied in the half yearly report and circulated amongst the members.

The meeting then dispersed.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, August 5.

The P. and O. steamer *Ganges* arrived on the evening of the 2nd inst. with the English mail of 18th June, and telegrams to the 10th July, the Chamber receiving a purely commercial telegram as late as the 13th July on the same day, *via* Kiachta. Grant's Transmongolian telegram of the same date informed us that the Irish Church Bill had passed the Lords. Yesterday the P.M. steamer *New York* arrived with the American mail, and London dates to the 1st July; her only important intelligence was a rumour current in San Francisco when she left (3rd July) that Mr. Howard had accepted a railway commissionership, and would not supersede Mr. Browne as Minister to Peking. Meanwhile, as you know, Mr. Browne left China three weeks ago.

On the 26th ult. the river at Hankow stood 49 feet above the lowest winter level. The flood mark this year is nearly 12 inches higher than that of 1866. At last advices the river was steadily falling, and had already fallen to the extent of a foot.

Intelligence has just arrived of the murder of twenty Catholic missionaries in Szechuen. The *Daily News* asserts that its information is such that there is no possibility of error. But I have no doubt that the report is exaggerated, and that probably *twenty in all*, *missionaries* and *converts* have been murdered. Indeed it is improbable that so many as twenty European missionaries would be together in one place. Here, however, it is believed, and it has caused a curious and ill-defined feeling of satisfaction, that as the assassination was fated to occur it should occur just now, as if to give the French an excuse for solving the great China problem. I do not exaggerate when I say that nine out of ten who heard the news yesterday said at once—"War with France, please God!" The extinction of the rebellion in Japan has sent a number of refugees to Shanghai. These fellows swagger about in a very independent and frequently intoxicated manner, and as they are each armed with two swords, some apprehension of a breach of the peace has been expressed. However, so far they seem good humoured enough, and bear rather the appearance of "Jacks-on-shore" than of political exiles.

The Chief Judge has refused the application for leave to appeal to Her Majesty in Council against the conviction of the man George for the murder of a Chinese carpenter at Farnham's dock. The points raised were that the jury consisted of five persons only, and that the Chinese witnesses, as possessing no definite religious beliefs, were unworthy of credit. Both objections were overruled; the first on the ground that the Legislature has the power to delegate to the Queen in Council the right to alter the Constitution in particular cases, the second on the ground that the assertion by a native witness that he believes in *a* god (whether of thunder or anything else) who will punish him if he lies, is sufficient to render his evidence admissible.

At a meeting of Consuls held on the 24th ult., the proceedings at which did not transpire until three days ago, the following reply to the Taoutai's refusal to permit the erection of a telegraph from the Kintoan Beacon to Shanghai was drafted. I think it is to be regretted that the tone is so conciliatory. Our trading interests here are too large to be imperilled by the idiotic superstitions of the Chinese authorities, and to me it seems that there is but one possible answer to the question whether we should respect their folly or the lives of our seamen, imperilled in every case where a ship goes on shore at the mouth of this river:—

Shanghai, 24th July, 1869.

His Excellency Tu, Taoutai of Shanghai.

SIR,—The undersigned Consuls have the honour to acknowledge the receipt of your rejoinder, under date the 19th inst., on the subject of a proposed telegraph line between this place and the Kintoan Beacon.

They regret that they cannot express their satisfaction at the nature of the conclusion at which you have arrived.

That the grounds upon which this conclusion are based are of a purely speculative character has been abundantly proved by actual experience in this very settlement, where, as you are aware, lines of telegraphic wires have for months past run over the heads of Foreigners and Chinese alike, and in many instances are actually attached to their dwelling houses, without having caused any deleterious effect or influence whatever. An objection such as that of "fung-shuy" should not at any rate be allowed to have any weight as against a scheme for the protection of life and property, and of important commercial interest, which formed the subject of the representation made to you.

The precedent of Mr. Reynold's case, which you quote in support of your theory as to the objectionable character of telegraphs, is, moreover, so erroneously adduced as to be inapplicable as an argument. It is not the fact that the posts were clandestinely planted. Mr. Reynold's operations were at the time notorious to the general public. He began with the Pootung bank of the river it is true, but he succeeded in laying the whole line, 227 posts, as far as the Beacon, a distance of sixteen miles, and he occupied three weeks in the work, during all which period he encountered no interference or molestation of any kind either from the people or the authorities. The posts were eventually removed in one night, but for what reason or at whose instigation has not yet been proved.

The Consuls would prefer accepting the latter part of your letter as affording the truest exposition of the state of the case, and inferring therefrom that your honourable Government objects to the indiscriminate introduction of telegraphs just at present, on the grounds of inexpediency.

In this view of the case, whilst regretting their failure to receive your support, they propose to bring the matter to the notice of their several Ministers resident at Peking, and to request them to recommend the adoption of the scheme which they have at heart as a purely exceptional measure in the interest of the foreign and native shipping resorting to this port.

With renewed expressions of their consideration, the undersigned have the honour to be, Your obedient servants.

The new steamer *Walrus*, recently brought out for the S.S.N. Company, and destined, as was thought, for the Yangtsze trade, has been re-named the *Chusan*, and is placed on the Ningpo line, running alternate days with the *Hangchow*, the *Kiangse* being transferred to the Tientsin list.

It may interest some of your readers who have spent summers in Shanghai and also in Hong Kong, to know that during the past fortnight the temperature here has ranged ten degrees Fahrenheit higher than at Hong Kong. In some parts of the settlement the mercury reached a hundred degrees in the shade on the 29th ult.

The new church was opened on the 1st inst. with appropriate

Digitized by Google

services, the other churches in the Settlement being closed for the occasion, in order to allow their congregations to swell that of the English Established Church.

Some rowdy Foreigners having made an attack some weeks ago upon a Chinese tax-collector's boat near Quiman, killing six natives and wounding several others, the Chehzien of Shanghai has issued a notification in English offering Tls. 200 for information that will lead to the capture of all or any of the culprits, Tls. 300 for the apprehension of the leader of the party, Tls. 100 for the apprehension of any accomplice, and Tls. 200 for the production of "such evidence as shall unfailingly convict any or all of the culprits."

The tea clippers *Dilkhoosh* and *John R. Worcester* cleared yesterday, having filled at £2 10s. The ruling rate is now £2 both here and at Foochow.

Sir Edmund Hornby leaves Shanghai in a few days on his annual tour. He will first visit Japan.

The Prussian Vice-Consul at Tientsin has given judgment in a collision case—Norwegian brig *Kvik versus* North German steamer *Tapangnyo*. The details of the evidence (as contradictory as can be imagined) are without interest; the steamer, however, was cast in damages and costs.

From Ningpo I hear that the recent floods have carried away a considerable portion of the bunding for the new English Consulate.

Baron von Gumpach, Professor of Astronomy in the (so-called) University of Peking, has addressed a letter to the *Daily News*, setting forth the wrongs he has sustained at Mr. Hart's hands, and threatening legal proceedings against him. It is worth mentioning that Baron von Gumpach professes to have discovered a System of the Universe essentially different from that announced by Newton, whom he declares to have been a mere visionary. He ascribes the rejection of his theories to the ignorance and jealousy of those who are interested in maintaining the Newtonian delusions, and of course he is very bitter against his opponents. He has now discovered another enemy in Mr. Hart, who (no doubt grossly deceived himself) deceived Von Gumpach with enthusiastic descriptions of a sort of learning in Peking which turned out to have no location save in Hart's imagination. Indeed, all the professors have valid reason for bitter complaint, and it remains to be seen whether, now that the college scheme has finally collapsed, Hart will leave them in the lurch.

Mr. J. B. Robertson has published a series of letters on the "Political Situation in China," which we shall notice in our next.

The intense heat, combined with the submergence of the up-river districts has caused much misery, disease and death amongst the natives. To Kiukiang refugees have crowded in such numbers that the population is now estimated at 70,000. Some houses are crammed, and thus the evils of over-crowding are added to those of poverty and miasmatic exhalations.

In the Supreme Court an application was made by Messrs. Wilkin and Robson, the consignees of the principal part of the cargo of the *Bolivar*, that the freight paid by them as such consignees should be declared a charge upon the proceeds of the said cargo, and be paid to the applicants out of such proceeds. Mr. Eames, who appeared for Messrs. Wilkin and Robson, said that the proceeding was practically an application to correct account sales of cargo sold under a decree in suit on Bottomry. The freight which his clients held as agents of the ship, amounting to $1,296 and £500 prepaid in New York, they had paid under an order of the Court, and it ought, he contended, to be a charge upon the proceeds of the cargo. The freight enters in and makes part of the value of the cargo at the port of delivery; and if the deduction was not allowed freight would be paid twice—once as freight, and again in cargo. Although the shipowner is bound to repair, his liability is limited to the ship, while the owners of the cargo, if the deduction he contended for were not allowed, would pay freight in addition to the whole value of the goods delivered. Freight is called in in exoneration of cargo, and should not be permitted to become an additional burthen instead of a relief. Judgment was reserved.

Another application has been made in the Supreme Court for leave to appeal to Her Majesty in Council against the verdict and sentence in the case of *Regina v. George*. The Court postponed its decision.

The following statistics, calculated for the present Silk season, commencing 1st June, 1869, to date are from the *Courier*:—

| | 1869-70. Bales. | 1868-69. Bales. |
|---|---|---|
| Transactions since last mail are estimated at ... | 3,000 | 6,000 |
| Making total settlements—China Silk ... ... | 10,600 | 19,000 |
| Total receipts—China Silk ... ... ... | 16,100 | 22,500 |
| Present unsold stock is estimated at about ... | 5,500 | 4,500 |
| Total export ... ... ... ... ... | 7,701 | 15,764 |
| Remaining unshipped in godowns and afloat in vessels in the harbour ... ... ... ... | 2,899 | 4,976 |
| Total export of waste silk, to date ... ... | 32 | 180 |

### THE GREAT FLOOD ON THE YANGTSZE.

By the present mail we hear that the waters had begun to subside. A letter from Hankow says:—

Nearly all the boundary walls have fallen already; the rest must follow as the water retires. Many of the palatial residences which adorn the Settlement are materially and permanently injured, and some of them will have to be taken down without delay. The amount of damage done will not appear fully till the water has fallen some feet below the present mark. Everywhere the foundations are sinking, and the walls show portentous signs. Though most of the stone foundations are high and well laid, yet the ground is so treacherous, and the piles not so fast on account of the annual rise and fall of the river, that the strongest artificial basis avails but little. We shall be compelled to devise and adopt a new plan of building better suited to the conditions which Hankow presents.

But if our condition as Foreigner is bad that of the natives is far worse. Thousands of native houses have been rendered uninhabitable, and tens of thousands of the poorest of the people have been driven from their homes. Some have taken refuge on the walls of the cities, and others on the neighbouring hills. From these heights many can see the roofs of their miserable huts just peeping through their watery grave. Others look in vain for their former abodes, the flood having swallowed them up, and, for for the present, obliterated every trace of their existence. Most cling to their cots to the last moment. By means of raised boards and piled-up tables and benches they contrive to live with several feet of water in their houses. Confined to a very contracted space between the water and the roof, you see them sometimes moving along in their double, and sometimes crawling on all fours as if they were so many quadrupeds. Here and there a faithful dog may be seen perched on the top of the roof, evidently greatly perplexed to account for this new thing which has happened to the dwellers upon the earth, and wondering where he is to be driven to next. The gods, too, are in a sad state. The worshippers being, apparently, disgusted with the carelessness or impotency of their divine protectors, have abandoned them to their fate.

The present flood is owing principally to the heavy rains which have fallen in Hunan and Kiangsi. The rise in the Tung-ting lake is caused by the former, that in the Poyang by the latter. We were informed some time before it had reached us that Hunan was flooded. The rains in this province (Hupeh) have also been very heavy. For about three weeks the heavens kept sending down torrents almost incessantly, and this did much towards enlarging the swollen stream which the Tung-ting lake was sending forth. The Si-chuan does not seem to have contributed anything to the extra volume which now floods the land. We can always distinguish between the Si-chuan and the Hunan waters, the latter being much clearer, owing to the deposit which takes place on their course through the Tung-ting lake. In the Han there is hardly any current, and the ascent near the mouth is nearly as easy as the descent. At the junction of the two streams there is quite a rush from the Yangtsze into the Han. Thus there can be no doubt as to the source of the extra rise. It is to be traced to the extraordinary heavy rains which have recently fallen in these hydrographical regions that are drained by the streams which empty themselves into the Tung-ting and Poyang lakes.

## COCHIN CHINA.

The following is from the Circular of Messrs. W. G. Hale and Co., dated Saigon, August 16, 1869:—

RICE.—Transactions have been upon a very limited scale, barely reaching 30,000 piculs, which were taken for China and Bourbon; for Europe there has been no business. Prices have been well maintained, owing to the very small supplies, and in some instances a slight advance has been paid. We now quote round grain at $1.27 per picul (5s. 2½d. per f.o.b.), and long at $1.11 per picul (4s. 6¾d per cwt. f.o.b), the market closing firmly at these figures. Our small supplies may be attributed in a great measure to the fact that the natives are now busily employed in preparing the coming crop, and we may in a month look for more liberal receipts, as the stock in the interior is known to be yet considerable. The shipments to China and Japan for the past month are about 90,000 piculs, while to your quarter nothing has been done.

TONNAGE.—With the arrival of several seeking vessels rates have again declined, and for Hong Kong 15 to 18 cents has been accepted, according to the capacity of the vessels. For Europe we have no settlement to note.

EXCHANGE.—Rates are almost nominal, as there have been so few bills offering; we quote sterling 4s. 7½d. 6 months with document. Hong Kong 30 days' sight 2¼ to 2¾ discount. Singapore 3 days' sight—par.

## CEYLON.

### COLOMBO.

Dates from this place are to the 31st August, or a week later. We observe that the report of the meeting of the European Life Office had been published by the agents, Clark, Spence and Co., and very shortly

Digitized by Google

after it they would be dismayed by a telegram of its collapse. The following are the current items of news:—

The *Observer* says there is a rumour prevalent in Colombo that on account of the annexation, as far as military matters are concerned, of the Colony of Labuan to India, the two companies of the Ceylon Rifle Regiment at present in that colony will return at no distant date to Ceylon, and that the Major-General Commanding the Forces has advised the Home Government to further reduce the regiment by two companies. We suppose the truth of the matter to be that Labuan is to be garrisoned by troops from Madras, which is a very different thing to being taken over by India. It is not at all probable that just as the Straits Settlements were constituted into a separate Grvernment, Labuan, a separate colony from the first, should be absorbed into India.

As bearing on the question of the currency of Ceylon it is noticeable that the O.B.C. notes promise to pay in "rupees or their equivalent in the currency of the colony." This certainly looks like an admission that the rupee is not the currency; if not, what is? And from this also two questions arise—first, with whom does the option of the alternative "rupees or currency" lie; with the holder or the issuer of the note? secondly, what is the equivalent of a rupee in currency? Who is to determine whether it should be the intrinsic value of the coin or the price at which it has hitherto passed by common consent and usage? It is clear that legislation is wanted to settle such questions as these, but it is more than questionable if legislation could make ten Indian rupees the equivalent of a pound.

It is stated that Sir Edward Creasy has been advised by his medical attendants to leave the island as quickly as arrangements can be made, though it is hoped that his absence will be only temporary. Sir Edward has applied for a year's leave of absence, and already in legal circles gossip is rife as to the temporary successor to the Chief Justiceship. It seems that the Government will deem it necessary, as the leave of absence will certainly extend over a year, and possibly longer, to appoint an acting Chief Justice. We understand that Mr. Justice Temple will act as Chief Justice during the absence of Sir Edward Creasy, and Mr. Lawson as additional Puisne Judge. Mr. Berwick and Mr. Cayley are spoken of in connection with the seat on the Colombo District Court Bench.

The public meeting called at Kandy to take steps for a recognition of the services of the retiring Government Agent of the Central Provinces was not so well attended as had been anticipated, owing probably to the unfavourable state of the weather. Resolutions were passed expressive of the regret of the community at the approaching departure of Mr. Braybrooke, determining that subscription lists in English and Singhalese be opened throughout the province, and, further, that a committee be appointed to collect subscriptions and generally to carry out the objects of the meeting. It is understood that another meeting shall take place on the 31st inst., and that the question of the form of the testimonial to be given shall be discussed by a general meeting of the subscribers.

# Market Report.

## IMPORTS.

SHANGHAI.—Piece Goods: The course of prices for all kinds of plain cottons continued against importers, and rates current in England had no effect on the Chinese market. Sales of Grey Shirtings since the mail left are reported at easier prices, and the market closed very dull. T-Cloths were also lower in value, and less sought for. Drills of all kinds had been much wanted at low figures, and several transactions were reported, though some holders asked higher prices. White Shirtings: The demand was very slack, even at reduced rates. Fancy Goods, Dyed Brocades and Dyed Spots were asked for at former figures, with but few sellers. In other kinds of manufactures there is not much change to report. Metals: Lead: a few speculative purchases had been made at Tls. 5. Iron Nail Rods had been dealt in to a limited extent, sales comprising only some 9,000 bales at Tls. 2.0.5 to 2.0.6 per picul for small sizes, to Tls. 2.1.8 for fair assortments. Bars had been held for prices above the ideas of the trade, consequently no transactions had taken place. Coals: The arrivals comprise two cargoes from New York, four from Cardiff, and one from Shields. Sales had been made of Cardiff at Tls. 8, and of English at Tls. 6.40. Quotations:—Grey Shirtings, 7 lbs., per piece, Tls. 1.9.4 to 1.9.7: 8.4 to 8.6 lbs., Tls. 2.1.4 to 2.1.9; White Shirtings, Tls. 2.1 to 3.2.5; T-Cloths, 6 lbs., Tls. 1.4 to 1.7.2; 7 lbs. Tls. 1.6.5 to 1.9.2; 8 to 8.4 lbs., Tls. 1.9.5 to 2.4.5; American Drills, 40 yards, Tls. 4 to 4.2; American Jeans, 30 yards, Tls. 3.6; American Sheetings, 40 yards, Tls. 3.6 to 3.8.5; English Drills, 40 yards, Tls. 3.7 to 3.8.5; Dutch Drills, 40 yards, Tls. 3.6 to 3.7; Camlets, English, SS, Tls. 12 to 12.5.5; Spanish Stripes, per yard, Tls. 0.5 to 0.8; Medium Broad and Habit Cloth, Tls. 0.9 to 1.7.5.

HONG KONG.—In piece goods fair settlements of 6 and 7 lbs. T.Cloths and 8.4 lbs. Grey Shirtings had resulted, but there is no change to report in prices. Nothing whatever had been done in American Cotton manufactures, and dealers were not offering. No sales of English Cotton Yarns had been reported, and as stocks had run quite low holders were firm. Quotations for Coal were unaltered.

## EXPORTS.

### TEA.

SHANGHAI.—Black: During the week there had been much less business doing, and quotations for medium Teas show no change. Common Black leafs, however, had been eagerly bought, and as high as Tls. 20 had been paid. At the close the market was quiet, and it was not likely that prices for common teas would be maintained. There had been considerable arrivals of Second Crop Teas, for which Tls. 22 to 25 are the prices at which business will probably be done. Settlements and shipments, 11,000 chests; stock, 28,000 chests. Green: There had been nothing done in New Teenkais; the natives asked enormous prices, say Tls. 45 to 47, alleging that heavy rains had seriously damaged the Crop. So far, however, Foreigners' views appeared to be much lower.—A small business had been done in Pingsueys at Tls. 35 to 43¼, and in Shanghai-packed at Tls. 30 to 35 per picul. Pingsuey—settlements, 1,400 half-chests; Shanghai-packed — settlements, 2,000 half-chests; Stock—Pingsueys, 4,500 half-chests; Teenkais, 6,000 half-chests; Shanghai-packed, 4,200 half-shests.

FOOCHOW.—There had been rather less business doing, but prices were without alteration, excepting, perhaps, for Teas with quality, which were becoming rather scarce, and of which teamen consequently were firmer holders. In Oolongs there had been no business. The only departure had been the Clara, which vessel left on the 1st August for London, with a cargo of 1,284,340 lbs. Tea. The Yangtsze had arrived and been placed on the berth, and there were other vessels expected from Shanghai to load for London. The rate of freight had been lowered to £2 10s. per ton, and some ships would probably accept a still lower rate.

AMOY.—Settlements of about 4,700 packages Congou had been made, at rates showing a slight advance. Total settlements to 6th August were 32,485 packages. In Oolong no further puchases had taken place. For the lower grades the teamen were asking much higher prices than buyers cared to give, the pick of the crop being gone. Arrivals 27,880 packages. Settlements 9,585 packages. Stocks 18,295 packages.

CANTON.—Business at this port had been rather quiet since the departure of the English mail. There had, however, been a fair demand for Teas at about last quotations. The stock of Country Congou had been increased by the arrival of three additional chops, but no settlements had been made.

### SILK.

SHANGHAI.—Settlements since the departure of the last mail were estimated at about 1,000 bales, giving a total of 11,500 bales since June 1st. Prices paid show little change, all best classes remained at last mail's quotations, while common Tsatlees and Taysaams were quoted Tls. 10 per picul lower. Re-reeled Silks had been taken to a fair extent, but these special grades compare unfavourably with last season's corresponding classes. Throwns of medium and lower quality were also offering at rather weak rates, but as they were of undesirable nature they did not find many buyers. The arrivals having come forward freely, the unsold stock had been increased to 6,000 bales.

CANTON.—Good qualities were very scarce, and high prices were asked for them; purchasers prefer waiting till after the fourth crop has been placed on the market, in the hopes of being able to secure a better quality of Silk on easier terms. In Re-reeled Silk a contract for 100 boxes of very finest kinds has been reported at $605 to 615. Prices for ordinary No. 1 Cumchook were without change.]

SHARP—On the 11th Sept., at Forest Lodge, Reading, Berks, the residence of her brother, Granville Sharp, Eliza Akehurst, in the 35th year of her age, youngest daughter of the late Rev. Thomas Sharp, A.M., of Crown-street Chapel, Soho, London, and formerly of Woolwich, Kent.

WINCHURST—On the 15th July, at the General Hospital, Yokohama, Edward Charles Winchurst, late of Shanghai.

## UNITED STATES.

### NEW YORK MARKETS.

COFFEE.—There is a fair demand for Government Java at 22c. to 25; for Singapore at 20c. to 22½c. ; for Manila at 16c. to 18 ; and for Native Ceylon at 17½c. to 19⅛ gold.

HEMP.—There is but little doing in Manila ; last sales at 12⅜c. gold. The cargo of superior Cebu, per Sea Serpent, goes in store, 13c. not being offered for it.

INDIGO.—The market was very firm, with a good jobbing demand, chiefly for Manila, in the absence of adequate supplies of Madras ; sales of Manila, in lots, part at $1.10 gold, and part $1.05 to 1.50 currency, for all grades.

SUGAR.—The market for Raw Sugar presents a steady good demand from refiners and the trade, as well as from neighbouring cities, very small offerings and great firmness on the part of holders, and a strong buoyant tone, with full market values. Quotations—Clayed Manila, 11⅜c. to 11¾ per lb. ; Java, Nos. 10 and 12, 12c. to 12⅝ per lb. gold.

TEA.—There is a steady and pretty good demand for desirable grades Green, and Black and Japan share in the inquiry from the trade. The fluctuations in gold tend to restrict operations, but there is a pretty good business going forward in all kinds at steady prices. Sales:—1,297 half-chests Green per Charger, 1,527 per Chinaman, 457 per Dartmouth, 630 per Sir William Wallace, 827 per Monkchester, 500 Japan per Benefactor, 2,500 do. (vessel not named), 500 Oolong and 1,400 half-chests and 3 quarter-chests Souchong (via California), and 3,000 fine Oolong. The following were the prices paid :—Hyson, common to fine, 90c. to $1.35 ; finest, $1.40 to 1.65 ; Japan, common to fine, 80c. to $1.5 ; finest, $1.10 to 1.25 ; Oolong, common to fine, 70c. to $1.15 ; finest, $1.20 to 1.60 ; Souchong, common to fine, 70c. to $1.5 ; finest, $1.25 to 1.50.

TIN.—The market for Pig is very firm, and a slight improvement has been realised. The sales here and in Boston, on the spot and to arrive soon, are 3,400 pigs Straits (1,750 to arrive), at 32¼c. to 32½, part cash and part thirty days.

### SAN FRANCISCO MARKETS.

COFFEE.—Imports from Jan. 1st to Sept. 1st :—Java, 899,836 lbs., 70 packages ; Central America, 3,031,664 lbs., 15,074 packages ; Hawaiian, 65,669 lbs., 473 packages ; Manila, 170,375 lbs., 3,395 packages ; Rio, 591,869 lbs. ; Peruvian, 15 sacks. The market for all kinds is without animation, and in the absence of any considerable demand from the trade, old rates prevail, importers showing firmness ; but, were there any buyers of moment, some concessions in price would be made for the sake of a trade. Old Government Java is obtainable at 24c. The various kinds of Greens are quotable at 17½c. to 20.

MATTING.—Imports from Jan. 1st to Sept. 1st :—Bales, 60 ; rolls, 6,069. The trade is well supplied with Chinese, both white and checked, of the various descriptions of Cargo and Contract, with moderate sale within the range of our quotations, viz., 4-4 cargo, $5 to 5.50 ; 5-4 cargo, $5.50 to 6 ; 6-4 cargo, $6.50 to 7 ; 4-4 contract, $8 to 12 ; 5 4 contract, $9 to 14 ; 6-4 contract, $11 to 16.

RICE.—Imports from Jan. 1st to Sept. 1st :—China, 14,845,395 lbs., 126,120 packages ; Siam, 1,066,862 lbs., 28,142 packages ; Batavia, 110,271 lbs. The stock of China is large, and with less than the average inquiry, prices favour the buyer. Quotations : China, 5½c. to 6 ; Siam, recleaned, 5c. to 5¼.

SUGAR.—Imports from January 1st to September 1st : Manila, 8,845,568 lbs., 40,126 packages ; China, 1,396,013 lbs., 1,111 packages ; Batavia, 628,449 lbs., 2,357 packages ; Siam, 320 packages. The San Francisco and Pacific Sugar Refining Company have now four entire cargoes of Raws *en route* from Manila. Quotations—China, $9 to 10½ ; Manila, $8½.

TEAS.—Imports from January 1st to Sept. 1st : China, 478,946 lbs., 6,347 packages ; Japan, 695,712 lbs., 4,806 packages. Owing to limited imports of Japans by recent arrivals prices have advanced, stocks being somewhat reduced. We quote prices at 62½c. to 67½c. for chests and half-chests ; small boxes, 5s. and 10s., fancy and lacquered, 70c. to 75c. ; extra fine chops, 80c. to 85c. For a like reason importers of Comet and other choice Oolongs have advanced their prices to 95c. to $1. There is a fair demand for Japans, with but limited call for Oolongs. The stock of low grade China Blacks is ample for trade wants. We note small shipments of Basket tea overland, destined to Chicago for a market.

### SHIPPING.

ARRIVALS.—Sept. 3, at San Francisco, from Manila, Kolga ; from Hong Kong, Mauritius ; Sept. 6, at New York, from Shanghai, Anglo-Saxon ; 7, from Hong Kong, Sea Serpent ; from Amoy, Benefactor ; 9, from Manila, Rattler.

DEPARTURES.—Sept. 2, from San Francisco, for Batavia, Sacramento ; 4, for Japan, &c., Japan (s.).

LOADING.—At San Francisco, for Hong Kong, Maley, Mary, America ; at New York, for Hong Kong, Golden State ; for Shanghai, Surprise.

## MISCELLANEOUS.

CONSULAR APPOINTMENTS.—The Queen has been pleased to approve of Mr. C. N. Goulding as Consul at Hong Kong ; of Mr. Theodore Kramer as Consul at Colombo, Ceylon, for the North German Confederation ; of Don Fermin Saenz de Tejada as Vice-Consul for Spain at Hong Kong ; and of Mr. B. A. Dickman as Consul at Rangoon for his Majesty the King of Sweden and Norway.

THE SPITEFUL, paddlewheel steamer, Commander Morrell, has been paid off at Portsmouth, after having been three years and eleven months in commission, the most of the time spent on the Brazilian and East India station. In the early part of the present year she visited the whole of the western coast of Burmah and Siam, suppressing the piracies existing there, and, as a suitable end to her services, had the honour of taking possession of the Nicobar Islands, in the Indian Ocean, on the 28th of March.

THE Prussian screw corvette *Hertha*, 28 guns, Capt. Kochler, arrived at Spithead on the 23rd from Kiel, *en route* to China and Japan. On anchoring she exchanged salutes with the garrison and *Duke of Wellington*, flagship of Vice-Admiral Sir J. Hope, K.C.B., Commander-in-Chief at Portsmouth.

THE daily papers state that Mr. Laurence Oliphant, formerly M.P. for the Stirling burghs (about whom some anxiety has been felt), paid a short visit to this country on business last week. Mr. Oliphant is said to be quite well.

IT has been announced at Chatham garrison that reinforcements for the 73rd Regiment will leave Chatham, for Ceylon, about the 5th of the ensuing month, the *Salamanca* having been chartered by the Government for their conveyance to join the head-quarters of the regiment. Major J. W. Barnes has been appointed to proceed to Ceylon in charge of the troops, which will number 124 non-commissioned officers and privates.

IT was recently stated that Sir Henry Keppel is the junior admiral on the active list. We are now informed that, owing to the death of Admiral Sir Robert L. Baynes, Vice-Admiral John Elphinstone Erskine has been promoted, and consequently stands below Sir Henry Keppel.

## THE SUEZ CANAL.

The following letter has been addressed by Captain Methven, an old P. and O. captain, to M. Lesseps, on the navigation of the Canal for screw steamers, and contains many useful suggestions :—

Permit me to address you briefly on the subject of the navigation of the Suez Canal. It may very possibly happen that among the numerous points *apropos* of the Canal claiming your attention some minor details may be overlooked ; you will, therefore, I trust, excuse me if I mention one which, though apparently small, may yet be of considerable importance.

In a report by M. A. Lavallay, your principal contractor, I find the following passage :—"In the region of the Canal the tendency of the wind is to blow directly from the Mediterranean towards the Red Sea —from the cold sea towards the hot sea, and scarcely ever in a direction across the Canal."

This being the case, the navigator of a well-rigged large steamship must keep in view the probability of a fair wind coming up astern, and acting on hull and rigging, especially so when the ship is a screw steamer ; for, having to stop or slow the ship by the engine, the action of the screw will always be found to carry the ship to one side—towards one or other of the banks of the Canal—and never to take the ship astern in the direct line of the keel, as it is when the order is given to turn astern.

Speaking individually, I certainly should desire, in passing through the Canal, to have a small tug—not for towing, but in attendance—being towed and attached to the stern of the ship, so that I might use her at pleasure to stop or slow.

I think the tug best adapted for such purpose would be one provided with a rudder at both ends.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks :—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

## THE "PALL MALL GAZETTE" ON CHINA AFFAIRS.

IT is always with a sense of disappointment that we observe a usually well-informed clear-headed man persistently taking, in some particular controversy, that side which has the least pretence to reason and common sense. It is the same with a newspaper; the more able its general management, and the higher its tone, the more we regret such a sad falling off from its wonted high standard as the *Pall Mall Gazette* has exhibited in its recent articles on China affairs. We can understand, and appreciate at their true value, the motives of the opinions on this subject expressed by most of the daily journals. *The Times* is a weather-cock—consistent in its perpetual inconsistency. The Radical papers treat a question of China policy, as they do most other questions, in a party spirit, and with an utter disregard of logic. Whatever is initiated by, or sanctioned by Mr. GLADSTONE'S Cabinet must be according to their views, the perfection of human reason. The *Standard* and other ultra-Tory organs take a side far more congenial to the ideas of China residents, whether mercantile or missionary; but it is to be feared that they adopt that side, not so much from an inward conviction of its righteousness as because it is diametrically opposed to the policy of the present Government. The *Pall Mall Gazette*, though consistently Liberal, never degenerates to Radicalism, and is not committed to that unreasoning enthusiasm for every word and deed of Mr. GLADSTONE'S that characterises the rest of the Liberal press. We are therefore puzzled by the strangely perverse view it persists in taking of the conduct and attitude of the British merchants in China. Only a day or two ago this journal devoted another article to a diatribe against the Shanghai residents, in which they are stigmatised as hypocritical, tyrannical, and dishonest. Hypocritical, because, in their address to Mr. Ross BROWNE, they adduced other motives than those of self-interest for their wish to see a policy of progress adopted. Tyrannical, because they advocate the application of that wholesome pressure, without which experience has taught us that no treaty obligations will be fulfilled. Dishonest, because, while they profess a wish to "raise China in the scale of civilisation," their only true object is "to squeeze her as dry as possible."

All this is not only unfair, but untrue. What have our merchants in China done that they have forfeited all claim to honourable motives? "They define the true policy," says the *Pall Mall*, "to be one which looks towards the extension "of trade and intercourse with Western nations. But this "extension is only valuable in their eyes as a step towards "raising China in the scale of civilisation. *The vulgar notion "of mercantile advantage has no place in their thoughts.*" Surely this bitter sneer is not deserved. The merchants have not only made no secret of their desire for increased trading facilities, but have never ceased to urge it, by memorials and otherwise, on their representatives. And shall it be said, because an Englishman has an interest in the development of Chinese commerce, that he is, therefore, incapable of entertaining a sincere wish for the welfare and progress of the Chinese people? It is a preposterous assumption. The assertion that the only object is to squeeze China as dry as possible, may be dismissed with a word of contempt. Everybody who knows anything at all about the China trade, knows that "squeezing" is all on the other side. A bit of truth unconsciously peeps out in the closing sentence of the *Pall Mall* article, though it is intended by the writer to bear exactly the opposite construction to that we attach to it. "If our intercourse with China is to be anything better than "a series of little wars, we must be content to take the "Chinese willingness to trade with us as the measure of our "right to trade with them." Precisely. This is a proposition we must cordially endorse. The willingness of the Chinese — as a people — to trade with us is unbounded. Willingness is a feeble word; it is positive eagerness that is displayed by the trading population in every province to buy, sell, and exchange productions with us. The Chinese people fret and chafe, as do our merchants, under the oppressive exactions and restrictions by which meddling officials hamper their mutual transactions. And if we are to have a "series of little wars" it is just this vexatious system of repression, and the humiliating submission to it on the part of our Government, that will give rise to them. But enough of the *Pall Mall Gazette* for the present; our readers are by this time as sick of its misrepresentations as we are.

THE necessity of devoting so large a proportion of space to politics and commerce has, perhaps, an occasional tendency to make *The London and China Telegraph* rather dry reading; we are accordingly grateful when an opportunity offers for presenting our readers with something genuinely amusing, without laying ourselves open to a charge of frivolity. As a rule, there is not much fun to be got out of China affairs. But anybody wanting a hearty laugh need only turn to the letter of Mr. KIERNAN to the *New York Herald*, which we reprint in another column, and their longing will at once be gratified. We must quote one delicious little bit as a sample:—"The Western Christians, particularly the British, "have been cruel and exacting in their military operations, "swindling and unscrupulous in their mercantile transac- "tions, and licentious and degraded in their habits." Really the *Pall Mall Gazette* should retain the services of Mr. KIERNAN as its special contributor on foreign relations with China.

## THE AMERICAN MINISTER.

THERE seems to have been some misunderstanding in connection with the sudden return of Mr. Ross BROWNE from Peking. It seems that he had only been in office about six months when he was informed that Mr. HOWARD had been appointed by the PRESIDENT, and confirmed by the Senate, as his successor. The newspapers announced that the new Minister would reach Peking by midsummer. Taking it for granted that he would soon arrive, and following the general custom of American Ministers in China to take leave without waiting for the successor, Mr. BROWNE started for Shanghai, expecting to meet Mr. HOWARD there. Disappointed in this, he went on to Yokohama, and there heard, for the first time, that Mr. HOWARD had given up the mission. Having his family with him, he nevertheless went on to San Francisco, and thence signified his willingness to resume the post he had quitted. Of course there are differences of opinion in the United States as to the expediency of permitting him to return. The *New York Tribune*, in an article spiced with some choice abuse of England, declares Mr. GREELEY the only man fit for the post, as (it says) Mr. BROWNE has identified himself with "the narrow-minded, "selfish, grasping policy of England," and has an inclination "to imitate the stupid and criminal system of arrogant in- "terference" practised by this country. Other journals praise Mr. BROWNE'S management of affairs, and think it would be difficult to find a better Minister; in which opinion we concur.

WE invite attention to a highly interesting narrative given below of a visit of inspection made last month to the Suez Canal. It is calculated to leave a favourable impression, but we nevertheless adhere to our previously-expressed opinion, that it will yet be several months before the Canal is actually available for traffic on a large scale.

MR. BURLINGAME and the Chinese Ambassadors have left Paris for St. Petersburg, and we understand that the cities of Hamburg, Copenhagen, and Stockholm will be visited *en route*. Should no alteration be made in existing arrangements, the Embassy will return to Paris about the end of December.

## LICENSED GAMBLING IN HONG KONG.

AFTER all that has been said and written about the now-celebrated "Gambling Ordinance" it seems there is still a good deal of misapprehension as to the circumstances attending its inception. The existing ordinance originated, not in Hong Kong, but in Downing-street. Of course, the first attempt to bring the gaming-houses under surveillance was by means of an ordinance drafted in Hong Kong, but this was not approved by the Home Government, and therefore not passed. It would seem, however, that the FOREIGN SECRETARY thought the idea a good one, though he disliked the proposed means of carrying it into effect, and accordingly forwarded to the Colonial Government a draft of such a measure as he was willing to sanction. This ordinance, as originally framed, and, we believe, as passed by the Legislative Council, was not intended to create a monopoly which might be sold, and thus turned into a source of revenue. It simply authorised the GOVERNOR in Council to issue certain regulations to be applied to, and enforced in, *all* gambling houses; but by an ingenious perversion of its meaning Sir RICHARD MACDONNELL applied it to a totally different purpose, greatly to the surprise, we believe, of even some of the members of Council who had voted in its favour. It was a bold stroke, certainly, and in some respects, perhaps, not quite easy to justify; but experience has not shown it to be fraught with any ill effects in a social sense, while the pecuniary results could not be otherwise than acceptable to a bankrupt exchequer.

---

WE learn from our Shanghai correspondent that subscriptions are being collected at that port to form a fund for the establishment of a CHINA ASSOCIATION in London. Some hard things have been said with reference to the decay of the HONG KONG ASSOCIATION of London that were not altogether deserved. The proposed China institution will, however stand a fairer chance of success, as it will start on a much broader basis.

---

MAILS VIA BRINDISI.—It has beeu arranged by the Post-office to make up a mail for India, &c., every Saturday at 7 A.M. As this is only twelve night hours later than that by Marseilles it is of no service. The experiment should have been made of twenty-four hours. The postage is 3d. higher.

---

# Literature.

Messrs. Sampson Low and Sons send us *Our New Way Round the World*; a handsome volume of Notes of the Observations of an intelligent American traveller (Mr. Charles C. Coffin) during a tour through Europe, Egypt, India, China, Japan, and California. The professed object of the author is to bring before the non-travelling reader a succession of facts, scenes, and incidents such as will enable him to form a good idea of what is to be done and seen in the course of a voyage of circumnavigation, aided by the newly-opened Pacific Railway; and further, to give a budget of useful information to others who may wish to follow in his footsteps. The chapters devoted to that portion of the voyage extending from India to San Francisco is naturally the portion of the work that possesses the most interest for our readers. Residents in foreign lands are always interested in the observations of travellers (who print their experiences) on those countries. A good deal of space is devoted to disquisitions on the history and geography of China and Japan; and a good deal more to descriptions of "manners and customs," that of course are (to us, at least) a thrice-told tale. But all this is mingled with much that is worth reading in the way of shrewd observation, and the book, if received rather as a source of amusement than instruction, will repay perusal, even by those who believe they have read all that has been written on the various countries treated of—even if it be only for the sake of the strikingly original views expressed on some subjects. As a sample, however, of the accuracy of the descriptive part, we may note that the Japanese ensign is called "the flag of the full moon." The volume is illustrated with numerous woodcuts, of various degrees of excellence.

From Messrs. William Blackwood and Sons we have a handsome volume simply entitled *Japan*. It is from the pen of Mr. Walter Dickson, and comprehends some instructive sketches of the history and government of the Empire. The explanations of the system of government, the powers, privileges, and functions of the several ranks of Daimios and high officials, are perhaps more perspicuous than any that have previously appeared. For much of this information, Mr. Dickson informs us, he is indebted to a Japanese gentleman in Yokohama, whose name (for obvious reasons) he declines to mention. There is no doubt that the knowledge thus obtained is of a most valuable nature, and it is in fact this element that makes such a marked distinction between Mr. Dickson's work and those numerous books on Japan, the authors of which depended either on their own casual observations and inquiries, or on the writings of a bye-gone age. The historical part of the volume is interesting, but the chapters devoted to the Imperial family and Court, and the position of the Shiogoon and Daimios, are doubly so. The entire work is not only pleasant and instructive reading, but one that ought to be read and re-read by all who wish to attain anything like a coherent idea of the real condition of Japan. Its value can hardly be over estimated.

Mr. Hotten publishes probably the first volume of poems in the English tongue ever written so far East as Hong Kong. The author is Mr. W. T. Mercer, who was for some twenty years a resident in that colony, and who, under the appropriate title of *Under the Peak*, presents us with a series of jottings in verse. Apart from their intrinsic merit, which is by no means inconsiderable, these poems will have a special interest for many of our readers, derived from the hand that wrote them and the circumstances attending their production. Want of space forbids us to indulge in any quotations, though there is no lack of tempting bits that would serve to illustrate the style. Before taking leave of the author we may observe that in his preface he holds out expectations of "a graver volume," based on his experience as Colonial Secretary. A History of the Government of Hong Kong would be an instructive book, and one greatly to be wished for; is Mr. Mercer going to supply the want? By the way, we cannot say much for the exterior of *Under the Peak*. Why such very ugly brown cloth? and what is there suggestive of poetry in the fac-similes of half and quarter dollars splashed in tin-foil on the back and sides of the book?

We have received the first volume of a very important work on Chinese grammar, by the learned professor of the College de France.* The work which M. Julien presents to the public bears in the Chinese language the title of *Han-wen-tchin-nan*, or, the "Compass of the Chinese Language," the expression *Tchi-nan*, compass, being commonly used for didactic works intended for students; thus, a collection of dialogues is called *Monggou-tchi-nan*, the compass of the Mongul tongue. "The whole of the Chinese grammar depends on position," is used as a motto for the work, and M. Julien, in referring to Dr. Marshman's work published at Serampore in 1844, says to that gentleman, who called his work, too modestly, "Elements of Chinese Grammar," is due the discovery recorded in his own words in the above motto. The learned doctor however says M. Julien did not demonstrate the above truth with sufficient clearness, he did not accompany his dissertation with sufficient examples, drawn from the best sources and faithfully translated. The Chinese characters, says M. Julien, are all monosyllabic, indeclinable, and without conjugation; there are no inflections to show the different genders, cases, numbers, persons, moods, or tenses, yet, in spite of the absence of inflections, the language to a good Chinese scholar is as clear and intelligible as the learned languages which are so rich in these inflections. M. Julien has given in the commencement of the work some very simple examples which illustrate the syntax by position; thus, if the character *tch'i*, governor, be placed before *koŭe*, kingdom, the two together signify *o govern the kingdom*; if, on the contrary, the order of the two characters be reversed, the meaning then is, *the kingdom is governed*; if the character *tch'i* is placed after *chi*, magistrate, the former becomes a substantive, and the other two form the expression *the administration of the magistrates*. Again, the character *thouan*, round, may, according to its position, be either an adjective, substantive, verb, or adverb. Thus:—*Thouan-chen*, means a round screen; *fen-thouan*, a bowl of white lead; *thouan-fan*, put the cooked rice in a bowl; and *thouan-tso*, to sit down in a circle. This will be sufficient to explain to the unitiated the peculiarity of syntax depending entirely on the relative position of the words or characters in a sentence. The Chinese have, however, certain prepositions which mark the cases, and those used for the accusative *—i, yu, hou*, &c., were discovered by M. Julien, and recorded in a memoir in his Latin translation of "Mencius." Appended to the grammar proper is a series of very valuable *monographies*, or full descriptions of a number of the most important characters in the Chinese language, showing how many and what changes they are susceptible of by collocation, in some cases amounting to seventeen, if not more. Following the *monographies* is a translation, abridged, of a treatise on the particles and principal grammatical terms, written in 1798, by Wang-in-tchi, president of one of the Six Ministeries. Next we have a table of the particles which serve to form the idioms or peculiar expressions of the *kou-wen*, ancient style, extracted from classic and canonical works, and from selections from the antique. These idiomatic and other irregular forms are

* Syntaxe nouvelle de la langue Chinoise fondée sur la positions des mots, suivie de deux traités sur les particules et les principaux termes de grammaire, d'une table des idiotismes, de fables, de légendes et d'apologues tradults mot à mot par M. Stanislas Julien, de l'Institut. 1st volume, 8vo. Paris: Maisonneuve and Cie.

Digitized by Google

numerous, the Chinese encyclopedia containing about three hundred. The volume concludes with a collection of fables, Indian legends, translated from Sanscrit into Chinese, and explained word for word to assist the student in the comprehension of the *kou-wen*, or ancient style. The text of these works and extracts is broken up into sentences and paragraphs, the translation following the original in each case, and the characters, as well as their names or sounds, being all numbered, the student finds out easily which belongs to the French equivalent, and, consequently, what is the collocation of the phrases. M. Julien has dedicated his work to our countryman, Dr. James Legge, whose name appears in more than one place in the volume.

Messrs. Trübner and Co.'s last contribution to China literature is the *Travels of Fah-hian and Sung-yun*, a translation of the journal of two Buddhist pilgrims from China to India, in the years 400 and 518 A.D. The translator is Mr. Samuel Beal, and his work will be highly valued by those who make Buddhism their study.

## NOTES OF A VISIT TO SUEZ AND THE SUEZ CANAL IN AUGUST, 1869.

July 31.—We spent this morning in looking over the head works of the Canal and the new harbour works. The harbour works, which are immediately adjoining the Suez Canal, are in a fair way towards completion; these works are being carried out for the Egyptian Government by Messrs. Dussaud Frères, the contractors for the Marseilles port works. They consist in the construction of two basins, and a dry dock to be connected with the mainland by an embanked jetty, laid with rails. The dock (which is a very fine one, having nearly the following dimensions:—Length 420 ft., breadth 108 ft.) is completed, as also the jetty, which has a crest 33 ft. wide, with a triple line of rails.

The basins, one of which is solely for the use of the Egyptian navy, and is to have an area of 39 acres, as well as the other for the use of vessels of all nations, which will have an area of 57 acres, are fully two-thirds completed. They are formed and protected from the sea by rubble stone jetties, running round their exterior sides, and they are dredged out to an uniform depth of 23 ft. The two basins are separated by a centre jetty, with quays on each side for the convenience of loading and unloading merchandise. In the line of this jetty is the opening, 328 ft. wide, which gives access to the two basins. The basins are connected with the deep water of the harbour, where ships anchor, by a dredged channel 23 ft. deep. On the made-up ground in rear of the basins, a goods station has been constructed, from which all goods will eventually be despatched. The whole of the works are to be completed, according to contract, in January, 1873.

The entrance to the Canal is a channel dredged through the shallow bay in front of Suez, protected on its sides by shingle jetties, and also by a jetty or breakwater about 2,800 ft. in length, running out from the shore in a westerly direction across the mouth of the Canal.

In the afternoon we went out to Petit Chalouf, five miles north of Suez, and travelled over several miles of the Canal in the company of M. Batissol, the engineer in charge. Here had been one of the heaviest portions of the work, the Canal having to be excavated in rocky soil. We saw this portion nearly completed to its full depth; blasting was still in progress, and some thousands of labourers were finishing off the work to have all in readiness for letting in the waters of the Red Sea on the 15th August. At the extremity of M. Batissol's section a *deversoir*, or temporary weir, was in course of construction for regulating the admittance of the waters of the Red Sea, with a view to prevent the sudden rushing in of a body of water large enough to injure the newly formed Canal banks. Between this and Suez dredgers were at work dredging the Canal to its full depth.

On the 1st of August we proceeded to Ismaïlia. At Ismaïlia we found a very neat little town, with houses surrounded by flourishing little gardens, situated on the banks of Lake Timsah, a shallow lake, through which a channel has been dredged for a continuation of the Canal. At Ismaïlia the company have shops, and there is also a pumping station for pumping fresh water to Port Saïd.

Aug. 2.—We went out to El Guise with M. De la Croix, an officer of the Company. El Guise is about five miles north of Ismaïlia, and is the heaviest cutting throughout the Canal, being 91 ft. deep to the floor. The soil is sand, the slopes of the cutting are three to one, above water level, in one long slope. The Canal is here contracted to a surface width of 202 ft., to save expense. Some dredging was still going on, though we were told the Canal had nearly its full depth. South of El Guise, a couple of miles, the Canal enters Lake Timsah.

On our return from El Guise we proceeded, in company with the chief engineer of the Ismaïlia division, to Serapeum and the Bitter Lakes. Serapeum is about nine miles from Ismaïlia. We went there in a small steamer. This section of the Canal, which has the full width of 100 metres, was nearly completed, with the exception of the last two or three miles near Serapeum, where we saw a number of dredges in full work. At Serapeum the Canal is in heavy sand cutting, and the width is contracted to 62 metres. Between Serapeum and the Bitter Lakes (a distance of three miles) much work was remaining to be done. Owing to the small depth of water in certain spots, and to the rapidity of the current, caused by the waters of the Mediterranean running into the Bitter Lakes, we left our steamer and proceeded on by horses. We found the Bitter Lakes filling in the most satisfactory manner, and already presenting the appearance of a sea. The water of the Mediterranean is admitted through a *deservoir* or kind of temporary weir constructed across a portion of the Canal slightly diverted from the main line.

Aug. 3.—We proceeded by steamer from Ismaïlia to Port Saïd by one of the regular Transit Service steamers. The whole of this portion of the Canal, 46 miles, or nearly half the entire Canal, is formed throughout, and is only short of completion by not being dredged throughout to its proper depth. The banks and slopes of cuttings are nearly all finished and dressed off. Dredgers innumerable, with their attendant "couloirs," "elevateurs," and bottom emptying and side emptying lighters are hard at work all along the Canal. Towards Port Saïd measures have been commenced for protecting the top of the slopes of the Canal from the wash caused by passing ships. Such measures will probably have to be extensively adopted throughout the Canal, and the engineers are quite prepared for the work, though they are sanguine, from observations already made, that there will be less of it required than is generally anticipated.

The new port at Saïd, which forms the entrance to the Canal from the Mediterranean, is completed; only a few dredgers were remaining at work. In the port lay an Austrian frigate, two or three large French vessels, and many English and French colliers, and other smaller vessels. A new lighthouse was in course of rapid construction, and is to be finished before November.

## FOREIGN POLICY IN CHINA.

(PALL MALL GAZETTE.)

We do not wish for a better example of the temper which most needs to be avoided in our dealings with China than the address of the American residents at Shanghai to Mr. Ross Browne. The recall of this gentleman from Peking appears to be due to his known dislike of the Chinese policy which has lately been adopted by the United States Government — there being an obvious inconvenience in having an Ambassador whose views are the exact opposite of his instructions. To console him on his departure his countrymen at Shanghai have been good enough to express their approval of his conduct since he has been in China. The spirit which pervades their address is not such as to make his successor's post at all enviable. If the new American Minister comes resolved to carry out the intentions of his Government, he is certain to be opposed by an important section of the public to which he naturally looks for support. If the framers of the address to Mr. Browne had had the honesty to defend the policy they wish to see pursued by arguments founded on self-interest, we should not have cared to quarrel with it. A distinct intimation that you covet and intend to steal your neighbour's goods is to be met, if met at all, by something else than criticism. They have chosen, however, to justify it by a hypocritical assumption of zeal for the interests of the Chinese themselves. They soar, so far as words go, to a height far above the ordinary level of business humanity. They define the true policy of foreign Powers towards China to be "one that looks towards the extension of its trade and intercourse with Western nations." But this extension is only valuable in their eyes as a step towards the "raising of China in the scale of civilisation." The vulgar notion of mercantile advantage has no place in their thoughts. It is because China is so low in civilisation—because she has neglected and forgotten the maxims of morality uttered by her own sages—that the presence of Foreigners is so indispensable. China must for her own sake be made to advance, and as this will never be done with the consent of the Chinese Government, it must be done without that consent. New treaties must be entered into, the terms of which must be settled by the "pressure of Western opinion," and the execution enforced by "the pressure of Western power." It is taking too contracted a view of the circumstances to hold that foreign Powers have merely a right to insist that China shall be civilised. They "have a clear duty in that direction." Their greater material power affects them with a moral responsibility of which they cannot divest themselves. If the Chinese Government will not "advance in a career of discreet progress," it is incumbent upon other Governments to administer the goad. This self-sacrificing theory is probably held in more or less of good faith by many people in this country as well as in the United States. It is, we presume, an undesigned tribute to the beauty of disinterestedness that these persons will not say plainly that all we have to do with China is to squeeze her as dry as possible. According to their own account they have always an *arrière pensée* in the matter. They send out gunboats, they extract concessions, they defy the central or local authorities, or play off one against the other, just as it pleases them —for the good of the Chinese themselves. They are distressed at the bare idea of what would happen to this unfortunate people if they were left to their own devices. It is our duty to Christianise and civilise them, even against their own wishes, and it is sure to turn out somehow or other that the surest means of doing this is to make them trade with us whether they will or not.

Mr. Browne's reply to the address adopts without reserve the theory put forward by his countrymen, but his better acquaintance with the subject enables him to construct a rather telling *argumentum ad hominem* from the past conduct of foreign Powers towards China. So long,

Digitized by Google

he says, as treaties with China exist they ought to be observed by the Chinese authorities; and as even the most imperfect observance of them can only be extorted under constant pressure it is idle to profess abstinence from interference in the internal affairs of the Empire. All our relations with China rest on compulsion. Of her own accord she would never have had any intercourse with us, and all Mr. Browne professes to contend is "that, having forced obligations upon her, we must compel her to observe them, or recede from the position we have undertaken to maintain." If by receding from our position Mr. Browne understands introducing considerable modifications into the existing treaties whenever an opportunity offers for revising them, we accept his dilemma. Under the policy which was till lately pursued by Great Britain, and to a lesser degree by the United States, it was considered expedient to extort concessions from the Chinese Government which were certain to remain a dead letter unless the means of insisting upon them were constantly at hand. We do not dispute the right of the Western Powers to impose what terms they pleased after a successful war. What we maintain is that experience has shown that the terms actually imposed are such as do not repay the cost of enforcing them. Mr. Browne endeavours to make out that the disputes which arise are all upon questions of interpretation, and that Christian nations are bound to adhere to what they think just, and not to what a Pagan nation thinks just. "In order to be true to our own faith we can only concede so much as may be reconcilable with the sacred duties it inculcates," these "sacred duties" being, so far as we can follow Mr. Browne's argument, all summed up in one—the opening up new markets to Christian traders. In point of fact, however, there is nothing to show that the quarrels between the Western Powers and the Chinese authorities do originate in questions of interpretation. The truer account of the matter is that the former have forced the Chinese Government to accord certain privileges to Foreigners which it would openly withdraw if it dared, and, since it does not dare to do this, will evade. Our position is that the original extortion of these privileges was a mistake. One proof that it was so has been lately supplied by the case of the missionaries. It was clearly impossible to give them a virtual safe conduct throughout the whole extent of the Chinese territory, and yet it could not be denied that the letter of the treaty of Tientsin did justify them in looking to the British Government for something very little short of this. If our intercourse with China is to be anything better than a series of little wars, we must be content to take the Chinese willingness to trade with us as the measure of our right to trade with them.

# Monetary and Commercial.

The arrival of the steamers *Achilles* and *West Indian* from Foochow, and *Ajax* and *Titania* from Shanghai, have caused some interest in the Tea market, but the trade have been very tame in their bids, and there has been consequently no excitement. There is a very general disposition on the part of importers to sell, and the consequence is that prices have given way from 1d. to 3d. as compared with first sales. Although buyers this year at Foochow acted with much greater prudence, still they did not go far enough; the teamen should have been kept off until prices were brought down to a level assimilating to home prices. However, a step has been gained in the right direction. Some of the sales of new teas leave a profit of 3d., but the great bulk leave little over cost, and some a loss, the Kaisows per *Achilles* being much mixed, and sales have been made as low as 1s. 3d. The sales this week will be a considerable test, and will comprise Kaisows and Moning Congous and Green Teas by the *Ajax*, from Shanghai. The large exports so early in the season is the great obstacle to obtaining higher rates. The export of Manchester Goods to China and Japan proceeds on a very reduced scale, and the vessels on the berth have great difficulty in loading.

The list of applications for shares in the India, Australia, and China Submarine Telegraph Company (Limited) will be closed on the 30th inst. for London, and on the 1st October for the country. In connection with this announcement it is said that the applications are already of a character and extent sufficient to ensure the establishment of the undertaking. The capital of this company, £350,000, is for the first section of the proposed lines—that is, from Point de Galle to Penang; and for this section the India-Rubber, Gutta-Percha and Telegraph Works Company have contracted to make the cable for £320,000. Should the construction of the remaining sections to China and Australia be undertaken in the future by this India, China, and Australia Company, it is said that the option of manufacturing the cable for those sections is likely also to come into the hands of the India-Rubber Company.

The report of the National Bank of India (Limited) has been issued. It states that the net profit for the half-year ending 30th June last, after providing for all charges, interest, and losses, amounts to £19,651 9s. 6d., to which has to be added £3,045 11s. 2d. brought forward from last half-year, making a total of £22,697 0s. 8d. An interim dividend at the rate of 6 per cent. per annum is recommended, carrying forward a balance of £8,777 0s. 8d. The directors state that they have decided upon establishing a branch in China, to aid the fuller development of the bank's exchange operations.

The Chartered Bank of India will declare at the next meeting a dividend of 3 per cent. for the half-year ending 30th June last.

The India Council have notified that the amount of bills on India to be tendered for on the 6th of October will be only £200,000, instead of £350,000. To that extent the demand for silver for the East will, therefore, be augmented.

The charge for six months' India and China bank bills has been advanced by the discount establishments about ¼ per cent., 3¼ being generally asked.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Sept., 1869, compared with the corresponding periods of the two preceding years:—

### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 1,603,293 yards; for the twelve months 1869, 43,937,083 yards; for the twelve months, 1868, 66,801,726 yards; for the twelve months 1867, 41,259,199 yards. Decrease for 1869 against 1868, 22,364,643 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 69,676 yards; for the twelve months 1869, 1,435,335 yards; for the twelve months, 1868, 1,943,578 yards; for the twelve months, 1867, 2,236,556 yards. Decrease for 1869 against 1868, 508,643 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 225,503 yards; for the twelve months 1869, 1,230,485 yards; for the twelve months 1868, 1,958,269 yards; for the twelve months, 1867, 820,623 yards. Decrease for 1869 against 1868, 727,784 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 57,600 lbs.; for the twelve months 1869, 4,580,822 lbs.; for the twelve months 1868, 7,175,528 lbs.; for the twelve months 1867, 5,823,704 lbs. Decrease for 1869 against 1868, 2,594,706 lbs.

VALUE.—For the month ended 16th Sept., 1869, £42,906; for the twelve months 1869, £1,182,843; for the twelve months 1868, £1,795,596; for the twelve months 1867, £1,358,731. Decrease for 1869 against 1868, £612,753.

### SHANGHAI.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 10,599,995 yards; for the twelve months 1869, 240,116,275 yards; for the twelve months 1868, 227,573,123 yards; for the twelve months 1867, 117,502,739 yards. Increase for 1869 against 1868, 12,543,152 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 1,233,840 yards; for the twelve months 1869, 11,998,302 yards; for the twelve months 1868, 8,596,871 yards; for the twelve months 1867, 10,108,061 yards. Increase for 1869 against 1868, 3,401,431 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 695,976 yards; for the twelve months 1869, 3,651,340 yards; for the twelve months 1868, 5,114,377 yards; for the twelve months 1867, 6,010,274 yards. Decrease for 1869 against 1868, 1,463,037 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 3,200 lbs.; for the twelve months 1869, 415,623 lbs.; for the twelve months 1868, 221,700 lbs.; for the twelve months 1867, 391,232 lbs. Increase for 1869 against 1868, 193,923 lbs.

VALUE.—For the month ended 16th Sept., 1869, £246,472; for the twelve months 1869, £4,466,429; for the twelve months 1868, £3,980,909; for the twelve months 1867, £2,748,825. Increase for 1869 against 1868, £485,520.

### JAPAN.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 226,000 yards; for the twelve months 1869, 17,556,928 yards; for the twelve months 1868, 24,965,156 yards; for the twelve months 1867, 16,718,530 yards. Decrease for 1869 against 1868, 7,408,228 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, *nil*; for the twelve months 1869, 1,347,835 yards; for the twelve months 1868, 2,085,051 yards; for the twelve months 1867, 3,062,796 yards. Decrease for 1869 against 1868, 737,216 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, *nil*; for the twelve months 1869, 816,788 yards; for the twelve months 1868, 561,007 yards; for the twelve months 1867, 733,592 yards. Increase for 1869 against 1868, 255,781 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 50 lbs.; for the twelve months 1869, 5,703,784 lbs.; for the twelve months 1868, 4,408,841 lbs.; for the twelve months 1867, 2,205,879 lbs. Increase for 1869 against 1868, 1,294,943 lbs.

VALUE.—For the month ended 16th Sept., 1869, £3,875; for the twelve months 1869, £720,527; for the twelve months 1868, £654,978; for the twelve months 1867, £619,081. Decrease for 1869 against 1868, £34,441.

### SINGAPORE AND PENANG.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 2,854,251 yards; for the twelve months 1869, 45,630,701 yards; for the twelve months 1868, 58,243,579 yards; for the twelve months 1867, 55,769,728 yards. Decrease for 1869 against 1868, 12,612,878 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 237,550 yards; for the twelve months 1869, 4,796,174 yards; for the twelve months 1868, 4,997,156 yards; for the twelve months 1867, 10,057,380 yards. Decrease for 1869 against 1868, 200,982 yards.

Digitized by Google

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 91,608 yards; for the twelve months 1869, 2,996,492 yards; for the twelve months 1868, 2,443,007 yards; for the twelve months 1867, 4,741,455 yards. Increase for 1869 against 1868, 553,485 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 61,630 lbs.; for the twelve months 1869, 1,305,950 lbs.; for the twelve months 1868, 2,229,408 lbs.: for the twelve months 1867, 2,424,053 lbs. Decrease for 1869 against 1868, 923,538 lbs.

VALUE.—For the month ended 16th Sept., 1869, £41,598; for the twelve months 1869, £1,001,476; for the twelve months 1868, £1,217,022 for the twelve months 1867, £1,654,517. Decrease for 1869 against 1868, £115,546.

### BATAVIA.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 1,371,534 yards; for the twelve months 1869, 11,946,852 yards; for the twelve months 1868, 18,839,793 yards; for the twelve months 1867, 25,100,396 yards. Decrease for 1869 against 1868, 6,892,941 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 127,537 yards; for the twelve months 1869, 7,154,677 yards; for the twelve months 1868, 7,691,654 yards; for the twelve months 1867, 15,339,072 yards. Decrease for 1869 against 1868, 536,977 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 811,545 yards; for the twelve months 1869, 4,639,315 yards; for the twelve months 1868, 6,965,265 yards; for the twelve months 1867, 15,405,448 yards. Decrease for 1869 against 1868, 2,325,950 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 81,695 lbs.; for the twelve months 1869, 391,255 lbs.; for the twelve months 1868, 665,000 lbs.; for the twelve months 1867, 707,173 lbs. Decrease for 1869 against 1868, 273,745 lbs.

VALUE.—For the month ended 16th Sept., 1869, £63,623; for the twelve months 1869, £512,899; for the twelve months, 1868, £724,995; for the twelve months 1867, £1,306,449. Decrease for 1869 against 1868, £212,096.

### MANILA.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869, 461,688 yards; for the twelve months 1869, 14,804,425 yards; for the twelve months 1868, 17,314,121 yards; for the twelve months 1867, 16,692,275 yards. Decrease for 1869 against 1868, 2,509,696 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 508,035 yards; for the twelve months 1869, 12,565,683 yards; for the twelve months 1868, 12,767,487 yards; for the twelve months 1867, 18,260,703 yards. Decrease for 1869 against 1868, 201,804 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 24,100 yards; for the twelve months 1869, 1,280,042 yards; for the twelve months 1868, 880,950 yards; for the twelve months 1867, 867,457 yards. Increase for 1869 against 1868, 399,092 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 6,000 lbs.; for the twelve months 1869, 201,044 lbs.; for the twelve months 1868, 341,833 lbs.; for the twelve months 1867, 177,356 lbs. Decrease for 1869 against 1868, 140,789 lbs.

VALUE.—For the month ended 16th Sept., 1869, £22,420; for the twelve months 1869, £578,966; for the twelve months 1868, £145,678; for the twelve months 1867, £903,167. Decrease for 1869 against 1868, £166,712.

### CEYLON.

PLAIN COTTONS.—Export for the month ended 16th Sept., 1869. 1,349,324 yards; for the twelve months 1869, 20,584,993 yards; for the twelve months 1868, 23,874,832 yards; for the twelve months 1867, 18,652,887 yards. Decrease for 1869 against 1868, 3,289,839 yards.

COLOURED COTTONS.—Export for the month ended 16th Sept., 1869, 65,301 yards; for the twelve months 1869, 1,043,612 yards; for the twelve months 1868, 740,440 yards; for the twelve months 1867, 1,379,305 yards. Increase for 1869 against 1868, 303,172 yards.

PRINTED COTTONS.—Export for the month ended 16th Sept., 1869, 826,070 yards; for the twelve months, 1869, 3,313,279 yards; for the twelve months 1868, 1,794,061 yds.; for the twelve months 1867, 2,789,788 yards. Increase for 1869 against 1868, 1,519,218 yards.

COTTON YARN.—Export for the month ended 16th Sept., 1869, 89,382 lbs.; for the twelve months 1869, 335,642 lbs.; for the twelve months 1868, 518,637 lbs.; for the twelve months 1867, 288,800 lbs. Decrease for 1869 against 1868, 182,995 lbs.

VALUE.—For the month ended 16th Sept., 1869, £41,506; for the twelve months 1869, £461,884; for the twelve months 1868, £473,802; for the twelve months 1867, £535,685. Decrease for 1869 against 1868, £11,918.

## ARTICLES OF IMPORT.

### TEA.

Messrs. A. Capel and Co.'s Report is as follows:—

The market during the fortnight has been much depressed. The large arrivals of new Tea so early have interfered with the demand for old season's, and, as importers have been anxious in many cases to realise, the few sales made have been at lower prices, whilst, at public auction, nearly 25,000 packages of old Teas have been offered without reserve, many parcels being second-hand Teas, and selling at easier rates. The first steamer, the Achilles, with Foochow Teas has arrived, bringing over 2,000,000 lbs. weight. The Teas, with few exceptions, compare unfavourably with the Monings; still, a fair proportion has been sold, common to fair, 1s. 1¾d. to 1s. 4d.; good quality, 1s. 6d. to 1s. 10d.; and fine to finest, 1s. 11d. to 2s. 7d. Pak Lin, in boxes, 2s. to 2s. 3d. for good to fine kinds. Souchongs have been inferior; prices have ranged from 1s. 10½d. to 2s. 4d. per lb., the latter for boxes. Fine Flowery Pekoe has been sold over 4s. per lb.; Orange Pekoes from 1s. 9d. to 1s. 11d. for good, and 2s. 2d. to 2s. 4d. for fine to finest. Oolongs have been sold from 1s. 7d. to 2s. 2d. per lb. The opening prices for good kinds are not now obtainable. The public sales of the 21st. inst. comprised 25,337 packages, of which 21,506 packages were printed without reserve.

Siftings have sold rather lower; also broken-leaf kinds. Fair to good common show a reduction of ¼d. per lb., the price being 1s. 1d. to 1s. 1½d. per lb. Fair to good flavoury kinds have sold ¼d. to 1d. per lb. lower, and only in small parcels. Good to fine Kaisows, of old season, have been neglected, and prices are somewhat nominal. Pak Lins, in half-chests and boxes, have sold 1d. to 2d. per lb. lower. Amoy kinds have been sold at 1s. 0¾d. per lb. Good common black-leaf kinds have been less in demand, and the price must be quoted 1s. 1½d. to 1s. 1¾d., being ¼d. to ½d. per lb. decline. Fair to good and fine, of old season, have been neglected, and the few sales made have been at 1d. to 1½d. per lb. reduction. The new season's good quality has been sold from 1s. 6½d. to 1s. 8d., fine 1s. 9d. to 2s., finest 2s. 2d. to 2s. 6d. for chests, and 2s. 8d. to 2s. 11¾d. for half-chests, showing lower prices for all but the finest, which have commanded exceptionally high rates for export, owing to their scarcity. New-make kinds show but little alteration, but the demand is inactive. Oolongs of old import remain most unsaleable, except under Common Congou prices. Souchongs show no change, the sales having been very small. Old Flowery Pekoes have been in request, with but few on offer. Scented Teas: Common spurious Capers have sold at 7d. per lb.; fair to good have been sold at about previous prices. Orange Pekoes: Canton kinds show no material alteration. Foochow kinds: Fair to good have sold from 1s. 2d. to 1s. 6d. per lb., being former prices. In Uncoloured Japan there has been nothing of interest to report. In Green Teas since the sale of the small quantity of fine Ping Suey, per Nestor, there has not been much done, and prices show no change.

The following is from Messrs. Shepard, Harrison, and Rehden's Circular:—A steady business has been transacted since our report of 8th inst. At a public sale, without reserve, held 13th inst., consisting of 3,000 chests and 1,200 half-chests new season's Black-leaf Congou, ex Nestor, extreme prices were paid for extra fine quality, one parcel of half-chests, taken for export, realising up to 2s. 11¾d., other grades also sold well, but generally at loss on import cost. The steamer Achilles, from Foo Chow, arrived 16th inst. with the first cargo of new season's Red-leaf Congou. The quality is not liked, but we believe does not represent an average of the crop, as 10,000,000 lbs. had been shipped before this steamer left. The sales, so far, have been unusually small, and at most irregular prices, some parcels giving good profits, others barely covering cost. There is a general demand for finest quality, which is very scarce, and 2s. 5d. to 2s. 8d. has been paid for half-chests, and 2s. 10d. per lb. for boxes. Buyers for the Russian market continue to give attention only to truly fine quality. To Canada no business has been done, advices not being of a favourable nature. Of red leaf the inferior to good flavoury kinds have sold at rates favouring the buyer, though we do not alter quotations of 1s. 1d. to 1s. 1¼d. per lb.; in other grades of old Season's transactions have been very small. New Season's 1869-70 have sold most irregularly, ranging from 1s. 3½d. to 1s. 9d. for burnt Kaisow kinds, and brisk Sayune, 1s. 10d. to 2s. 3d. per lb. for medium to fine Kaisow, and at 2s. 4d. to 2s. 10d. per lb. for small lots of finest and extra fine. Pak Lin kinds, boxes at 1s. 10d. to 2s. 2d. per lb. for medium quality; no finest to hand. Black leaf: Good common has been in small supply, at 1s. 1¾d. per lb., preferable kinds, at 1s. 1¾d. to 1s. 2¼d., are the turn easier; fine and finest of 1868-9 growth not saleable over 1s. 6d. per lb. New Season's Oonams have sold at 1s. 6¼d. to 1s. 8d. per lb.; Oopacks, 1s. 7¼d. to 1s. 9½d., and best quality of this class show sterling value; Oonfas at 1d. per lb. decline, and range from 1s. 10d. to 2s. for fine; 2s. 1d. to 2s. 4d. per lb. for finest. Extra fine kinds, mostly Ningchow district, suitable for export, have sold at fancy prices, up to 2s. 11¾d. per lb. Souchong: the new season's are tarry, of medium quality, and a few have sold at 1s. 8d. to 1s. 11d. per lb. Oolong, new, with strength and pungency, has sold in small lots at 1s. 7d. to 2s. per lb., but undesirable kinds are unsaleable, except on a par with old season's. Scented tea: Canton Orange Pekoe has maintained the improvement lately advised, as the supply available and quantity afloat is very small. Caper: Several parcels fine and finest, of last season's growth, have sold at very good prices up to 2s. per lb.; common and medium show no change. Foo Chow Orange Pekoe, new, has sold at 1s. 9d. to 2s. 2d. per lb., and Caper at 1s. 8d. to 1s. 10d. per lb.

### SILK.

There has been a slight improvement in the market since the date of our last, more especially in Chinas and Japans, and a fair amount of business has been done at very firm rates; best chop 3rd Tsatlees show a trifling advance, 29s. to 29s. 6d. having been paid for some of the best chops, but other classes remain unchanged, and are as last quoted. The principal enquiry has been for Tsatlees at 22s. 6d. to 23s. 6d., and of such class there is very little desirable now offering. Importers are very firm, and the general opinion, that the total export from China this season will not exceed 42,000 bales, makes them but little disposed to sell their new arrivals except at full rates. In Japan Silk there has been more doing, and the low price of some large parcels of mixed Mybash has tempted buyers to operate. In Cantons ordinary Tsatlee reels have been sold at 19s. 6d. to 20s.; Loongcongs at from 19s. 6d. to 22s. 6d. for fair to "extra." The deliveries from 1st to 21st inst. do not show any improvement upon the previous month, being of China 1,989; Canton, 308; Japan, 298; Bengal, 253; total, 2,848 bales.

#### THE CONTINENTAL MARKETS.

The Lyons silk market, like all other markets, has been affected by the late condition of the Paris and other Bourses, and scarcely any business has been done. What demand there was fell to the share of the holders of Asiatic silk; the produce of Europe was offered with such evident anxiety to sell that buyers would hardly touch it; so little confidence is felt in commercial affairs that no one had the temerity to buy for stock, and each took only what his immediate wants rendered necessary. At Marseilles the market remains very dull; there have been a few dealings in fine silk of the first quality, but no purchasers have been found either for co-

Digitized by Google

coons or for waste. Some imports from China have recently added to the stock and given a little animation to the markets. In Piedmont it appears that the number of silkworms reared this year has not been sensibly larger than in 1868, and towards the end of the period for the purchase of eggs the holders could not get rid of them except at the very lowest rates, while the purchasers who had not carefully calculated the probable price of mulberry leaves for late rearing found them so dear that they were compelled to sacrifice half the young worms that had been hatched, thus leaving themselves with the burden of full expenses with a half-average crop. Still, it appears that the cocoons were generally tolerably abundant, but they were very small, thin, and light, and the silk obtained from them is no better nor stronger than it was last year. Thus it is evident that the prospects of the European silk producer can scarcely be said to have mended. It is admitted generally that Japanese eggs, and even those reproduced in Europe, have yielded better results than any other kinds. As to actual prices, they seem at present to be tending downwards, in spite of the poverty of the crop of silk, partly on account of the small demand, and partly because of the uncertainty which still exists respecting the value of the cocoons in the other silk-producing countries of Italy. On the whole, the prospect is in favour of Eastern commerce.

## COFFEE.

There is scarcely any change to note in the market for Ceylon descriptions. A moderate quantity of Plantation has been offered at the public sales, which was taken off readily at former prices. The offers of Native at the auctions have been small, the principal business done having again been by private contract. Good Campar Singapore has realised 50s. to 50s. 6d., mixed 48s. 6d., and a parcel of small Manila has been offered and bought in at 57s. to 65s. The arrivals from Ceylon have been very heavy, and the market has sustained prices.

The latest advices from Brazil state that dealers were firm in their demands, especially for the better sorts, notwithstanding continued unfavourable advices from consuming countries and a slight increase in supplies from the interior. Supplies averaged very nearly 7,000 bags per diem, and the stock was estimated at 100,000 bags :—Washed, 7,600 to 10,000 reis; fine superior, 8,400 to 8,800 reis; superior, 7,800 to 8,000 reis; good firsts, 7,200 to 7,500 reis; ordinary firsts, 5,800 to 6,800 reis; good seconds, 5,000 to 5,400 reis; ordinary seconds, 4,000 to 5,000 reis.

[From our next issue the report on Coffee will include particulars of sales from the various estates in Ceylon, Stocks, Home Consumption, Imports and Exports, and all statistics, as well as the latest from Brazil.]

COTTON.—A slightly improved tone was manifested in the Liverpool market immediately after the departure of the last mail, but it was only of a temporary character, and for the past ten days there has been extreme dulness. The supplies of Cotton offering upon the market are still much in excess of the demand, and there appears to be an increasing desire on the part of holders to press sales. The following are the current quotations:—Surat 8¼d. to 11d.; Bengal, Scinde, &c., 8⅞d., to 9d.; Middling Uplands, 12⅛d.; Middling Orleans, 13d.; fair Dhollerah, 10d.; fair Oomrawnttee, 10d.; fair Broach, 10d.; fair Pernam., 13⅜d.; fair Egyptian, 13⅜d.; fair Smyrna, 10⅜d.; fair Bengal, 8¼d. The London market is extremely languid, and prices are considerably lower than at the date of our last report.

CAMPHOR.—There has been a moderate business in China and Japan at unchanged rates.

COCOA-NUT OIL.—There is a firm but quiet market generally; a fair amount of business has been transacted in Ceylon at an advance of about 6d. per ton.

GALLS.—An improved demand has led to an increased business; prices for China are unaltered, but for Japan there has been an advance of 20s. to 30s. per cwt.; the market closes firm.

GUMS.—Benjamin: Flat; of 110 cases Sumatra at auction a few only sold at £8 2s. 6d. to £8 12s. 6d. per cwt. for false-packed 2nd quality, and £5 middling 3rd. Copal: Firm; but of 90 cases at auction a few only sold at 46s. per cwt. for good hard. Damar: Firm; 28 cases at auction retired. Gamboge: Quiet; 15 cases at auction retired.

INDIA-RUBBER.—No business in East India.

JAPAN WAX.—Prices have slightly advanced, and there is a fair business doing at the improved rates, the demand being slightly in excess of the supply.

MANILA HEMP.—There is a fair demand at the public sales at the current quotations, while privately a fair extent of busines is reported at £52 10s. to £54 per ton for fair and good roping, and at £56 for superior quality.

MUSK.—Steady at the previous value; of 49 caddies Tonquin at auction about half sold at 30s. to 32s. per oz. for good, 17s. to 17s. 6d. ordinary, and 11s. to 13s. 6d. pickings; of 7 tins Grain, two fine sold at 55s. to 58s.

PLUMBAGO.—The market for Ceylon is flat at previous prices; the sales since our last have amounted to only 254 barrels.

PEPPER.—Black is scarcely so firm or active as when we last reported; private operations moderate, and of 12,907 bags Penang at auction, half sold at 4d. to 4⅛d. per lb., with Trang at 4⅛d. to 4⅜d. White: Firm; 356 bags Singapore at auction sold at 5⅞d. to 6d. per lb., and 24 bags Penang at 5¾d.

RATTANS.—The market is extremely flat; 10,690 bundles Singapore have been offered and withdrawn.

RICE.—The demand is still very limited, and quotations are unaltered, with the exception of an advance of 6d. in Rangoon. At the public sales about 10,000 bags have been sold at full prices, good white Bengal 12s. 4½d. to 12s. 6d., ordinary 8s. to 8s. 9d., Madras 8s. 10½d. Field Siam 7s. 4½d. Floating cargoes attract some notice, and the following are reported sold,—one of 1,370 tons, Moulmein (arrived) at 10s. ex ship, another 1,160 tons at 10s. 9d. for Liverpool, quay terms, 400 tons (part of a cargo) Rangoon at 9s. 3d. ex ship, two of Bassein, together 1,480 tons, at 9s. 3d. for the Continent, and one of Rangoon at 9s. 6d. for the Continent.

RHUBARB.—The market for China continues very flat; of 117 chests at auction, one-third sold at 2s. 7d. to 4s. 6d. per lb. for middling to good, and 1s. 1d. to 1s. 4d. ordinary.

SUGAR.—Prices for Manila are slightly lower, owing to there being less inquiry, and the business generally has been very limited. In Penang, China, Java, and Siam there has been scarcely any business.

SPICES.—Cassia Lignea: Steady, with limited trade upon former terms. Buds: Limited transactions at previous prices. Cinnamon: The demand for Ceylon continues very strong, and prices have further risen 3d. per lb.; 46 bales sold at auction, and limited sales made privately; Chips are also 1d. to 2d. dearer; 1,144 bags sold at 4½d. to 9d. low to fair. Cloves: Penang firm; 4 cases sold at auction at 11d. per ld.; Zanzibar steady; 1,326 bags at auction sold at 2⅞d. to 3d.; 4,880 pockets and 334 bags Clove Stems retired at 1⅜d. Mace: Again dearer; of 14 cases Penang and 10 packages Batavia at auction, the greater portion sold at 3s. 2d. to 4s. 2d. per lb. for middling red to fair palish; and 2s. 6d. ordinary. Nutmegs: Good business done subsequently to our last at the recent advance, at which holders are still generally firm, but at which there is no immediate demand; of 75 cases Penang at auction one fourth sold at 2s. 3d. to 3s. 9d. per lb. for medium to fair bold.

TIN.—The market for Straits is firm, with a moderate business at £131 to £131 10s. on the spot and £130 afloat, being 10s. lower than our last quotations. Banca is quoted £135 to £136 per ton.

### POSTSCRIPT.

TEA.—The public sales have been closed, and show a fall of 1d. to 3d. on new season's; a parcel of Congou, by overland, sold at 1s. 4½d. to 1s. 4⅝d. Great discussion exists on the course pursued by Messrs. Thorne in placing new teas in public sale. A sale is announced next week of teas ex Ajax, Titania, &c., a large proportion being greens. The Circular of Messrs. Kinnear and Co. says:—The Foochow teas ex Achilles are considered very inferior in quality, and on this account the bulk of the cargo moves off slowly, pending further arrivals from that port. Some of the best Kaisows have realised 2s. 5d. to 2s. 8d., and a parcel of boxes 2s. 10d.; flavoury kinds, 1s. 3½d. to 1s. 9d. for good medium Kaisow. Paklings share in the general inferiority of the crop; a few have been sold at 1s. 9d. to 2s. 3d. per lb.

SILK.—Market flat; small sales at our quotations.

COFFEE.—Sales of Ceylon have been made at full rates, and 1s. advance for good colourey sorts, notwithstanding the heavy arrivals.

HEMP.—Manila: Good roping sold at £54, common brown £49.

SAPANWOOD.—No demand; Ceylon sold at £2.

ISINGLASS.—41 cases Penang chiefly sold, middling tongue 3s. 6d. to 3s. 7d., ordinary thin and dark 3s. 2d. to 3s. 5d., low 2s. 11d., pickings 2s. 7d., good leaf 4s. 1d., middling to fair 3s. 10d. to 4s., ordinary 3s., good Manila sort 2s. 5d. to 2s. 6d.

JAPAN WAX.—Saucer bought in at £4 5s.

RATTANS.—Penang 3s. 3d. to 4s. 7d.; sales of 4,000 bundles. Siam: Arrivals on hand. Singapore Canes: 20,000 sold at 3s. 8d.

PLUMBAGO.—Sales of Ceylon; good bright lump at 20s. to 23s.

RICE.—Sales of Field Siam at 7s. 4d.; Rangoon, new, 9s. 9d.

CINNAMON.—Sales, Ceylon 1st sort, at 3s. 5d. to 3s. 10d.; second, 3s. 3d. to 3s. 6d.

# ARTICLES OF EXPORT.

## METALS.

Since the date of our last the Metal Market has continued very quiet and there is no change to report.

## MANCHESTER GOODS.

The depression prevailing at the date of our last is more marked, with increased pressure to sell, more especially India and China qualities of 39 inch Shirtings, and it is not difficult to place orders under current quotations for the above descriptions. Yarns also show further weakness, but, with the exception of sorts taken more especially for home use, there is scarcely an equal extent of reduction to be obtained as on goods.

TEMPLAR, Manila to New York, July 19, off Cape of Good Hope.

## FREIGHTS AND CHARTERS.

There is a great depression in the freight market, exports being on a very reduced scale. The rates are nominally as follows:—

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osako: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £43. For Hong Kong: £34. For Singapore: £25. For Batavia: £17. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. To Chefoo: £2 2s. For Shanghai: £2 2s. 6d. For Hong Kong: £1 13s. For Singapore: £1 4s. For Galle: £1 4s.

The Admiralty have invited tenders for the conveyance of about 52 tons stores to Hong Kong.

## CASUALTIES.

The Silome, Davidson, from Sunderland to Japan, anchored in the Downs Sept. 19, and was supplied with an anchor and 45 fathoms of chain, in lieu of others lost during the previous night, when off the North Foreland.

The Warwick, from Colombo to London, was spoken Aug. 14, in lat. 35 S., long. 22 E., with loss of maintopmast.

## MISCELLANEOUS.

At MADEIRA.—Sept. 14, West Indian (s.s.), Miller, from China, for London.

At ST. HELENA.—Aug. 15, Nelly, Poilbut, from Macao, and sailed 16 for Havana; 19, Elmina Piera, from Batavia, and sailed 20 for Amsterdam; 20, Aurelia, Baker, from Singapore, and sailed for Boston; 21, Isaure, Bolibo, from Penang, and sailed 24 for Marseilles; 22, Lady Louisa, Kier, from Bangkok, and sailed 23 for the United Kingdom; Aletta Augusta, Tinholt, from Tjilatjap, and sailed 23 for Rotterdam; 23, Anna and Sophia, Hoekstra, from Batavia, and sailed for Amsterdam; Stirlingshire, M'Culloch, from Zebu, and sailed for London; 24, Rusoer, Pedersen, from Sarawak, and sailed 25 for London; 25, Johanna, Antonio, Withof, from Batavia, and sailed 26 for Rotterdam; Utrecht, Kramers (late Hoogenstraaten), from Batavia, and sailed 27 for Rotterdam; 26, Nestor, Brandligt, from Batavia.

Off ST. HELENA.—Aug. 14, Eastham and Allegonda Jacoba, both from Batavia for Amsterdam; 20, Salado, from Penang, for London; 21, Titania, from Shanghai, for London.

Off CAPE RECIFE.—Aug. 3, Johanna Antonia, from Batavia.

At TABLE BAY.—Aug. 14, Gustav, Schulle, sailed for Shanghai.

Off FISH POINT.—July 31, Southern Cross, from Manila, for London.

Off CAPE AGULHAS.—Aug. 4, Crested Wave, from Nagasaki, for New York.

Off BIRD ISLAND.—July 10, ship No. 0,143, 3rd dp., Philippine Islands to Falmouth, eighty days out.

The Admiral de Winter, of Rotterdam, Dill, which sailed from Banjoewangie Jan. 22 last, with produce for Rotterdam, and was spoken Feb. 8, in lat. 21 S., lon. 99 E., has been posted at Lloyd's as not having since been heard of.

The Padang Packet, Huidekoper, for Padang, put back, Sept. 15, to Dungeness Roads.

NEW STEAMER.—Messrs. M'Millan and Sons, of Dumbarton, are building a composite screw-steamer for the China trade, for a company of gentlemen recently formed in Glasgow. She is intended merely as an experiment, and if she turns out successful the builders are confident that large orders will immediately follow. The Eastern Niles, by which name the vessel will be known, has been built in an unprecedentedly short time, having only been two months on the ways, and will be handed over to the owners in another month from now. Her dimensions are—length of keel 171 feet, breadth moulded 25 feet 3 inches, depth of hold 19 feet 6 inches, and tonnage 600 registered. Her engines, which are being made by an eminent Glasgow firm, are to be of 130-horse power. She is to be fitted up to carry thirty passengers, and with that view a handsome saloon built of polished bird's-eye maple, and lighted from the deck by means of a large skylight of plated stained glass, is being provided. The saloon will be handsomely upholstered, and selfish indeed will be the being who desires more comforts on board ship than will be found in the Eastern Niles. For the accommodation of smokers a large and admirably-fitted up room is provided on deck, to which access will be gained from the saloon. The vessel has a collision bulkhead, a bulkhead on each side of her engines, and an after bulkhead, so that every precaution has been made to secure her safety. She is a spardecked boat, has a rounded stern and a clipper bow, and will be brig-rigged. Her masts will be of wood, the rigging being of Newall's patent wire rope. She will be launched on the 28th of this month.

THE "LISMORE."—Result of the trial trip of the steamship Lismore, Captain Morrison, built by Messrs. Denny and Bros., Dumbarton, for Messrs. Jardine, Matheson, and Co., which recently sailed for China:—The draught was 9½ feet; total weight on board, 372 tons; diameter of cylinders, 36 inches; mean pressure of steam, 20½; number of revolutions, 89¾; indicated horse power, 625. Under these conditions a mean speed was attained of nearly eleven miles an hour, with fair weather, a light wind, and a calm sea.

THE "ACHILLES" AND "TITANIA."—The steamer *Achilles* has made the passage from Foochow in 62 days, and the clipper *Titania*, Capt. Burgoyne, belonging to Messrs. Shaw, Maxton, and Co., in 96 days. The *Titania* is the first of the clippers with the new season's Teas, and the passage is one of the best on record against the S.W. monsoon.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES, A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200.000.

THE *London and China Express* ON SALE.

## HOLLOWAY'S OINTMENT and PILLS

—DYSPEPSIA, JAUNDICE.—These complaints are the result of a disordered liver, which secretes bile in quality or quantity incapable of digesting food. Digestion requires a free flow of healthy bile, to insure which Holloway's Pills and Ointment have long been famous, far eclipsing every other medicine. Food, irregularity of living, climates, and other causes are constantly throwing the liver into disorder; but that important organ can under all circumstances soon be regulated and healthily adjusted by Holloway's Pills and Ointment, which act directly upon its vital secretion. The Ointment, rubbed upon the skin, penetrates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed; a cure will soon follow.

To Singapore: Mr. R. C. Smith, Mr. J. Ogilvie. To Penang: Mr. G. M. Sandilands. To Ceylon: Mr. Garbutt, Mr. W. C. Brodie, Miss Payne, Mrs. Longley, Mr. H. D. Cunningham.

Per P. and O. steamer from Suez, Oct. 31.—To Hong Kong: Mr, H. G. Allen.

Per P. and O. steamer *Nyanza*, from Southampton Oct. 30.—To Singapore: Mr. P. McMaster To Ceylon: Mr. and Mrs. Carson, Mr. E. Layard, Mr. R. A. B. Dobree.

Per P. and O. steamer *Bangalore*, from Marseilles, Nov. 7.—To Hong Kong: Mrs. Pauncefote, Mr. A. Bazley. To Ceylon: Mr. and Mrs. St. Albin.

Per P. and O. steamer from Suez. Nov. 14. To Batavia: Mr. Wilmer

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Dates by the present mail are down to the 9th August. By telegram they reach to the 31st., and announce the arrival of the Duke of Edinburgh on the 29th August. In our issue of the 20th ult. we gave some particulars of the arrangements made for his reception. A meeting was held, comprising the Rev. M. B. Bailey, Messrs. Dunlop, Wilkin, McDonald, Shand, Simpson, Dallas, Black, Pitman, Campbell, Marcus, Watkins, Jaffray, Eyton, Milsom, Rickerby, Vernede, Dalziel, Marshall, Robison and Robertson, to consider the proper course to adopt. Mr. Bailey took the chair. Several propositions were laid before the meeting, but the following was adopted :—

Proposed by Mr. Wilkin, seconded by Mr. Simpson :—

"That in view of the approaching visit of H.R.H. the Duke of Edinburgh, the British community of Yokohama desires to receive him with such welcome as is due to the son of their Queen."

The Chairman considered it due to himself and other gentlemen who had acted with him to state, as it had been asserted that the present mode of action was objected to by the officials, that Mr. Dalziel, Mr. Whittall, and himself had waited on Sir Harry Parkes by appointment, and that Mr. Aspinall was to have gone with them, but was unable through illness, and that the statement that it was objected to by Sir Harry was false. He quite approved of an address being presented by the community, but agreed with the gentleman whom he received that it was extremely difficult to see, under the circumstances of this community, what manner of public entertainment could be given.

Mr. Simpson moved, and Mr. Shand seconded—

"That an address of welcome from the British residents be delivered to his Royal Highness on his arrival, or at his convenience."

Proposed by Mr. Black, seconded by Mr. Dallas—

"That a committee of twelve be appointed by ballot, to be now taken, to draw up the address, obtain signatures, and present it in the name of their fellow countrymen."

Mr. McDonald moved the next resolution. It was one that seemed desirable in case the Prince's engagements should allow of anything further being done to entertain him. He feared that it was hardly likely that the resolution would bear fruit, but it was well to leave no stone unturned, and if it were found that anything further could be done acceptably by the community there should be persons to carry it out. He therefore moved :

"That the said committee act as a committee in waiting to devise and propose to the British residents any further method of showing to his Royal Highness and Her Majesty the loyalty and affection towards the Throne cherished by Her Majesty's subjects resident in Yokohama."

Mr. Wilkin seconded, and it was carried.

The Chairman requested Mr. Black to move the next resolution, which he did as follows :—

"That the said Committee be authorised to collect any subscriptions required for the reception or entertainment of H.R.H.,—and also that the Committee as appointed by ballot be empowered to add to their number."

Mr. Simpson seconded ; and it was carried.

A ballot having been taken for the Reception Committee, the following gentlemen were elected :—Messrs. Wilkin, Aspinall,

Digitized by Google

Bailey, Simpson, Black, McDonald, Robertson, Shand, Dalziel, Kirby, Jenkins and Jackson. Mr. Marshall declined to act.

By the steamer *Great Republic* the new American Consul for this port arrived to take the place of General Stahel. Mr. Lyon was born in Massachusetts, we hear, and of late has been in Oregon. His services as President of the Grant and Colfax Club there, and prominent position during the war as an extreme Radical, have no doubt influenced his appointment as Consul here.

The new Minister, Mr. De Long, from private information, was to leave for Japan after receiving his instructions from Washington. Our next American mail will be brought over by a new steamer, named the *Oregonian*, intended to ply on the coast of Japan, thus giving us three American steamers through the Inland sea monthly.

A beautiful little screw steamer has been launched from the yard of Messrs. Lucy and Co., of the Vulcan Foundry. She has been built to the order of Messrs. Kirby and Co., under the superintendence of Captain Robertson.

A correspondent writes us on August 9 :—

"A contract has been entered into to supply the native Government with five hundred carriages suitable for governors of towns, districts, &c, to each of whom a carriage is to be given.

"It is rumoured that the late Shicoon will soon be called to power again as 'Viceroy ;' and this we believe, as we think such a step will be necessary to enable our Minister (at present chief adviser and protector of the Daimios in power) to extract himself and friends from the political muddle they are waddling in, to the destruction of all other interests in Japan, British trade especially. Should this project be successfully carried out it will save another war in this country (which will otherwise soon break out), and, for a time at least, relieve trade from the trammels so prejudicially affecting it at present."

The Government, it is stated, have forbidden the Daimios purchasing any more steamers.

Mr. Brunton, the engineer to the Japanese Government, has notified the taving of buoys at the Yokohama anchorage and the Straits of Simonoseki. We hope the light-houses will soon follow.

The half-yearly report of the Chamber of Commerce has been published, and contains much useful information as to trade in Japan, &c.

The following items are from the *Japan Times* :—

We have absolutely no political news to give by this opportunity. The difficulties of the Government still continue as great as ever, but in both branches of the export trade there has been considerable activity, and native traders are showing more confidence in their new rulers. Nothing has been done towards the settlement of the currency question, and we must warn our friends in Europe and elsewhere against belief in the genuineness of a document put forth by our contemporaries as an important Government proclamation.

The Chamber of Commerce has had its meeting, and received its Finance Committee's report. Members seemed to receive it with satisfaction, but it appears to us that the currency question is left by it in precisely the same position as it occupied before the committee was appointed. The five main points of reform demanded are all either under consideration, or, in consequence of more important questions occupying the Government, are reserved for consideration at some future period. The committee has worked hard, and deserves the thanks it has received, but it has given no fruit.

From Hakodadi we have no news except that the people are returning to it. A letter from our correspondent there describing its appearance after being retaken, to which he refers in a subsequent private communication, has unluckily been lost. A curious instance of the inefficiency of the Consular power there is the only noticeable circumstance. A defendant in a case regarding occupation of certain premises, having received orders to quit, refused, shut himself up, and defied the Consul and all his constables. Mr. Eusden applied to Captain Ross, of H.M.S. *Pearl* for a file of marines, which he refused, and at the date of last advices the besieged party held his own. We remember Admiral Kuper, on the occasion of a false alarm in the harbour, sending an armed boat's crew on board the offending merchant vessel, and having captain and passengers, half-dressed, brought before him to be wigged. Is it at the discretion of a British senior naval officer in these waters to support the civil power, or to transgress the law himself—according to his own imperial caprice ?

It is very gratifying to see the American line getting into such good order, as exemplified by the arrival and departure to time of this week's steamers. As we have heard many an American remark, the P.M.S.S. Company began its operations in these waters three months too soon. A year and a half's unpopularity has quite sufficiently punished the error, and now that the line is in good order, at all events as regards punctuality, we may expect continual improvement and the directors an increasing share of public favour.

## HIOGO.

There is nothing of any importance from this port or Osaka. In reference to the memorial for the retention of the Consul, Mr. Abel Gower, it is stated that Sir Harry Parkes has acceded to the request, and Mr. Gower will have charge of the Consulates both at Hiogo and Osaka.

## CHINA.

—o—

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Augpst 12, 1869.

Since I closed my budget by last French mail little or nothing of interest has occurred. On the 9th inst. two telegrams, dated July 20, were received, one private, the other by Grant's trans-Mongolian line. To give you an idea of their value I subjoin a comparative statement :—

| | Grant's | | Via Kiachta. |
|---|---|---|---|
| Silk ... ... ... | Unchanged—dull' | ... | More inquiry |
| American Gold ... | 136 | ... | $133\frac{5}{8}$ |
| Cotton ... ... | $12\frac{3}{4}$ | ... | $12\frac{1}{4}$ |

The steamer *Negapatam*, which sailed for Foochow yesterday, took Tls. 41,800 of treasure.

On the 5th and 6th inst. four tea-clippers—the *Dilkoosh*, *John R. Worcester*, *Challenge*, and *Charmian*, left the port tea-laden for London, and carrying over 4,000 tons of tea.

On the 6th inst. the S.S.N. Company's steamer *Hangchow*, coming up the Yangtsze against a strong ebb, on her way from Ningpo, came into collision with and sank a lorcha, which was dropping down. The master was saved, but eleven natives were drowned. As yet the lorcha's story has only been heard ; I therefore merely state the fact, as there will of course be a legal investigation.

The Yangtsze continues to fall, and five days ago the subsidence amounted to three feet. Trade both at Hankow and Kiukiang is exceedingly dull, but is gradually mending as the flood disappears.

The annual report of the Anglo-Chinese Hospital in the English settlement has been published. It contains nothing of importance, beyond the mere statements that during the year 1868 somewhat more than 11,000 patients were prescribed for, and that 393 patients were treated within the hospital, of whom 331 were discharged cured and 10 relieved, the deaths being 52.

You have, perhaps, already seen a translation of a memorial recently addressed to the Throne by Ting Tih-chang, Futai of this province, and lately Taoutai of Shanghai, who, by the way, is said to be in imminent danger of losing his office for favour shown to Foreigners. Underneath the usual amount of rigmarole there is much truth told fearlessly. The Governor ascribes the readiness of the people to rebel exclusively to the misery—hunger and cold—in which they live, and this condition, he states, is due to the exactions of underpaid officials, who are obliged to grind the people in order to reimburse themselves in the sums paid for their situations, and make a suitable provision for their families. Ting is believed to have paid half a million of taels for his present berth, and to have been mulcted most tremendously during his recent visit to Peking, so that he at least knows all about his subject. He recommends that grain for use in the north be carried in foreign ships for the future, but of course neither this sensible suggestion, nor the others contained in his memorial, will be adopted. Yet it is well known that no more suicidal system could be adopted than that in force as regards the annual grain tribute. Much of the tribute rice is lost by leakage and wreck during the sea passage in junks. A large proportion of the freight is paid by allowing the junk owner to smuggle various dutiable articles, so that it is obviously impossible to estimate the cost of transport. Most of the rice is said to be intended for the Peking garrison, but very much more than is necessary is brought. The soldiers are paid by granary orders, but each man has to submit to a reduction of thirty per cent. on the amount of his order. This goes towards making up the quantity that would be in store but for the constant peculations of the officials. Yet even this is not found sufficient, and the rice is recklessly wetted in order to increase its weight. Much of it is thus half spoiled or entirely ruined before it reaches the consumers. But the soldiers are not the consumers. They sell their orders to the rice shops, and get a supply of millet or some other coarse grain equal to the rice (less discount) that their orders entitle them to, and in addition they receive some small pecuniary consideration. Thus the soldiers can sell their rice for a smaller sum than could merchants, who should purchase grain in the South and transport it to the capital. The upshot of the whole matter is, according to Mr. Dick, that the tribute becomes simply a trade in rice carried on by officials at a great cost to the country.

In the Supreme Court judgment was given on the 10th inst. against the owners of a cargo shipped per *Bolicia*, which cargo was hypothecated *to its full value* by the captain on bottomry bond. The judge expressed his sympathy with the owners, who were "cruelly victimised," but could not in the existing state of the law, as laid down by Lord Stowell (that " the right of hypothecation of the whole cargo is extremely natural "), do otherwise than refuse their application for a reduction on account of freights paid. They thus not only lose their cargo, but they are compelled to pay freight, and to loose the additional value of the goods arising out of that payment. You will remember that when the case first arose I sent you full particulars.

On the 9th inst. no less than 4,500 tons, tonnage of British merchant vessels, was entered at the Consulate. The vessels were four in number—*Wemmera*, *Glengyle*, *Northampton*, and *Earl Dalhousie*.

Messrs. Farnham and Co. have obtained the contract for the

Digitized by Google

new pontoons, bridges, and pier heads intended to replace the present unsightly and dangerous jetties on the English and Hongque settlements. A line of long piles is to run from one landing stage to another along the entire length of both bunds, and the forcshore will then be rapidly filled in. The health and the apppearance of our settlements will, when this plan is carried out, be found to have undergone a total change for the better.

On the 10th inst. a meeting of the supporters of an institution of which the name discloses the nature—the Shanghai Native Female School Society—was held, when it was reported that during the past year twelve girls have been under instruction at a cost of $416, the income for the same period having been $896. You will observe that this is one of the very few flourishing Shanghai societies.

A despatch from Lord Clarendon to Sir Rutherford Alcock with regard to Church support has been published. It is announced as the intention of the Government that for the future nothing will be done beyond "eking out local contributions." The reason assigned is, as we know, but as Lord Clarendon appears not to know, most curious. "In China the wealth of British mercantile establishments is doubtless far greater than what it is in most countries." In the present condition of affairs this statement is perfectly groundless, and, further, so long as the English chaplains have Consular duties assigned to them they are surely entitled to pay from the Government chest. Then, again, when the Scotch Presbyterians, English Independents, American Episcopalians, and Dissenters, to say nothing of the Catholics, are subtracted from the total sum of Church-subscribing people, very few are left to rally round the English Establishment. In Shanghai the Germans are about to build a church and import a pastor, so that here, at any rate (as the only place of which I can speak from personal knowledge), the British chaplain has a very valid claim on the Government to supplement materially the small income he derives from the English Episcopalians. If the English Church is to be represented at all here, it ought to be represented in a properly dignified manner, and really those who own allegiance to it are so few in number that they cannot, without sacrifices which they are not disposed to make, adequately remunerate the present popular chaplain. It must be remembered that almost all the necessaries of life, and all the luxuries without exception, are here to be obtained only at enormously enhanced prices. But it is right and necessary that the authorised representative of the English State Church should be "given to hospitality," if only to maintain the dignity of his office. I need not tell you how many calls there are on that hospitality in a place like Shanghai, which is on the way to everywhere. Beyond this, however, a large proportion of his flock are young men, who, but for the social ties which bind them to the chaplain, would not be members of his congregation. To these, with very much restricted resources, the chaplain is bound by a duty which it is true is dictated only by his conscience, to extend the benefit of the social and domestic influences at his command. These men are, perhaps, "local contributors," though they cannot contribute largely or even adequately, but for all that they are the people amongst whom the chaplain's mission lies. Of course he could shut himself up and live like an anchorite, but this, as I have shown, would comport neither with the dignity of his official position, nor with the standard of usefulness which he has set before him.

A return of the Protestant missionaries labouring in China has recently been issued by the editor of the *Missionary Recorder*. From it we learn that 665 agents labour at 296 chapels and 306 out-stations. Of the missionaries, 129 are ordained Foreigners, 129 are ladies, 23 are laymen, 19 are ordained natives, and 365 are lay natives. There are 5,743 Church members, and 4,389 boys and girls under instruction.

The stonework for the lighthouse on Gutzlaff Island is nearly completed, and in the course of a few days the placing of the lantern will be commenced.

The P. and O. Company are running steamers by the Inland Sea to Nagasaki, Hiogo, and Yokohama, and it is to be hoped that it will be continued, although we understand that the directors have not decided on the question as yet.

The P. and O. steamer *Malacca*, with this mail, carries 2,465 bales silk.

## HANKOW.

A letter from this place says:—The water is subsiding almost as quickly as it rose, and the "navigation" of the streets in the settlement is fast becoming impossible; so the boatmen who throve on our being water-bound will soon give place to the chair and its bearers. What a sight the settlement is just now; walls down in all directions, some houses in a worse than shaky condition, and all vegetable life, with the exception of the larger trees, gone. The effect of an August sun will not prove either beneficial or savoury, I fear. And though we have had a stiff northerly breeze for the last forty-eight hours, which has brought the thermometer from 97 deg. to 74 deg., and rendered existence bearable, the change is only a temporary one.

All down through the valley of the Yangtsze, where the embankment some few weeks ago was carried away, and where an immense quantity of rice is annually cultivated, is utterly destroyed, and famine in its worst form awaits the unfortunate country people, not only in that particular district, but hundreds of miles along the river. It is really astonishing to witness how the poor sufferers adhere to their submerged dwellings and homesteads with starvation staring them in the face. Some magnetic influence appears to fasten them to the spot. Famine prices are realised for everything procurable.

## HONG KONG.

The papers by this mail report several meetings of public companies, the Chamber of Commerce and Hong Kong and Shanghai Bank. A meeting of the Hong Kong Association has also been held, at which Mr. Rowett, of Messrs. Holliday, Wise and Co., proposed that the Association be dissolved, whilst Mr. Sharp advocated its continuation. It was finally arranged to appoint a new committee, but it is stated by the *China Mail* that this committee had declined to act, and that the Association may be considered as defunct. The meeting was attended by Messrs. Duncanson, Delbanco, Medlen, Rowett, Norton, Dulcken, Francis, Zimmern, Arnhold, Sharp (G), Dennys, Whyte, Linstead, Overbeck, Lemann, Heard (G.), Moss, Dr. O'Brien, &c. After an unsuccessful attempt to obtain Mr. Duncanson as president, Mr. Overbeck took the chair.

The Chairman having read the notice calling the meeting, in which it was stated that the purpose of calling it was to consider the scope and object of the Association, Mr. J. S. Linstead (secretary) said that the meeting had been called in consequence of a resolution passed at the last meeting, and as it had been called by the members, it was for the members to take action, as the committee's powers had expired.

After a pause, Mr. G. Sharp rose and said that as nobody appeared desirous of saying anything, he would make a few remarks in reference to the point upon which they were dismissed at last meeting, and convened at the present—viz., the scope of the Association. It was beyond question that the Association was originally formed with the primary object of removing the then greatest grievance under which the colony suffered—the military contribution—which was very clearly put in the able circular issued in November, 1867. The Association was not the same as the Hong Kong Chamber of Commerce, though it might sometimes have occasion to take up similar subjects, and run parallel, as it were, with that body. It was not the same, because Hong Kong was especially the object of the Association, while the interests of the colony and their advancement were primarily the avowed purpose for which it was originated. Now, he was of opinion that, unless they did something different from this—which could be done only by departing from the constitution of the Association—they could not do better than follow up the plan laid down by the circular, and consider that as the expressed object and defined scope of the body, both past and future, and take steps to accomplish the object, or abandon the same. And firstly, as regarded the removal of the military contribution, two years ago in England there was great difficulty in getting any member of Parliament whatever to bring forward for discussion anything connected with China. This accounted in a great measure for the painful delay; and he really believed that they had more chance now than they ever had before, as then the mere mention of anything connected with China was met with dissatisfaction.

Mr. Rowett: I propose that the Association dissolve.

Mr. Sharp again rose and sought to explain the reasons for the apparent failure of the London Association. Who, he asked, would follow the cue of Mr. George Duddell, however worthy a man he may be? Now, would Sir J. Matheson ever sit down at the same table with Mr. Duddell? No. Mr. Duddell may in many ways be a very worthy man, but not the man for this duty.

Mr. Rowett remarked that Mr. Duddell was appointed by these very same men at home. Mr. Sharp replied that he was appointed by Mr. Lapraik; and he knew that this was the great cause why things had not gone on so well. Mr. Whyte said that they might limit the period of dissolution, and give another chance to those at home. Mr. Linstead said it was no use; he had much pleasure in seconding Mr. Rowett's motion.

Mr. Sharp observed that there was a capital association in the Straits. Mr. Delbanco replied that the reason why this was so was because Mr. Horsman had so great an interest in the Straits. Mr. Sharp cited Mr. Robert Jardine's name. Mr. Delbanco replied that Mr. Robert Jardine had not the interest in Hong Kong which Mr. Horsman had in the Straits.

Mr. Norton suggested that the letters may never have reached the gentlemen named in the list; but the Secretary replied that he knew they had been delivered. Some discussion of a conversational description here followed; after which the chairman essayed to put Mr. Rowett's amendment.

Mr. Sharp implored Mr. Rowett to withdraw his amendment. They would never get rid of the Military Contribution after a resolution like that; and he was sure they were doing a wrong to the men at home. Mr. Rowett said that they could tear up the amendment if they thought they could carry on the Association. Mr. Whyte: "Oh, give it six months longer."

The amendment was then withdrawn.

Mr. Sharp's motion was then put by the Chairman, and carried by eight to three.

Mr. Francis suggested that, before they appointed a committee, they had better say what powers the committee would have. It was because of this omission that all the difficulties arose. They ought to decide what powers the committee had and what powers

Digitized by Google

would be reserved for the general body of the Association. It was not advisable that the work of an association such as this should be done by a committee, because it was for the society, by discussion and frequent meetings (which would be reported) to educate the public mind, as it were, to act as a guide to the public mind, and by continued discussion and a good deal of talk to engage the public attention upon certain subjects. Monthly meetings might be held, or meetings every quarter or two months. As for funds, they would have to be got if the Association were to be carried on. No association could carry on the object of its formation without meeting most frequently and persistently discussing those objects. The defining of the powers of the committee had better be done before the committee were elected, as some might refuse to act otherwise.

Mr. Rowett said he would not for a moment dispute but that every word that Mr. Francis had said was perfectly correct in theory, but it was perfectly impossible in fact. None would gainsay the truth of Mr. Francis's remarks about the Association guiding the committee; if the Association had taken the trouble, they could easily have done so; but they would not.

The Chairman said that it would possibly be sufficient to elect a chairman, a vice-president, and a secretary; and it would be better if the committee were to draw up rules and regulations for the Association's guidance. Mr. Sharp moved that the late committee should be requested to continue in office. Mr. Medlen having seconded this motion, it was carried by a majority.

Mr. Francis next proposed that rules should be drawn up by the committee, and presented to a general meeting within one month. Some discussion ensued as to the time, and Mr. Whyte suggested three months. Mr. Francis said that time was everything, and this was the proper time to take action in the Military Contribution question, as the five years' impost was about up; say two months. Mr. Arnold having seconded this motion, it was unanimously carried.

### THE HONG KONG AND SHANGHAI BANK.

The ordinary half-yearly meeting of the Hong Kong and Shanghai Banking Corporation was held on the 16th Aug., at the bank premises; present—Messrs. Geo. F. Heard (chairman), Helland, Rowett, Delbanco, Morgan, Hon. E. H Pollard, Sassoon, Pyke, R. S. Walker, Menke, Behre, Coxon, André, Hazeland, Lemann, Vicars, Sharpe, Wilson, Foster, Bergen, Fairbairn, Medlin, Newton, Hon. J. B. Taylor, Budde, Duncanson, E. Sharpe, Drs. Dodd, Adams, and Huyvenaar, and several others.

The Chairman read the notice calling the meeting and the report to the 30th of June last which will be found in our advertising columns. Mr. André rose to ask why the directors had not carried a portion of the balance of $116,791.51 to the reserve fund, as customary; the accounts were supposed to be closed half-yearly.

The Chairman replied that the subject had been fully discussed by the directors, and they, bearing in mind that the business of the last six months had been less profitable than heretofore, and that the prospects of the next six months were not much brighter, although it was to be hoped sufficient to pay the ordinary dividend, had so decided. It would look bad to withdraw any money from the reserve fund after it had been paid in. It of course rested with the meeting to confirm or reject the decision of the directors.

Mr. André said that it would seem curious to those reading the report in Europe. It would seem as if the bank was less flourishing than before.

The Chairman said that Mr. André could put a motion before the meeting.

Mr. Pyke here rose, and proposed that the report be adopted as it stood; this, being seconded by Mr. Foster, was almost unanimously carried.

Mr. Pyke then said he would propose that a list of shareholders be published and circulated amongst the shareholders, if not contrary to the rules of the corporation. Mr. Walker seconded the motion. The Chairman referred him to Mr. Pollard, as the legal adviser of the bank. Mr. Pollard said that such a publication was not provided for in the deed of incorporation.

Mr. Pyke: That was probably an oversight.

Mr. Pollard: Not at all. It was only in companies with or without limited liability that such a provision was made; they were, in fact, compelled to file such lists periodically. But the rule did not apply to companies or banks incorporated under charter; and as not provided for, he would object to the bank doing so. He might observe that the rules provide what documents should be open to inspection, and the list kept at the bank was one of them. Furthermore, the charter had not only been very carefully drawn up here, but had been submitted to the Lords of the Treasury, and any going beyond the document might result in trouble. He did not see or say there was any danger, but there might be.

Mr. Pyke wished the motion put. If against the wishes of the majority, he would of course have to be content. The Chairman then put the motion, and it was lost by a majority of one-third. The Chairman then stated that auditors were to be elected. Mr. Foster proposed, and Mr. Menke seconded, Messrs. Vicars and Macauley as auditors for the ensuing year. Carried unanimously.

### CHAMBER OF COMMERCE.

At the meeting of the Chamber of Commerce on the 9th August Mr. Helland took the chair. The report as read was duly passed and the following members of Committee elected for the ensuing year—the Chairman having mentioned that Messrs. Jardine, Matheson and Co. had stated their intention of rejoining the Chamber:—Hon. W. Keswick, Chairman; Hon. J. B. Taylor, Vice-Chairman; Hon. H. B. Gibb, and Messrs. Pyke, Rowett, Hitchcock, Zimmern, Heard, and Kresser.

The Hon. J. B. Taylor rose and said: I rise, Sir, to crave the attention of the Chamber to the late Mr. Consul Gibson, and after a very admirable speech proposed:—"That this Chamber desires to record its appreciation of the admirable conduct of the late Mr. Consul Gibson in bringing about a settlement in November last of the wrongs inflicted upon British subjects by the Chinese officials at Taiwan and its neigbourhood, and of at length placing our relations with that part of the Empire upon a satisfactory footing."

Mr. Pyke proposed—"That a memorial be sent to the Postmaster General, London, through the proper channel, calling attention to the entire absence of regular postal communication between this port and Foochow, and praying that some steps may be taken to remedy the serious inconvenience that now exists."

Mr. Hitchcock said he had much pleasure in seconding this resolution. He thought that, in addition to the facilities we were entitled, as a mercantile body, to demand, it would be seen, when the colonial estimates were examined, that we have the right to prefer a distinct claim. In 1868 the revenue from the Post-office amounted to $62,000, while the expenditure was $27,000. This year the expenditure was estimated at $35,000, the increase being intended to cover the increased cost entailed by the earlier delivery of some of the mails; but, even with this expenditure, a profit equal to nearly 50 per cent. was shown, and, indebted as the community were to Mr. Mitchell for the improvements he had made, and the facilities he had provided, still it must be said that he had not yet pushed his energies far enough. It was made compulsory to send letters through the post-office, but the privileges afforded did not in any manner accord with the amount paid for them by the mercantile community. The postage on a single letter, to any part of the coast, including Swatow, less than two hundred miles distant, was 8 cents, or 4d., while a single letter could be carried all over Great Britain for 1d., and all over the United States for 1½d.! The absence of a regular mail service on the coast was simply an outrage on the merchants, and it was high time that they protested. (Applause.) The coast steamer with the Foochow mail almost invariably came in late, thus entailing extra nightwork, a delay of a fortnight in the transmission of documents, and the despatch of advices which were incomplete and unsatisfactory, simply because of the limited time allowed in which to prepare them. The regulations for the transmission of mails by the French steamers also required notice. At present no mail matter could be posted on board, as in the case of the P. and O. steamer, and what was the result? Only one hour and a-half was allowed, after the arrival of the Japan steamer, for the preparation of correspondence for the last French mail, although the steamer remained several hours later in this port. The post closed at one o'clock, and the steamer did not leave until five o'clock, and solely because letters could not be posted on board up to the departure of the steamer, four valuable hours had been lost! It was impossible to get a letter on board after the closing of the mail, without a resort to smuggling, and this was an alternative to which the merchants were not at all anxious to resort. He hoped the new committee would take the matter energetically in hand, and insist upon the postal reforms and accommodations to which the commmunity were certainly entitled, in view of the unusually heavy rates of postage exacted by the authorities. (Applause.)

The motion was unanimously carried.

### THE ADDRESSES TO MR. BROWNE.

Mr. Hitchcock said that, as the mercantile community of this Colony were as much identified with the trade of all China as they were with that of Hong Kong, it was not only right, but a duty devolving upon them, that the members of this Chamber should, upon fitting occasions, take cognizance of, and comment upon the policies of the different Home Governments with respect to China. The retirement of the American Minister, the Honorable J. Ross Browne, from Peking, provided an opportunity which should not be neglected, and he therefore begged to offer the following resolution:—

"That this Chamber desires to express its entire concurrence in the sentiments embodied in the addresses of the English and American residents of Shanghai to the Hon. J. Ross Browne, late American Minister to China on the occasion of his recall, both as regards their approval of his action at Peking, and their regret at his recall; and also its endorsement of Mr. Browne's clear and forcible exposition of the present state of affairs in China, and of his views with respect to the Burlingame Mission, and the policy which should be pursued by the Home Governments in their relations with China, as set forth in his reply to the said addresses."

—If this community had only known in time of the intended departure of Mr. Browne, he had no doubt there would have been a similar address sent from Hong Kong, but as this was now out of the question, we should be guilty of negligence if some expression of this kind were not placed on record.

Proposed by Mr. Heard and seconded by the Hon. J. B. Taylor "That a copy of the foregoing resolution be sent to Mr. J. Ross Browne, to the British and American Ministers at Peking,

Digitized by Google

and to the Shanghai Chamber of Commerce." The motion was seconded by Mr. Rowett, and carried.

Mr. Hitchcock observed that the Government at Washington were in a state of total ignorance on this subject, having been completely hoodwinked by Mr. Burlingame, and it was only by such documents as these, and others, that the Hon. Mr. Browne would take home with him, that it could be dispelled. (Applause.) Mr. Heard's resolution was unanimously carried, and with a vote of thanks to the chairman the meeting then separated.

At a meeting of the Hong Kong and Whampoa Dock Company, on the 18th August, a rather stormy discussion took place. A motion to elect fresh auditors was lost, and the report (giving a dividend of six per cent. for the year) was, after some opposition, adopted. A resolution was passed to take steps for amalgamating with the Union Dock Company, if practicable.

The West Point slip was opened on the 9th inst. by hauling up the steamer *Cataluna*, but unfortunately an accident occurred and the vessel canted over, injuring her bottom. The fault, however, lay in the adjustment of the vessel on the cradle, and not in the slip itself. Strong hopes are entertained that she will be speedily got afloat.

A testimonial has been presented to Captain Clark, of the *Suwonada*, by the underwriters, for his skill in bringing the vessel into harbour on the 26th June last, after striking on an unknown rock with serious damage.

Information is to hand from Canton concerning the final results of the late expedition of H.B.M. gunboat *Bouncer* and the Chinese gunboats *An-lan* and *Sui-tsing*. It appears that the captures made on that occasion have been confiscated, and the crews have suffered the extreme penalty of the law—beheading. For the energy displayed by Captains Godsil and Stewart in bringing their cruise to so successful a termination, they have been decorated with a handsome gold medal, whilst their officers have received each a silver medal. It is understood that the commander and officers of the *Bouncer* were tendered a money consideration for the services rendered, but owing to the late instructions from the Admiralty were compelled to decline the proffered compensation.

The adjourned proceedings in the case of Lyall, Still, and Co. have been resumed in the Bankruptcy Court. The points of argument were almost precisely the same, as to the principle involved, as those recently decided by Chief Justice Smale, on the application of Mr. C. P. Henderson, Manchester. The proceeds of the goods claimed in this instance are under the same invoice-heading which governed all those cases already decided, *in re* Lyall, Still, and Co.'s bankruptcy. In this case it appears that the goods were handed to the Oriental Bank as security for advances made to the bankrupts; that the bank sold the goods and obtained the money therefor; and that a sum of $3,600, in addition, for a bill drawn by Mr. Still in London and dishonoured by Lyall, Still, and Co., was also taken out of the proceeds of the same;—the balance ($4,975.62) having been handed over to the Official Assignee on account of the bankrupt estate. Mr. Whyte (in reference to the $4,975.62) quoted a number of authorities, showing that, however mixed up money might be, a trust must be paid; and though the exact money paid for the goods could not be traced, the Court would not ask for impossibilities. Mr. Hayllar admitted the finality, subject to appeal, of the Chief Justice's decision in the *Pakwan* case touching the goods; but he contended that, regarding the balance paid to the official assignee, Lyall, Still, and Co. having once realised should have at once sent home the proceeds "in first-class bills," as per invoice heading; and the money in the hands of the Banking Corporation was not that in which the trust could be placed. His lordship reserved judgment.

The case of Druscovitch *v.* Walker has been heard in the Supreme Court. This was an action for the recovery of balance of freight on a cargo of coals per *Cleopatra*, from Cardiff, and for damages caused by a refusal to give a certificate of right delivery. The facts are these. The cargo of coals (1,219 tons) in question was shipped by Gillespie, Scott and Co. according to a contract made with the Admiralty in London. Defendant is agent for the London firm, is the consignee of the ship, and has the full command of her movements as to delivery of cargo, &c. As the coal is delivered, however, by the defendant to the Naval Storekeeper here in the Naval Store go-downs, that officer (though consignee under the bill of lading) looks to the defendant for the delivery of a certain quality of coal comparatively free of dust, in accordance with the terms of the contract with Messrs. Gillespie and Co. Of the 1,219 tons shipped, it was shown on discharge and after screening that about 100 tons were composed of coal dust; and this portion was accordingly pronounced at the Naval Yard as unfit for the service. Defendant, on this refusal, refused to give the plaintiff a certificate of delivery without qualification, and insisted upon inserting the fact therein that the coal was unusually dusty. The effect of this was, that the captain would suffer damage to the extent of £152 10s. 10d., balance of freight payable in London after presentation of the certificate of right delivery obtained here; together with £10 10s. primage or gratuity payable to the said plaintiff. The bulk of the freight had been paid in England; a fourth ($1,841.03) was admitted by defendant to be payable here, and was paid into Court; and the question narrowed itself into the damage sustained by the plantiff owing to defendant's refusal to give the certificate of delivery, viz., £163 0s. 10d.

The jury returned a verdict for the plaintiff for the total sum of $2,569.70, made up as follows:—$1,841.03, being fourth part of freight due in Hong Kong; £152 10s. 10d., being the balance of freight payable in London by a three months' bill at 4s. 5¾d., or $681.12; and £10 10s. primage, equal to $47.55.

The *Overland Trade Report* says:—How it is possible the Home Government can be so infatuated as not a see the vast injury it is allowing the country to suffer, by being cajoled out of furthering its just interests in China, is perfectly astounding, in the face of the increasing distress and depression of trade in Lancashire. With a thousand men emigating a day, and continued commercial inactivity in the manufacturing districts, the Government do not stir a finger to further the consumption of their manufactured goods in China, but permit these goods, which cannot but be of benefit to the Chinese, and upon whose manufacture the prosperity of England must mainly depend, to be excluded by illegal exactions on the part of rapacious local officials. That there has latterly been a marked increase in the consumption of manufactured goods in this country is an indication of the vast benefits that would result from the removal of existing restrictions, and the injury of the present Government is doing to the working man by its stolid and selfish indifference as to its trade with China. There is not the slightest doubt, if the rights conceded by treaty were obtained, an import trade, compared with which that at present conducted in China would be a mere trifle, could be carried on, without exhausting the legitimate demand for British manufactures, if that demand were not hampered in all directions by artificial restrictions and illegal exactions. A mercantile gentleman of large experience in this country expressed his opinion recently that, were these illegal restrictions removed, the import trade could be increased to fully ten times what it is at present within the space of three years. To judge from what has taken place where such restrictions have been known to be removed, as, for example, at Chinkiang, it would certainly appear that this estimate is not in the slightest degree beyond the mark.

The circulation of the banks is reported as follows:—

| Banks. | Average amount. | Specie in reserve. |
|---|---|---|
| Oriental Bank ... | ... $782,043 | ... $260,681 |
| Chartered Mercantile | ... 656,185 | ... 250,000 |
| Chartered ... ... | ... 375,250 | ... 130,000 |
| Hong Kong ... | ... 1,095,511 | ... 800,000 |
| Total | ... $2,908,989 | $1,440,681 |

## PHILIPPINES.

—o—

### MANILA.

From Manila the dates reach to the 12th August, but there is nothing to record beyond the mercantile quotations given in our Commercial. The American steamer *Venus* had taken the place of the *Fung Shuey*, lost at Amoy, as a regular trader between Hong Kong and Manila.

## BORNEO.

—o—

### LABUAN.

Some time ago the Governor of Labuan was invited to open the new Mosque in the town of Victoria—a handsome brick building, very creditable to the zeal and public spirit of the Mahomedan traders—and on that occasion his Excellency was presented with an address.

The Governor, Mrs. Pope Hennessy, and the other Europeans were entertained at a *dejeuner* of fruit, pastry, and sherbet, by Syed Malang and the chief Mahomedans in the garden outside the Mosque.

The news of the progress of the coal mines is satisfactory, and coal can now be obtained promptly by any calling vessel.

## JAVA.

—o—

### BATAVIA.

The railroad from Samarang to Solo was expected to be completed by the 10th August.

There seems to be no immediate prospect of the completion of the projected telegraphic line, which is, or rather was, to connect the Java lines, *via* Siac, Malacca, and Singapore, with the Indo-European lines. The posts for the wires have been set up as far as Padang, but the wires are left coiled up here and there, in place of being put on the posts; and, finally, the Governor-General has been informed by the Dutch Minister for the Colonies that no more money could be placed on the Budget for 1869 for the Sumatra telegraph.

The Court of Justice at Batavia has given an important decision on the question as to whether a policy of insurance granted on an English vessel, in an English colony, is to be construed and judged according to the English law. It was decided in the affirmative.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Dates from this port are to the 27th August; the London mail of the 16th July arrived out on the 18th August. The advices contain no items of special importance, no progress having been made with the measures under consideration by the Legislative Council. Independently of the Legislature, however, two subjects were in course of discussion—namely, the reimbursement claimed for Indian convicts, and the permission given by General Cavanagh to the Maharajah of Johore to lease his Opium Farm independently of that of Singapore. According to the *Straits Times*, the first of these questions is in a fair way of satisfactory settlement, but the same paper anticipates considerable difficulty in adjusting the dispute between the Maharajah and the Straits Government with regard to the Opium Farm.

Mr. J. D. Vaughan, the police magistrate, having returned from Europe, had resumed his duties at the Police-court. Mr. F. H. Gottlieb was doing duty as Junior Magistrate. The vacancy of head clerk in the Police-court had been given to Mr. W. D. Moore, formerly clerk to the Commissioner of Police, and Mr. Moore's post to Mr. Holloway, formerly second clerk in the Court of Requests. According to the usual practice in Government appointments the salary of the head clerk has been reduced, a system of screwing intended to show the economy of the administration.

A court of enquiry on the loss of the *Empress*, from Singapore to London, has been held, and the certificate of the master, McPherson, has been suspended for twelve months.

C. B. Waller, Esq., Commissioner of Police, Singapore, reported his arrival from Penang, and assumed charge of his office, on the 16th August.

H.M.'s steam gunboat *Midge*, Commander Rising, from England (*via* Trincomalee), *en route* to China, has arrived.

### PENANG.

The following has been published for general information :—

Notice is hereby given to all whom it may concern, that by certain treaties entered into on the 21st day of March, 1868, and 6th May, 1869, between Her Majesty the Queen of Great Britain, and his Majesty the King of Siam, the Yang de Per-Tuan of Quedah agreed to cede to Her Britannic Majesty a certain portion of his territory on the mainland of the peninsula, to the east of Province Wellesley, and the said territory having been so ceded by the said Yang de Per-Tuan, the same is thenceforth British territory, and is incorporated with, and has become a portion of Her Majesty's possessions in Province Wellesley on the mainland of the Malay Peninsula; the boundaries of the said province being thenceforth as follows :—

On the West the Sea, on the North the right bank of the River Mudah, on the South the right bank of the River Kurreean, and on the East a line running South from a spot on the right bank of the River Mudah opposite the existing Frontier-pillar at Summatool in a straight line to a point on the extreme Eastern end of the Maratajam range of Hills. Thence along the top ridge of the Punchore Hill to the existing Frontier-pillar on the right bank of the River Kurreean, about 400 English yards above and East of Bukit Tunggal.

On this interpretation the *Penang Gazette* has the following :—The long expected notification of the extension of North Province Wellesley eastward has at length been published. It leaves it somewhat uncertain from what date the annexation of the new territory took effect, as the *two* treaties referred to between Siam and Great Britain are not published. One is dated the 21st of March, 1868, and the other the 6th of May, 1869, and the notification states that the ceded territory *is* "thenceforth" British Territory. Does this mean from the former or the latter date, or is the date actually intended the 13th August instant, the addition of an initial to "henceforth" having altered and confused the meaning of the sentence? The last suggestion would appear to be well founded, for the Notification goes on to say that the new territory "*is* incorporated" with Province Wellesley, the boundaries of the Province being thenceforth (i. e. henceforth) as follows, &c. The Lieutenant Governor's second Notification of the same date appears also to be intended to fix the 13th instant as the date on which the new territory became British.

A meeting has been held with a view to make suitable arrangements to entertain the Duke of Edinburgh.

Mr. Bradford had arrived and supplemented the Hon. C. B. Plunkett as Registrar to the Supreme Court, which is an act of injustice to the latter gentleman.

## CEYLON.

The London mail of August 13 arrived out on the 6th Sept.; dates from Galle are down to that date, and from Colombo the 5th. We extract the following items from our *Telegraphic Extra*, published at Galle for the Straits, China, and Japan :—

The *Shaftesbury* called here for coals on her way from Hong Kong to Bombay. She arrived on the 28th August, and left same day.

Reuter has not been very communicative since last mail, and the wires have not been working well, so that we are almost bare of telegraphic information.

The stoppage of the Albert Assurance Company is causing a deal of excitement here, and several indignant letters have appeared in the papers on the subject.

There is considerable discussion on the change of the currency from £. s. d. to R. a. p.; but, considering that the rupee is the real currency, the measure appears to be a sensible one. There is also great difference of opinion as to the mode of raising the funds for the Galle harbour improvements; but the plan adopted is the only one which could be found practicable. The Imperial Government have always refused to undertake them.

In addition to the items given in our issue of the 27th, from the *Colombo Observer*, we find the following :—

A general meeting of the Chamber of Commerce of Colombo was held to consider the Currency question and the new Customs' ordinance. The following gentlemen were present :—Messrs. J. T. White (chairman), Geo. Wall, R. V. Dunlop, H. T. Armitage, F. Smith, C. Tatham, J. D. Robinson, T. Mackenzie, R. E. Lewis, D. Macdonald, Alfred Wise, R. Crowe, C. E. Leechman, W. Leechman, G. Hedges, C. Bischoff, S. T. Richmond, J. S. Findlay, J. B. Curtayne, and R. Dawsen.

It was also resolved that a deputation of the Chamber should wait upon his Excellency and earnestly request that the change may not be put in force until a reply is received from the Home Government. The following gentlemen were named as the deputation: Messrs. White, L. J. Mercer, R. V. Dunlop, G. Wall and F. Smith; Mr. Dunlop, we believe, requested the Secretary to withdraw his name. The following memorial to the Secretary of State for the colonies was adopted :—"To the Right Honorable Earl Granville, K. G., H. M. Principal Secretary of State for the Colonies. The memorial of the undersigned merchants and others, engaged in the trade of Ceylon humbly showeth,—That your memorialists observe that an Order in Council has been published in the Ceylon Government *Gazette* with the intention of constituting the Rupee the only legal tender in Ceylon, but altogether ignoring its relation to the currency of the island. That for more than thirty years the rupee has been paid and received without question as the equivalent of two shillings Ceylon currency. That your memorialists consider an alteration in the denomination of the currency fraught with much inconvenience if not with risk. Your memorialists therefore humbly pray that any order in Council affecting the rupee may ordain it to be a legal tender at the rate of two shillings Ceylon currency. And your memoralists, as in duty bound, will ever pray." It was resolved that the banks be requested by the Chamber to make no change in their mode of keeping accounts, and to request the support of their head offices to the request and to forward to them copies of the report and memorial. It was resolved that the co-operation of the Planters' Association and the general public be invited in order to procure the reconsideration of the proposed change in the currency.

There is a rumour that the Major-General has recommended the further reduction of the Ceylon Rifle Regiment by two companies, and that the companies at present stationed in Labuan will shortly return to Ceylon. A detachment of the 2nd Brigade Royal Artillery has arrived by the *Lincelles* from Mauritius.

We are moving slowly onwards with coffee exports, and we are now less than 18,000 cwts. from the "million." The shipments during the fortnight are 9,352 cwts. plantation and 3,780 cwts. native, a small quantity of the latter having gone to Philadelphia, and the remainder, as well as the whole of the plantation, to London, by the *Shooting Star* and the *War Cloud*. The figures now are 982,747 cwts., viz., 762,185 cwts. plantation, and 220,562 native, the former being 76,000 cwts. in excess of last year's figures to the same date, and the latter exactly 20,000 less.

| | Plantation. cwts. | Native. cwts. | Total. cwts. |
|---|---|---|---|
| Two ships for London with ... ... | 9,352 | 3,155 | 12,507 |
| One ship for Philadelphia with ... | — | 625 | 625 |
| Total three ships with ... ... | 9,352 | 3,780 | 13,132 |
| Total to 2nd Sept., 1869 ... ... | 762,185 | 220,562 | 982,747 |
| Total to 2nd Sept., 1868 ... ... | 686,714 | 240,562 | 927,276 |
| | 75,471 | 20,000 | 55,471 |

The new crop, except the early pickings already spoken of, most of which have gone to Colombo, will not begin to come in till about the middle of the month, when small parcels will make their appearance. October and November, however, will still be the busy picking months; December, January, and February, the principal months of despatch. Estates generally are looking well.

The circular of Messrs. J. Gibson, Thomson, and Co., Galle, 6th Sept., says:—"Our markets have been somewhat more animated during the fortnight as regards nearly all our articles of produce. The London berth however being still unoccupied, buyers seem disposed to hold off until they have an opportunity of getting their cargo away. The *Albert Victor*, 1,184 tons, is coming down from Colombo to load, and a considerable quantity has been booked for her already. There will still be room, however, for another vessel to take in a good portion of her cargo."

# Commercial Report.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—We have still to report a most unsatisfactory state of things in this market. A few small sales of Grey Goods and Yarns had been made, but the bulk of what little business had been done had been auction sales of damaged goods, from the numerous arrivals which had so overstocked the market. Quotations were almost unchanged:—Cotton Yarn, 16 to 24, $46 to 46.75 per picul; 28 to 32, $47 to 47.50; 38 to 42, $49 to 49.50; Grey Shirtings, 7 lbs., $2.35 to 2.40; 8 lbs., $2.75 to 2.80. The Janet Ferguson, from London, had arrived.

SHANGHAI.—Grey Shirtings: Sales of 170,000 to 190,000 pieces were reported at gradually weakening prices, and some of the goods which had thus gone into second hands were very weakly held, and will probably be resold at a decline. We quote 7 lbs. Tls. 1.94 to 1.97 per piece (few sellers), 8.4 lbs. Tls. 2.1.4 to 2.1.8 per piece, and 9 lbs. to 9.12 lbs. Tls. 2.5 to 2.9.5 per piece; at the latter figures there were but few buyers. The stock of all weights was variously estimated at 1,150,000 to 1,200,000 pieces, and was liable to increase at any date by ships overdue. T-Cloths: About 45,000 to 48,000 pieces had changed hands at nearly last rates, but the market closed very quietly, and for the finer classes a decline must be quoted. 8 lbs. 36 inch somewhat firmer, and sales of Dewhurst's M.T. reported at Tls. 2.10 per piece. Quotations, 6 lbs. Tls. 1.40 to 1.70 per piece, 7 lbs. Tls. 1.68 to 1.90 per piece, and 8 lbs. 36 inch Tls. 1.95 to 2.40 per piece, the latter price being for a special chop. Stock roughly estimated at 160,000 to 180,000 pieces. White Shirtings: The demand had been languid, and only about 4,000 pieces sold—56 reed, Tls. 2.1 to 2.1.2; 60 reed, Tls. 2.2 to 2.2.5; 64 reed, Tls. 2.3.5 to 2.4; and 66 reed, Tls. 2.5 to 2.5.2. Drills: A good inquiry existed for English and Dutch goods at prices under those last current. American goods sold at Tls.4, best at 4.0.5 per piece. Sheetings: American cloth dull of sale; English goods of full weights in moderate inquiry, at Tls. 3.2.5 to 3.3.0 per piece. Jeans declining in value; English goods nominally worth Tls. 3.0.0 to 3.0.5 per piece. A small sale of American goods at Tls. 3.2.5. per piece. Camlets: A few sales at rates slightly under those last current. Scarlet showed a small decline; Grentian and Green higher in price. Black very difficult to place. Long Ells: An inquiry for Scarlet had set in, but had not been met by foreign holders, as higher prices were looked for. The business in other Woollens had been limited. Metals—Iron: Some 20,000 bundles of small sized Rods had found buyers at Tls. 2.05, one invoice at Tls. 2.20 per picul. Stock heavy; Bars: a few sales, at Tls. 2.20 to 3.30. Lead: Dull, no transactions worthy of note. Coal: Market active, but continued arrivals prevented improvement in prices. Cardiff sales at Tls. 8.00 per ton from ship's side. English, Tls. 6.40 for cargoes. American without sales; offers lower.

FOOCHOW.—The following sales had been reported during the interval:—Grey Shirtings, 8¼ lbs., 2,800 pieces, at $3.0 per piece; T-Cloths, 7 lbs., 1,700 pieces, at $2.55 per piece; Grey Shirtings, 7 lbs., 1,200 pieces, at $2.75 per piece; T-Cloths, 6 lbs., 1,000 pieces, at $2.25 per piece; Turkey Red Cloths, 400 pieces, at $3.20 per piece; Camlets, 100 pieces, at $18.25 per piece. Lead, 1,810 piculs, at $8.0, in barter.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated August 18:—Cotton Yarn: Advices from Canton being unfavourable, only limited sales have been effected, but home advices have strengthened holders, who are firm in demanding a slight advance on last quotations, notwithstanding the fact that considerable additions have been made to stocks during the fortnight. Piece Goods: Some slight improvement is observable in the general tone of the market for Manchester goods, owing mainly to late telegrams, which have rendered holders less anxious to press their goods to sale, and induced buyers to replenish their stocks at the low prices current. 7 lb. Grey Shirtings, especially the commoner chops, have found a fair degree of favour, and have advanced about 8 cents per piece, and all other weights of this description command slightly higher figures, though goods from 9 lbs. upwards are saleable only at auction. Common White Shirtings are much wanted, and the market has been nearly cleared at a marked advance, and the better qualities, which are in limited supply, have shared in the improvement. Common 6 lb. T-Cloths, too, are in some request, and a trifle dearer, while best chops of the same weight are easier. Other weights of this description are unchanged in value, but have been more readily saleable. Assorted Spotted Shirtings and Brocades are in large supply, and lower prices have to be accepted in order to effect sales. American Cottons are quite nominal. English and Dutch Drills are lower; 260 pieces of 30 yard English have been placed at private, and 2,200 ditto 40 yard Dutch at auction. Woollens: No change of moment has taken place, and there are no indications of any early return of activity. Metals: Nail Rod and best Bar Iron are lower. Hoop: quiet, but steady. Wire and Steel dull. Lead is materially lower, considerable supplies having arrived, and no demand existing. A good business has been done in Tin, but prices have declined under the influence of somewhat large arrivals. Tin Plates are unchanged. Quicksilver again lower. Coal: No sales have transpired. Ginseng: Demand has been very light, and sales amount to but ten casks and eleven barrels Crude at $112 per picul, and a few parcels of selected root, at prices that have not transpired. The offers made have been generally below the views of holders. The following were the current quotations:—Cotton Yarn, Nos. 16 to 24, $130.0 to 135.0 per bale; 28 to 32, $140.0 to 145.0 per bale; Grey Shirtings, 7 lbs., $2.50 to 2.60 per piece; 8.4 lbs., $2.75 to 2.82½; White Shirtings, $2.50 to 4.80 per piece; T-Cloths, 6 lbs., $1.85 to 2.10 per piece; 7 lbs., $2.15 to 2.42½; 8 to 8.4 oz., $2.65 to 2.85; American Drills, 40 yards 15 lbs., $5.20 to 5.50 per piece; Dutch Drills, 40 yards 14 lbs., $4.60 to 4.70 per piece; Iron—Nail Rod, $2.75 to 2.80 per picul; Round, Square, and Flat Bar, $2.80 to 2.90 per picul; Hoop, $2.90 to 2.95 per picul; Wire, $6.50 to 6.95 per picul; Lead, $6.75 to 7.0 per picul.

BATAVIA.—Madapollams: Dutch White and Unbleached, demand limited, with very few transactions; English White, neglected; Unbleached, saleable in small lots. Shirtings: Dutch White, no inquiry; Unbleached, good quality inquired for; English White, some sorts saleable at low rates; Unbleached, suitable weights in some inquiry; Cambrics: Saleable at low rates; Drills: Dutch, in some inquiry; English, in somewhat better request; Blue, no stocks. Jaconets: Plain, unsaleable; Printed, suitable patterns saleable; T. R. Cloth: Limited demand. Dyed Cloth: Orange dye saleable; Prints: Demand supplied and less active, prices weak; Mule Twist: In some request; Turkey Red, improved demand, especially No. 28; Green and Orange, slow of sale; Sewing Thread: In some inquiry; Batticks: Only saleable at very low rates; Blankets: Woollen, demand less; Molton, in some inquiry; Iron: Swedish, large supplies; English, difficult of sale, with ample stocks; Steel: Saleable; Sheet Copper: Stocks, demand for consumption limited; Zinc: Unsaleable; Spelter: Not in much request; Lead: Sheet, unsaleable; Pig, improved demand. Iron Nails: Supplies, good assortments still in demand; Copper Nails: Stocks; Tin Plates: Saleable, small stocks. Coals: Market supplied.

SINGAPORE.—The inquiry for Cotton Goods had improved, but holders asked advanced rates, and the business had consequently been limited. 39-inch Grey Shirtings: 6 lbs. nominally worth $2.15 to 2.20. 7 lbs. placed to a small extent at $2.52½ to 2.55. A few thousand pieces 8¼ lbs. had been disposed of at $2.87½ to 2.95. 45-inch unaltered. 36-inch White Shirtings also unchanged. 36-inch White Spots: Sales at $2.85 to 2.87½. 45-inch White Cambrics without alteration. 24's in fair inquiry at rather firmer rates, 15's and 16's dull. 30-inch White Madapollams in fair inquiry at $23 per corge. 33-inch Imitation Irish Linens: Sales at $2.12½ to 2.20. 32-inch Grey T-Cloths: 4 lbs. and 4½ lbs. sold at $1.45 and 1.55 respectively. 5 lbs. in limited demand at $1.65. 6 lbs. small sales reported at $1.85/90. 7 lbs. firm at $2.15/20. 32-inch Grey Madapollams: 3 lbs. placed at $21¾ to 22¼ to a limited extent. 30-inch Grey Drills: Dutch 9¼ lbs. sold at $65 to 67 per corge. English 8 lbs. and 9¼ lbs. placed to a small extent at $55 and $60 per corge respectively, other descriptions unchanged. 32-inch Turkey Red Cambrics: 2 lbs to 2 lbs. 4 oz. inquired for and worth $2.20 to 2.25 for the latter weight. Sales of 2¾ lbs. reported at $2.55/60 and 3 lbs. at $2.65. Grey Yarn: 16/24 wanted, and worth about $130; 40s. placed to some extent at $145/47½. Coloured Yarn: Sales of Imperial Red at $73, Orange at $80, and Green at $87¼. Turkey Red Yarn: 40s., 10 lbs. worth $150, and 12 lbs. $155.65. Woollens without alteration; no transactions. Metals: No demand for Copper Sheathing. Sales of Yellow Metal at $22 to 22⅜. Zinc Sheathing in request at $9 to 9¼. Small sales of Iron at $2.35 per picul for Square, $2.40 for Flat Bar, $2.50 for Nail Rod, and $3.35 for Swedish. Pig Iron placed at $21 per ton. A sale of Pig Lead at $6.30. Tin Plates dull at $5.75. Brass-wire in inquiry, but only at unremunerative rates. Cardiff Coals placed at $7.62½ to 7.87½ ex ship; no transactions in other descriptions.

PENANG.—An improved demand had been checked as at Singapore by the high rates demanded by holders, to which buyers were disinclined to respond. Grey Shirtings in pretty fair inquiry, and sales of 6 lbs. reported at from $45¼ to $46 per corge. 7 lbs. not in heavy stock, and sales only of inferior at $50½ per corge, and of ordinary at $52¼. High prices asked by holders of 8¼ lbs. goods checked sales, but to supply immediate wants $60 to $63 per corge had been paid. In Grey Long Cloths and Madapollams no business. Grey T-Cloths out of demand; a few sales of 6 lbs. at $39 and $39¼ per corge. White Shirtings in increased stock, demand mostly for medium qualities. Sales reported of fine at $100 to $108, medium at $65 to $94 per corge. The stock of yarn was light, and higher prices had been asked for and obtained. The sales of Grey Mule, No. 40, at $147; Turkey Red, 18 to 24, at $122; Imperial Red, at $78; Green, at $83 per bale.

COLOMBO.—Messrs. Geo. Wall and Co.'s Circular is as follows:—The tendency of home advices during the latter half of the fortnight has been to weaken the fair inquiry which existed at its commencement, and to increase and prolong the restriction usual at this season. The market for every description of Cotton goods closes quite inanimate. For Grey Mule Twist, indeed, there is a good demand; but, in the absence of stocks, there are no transactions. Even the arrival of two vessels with general cargo has not had the usual effect of stimulating inquiry. But the statistical position of most articles is good, and importers are not disposed to reduce their limits materially. A return of animation is confidently looked for when the progress towards the coast of the new coffee crop shall have occasioned renewed activity along all the principal lines of communication with the interior, and put in motion the curing establishments of Colombo.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

The weight of opinion on the supply for the present season is that Tea will be fully equal to last year, but that Silk will be less. Although the teamen at Shanghai and Hankow may have lost on the first crop, they will make it up on the second.

### TEA.

YOKOHAMA.—An active demand had sprung up, and quite a large business had been done for the New York market, nearly 5,000 piculs having been settled. In spite of some unfavourable weather, arrivals had more than kept pace with the demand, and stocks were about 3,500 piculs. Good medium and fine had been the grades chiefly dealt in, and the quality continued fair. Prices unchanged. The China (P.M.S.S. Co.'s steamer) had left with 140,689 lbs., and the Doon had sailed for New York with 272,263 lbs. Export to date 412,952 lbs., against 397,270 lbs. same time last year. On the berth were the Carobel, Cedric, Janet Ferguson, and Aurora Australis for New York, and the Evangeline for San Francisco; no vessel for London. Prices: finest, $36 to 37; fine, $31 to 33; good medium, $27 to 30; medium, $25 to 26; good common, $22 to 23.

SHANGHAI.—Black: There had been but a moderate business transacted, and prices, on the whole, had been slightly weaker. Common Black leafs still maintained a high rate, though it was tolerably clear that there would be an abundant third crop, consisting chiefly of these kinds. The export, as compared with that of last year at same date, shows a decrease of 250,000 lbs. Black, and 1,000,000 lbs. Green. The stock was 29,000 chests, against 36,500 chests. Settlements on the market, 14,645 chests; reshipments, 4,569 chests; stock, 29,300 chests. The following had been

Digitized by Google

the prices paid:—Oonams and Oonfas, Tls. 19 to 26½ per picul; Oopacks, &c., Tls. 20 to 25 per picul; Ningchows, Tls. 20 to 25½ per picul. Green: The market for new Teenkais, &c., was opened by the purchase of one chop at Tls. 44½, since when the settlement of two chops Fychow was reported, at Tls. 35 and Tls. 36. A moderate business had been done in Pingsueys, at Tls. 35 to 43¼; Fychows and Teenkais, at Tls. 35 to 44½; Shanghai Packed, at Tls. 30 to 35½. Settlements—3,093 half-chests Pingsuey; 2,618 half-chests Foochow and Teenkai; 3,017 half-chests Shanghai-packed. Stock—2,850 half-chests Pingsuey; 23,100 half-chests Fychow and Teenkai; 4,500 half-chests Shanghai-packed.

Hankow.—The following is from Messrs. Drysdale, Ringer, and Co.'s report, dated August 7:—The settlements since date of our last do not exceed by much those made during the previous fortnight; arrivals have, however, come to hand more freely, but our market has, nevertheless, been kept with a bare stock, as the bulk of the supplies have on arrival been sent on almost immediately to Shanghai for sale; the quantity which has gone forward for resale there is almost double the quantity which has been settled on this market. Settlements for fortnight are 8,900 chests, 2,939 half-chests, and 1,000 boxes, at from 14½ to 20 taels per picul. Shipments to Shanghai for sale 17,000 packages, a fair proportion of which has been purchased from the teamen by native speculators. Prices are decidedly higher than when we last gave quotations, many of the late settlements having been made at fully 2d. per lb. over latest home rates, and, quality considered, from six to eight taels per picul advance from the lowest point of the market. The high prices current both here and in Shanghai continue to encourage up-country operations, and from the latest information to hand we hear of the opening of additional Hongs for the purpose of making up third crop leaf. The price of leaf in Shuntam and the neighbouring districts has, we hear, advanced the equivalent of taels three per picul, and we are now told by teamen that the deficit in supplies will not be so great as they at first expected; they still, however, are confident the export hence will be less than last season, but we fear that the falling off will be too small to have any material effect on the home market. We quote fair to good second crop Oopacks, 17 to 20; Oonams, nominally, 16 to 18, but few on offer; and Shuntam packed Teas 15 to 16½ taels per picul. Oanfas, none on offer.

Foochow.—Congou: The second crop Teas had not come to hand so freely as was expected, and thus there had been but small stocks on offer throughout the fortnight. One or two firms had shown much eagerness to purchase, and prices had gradually advanced, being at the close 1 to 2 Taels higher, the advance being more marked in the common grades. As regards the quality of the second crop Teas, the report was unfavourable, though but few parcels had been received from the higher districts. Souchongs: A fair amount of business had been transacted on rather easier terms. Oolongs: A few parcels had found buyers at lower rates, and it was reported that one American firm had purchased about 2,000 half-chests, but the prices paid had not transpired. Scented Teas continued in moderate inquiry at previous currencies. Flowery Pekoes found ready sale at full rates. Settlements for the fortnight had been—Congou, 48,274 chests, at Tls. 9.1 to 26.3 per picul, ship off; Souchong, 6,002 chests, at Tls. 18.8 to 31.8; Oolong, 1,815 half-chests, at Tls. 21.3 to 24.8; Scented Teas, 7,740 boxes, at Tls. 8.8 to 27.8; Flowery Pekoe, 393 chests, at Tls. 26.8 to 64.8.

Kiukiang.—The receipts of Blacks had continued to be on a moderate scale, but it was reported that there was more activity in the interior, consequent upon advices of favourable outturn at Shanghai. Six small parcels had been settled at an advance of about Tls. 2 per picul. New Greens were not expected until about the 15th August. The quantity made in the Moyune district was reported to be about as large as last year.

Amoy.—Congous had been taken readily on arrival, notwithstanding their poor quality, at very full prices. Nothing further had been done in Oolongs, the few good Teas remaining unsold being firmly held, and buyers making no offers for the common grades. Supplies were coming forward very slowly, and teamen asserted that the season's crop would not exceed 90,000 half-chests. The Cresswell was loading for London and the Insulaire and Nantib for New York.

Canton.—The settlements of Scented Teas had been on an increased scale, and though purchases were made at about former rates during the early part of the interval, the continued demand had, towards the close, enabled teamen to obtain an advance of about two taels per picul. Canton Greens had been in moderate request for the London and Continental markets, at about last quotations. Canton District Congous had been neglected. Stocks of all descriptions were becoming much reduced, and, in view of the losses so generally sustained this season, Teamen evinced great reluctance to make further purchases of leaf at the prices demanded by growers. It was reported that the fourth crop would fall short of what it was expected to be owing to continued warm and dry weather. The stock of Country Congous had been increased to 1,800 chests—3 chops medium Oonams—but there was no immediate prospect of further arrivals. The following had been the settlements and quotations for the fortnight:—Country Congou, none; stock, 1,800 chests; Canton do., 500 boxes at Tls. 20 to 24; Scented Orange Pekoe, 25,000 boxes, at Tls. 14 to 31; Scented Caper, 35,000 boxes, at Tls. 10.4 to 28.50; Canton Gunpowder, 6,000 boxes, at Tls. 15 to 31; Do., Young Hyson, 1,000 boxes, at Tls. 15 to 18; Do., Imperial, 2,000 boxes, at Tls. 14 to 20.

## SILK.

Yokohama.—About a thousand piculs of Silk had been settled without change in quotations. The weather had not been favourable to the transit of supplies, but they had, nevertheless, been kept fully up to the demand. The quality of arrivals, which had consisted mainly of medium hanks, had been fully up to the average, and there was a noticeable improvement in the tares, particularly from the Mybash district, the result of the system of inspection established by the silk-owning Daimios. Stocks were increasing, being at the close nearly 300 piculs. Prices: Mybash best offering, $750, at 4s. 6½d., worth 30s. in London; medium, $700 to 730, say 28s. to 29s. 2d. in London; inferior, $650 to 680—say 26s. to 27s. 3d. in London. In Silkworm's Eggs both buyers and sellers were firm, and with the great difference existing between their ideas of prices, there was no prospect of business. If either side give way, it must be the sellers; stocks were accumulating, though quite trifling compared with other seasons. Last year, for instance, a million cards had come in, against 70,000 this season.

Shanghai.—We extract the following report from Messrs. C. J. Skeggs' and Co.'s Circular, dated 12th August:—The French mail which left here on the 6th instant took 934 bales, prices being about the same as previously quoted. Since then business has gradually progressed until about 2,000 bales have been placed for this steamer, making the total settlement for the fortnight about 3,000 bales. Little can be said about prices further than that the dealers are very firm, and may have gained a slight advantage in some cases towards the close; the bulk of the settlements, however, have been done at last mail's rates, the only notable exception being Red Peacocks, for which one or two anxious buyers have given up to Tls. 465. Chops remain unaltered at the following quotations:—Koo-fong-sings and Choopings, No. 3, Tls. 560; Dragon, Tls. 557½; Ya-kee, Tls. 547½; Elephant, Tls. 485. Hainins remain at Tls. 480 for No. 2. Fat-mow and Tay-saams show no alteration. The total yield available for export is variously estimated at from 40,000 to 43,000 bales.

## JAVA, STRAITS, AND CEYLON PRODUCE.

Batavia.—Arrack, in good demand, at f.120 to f.122 per leaguer. Cloves, f.18 to f.20 per picul, dull. Coffee—Java, f.33 per picul, sales. Cubebs, f.17 to f.18 per picul, nothing doing. Gutta-percha, f.60 to f.120 per picul, according to quality; market bare. Gum Damar, f.46 to f.48.50 per picul, sales; supplies. Hides—Cow, f.0.35 to f.0.40; Buffalo, f.0.23 to f.0.25 per lb., according to quality. India-rubber, f.90 to f.100 per picul, scarce. Indigo: Sales at Samarang, f.5.25 to f.5.35 per lb. for first quality. Mace, f.100 per picul, wanted. Nutmegs, f.110 to f.115 per picul, sales. Pepper: Black f.16, White f.30, per picul. No stocks. Rice: In good demand, first quality at f.150 to f.160 per Coyang; second, at f.120 to f.130 per Coyang; Cargo, at f.95 to f.100 per Coyang. Crop of Indramayoe table rice, about 25m/. piculs, sold by tender at f.256 05 per Coyang with bags, and 10m/. piculs Boedie Radja at f.230, without bags. Rattans: Borneo at f.10.50 to f.13 per picul, and Padang f.8 to f.8.50 per picul; sales. Sugar: No. 14, f.16.50 to f.16.75 per picul. Crop of Wonopringo, about 33m/. piculs, sold at auction at f.15.20, No. 20 at f.16.30 to f.15.80 per picul for medium numbers. Tin: Billiton—none in the market.

Singapore.—Gambier: There has been a steady advance in this article, and the price had reached $3.20, at which there were still buyers. Black Pepper is in very active demand at $6.85 to 6.90. There would be very little procurable until the next crop, which begins to come in about the end of December. White Pepper exceedingly scarce, small parcels readily sold at $10¼ to 11, according to quality and dryness. Sago Flour: Contracts for Singapore had been made at $2.58; 2,500 piculs Sarawak sold at $2.69, and 200 piculs Siak at $2.60. Pearl Sago: Contracts have been made at $3.20 to 3.22½ for small grain and $3.27½ for large. Tapioca: Sales at $4.50 to 4.90 for Flake, which was firm at the latter quotation. Pearl $4.75. Buffalo Hides in good demand at $10¾ to 11. Buffalo Horns advanced to $10¼, being in very active demand. Gum Damar out of supply, worth $16½ to 17. Rattans exceedingly scarce; good quality worth $5 to 6; ordinary Straits kinds $3 to 3½. Cassia Lignea in more demand, a small sale at $19½. Cubebs: Very little inquiry, worth $7¾ to 8. Coffee: Sales of Bontyne at $13½, 1,000 piculs picked Bally, for which $8¾ had been offered, held for higher prices. Nutmegs: An arrival brought $50 per picul. Mace: Good quality worth $55, none on the market.

Colombo.—Coffee Plantation: Sellers asked more than buyers can afford to give, and there was consequently nothing doing. 11s. 6d. p. bus., equal to 61s. per cwt., f.o.b., was the nominal quotation. Native: The market was quite bare of supplies. Nominal quotation—48s. to 49s. per cwt., f.o.b. Exports of both Plantation and Native from October 1, 1868, to Sept. 2, 1869, $982,747, against $927,276 at the same time last year, showing an increase of $55,471. Cinnamon: Dealings large, at firm rates. Plumbago: The fall in the home market appears to have affected the local market for fine kinds but little, and dealers refused to accept less than £15 for really good lump; the price for small chips is £6 to £6. 10s.; for dust, £4. 10s. to £5. Coir: Active; fibre in fair request; dealings in rope good. Ebony: In demand. Sapanwood: Scarce. Deer Horns: Small parcels of mixed sizes offered at £10. Rice: Slow; stocks continue good. Coals: No market.

## ARRIVALS.

At Yokohama.—From London, July 28, Janet Ferguson.
At Hiogo.—No advices.
At Nagasaki.—From Amsterdam, Johanna Willelm.
At Shanghai.—From London, Aug. 5, Corea; —, Wylo, Ornate, Kelso, Beemah (reported by telegram); from Liverpool, 11, M. C. Nelson; from Cardiff, Diamond (reported by telegram); from Hamburg, 10, Harmonia; from Shields, Atma.
At Foochow.—None.
At Amoy.—None.
At Hong Kong.—From London, Invincible; from Shields, Killarney (reported by telegram).
At Hong Kong and Canton.—From London, Aug. 6, British Empire, Chetah; from Liverpool, Veronica; from Cardiff, 7, Glenartney (str.); from New York, 7, Moneka (str.).
At Manila.—None.
At Singapore.—From London, Aug. 25, Luzon; from Liverpool, 14, Khimjee Oodowjee; 18, Alfred; from England, 21, H.M.S. Midge; from Cardiff, 17, Louis Meyer; 20, Empress of India; 23, Ravensworth; 26, Ravenscliff, from Newcastle, 25, Humboldt; from Rotterdam, 13, Tollens; 26, Tony; from Lisbon, 14, Baltic; from Bourbon, St. Sauveur; 19, Arabic.
At Batavia.—From London, Aug. 9, Drusus; from Cardiff, 13, Walcheren; from Newcastle, 9, Louise; 15, Saga; from Glasgow, 18, County of Nairn; from Shields, 9, Regina Maria; from Rotterdam, 6, Sumatra; 13, Mary and Hillegonda; from Holland, 8, Johanna Maria; from Amsterdam, 10, Djawa; 18, Vier Gebroeders; from Bordeaux, 13, Eldorado; from Havana, Onrust.
At Penang.—From London, Aug. 15, Peri; from Glasgow, Mary Falconer; 17, John Paul.
At Bangkok.—No advices.
At Saigon.—No advices.
At Colombo.—From London, Aug. 28, Asphodel, Ocean Rover.

## DEPARTURES.

From Yokohama.—For New York, Aug. 3, Doon.
From Shanghai.—For London, Aug. 5, Dilkhoosh; 6, Tynedale, Charmian, Challenge, J. R. Worcester.
From Foochow.—For London, Aug. 7, Min; 12, Silver Eagle; 26, Flying Spur (reported by telegram).
From Amoy.—For London, Aug. 6, Gleam.
From Hong Kong and Canton.—For Hamburg, Aug. 14, Sea Mew; for Callao, 17; Landwurstein, for New York, 9, Enrique.
From Manila.—For Liverpool, via Ilo Ilo, July 29, Magallanes; for London, via Cebu, 29, Delbhur; for New York, Aug. 5, Cleopatra; 10, Sonora; for Cadiz, 2, Fidela; 5, Conchita.
From Singapore.—For London, Aug. 17, Canning; 18, Sree Singapura; for Liverpool, Doune Castle; for Marseilles, 26, Emma; for Bordeaux, 21, Mondelli; for Barcelona, 24, Nuevo Lantaro; for Gibraltar, 25, Madura.
From Batavia.—For Holland, Aug. 16, Laura and Adele, Noach I.
From Penang.—For London, Aug. 22, Mofussilite.
From Colombo.—For London, Aug. 26, War Cloud, Comus, Star of the South, Shooting Star; for Philadelphia, Maid of Glanwern.

## FREIGHTS AND CHARTERS.

At Yokohama.—No vessel loading for home. To New York £2 10s. nominal. Per steamer to New York $45 per ton of 40 ft.
At Shanghai.—The rate to London has declined to £2 per ton. To New York the Argonaut is on the berth at £3 per ton of 40 ft.
At Nagasaki.—To London £4; to New York £3 10s. gold; nominal.
At Foochow.—Vessels on the berth for home are loading at £2 10s.
At Hong Kong and Canton.—To London £2 10s. per ton. To Liverpool the Veronica is getting £2 15s.
At Colombo—For London, coffee, 40s. to 50s.; deadweight 45s to 50s.
At Manila.—The Oriana for Liverpool loads 1,000 tons wet sugar at £2 5s., and hemp at £3 5s. per cwt. James Aiken for London takes about 500 tons dry sugar at £2 per 20 cwt. Orion, to load at Ilo Ilo for Liverpool, a full cargo of wet sugar at £2 12s. 6d. per 20 cwt. There is nothing new to the United States to report; last rates $11 gold per 20 cwt. sugar, and per four bales hemp.
At Singapore.—To London and Liverpool the rates are 35s. to 40s. per ton.
At Penang.—To London, deadweight £1 10s., light freight £2.
At Batavia.—There is no alteration to report.

At Manila.—For London, Vincenza, Carin, James Aiken; for Liverpool, Oriana; for Cadiz, 17, Pepita; for New York, George Peabody, Formosa; for Boston, Wild Rover, Archer.

At Singapore.—For London, Empress of India, Flora; for Liverpool, Kinfauns Castle, Ottawa; for Channel, f.o., Alfred; for Marseilles, Favorite.

At Penang.—For London, Albion, Mary Falconer, Ulleswater.

At Colombo.—For London, Star of the South, Passover, Skimmer of the Waves, Hollinside, Benledi; for Boston, Asphodel.

## SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—September 29, at London, from Colombo, &c., William Ritson; 28, at Bristol, from Macao, Baldur; at Falmouth, from Saigon, for Copenhagen, Salamander; from Bangkok, Sandersons; 29, off Falmouth, from Manila, for Rotterdam, China; at Liverpool, from Akyab, Eurynome; 17, at San Francisco, from Hong Kong, Elcano; 16, at New York, from Singapore, Sydpolen, 29, at Falmouth, from Rangoon, for Bremen, Louis Henri; 30, from Saigon, Nederland; 27, at Copenhagen, from Akyab, Emily; 28, at Texel, from Batavia, Vice-Admiral May; 30, off the Lizard, from Foochow, &c., Thermopylæ; 29, at Queenstown, from Rangoon, Margaretto Delfino, Andromeda; Oct. 1, at Deal, from Rangoon, Lepanto; Sept. 28, at Bremerhaven, from Rangoon, Sirius; Oct. 2, at London, from Shanghai, Forward Ho; —, off Kinsale, from Rangoon, Lancashire Witch; Sept. 29, at Brouwershaven, from Saigon, Cananore; at Cowes, from Akyab, for Copenhagen, Lorfald; Oct. 4, at London, from Manila, Channel Queen.

Departures.—Sept. 28, from Cardiff, for Galle, Valkyrien; Oct. 2, from London, for Hong Kong, Queen of the Age; Sept. 30, from Sunderland, for Hiogo, Hengist; 28, from Cuxhaven, for Shanghai, Hesperus; Oct. 1, from London, for Batavia and Sourabaya, Gladiator.

Spoken.—Mary Simpson, Penang to London, Aug. 7, 2 S., 18 W.; Nabob, Bangkok to Amsterdam, Aug. 8, 1 S., 19 W.; Naworth, Liverpool to Singapore, Aug. 12; Queen of the South, of Dumfries, for Japan, Sept. 17, 51 N., 10 W. Laurel, London to Shanghai, Aug. 13, 2 N., 20 W. A Danish barque, Hamburg to Hong Kong, Aug. 10, 26 S., 33 W. Alice, London to Galle, Aug. 22, 11 S, 29 W. Parana, London to Penang, Sept. 3, 10 N., 26 W. Sarah Anderson, Bangkok to Scilly, July 11, 24 S., 59 E., with bottom foul; Duke of Northumberland, Swansea to Galle, September 1, 4 N., 24 W.; Antonia, Batavia to Rotterdam, July 18, 29 S., 44 E.; Salado, Penang to London, Aug. 22., 14 S., 6 W.; Petcheleo (?) (barq.), Liverpool to Hong Kong, July 12, 1 S., 25 W.; Henry Keel (ship), Cardiff to Shanghai, July 18, 12 S., 32 W.; Stad Dockum, (Dutch barq.) Amsterdam to Batavia, July 23, 21 S., 36 W.; Nestor (Dutch ship), Batavia to Dunkirk, Sept. 19, 12 N., 26 W.

Casualties.—A telegram received from New York 1st Oct., per Atlantic Cable, states that the Chattanooga, from Singapore to New York, was disabled, and discharging at St. George's, Bermuda.

The Malakoff, from Colombo to London, was spoken, Aug. 9, off Agulhas, with maintopmast gone.

The Early Morn, from Dundee to Singapore, was spoken Sept. 1, 13 N., 27 W., with bowsprit sprung and foretopgallantmast carried away.

## REUTER'S TELEGRAMS.

—o—

(Received via Galle, Sept. 29.)

### CHINA.

Hong Kong, Sept. 2.

The Austrian Embassy has opened negotiations at Peking for the conclusion of a treaty, but it is said that the Envoy is annoyed at the needless delay on the part of the Chinese authorities in arranging terms.

Mr. Richard Rowett, of the firm of Holliday, Wise, and Co., has been appointed a member of the Hong Kong Legislative Council. [The friends of Mr. Rowett will be rather astonished at this being of sufficient importance for Reuter's agent to telegraph. Such items bring the service into ridicule. Surely something can be found to telegraph from China and Japan of political or general importance.]

Vienna, Oct. 1.

A telegram, dated Tientsin, Sept. 8, has been received by Count Beust from Admiral Petz, announcing that the Austro-Chinese Treaty of Commerce was signed on the 2nd of Sept., and that the Austrian expedition had left for Japan.

Hong Kong, Sept. 2.—Grey Shirtings, 6½ catties, 8¼ lb., $2. 85c. Watertwist, 16-24, $1.37½. Cotton: Bengal, fair medium, $17½. Tea at Canton.—Business checked by holders asking advanced prices. Exchange on London: Bank bills, six months' sight, 4s. 5¾d.

Shanghai, Aug. 27.—Grey Shirtings, 6½ catties, 8¼ lb., 2.2.0 taels. Cotton—Shanghai, 16½ taels. Tea, black, weaker; green less active, but steady. Silk, quiet, but unchanged; No. 3 Tsatlees, 565 taels. Settlements since departure of the last mail, 3,000 bales. Export to date (China and Japan), from commencement of season, 20,000 bales. Exchange on London: Bank bills, six months' sight, 5s. 10¾d. Freights. —Tea, £1 10s.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

Hieber—On the 18th August, at Beach-road, Singapore, Mrs. G. Hieber, of a daughter.

Howell.—On the 12th Aug., at Singapore, on board the steamer *Dionæd*, the wife of Henry R. Howell, of a daughter.

Ryder—At Shanghai, the wife of Capt. F. H. Ryder, steam tug *Maggie Lauder*, of a daughter.

### MARRIAGE.

Scott—Hindmarsh.—At St. George's Church, Penang, Aug. 12, by the Rev. Julian Morcton, George S. Scott, Esq., eldest son of George Scott, Esq., of Ayer Rajah, Pinang, to Eleanor, second daughter of the late M. Hindmarsh, Esq., Alnwick, Northumberland.

### DEATHS.

Atchison—On the 25th Sept., at his residence, Rose-hill, Dorking, Surrey, Lieut.-colonel Henry Alexander Atchison, late of the Ceylon Rifle Regiment.

De Meyer—On the 7th Aug., at Yokohama, Dr. A. de Meyer, aged 36 years.

Moses—On the 15th Aug., at Hong Kong, Capt. H. W. Moses, of Bath, Maine, U.S.A., late Master American barque *Rome*.

Stewart—On the 31st July, at Yokohama, Gavin Stewart, of Aberdeen, late in charge of the P. and O.S.N. store ship *Tiptree*.

## THE NEW SEASON'S TEA CLIPPERS.

The notice of the China clippers has now to be prefaced by the steamers which have become regular traders. The first steamer of this season to put us in possession of the new crop of 1869-70 was the *Agamemnon*, of Holt's line, from Hankow and Shanghai, followed by the *Erl King*, *Nestor*, *Ajax*, and the *Achilles*, in 62 days, and *West Indian*, in 80, from Foochow, the latter vessel losing her extra freight of 10s. per ton by a few days. The clippers were headed by the *Titania*, from Shanghai, in 96 days, which is the quickest passage yet achieved from that port against the S.W. monsoon. The passage of this vessel, now commanded by Captain Burgoyne and owned by Messrs. Shaw, Maxton, and Co., attracted more attention from the fact of her previous passages being attended with some accidents, which prevented her doing her best. The second clipper to arrive was the *Thermopylæ*, from Foochow, Captain Kembal, owned by Messrs. Geo. Thompson and Co., in 88 days, off the Lizard. This is also the best homeward passage from Foochow in the S.W. monsoon. The steamers *Nile* and *Miranda* left Foochow and Shanghai respectively on the 17th July, and may be expected at any moment, as also the clippers *Ariel*, *Leander*, *Lahloo* and *Spindrift*, which left Foochow between the 1st and 4th July.

We append the arrivals and passages into dock:—

| Steamers. | From. | Date. | Docked. | Days. |
|---|---|---|---|---|
| Agamemnon | Hankow | June 9 | Aug. 25 | 77 |
| Erl King | Do. | „ 5 | „ 30 | 86 |
| Nestor | Shanghai | „ 21 | Sept. 5 | 76 |
| Ajax | Do. | July 9 | „ 23 | 76 |
| Achilles | Foochow | „ 16 | „ 16 | 62 |
| West Indian Clippers. | Do. | „ 7 | „ 25 | 80 |
| Titania | Shanghai | June 16 | „ 22 | 97 |
| Thermopylæ | Foochow | July 3 | Oct. 2 | 90 |
| Forward Ho | Shanghai | June 11 | „ 2 | 112 |

## ROSS BROWNE AND THE BRITISH MERCHANTS IN CHINA.

The following communication from Mr. Kiernan, formerly a United States Consul in China, has appeared in the *New York Herald*, and referred to in our last number :—

I have read the address of the British merchants in Shanghai to J. Ross Browne, and his answer, and must say I am no way surprised at the address; it is only in consonance with the whole course of the British, not alone in China, but in the entire East; but I am both surprised and indignant that a representative American should be so blindly narrow-minded and retrogressive, or so culpable, as to maliciously misrepresent facts and the views and policy of his own country. The British merchants in China fear that their reign of robbery is about to pass from them—no more forcing of opium upon an unwilling people, no more smuggling, no more trading in human flesh, no more open, barefaced cheating, no more gunboats and redcoats to enforce all these infamies. No wonder they fret, and fume, and intrigue, cabal and do all in their power to undermine the wise and munificent provisions of the Burlingame treaties, by misrepresenting him to the Chinese Government, and the Chinese to the Western nations. The British merchants proclaim the inferiority, the non-progressiveness, and the Paganism of the Chinese. Mr. Browne coincides with all their views. I have already mentioned reasons for the course of the British in this respect. I shall now mention one other motive, and a very powerful one; it is jealousy of the increasing influence of America in China. No one unless he has resided in China can realise the bitter jealousy and animosity of the British towards the Americans. It is to be met with everywhere, in business and socially; and this feeling, intensified since the establishment of our line of steamers between Hong Kong and San Francisco, the finishing of the Pacific Railroad, and our new treaty, has its outlet in this delectable "address."

On what grounds and why does Mr. Browne take the views he does? From experience? This was certainly "short, sharp and decisive," and his conclusions directly opposite to those of men of at least equal intelligence and many years' experience in China, such as Mr. Burlingame, the Rev. Mr. Williams, &c., &c. Is he jealous of the bright and well earned fame of his predecessor? if so let him be consoled with the idea that, like himself, every one is not a Talleyrand, a Nesselrode or a Burlingame. Is he enraged at being so soon recalled, and does he seek revenge on the unoffending Chinese, and commit treason and apostacy to the progressive and Christian spirit of his country? Does he pander to those extremes that meet the British tory aggressive element in China and the ignorant, narrow-minded, rowdy element of California? I very properly ask all these questions from the extraordinary position in which Mr. Browne has placed himself, and his explanation, if there be any, has to come yet. It is not conveyed in his answer to the British merchants of Shanghai.

During my residence in China I have had much experience among the Chinese, and travelled the empire extensively, and I can state, without fear of refutation from any fair and discerning party, that the Chinese are, summing up all their virtues and defects, not a whit inferior to us as a people; that they are ready and willing to accept of improvements when they are introduced by genuine parties, and not, as almost invaribaly heretofore, by associations of swindlers and adventurers—by those who hold the theory that a Chinaman has no right which a Caucasian is bound to respect—and that I believe they will accept Christianity when it becomes Christianity to them. Certainly their experience since the opening of China has not been such as to render them in love with our Christianity. The Western Christians, particularly the British, have been cruel and exacting in their military operations, swindling and unscrupulous in their mercantile transactions, and licentious and degraded in their habits.

Let what will be said, America has the goodwill of, and the "inside track" with the Chinese. This is due to themselves, and to the influence of such leading representative men as Burlingame. My hope and trust is that no machinations, British or otherwise, will cause any misunderstanding between America and China. Let us wait patiently, and, meantime, keep ourselves to the wise and munificent provisions of the Burlingame treaty, and frown down and do away with the exclusive, bigoted, spirit evinced in California.

In conclusion, let me recommend a Minister for China, one who is a gentleman of extended and Christian views, a thorough Chinese scholar, and who has been loved and respected for many years past by the Chinese —I mean the Rev. S. Wells Williams, Secretary of Legation and Interpreter at Peking, and frequently Chargé d'Affaires. I assure you no selection could possibly be made which would give greater satisfaction to the Governments of the United States and China, or go further to neutralise the pernicious machinations of our British enemies and their allies. JAMES L. KIERNAN, late United States Consul.

## THE SILK SUPPLY ASSOCIATION.

On the 17th Sept. a very important meeting of the Silk Supply Association was held in London, at which various interesting letters from all quarters of the world were read, and specimens of silk from the Cape and other places exhibited. Mr. T. Dickins, the president, took the chair, and amongst others present were Mr. D. Chadwick, M.P., Mr. J. M. Canny (Shanghai), Mr. J. Murphy (St. Petersburg), Mr. Maxwell Anketell (Alexandria), Mr. B. T. Cobbe (Natal), Dr. Mann (Natal), Mr. J. A. Sparking, Mr. F. Bennoch, Dr. Wallace (Colchester), Mr. Vavassour, Captain G. Mason, Mr. Hyde Clarke, &c. The Chairman read *letters* from India, China, California, the Cape and other places giving information as to the culture of silk. In reference to China it was stated by Mr. Bennoch that any agent going out with Mr. Burliname's signature as authority would be able to proceed to any part of China unmolested. Mr. Canny said he had been all over the silk districts without any special authority. He pointed out the influence of the trade guilds in China, but thought they might assist the Association if it could be shown to them that the better reeling of the silk would produce immediate as well as future profits. He added that a much larger supply of Chinese silk might soon be expected. The chairman supplemented this remark with another, to the effect that, according to a reliable authority, the supply of Japanese silk would soon be threefold its present quantity. He proceeded then to exhibit some silk grown and reeled at the Cape by Mrs. Poeval, which was much admired by all present, and considered very valuable evidence of the quality of silk that might with proper care be produced in that colony. A communication was then read from the Agricultural Society of New South Wales, stating their anxiety to disseminate as much information as possible with reference to silk culture. The question of silk growing in Egypt was also brought forward upon a report by the chairman of an interview he had had with Nubar Pacha, in lieu of a deputation to the Viceroy when the Khedive recently visited London. Nubar Pacha offered free passages and lands to any persons desirous of commencing silk cultivation in Egypt. Mr. Anketell and other gentlemen testified to the capabilities of the country for silk growing, but added that the great obstacle at present was the wretched habitations in which the natives carried on the culture. A suggestion, which met with general approval, was made by Mr. D. Chadwick, M.P., that committees should be formed to watch the various districts of Egypt and the East, with a view to forward any efforts made in silk cultivation in that quarter. Another communication was read relative to the growth of the mulberry at the Cape and California, and it was asserted that the Cape could supply all the world with trees, whilst in California they were being grown to an enormous extent. It was added that letters of a favourable character had also been received from Chili, Peru, Panama, and other places; and in order that these reports might all be printed *in extenso* it was resolved to start a monthly magazine in the interests of the Association, to be called the *Silk Supply Record*. The Chairman read an interesting account of the cultivation of the mulberry at Poole, in Dorsetshire, in 1788, after which Captain Mason produced some silk of very good quality grown and reeled by himself at Aldershot, and, in compliance with a suggestion thrown out, offered to show his method of reeling to any persons connected with the Association. The Chairman reported that branch associations had been formed at Macclesfield and Coventry, and thanks were voted to those associations for their co operation. It was added that another branch would probably be formed at Manchester, and it was hoped a public meeting upon the question of silk supply would soon be convened in London by the Lord Mayor. The chairman's little "Guide to Sericiculture" was ordered to be printed and circulated. The proceedings concluded by a short discussion on the adaptability of sunflower leaves for silkworms, upon which it was admitted they would thrive for a short time.

---

THE LABUAN COAL MINES.—*The Times* of the 27th inst. has the following :—The Oriental Coal Company (Limited), into whose hands the extensive coal mines in the island of Labuan have passed, are now working them successfully. In anticipation of a great increase in the demand for coal in the China seas on the opening of the Suez Canal, it has been decided to supply coal at the fine harbour of Victoria, which admits and shelters vessels of the largest size at all times of the tides and at all seasons, instead of at Coal Point, as at present, where steamers can take in coal only in comparatively fine weather. The distance from the mines to Victoria harbour, where the Governor's residence and all the public buildings are situate, is about nine miles, and the coal is to be transported by means of the patent road steamers, with india-rubber tires, of Mr. R. W. Thomson, C.E., of Edinburgh. Two of these powerful engines and 16 wagons, to carry six tons each, are already completed, and will be shipped direct to Labuan in the company's new screw collier the *William Miller*. These road steamers appear to be exciting great interest all over the world. The Government of India have just ordered to be despatched overland the first engine for a regular service which they intend establishing on the Grand Trunk Road, for the transport of troops, Government stores, and general merchandise, in lieu of the miserably slow and costly bullock-trains which now creep along that fine road. The road steamers will, it is said, run five or six miles per hour at far less cost than the bullock hackeries, which cannot keep up a third of that speed.

We understand that the screw frigate Glasgow, of thirty-one guns, and 600-horse power, is to be substituted for the Penelope, as the flagship of the China squadron. The Glasgow will shortly be despatched under the command of Captain Hewitt, V.C., and until her arrival out Sir Henry Kellett will hoist his flag on board H.M.S. Ocean, which now carries that of Sir Henry Keppel.

The screw steam sloop Perseus, 15, Commander Charles E. Stevens, from the China station arrived at Plymouth on the 28th inst. She left Hong Kong March 31, arrived at Manila April 8, and left on the 14th, reached Labuan on the 20th, and sailed therefrom on the 27th; arrived at Singapore May 3, sailed on the 16th; Port Louis, Mauritius, June 11, sailed 16th; Simon's Bay, July 13, left on the 24th; St. Helena, August 7, and left on the 9th; arrived at Ascension August 13th, and left on the 17th in charge of the troop ship Orontes. On the 18th of September she put into Fayal for provisions and vegetables. The Perseus has brought home 11 invalids and 65 supernumeraries and time expired men. Between Hong Kong and the Mauritius two of her crew died. The iron screw steam troopship Orontes, 2, Capt. Henry Phelps, with troops from the Cape of Good Hope, bound to Portsmouth, parted company with the Perseus on the 27th inst. off the Lizard. It will be remembered that the Orontes, *en route* from the Cape, put into Ascension with machinery damaged, and that while there, in consequence of sickness breaking out among the children of the soldiers, they and all the women were landed on the island, and that the Perseus was appointed to escort the Orontes home. The Orontes and the troops arrived safely on the 29th.

# The London & China Telegraph.

*LONDON, MONDAY, OCT.* 4, 1869.

## THE TELEGRAPH TO CHINA.

In a recent notice of the several schemes lately put forward for extending telegraphic communication to China, we gave a prominent place to the project of the "India, Australia, and China Telegraph Company," for laying a light cable constructed on Mr. Varley's principle, between Ceylon and Penang. We have more than once written in favour of this plan, but some facts that have recently been published seem to indicate that the experiment is a far more hazardous one than either ourselves, or its promoters, have hitherto suspected. The light cable has been tried and found wanting. Indeed, it is hardly likely that the Telegraph Construction and Maintenance Company—the most powerful and well-organised concern of its kind in the world, and the one that commands the largest amount of electrical and engineering skill—would cling so tenaciously to the system of heavy, or "iron-clad" cables unless it had been proved to demonstration that the opposite principle (at all events as now applied), was totally inefficient. *The Times* not long ago asserted, on good authority, that of late years there have been 8,000 miles of light cable laid, some covered with thin wire, some consisting of indiarubber core alone, and others protected with hemp and other substances, but that no line of this description has been found to last longer than one year, while in some cases the period has been a few weeks only. All the cables now in working order are of the strong and heavy form, and there seems no example of any kind that can be cited to justify the adoption of the light principle. These are very damaging and discouraging facts, and they have evidently made a strong impression on the public mind. Mr. Varley himself comes to the rescue, by means of a long letter addressed to the daily papers, in vindication of his system. His arguments may be briefly summed up in a few sentences. Firstly, at great depths, the bottom is usually soft and even, and the water perfectly still; therefore a cable, once laid, requires no coating of iron wire to preserve it from attrition, &c. Secondly, the light cable will sustain as much as thirty-five miles of its own length in water without breaking, the heavy only ten; therefore the former is more easily recovered for the purpose of examination, or splicing. Thirdly, most of the faults in cables hitherto laid have arisen from fragments of the iron-wire, used as a coating, having penetrated the gutta-percha insulator; a mischief obviously impossible where no wire is used. Fourthly, smaller ships may be employed, and no paying-out machinery is wanted, as "kinks" or "foul flakes" will be allowed to go overboard without any check or attempt to disentangle them. These, and the alleged cheapness of the light cable, exhaust the arguments in its favour. But they are met by a similar number of serious objections. The absence of all danger from attrition, at great depths, cannot be denied; but there is another formidable source of destruction—the boring of the toredo, an enemy only to be defied by armour of proof. In like manner we may admit that a light cable is more easily picked up, in case of need, than a heavy one; but "prevention is better than cure," and the first consideration is to lay a cable of such construction, and in such a manner, as will reduce to a minimum the chances of necessity for repair or renewal. And on the mode of laying, Mr. Dunbar J. Heath, a gentleman of considerable attainments in electrical and mechanical science, adduces some important considerations. The smaller the vessel used, the greater, of course, will be the amount of "pitching." If a paying-out apparatus be used to control the jerking thus produced, no "light" cable could bear the strain; if (as is proposed) such apparatus be dispensed with, the cable would often run out at the rate of twenty or perhaps thirty miles an hour—causing an enormously disproportionate loss in "slack" or waste. Lastly, the question of cost is not placed on nearly so satisfactory a footing as we expected. Instead of being so very much cheaper, the light cable is as expensive as the heavy, if we may judge by the contract made for the section between Galle and the Straits. Taking the actual distance from point to point, and without any reference to the "slack" (which it is admitted would be considerably greater with the light cable) the sum of £325,000 to be paid the India-rubber, Gutta-percha, and Telegraph Works Company, is at the rate of almost £280 per mile, which is nearly the same as the cost of the "iron-clad" cable between Suez and Bombay, while the heavy cable between Malta and Alexandria cost only £250 per mile.

These calculations are particularly unfavourable to the success of Mr. Varley's pet scheme. No doubt, before long, there will be still further improvements in the construction of Ocean cables, and in the interest of progress we hope that the various difficulties we have dwelt on may soon be overcome; but for the present it seems to us far safer to trust to the well-tried form that has produced such satisfactory results in the Atlantic and other important lines. But by whatever means accomplished, the extension of the Red Sea line to China will be a great boon. At present, the vicissitudes encountered by every message, even between London and Galle, are such as render it almost a matter of surprise that a single one even escapes un-mutilated. Each telegram has to be repeated, from one forwarding-station to another, *more than twenty times*—twenty-two, we believe, is the exact number; and it has besides to be translated and re-translated at least five times! Of the heavy charge levied, nearly the whole is divided between the numerous foreign companies whose lines form the connecting links; thus, of the £3 1s., which is the *minimum* rate charged for a message to Galle, the English company that receives the message in London gets only 1s. 8d. One evil result of this minute subdivision, this confused conflict of interests, is that no reduction is allowed, as on other lines, for Press messages. For instance, the lengthy commercial and other telegrams now in course of transmission for our own "Telegraphic Extra," all pay the same price as is charged on private messages.

## THE SUEZ CANAL.

A letter from Suez, of a recent date, says that the first trial of the navigation of the Canal was made between Port Saïd and Kantara; the Egyptian steam frigate *Latif* performed the distance between those two points at the rate of six and a quarter knots per hour. It is also announced that M. Lesseps passed through the whole distance from Port Saïd to Suez. We are told that in a few weeks the work of the Canal will be completed, and the ships of Europe will pass *under full canvas or full steam* from the Mediterranean to the Indian Ocean. Careless language like this, used even by grave scientific and industrial journals in France, throws doubts over all assertions, just as the late announcement respecting the Emperor's recovery caused all the world to believe him much worse, perhaps, than he really was. Our neighbours seem to have adopted the witty saying—which is the property of Oliver Goldsmith, not Tallyrand—that "Language was given to man to conceal his ideas," as the rule of most of their compositions. The chickens are being sedulously counted before they are hatched, and some writers seem really to believe that the opening of the Suez Canal will cause half the carrying in the world to be done in future in French bottoms; they point to the condition of the direct commerce with Australia, which is set down at more than six hundred millions of francs, of which not six millions passes in French vessels, while the value of French goods imported into those colonies annually amounts to a hundred and fifty millions, and the raw materials produced in Australia and used in France reaches an annual value of more than a hundred and sixty millions. It is asked, why should not France carry her own goods to Australia, bring back the wool and other raw material she requires, and thus save some thirty

Digitized by Google

millions which goes into English pockets? Such a question may be met, if not answered, by another—Why does not Havre do as much carrying business as Liverpool, as the ocean is equally open to her? and why does London, fifty miles up a river, do more trade than Calais, Boulogne, Dunkirk, and all the French ports in the Channel together? The English Australian trade did not grow out of any special advantages of water way, and the overland route to the Far East is as available for French as English commerce. How, then, are circumstances to be altered by the opening of the Suez Canal for the ships of all nations? When our neighbours exhibit in commerce generally as much energy and perseverance as are shown by the Messageries Imperiales and the Transatlantic Steam Company, they will have their fair share of the carrying trade of the world; but it is ridiculous to imagine that the Suez Canal will be a royal road to commerce for France exclusively, as every true political economist and man of business well knows.

## COCHIN CHINA.

Saigon is improving as a place of trade, and should the scheme proposed by Hong Kong merchants be carried out, of connecting it with the Indian Telegraph system on the one side and China on the other, its importance will be vastly increased. The possession has cost the French a fabulous sum, and the annual outlay for the troops and general Government is still enormous. But in a short time it may reasonably be expected that a small force will suffice for the protection of Saigon against the incursions of the Annamites, who are now getting somewhat tired of worrying their invaders and conquerors. The extension and improvement of the town is carried on with spirit, and we hear it is proposed to introduce gas.

The commerce of the place is certainly increasing; the last mercantile advices show an active trade in the export of pepper, rice, cotton, hides, horns, and cocoa-nut oil. Indigo and silk are in cultivation, and it is expected will shortly be added to the productions. The export of rice for the month ending middle of August was about 130,000 piculs, divided over Europe, Mauritius, Straits, China, and Japan. In cotton to China 9,000 piculs and six vessels were loading for that part. Two vessels were loading pepper for France. The arrivals for the month consisted of thirty-two vessels of 200 to 2,000 tons, and the vessels loading twenty, of an aggregate tonnage of 9,000 tons, under the British, French, and German flags. The only duty levied is on opium, and the tonnage dues are two francs per ton for inward and outward cargoes, and one franc for an inward or outward cargo.

## THE MAILS *VIA* BRINDISI.

Our last issue contained a notice that from the first Saturday in October mails would be made up in the morning at 7 A.M. for India and China, *via* Brindisi, or twelve hours later than by Marseilles, which close on Friday evening. We have since ascertained that instructions have been forwarded to the various postmasters in India, Ceylon, the Straits, China, &c., to make up mails by this route. Hitherto correspondence *via* Brindisi had to be reposted in Alexandria, and as a rule arrived in London one or two days in advance of the Marseilles portion. When we explored and gave a report on the Brindisi route in 1866 we recommended this plan of making up a light supplementary mail, and why the Post-office have only now decided on it is one of those official mysteries which cannot be solved by the outside world. We have always considered it unwise to attempt to substitute Brindisi for Marseilles until the tunnel through Mont Cenis was complete and properly tried. This it is expected will be in 1871. To convey the whole of our immense mail *over* the mountain, subject to snow blocks, avalanches, and other obstructions, would be highly injudicious. It is even now a mystery why the Postal authorities have decided on Saturday morning, when it is known that in consequence of the French authorities refusing to run a train in correspondence with the Italian line, the mails have to remain the whole night in Paris. This twelve hours' delay could be given here, and the closing be made for Saturday evening.

The inner harbour of Brindisi is now sufficiently dredged, buoyed, and lighted to admit of steamers entering at all hours, and discharging alongside the quay. Not only do the Italian mail steamers regularly do this, but the larger boats of the Egyptian Company plying between Alexandria, Brindisi, and Venice.* The new hotel is nearly completed, and will be ready for opening next month; it contains some thirty bedrooms, well furnished, and is managed by a competent hotel keeper from Milan.

---

Mr. Edward Alexander Irving, who has been attached to the Colonial-office since 1854, has been appointed Assistant Colonial Secretary at Singapore. Mr. W. H. Rennie, the late Auditor-General of Hong Kong, who has received the same appointment at Ceylon, was a passenger by last mail *via* San Francisco, and is now *en route* to London. It is still, however, very doubtful if Mr. Rennie will take up the Ceylon post.

---

The appointment of a successor to Mr. Ross Browne as United States Minister to China has been announced by telegram from New York to be Mr. Frederick Low, the Governor of the State of California.

## LOSS OF THE P. AND O. STEAMER "CARNATIC."

We publish Captain Jones's account of the loss of the steamer *Carnatic*. It is evidently written under a disadvantage, and we think allowances should be made for a report written under such circumstances; but *The Times* makes no such allowance, and very roundly condemns the conduct of the captain in detaining the passengers on board until she parted, causing the loss of many lives. It bases its strictures on the written statement of a passenger whose name is not given. It is well known to old travellers in the Red Sea that landing on one of its islands unprotected from that dreadful sun which seems to enter one's very brain, is the last thing to be done, and so long as a ship will hold together there is far less misery in her than on one of these barren islands. We do not agree, therefore, with the sweeping condemnation of *The Times*, and we believe that evidence will be forthcoming to show that there was no probability of the vessel taking that sudden lurch which parted her, and engulphed the hapless passengers and crew. It was one of those unaccountable catastrophes which belong to the sea, and could not be anticipated. The best judges of the sufferings on an island in the Red Sea are the passengers wrecked in the *Alma* and landed on a reef. We venture to say that had one been on board the *Carnatic* the advice would have been to "stick to the ship" so long as she held together, especially when the landing was so close, and could apparently be reached at any required moment. That fright should overcome all judgment, and lead to a general desire on the part of passengers and crew to quit the ill-fated ship is of course natural, but it is for the captain and officers to put on a calm, yet determined front to the position, and prevent general panic and the enhanced miseries which generally follow. Had the efforts to get the vessel off the reef been successful it would unquestionably have been the best thing for the passengers as well as the owners, and we cannot see that Captain Jones was regardless of their safety in his efforts to save the ship. If any fault can be held it was that of the passengers in their own decision to remain on the ship. This is admitted by the letter we have alluded to, and which we append:—

The disappointment of the passengers was very great when they were told they would not be put on shore, as they had all anticipated. They were fortunately only about thirty in number, of whom three were ladies, and one was a little child, so that one boat would easily hold all. The crew commenced lightening the fore part of the ship by throwing over cargo, and endeavoured, fruitlessly, to pull her off the reef by putting out an anchor aft, which, however, would not hold in such deep water. It was obvious, in fact, that, having glided smoothly up the coral at full speed, the larger portion of her weight rested on the ground, and that no available force could ever move her off again. As the murmurs against being kept on the wreck grew louder, the captain after dinner called the passengers into the after cabin, and explained that his motive for not having sooner addressed himself to any of them was his desire to take every measure for the salvation of the ship, which he still trusted would be got off the rocks, and he recommended the passengers to choose a committee to confer with him as to the measures he had taken, adding his recommendation that he thought it much better to remain on the wreck. A committee of three was chosen, to whom he explained that he had put two an-

* The trains from Brindisi to Susa, at the foot of Mont Cenis, occupy twenty-four hours, and over the pass by the Fell Railway, five or six. Rome, or any part of Italy, can be reached from Brindisi.

Digitized by Google

chors forward on to the reef to prevent her sliding into deep water, and was employing the pumps in keeping the after compartment dry. By this time she had bumped a hole in her side, and the fore compartments were full of water; the engine compartments were dry, but there was a constant leakage into the after cabin, some of the berths being awash. These explanations reassured the passengers, who, seeing that it was too late to effect a landing by daylight, resigned themselves to passing another night on the wreck.

During the night a great change for the worse took place—the leak in the after saloon increased seriously, and chairs and seats were awash at the further end. The water slowly gained upon the pumps, and got into the stoke-holes and put out the fires, stopping the engines. The waves began also to break over the after taffrail. As daylight broke it was evident the ship would in a few hours be full of water from stem to stern, and might any moment slip down off the reef. The passengers were all ordered on to the forecastle, as there were signs of straining below deck near the engines. The crew continued to throw over cargo, and hoisted sails on the foremast to keep her from sliding back; they also lowered the yards from the mainmast. Boats had previously been got alongside, with a little water and provisions, in case of emergency. During all these long hours of gradually increasing danger the island lay refreshingly in sight, close at hand, the water between being in a state of dead calm from the protection of the reefs, but, to the astonishment of everybody, no attempt was made to man the boats or put the passengers on shore. The committee had been badly selected, for it comprised amongst its three members the only two persons on board who were in favour of remaining on the wreck, and its action was therefore paralysed. The passengers, behaving with wonderful presence of mind, could do nothing but exchange murmurings against the captain, and calmly await the result. At seven o'clock a fresh leak sprang in the main saloon, which began to fill rapidly with water, and by nine o'clock the water inside and outside the ship was pretty nearly on a level. The stern had sunk considerably, and it was reported that while bumping from side to side she had worked herself six feet down the slope. Although she was now virtually a waterlogged wreck, no attempt was even now made to put the mails and passengers on shore. By eleven o'clock the wind had freshened considerably, and the waves becoming rougher strained her so that she began to get hogged, and her stern sank under the water, so that her quarter deck was all awash with deck chairs, seats, hatches, &c. The order was now given to take to the boats, and the passengers, who had waited nearly two days and nights with their little bundles of valuables by their sides, began instantly to crowd down off the forecastle and to enter the boats. But the order had been given too late, for the gallant vessel had only five minutes to live. The boats had kept alongside with a man or two in them, and the three ladies and a little child entered them, together with four or five other passengers. The vessel was now settling down fast, each wave reaching further and further up the decks, and before the last of the ladies had been fairly got into a boat, the vessel parted clean in two amidships, with a noise like thunder, and the after part glided down into deep water, leaving an immense gulf in the waves as it disappeared. The fore part of the steamer rolled over first to starboard and then to port, finally settling down into deep water, but with her foremast and part of her bulwarks still above water. The crash was instantaneous, and as the crowd of passengers was descending in close file to the boats just as she separated beneath their feet, the majority of them fell, together with an immense mass of cargo and luggage, into the water just as the returning wave from the sinking vessel came back on the top of them, and for a few moments formed one struggling mass of human beings, mixed up with sheep, fowls, boxes, barrels, cargo, and deck lumber of every description, whirling about in inextricable confusion. By degrees the agitation of the water subsided, and those who were fortunate enough to escape were seen struggling up the rigging or swimming ashore among the wreckage. Numberless deeds of gallant daring were now done, the survivors rendering assistance to those who were still in the water, and in many cases when they were too exhausted to help themselves.

The boats were at once taken possession of by the Lascar crew, who, though they had hitherto worked very gallantly, now lost discipline and consulted their own safety; but they were soon brought back, and picked up those who were still floating or clinging to the rigging, and it being now high water the boats were floated over the reef and made their way to the island of Shadwan, where darkness came on before all were disembarked.

On mustering together it was found that twenty-six souls were lost, of whom about fifteen or sixteen were Europeans; and there was enough water and food on shore to last about two days on short allowance, the total number being about 200 souls. There was one signal rocket, but no means of producing a light. The *Sumatra* was known to be due, and great anxiety was felt lest she should pass us in the night without our having the means of gaining her attention; fortunately one of the passengers discovered a few dry matches, and at this moment the *Sumatra* was even passing. A boat had just started with the one rocket to intercept any passing vessel. Some bales of cotton cloth which had washed on shore were opened and fires kindled along the beach. At the same time the rocket was thrown up from the boat, and happily answered from the *Sumatra*. The commander, Captain White, knowing that on such a dry and barren rock no one would make fires except as a signal of distress, at once steamed in to the rescue, and took on board all the passengers at once, and the next morning rescued the remainder of the crew and took them to Suez.

The behaviour of the passengers and officers was admirable throughout, and the passengers worked as hard as the sailors, both at the capstans and deck work and in the boats; but the central figure in the scene was Mr. Wyatt, the first officer, whose untiring energy and activity throughout the whole disaster was the theme of constant admiration and remark, and when the final catastrophe came he crowned the whole by refusing to go ashore in the boats, and leaping out to the rescue of those who still remained near the wreck. Others of the officers and crew also performed similiar acts of daring—one man in particular, while the vessel was crashing under his feet, cutting off the rope by which the boats were fastened to the ladder to prevent their being drawn under with the wreck. As the *Carnatic* had a valuable cargo of copper and a considerable sum in bullion, it is probable that some attempt will be made to recover a portion of her cargo.

## STATEMENT OF THE CAPTAIN.

The Secretary of the Peninsular and Oriental Company has received ths following letter from Mr. Jones, the commander of the *Carnatic*, reporting the circumstances under which that vessel was lost:—

It is with the deepest regret that I have to inform you of the total loss of the *Carnatic* on the north edge of the Shadwan Reef, with a most deplorable loss of life attending it. A brief telegram of the sad event was sent you by Mr. West immediately on arrival of the *Sumatra* at Suez with all the passengers, officers, and crew that were saved from the wreck, and picked up off Shadwan by that steamer. I will endeavour, in the short time before the mail leaves, to furnish you with as full a statement as I can of all that happened from the moment of leaving Suez till we were picked up by the *Sumatra*. I have no record of the circumstances, my memoranda and everything having been lost. The *Carnatic* left Suez on the 12th inst., shortly after 10 A.M., for Bombay, with a full cargo, the mails, twenty-three first-class passengers, and eleven second-class. On arrival off Jubal Island a strong current must have set the ship to the westward; afterwards, at 12·50 A.M., Jubal bore W., and Ushraffee light N. 47 W. At 1 A.M. I had hauled the ship out S. 51 E., keeping a good look-out myself. About eighteen minutes afterwards I suddenly observed breakers on the starboard bow, and instantly ordered the helm hard a-starboard; when I saw no chance of clearing the breakers extending ahead, and the ship taking a long time to answer her helm, I reversed the engines full speed astern, but the ship struck on the reef a few minutes afterwards. Every effort was made at once to get her off. The ship was dry and made no water. Exertions were continued. Between eight and nine o'clock of the 13th she commenced to make water forward, and it increased up to noon, when I saw there was no chance of getting her off without assistance. The boats were all lowered immediately and moored along her side ready for service. Sounded wells every fifteen minutes. All pumps were set on, and the engines kept moving to work the bilge injections. Before this time cargo had been thrown overboard to lighten the ship, anchors got out astern, and every exertion made to move her off. When I perceived it was hopeless, from the quantity of water she had made forward, and being aground from abaft the funnel to the bows, I considered it advisable to keep her on the reef. The engines were turned ahead, and all pumps kept at work. Both bower anchors let go with a short scope of cable, and more cargo thrown overboard. The soundings round the ship at this time being eleven feet under the bows, twelve feet abaft the funnel, nine and ten fathoms at the gangway, and eleven and fourteen fathoms under the stern, coral bottom. All the boats were watered and provisions got up ready. About this time (6 P.M.) there was a light breeze and fine weather, and the ship was lying perfectly steady. I called a muster of all the passengers, and explained the situation we were in, asking them to form a committee out of their number of those they thought most capable to examine into and judge the state the ship was in. They cheerfully acceded to my request, and formed a committee. Myself and the chief officer pointed everything out to their attention, and without the slightest hesitation they decided it was the best plan to remain on board, as it appeared impossible that the ship could move or be in any danger unless a gale sprung up, which was considered unlikely at this season. The *Neera* and *Sumatra* were both expected to come in sight the next day, and would take them off. The boats were kept ready alongside, and I never left the deck an instant. At midnight the water in the forehold was the same, and aft about level with the floor of the tunnel. Shortly after 2 A.M. they were short of steam, and the engines stopped, the coal exit had jammed below, and before they could be supplied by hoisting it on deck out of the bunkers the water gained and put the fires out. There was not much increase till some time afterwards, but I desired that every one should go on the fore end as a precaution. At daylight there was a moderate breeze and fine weather, the foretopsail, foresail, and jib were set, and the sheet anchor let go. Provisions were put in the boats, and the crew standing by, I did not apprehend anything serious, except the water increased aft. At ten A.M. the boats were piped away. I assisted two ladies, a child, and stewardess in first, and the remaining passengers were getting down without alarm into the boats, when the ship suddenly slipped down stern foremost, heeling over and leaving the fore part only out of the water. I was standing on the edge of the forward gangway when the unfortunate catastrophe occurred, seeing everyone into the boats. I was jerked, and slipped overboard. On rising I was hauled into one of the lifeboats, which I took charge of at once, and landed the people out of her on the reef. Previously to this the other boats had made for the reef, and landed the people in them. My crew in the lifeboat were not strong enough to launch her back through the breakers, so I took the jolly boat, which had just come on shore, and with the carpenter, a quartermaster, and two men, I made for the wreck, and took off six people with the chief officer, who I wanted to help with another boat. We were swamped and capsized going through the breakers, but got on shore all right. I then launched the mail boat, and with the chief officer, fourth officer, carpenter, gunner, one quartermaster, and three Chinamen, brought off from the wreck seven more, who were safely landed. I then went off again, leaving the chief officer to take the first cutter, which the third officer was trying to launch. I got off again, the first cutter following, and took off all who were left on the wreck, proceeding in the two boats to leeward of the reef, and moored in smooth water. I had the other boats brought over, and started with all the people left for Shadwan, and landed safely about

Digitized by Google

six P.M. A look-out was kept, and shortly before eight P.M. a steamer was reported in sight. The chief officer was on the point of starting to cruise about during the night. I lost no time in sending him off. Signal fires were lit, which attracted the *Sumatra's* attention, and the chief officer having pulled alongside, reported our situation. Boats were immediately sent from the *Sumatra*, and all the passengers were got off without loss of time. Before we could launch our boats, which had been hauled up some distance for safety, the surf rose suddenly, and though several attempts were made, the boats were swamped and stove; the men were quite exhausted, so that further attempts had to be given up. At daylight the surf was much the same, and the boats were nearly all disabled in trying to launch them. Ultimately I had to send all hands off in a lifebuoy with a life-line from the boats to the shore. I was dragged last through the surf in the same way. All arrived safely alongside the *Sumatra* at ten A.M., when she proceeded on her way to Suez.

---

(The Times, Sept. 29).

The *Carnatic* left Suez on the forenoon of the 12th of this month. It was on the point of emerging from the Gulf, with its group of islands, into the Red Sea, when in a moment it slid up a coral reef, as a pleasure boat is run on the beach at an English watering-place. The reef is well known, and the captain himself was keeping a look-out which he describes as "good." The sea was still, the night was starlight, and a lighthouse was visible hard by to show the general position; but the only explanation he vouchsafes of the catastrophe is, that on arriving off the neighbouring Jubal Island "a strong current must have set the ship to the westward." Considering that parts of the Gulf are a network of rocks, and that strong currents are ordinary incidents of those waters, passengers for India will hardly be reassured by being thus given to understand that a strong current is treated by British seamen as a kind of fate which is neither to be resisted nor foreseen. But what followed leaves no room for surprise about the preliminaries. The *Carnatic* was hard and fast on a reef at the entrance of the Gulf of Suez; but if there are reefs there are also islands lying within them, and the Island of Shadwan was a refuge only four miles and a-half distant. For some time after the *Carnatic* struck to have reached the shore would apparently have been little more than a pleasure trip. There was only a light breeze, and the reef kept the waters between "in a dead calm." The passengers, thirty-three in number, were prepared, and, it is stated, with but two exceptions, eager to leave; but all through the remainder of the night and the next day till towards evening they waited on deck for the order to loose the boats anxiously and in vain. At length their murmurs compelled the captain to consult a committee of three selected by them. His own avowed opinion was that the ship was safe, and the committee endorsed his view. By this time in any case it was grown too late to effect a landing, and for yet another night the passengers waited, with their little parcels of valuables by their sides, the pleasure of the winds and waves to wash the wreck off the rock. The vessel had not been all this time motionless, though fixed fast. It had been flapping helplessly up and down on the coral, and a leak had sprung in the side of the after saloon. During the night the water rose and put out the fires, thus stopping the engines. By morning a fresh leak had sprung, and by nine o'clock, as our correspondent's graphic description shows, the water inside and outside was nearly on a level. Still the passengers waited for the order to leave, and still in vain. By eleven o'clock the wind had risen, the sea had roughened, the stern of the *Carnatic* was below the surface, and then at last the signal was given to take to the boats. Three ladies and a child had but just embarked when "the vessel parted in two amidships with a noise like thunder, and the after part glided into deep water, leaving an immense gulf in the waves as it disappeared." The fore part rolled to and fro, and then settled down, too, into deep water, the returning wave from the sunken after part whelming the whole remaining number of passengers, with sheep and fowls, cargo and luggage, and fragments of the wreck in one confused, seething mass. That twenty-six persons, fifteen or sixteen of whom were Europeans, perished in the whirlpool seems far less wonderful than that the rest should have escaped. It is only just to officers and crew to say that they must have displayed much courage and devotion to effect even such a salvage.

Persons who embark on distant voyages may be supposed prepared for the contingencies of storms and tempests. But here the sea was calm. If they explore unknown waters, they consciously run the risk of shoals and rocks. But the Gulf of Suez has been surveyed and mapped out till the locality of not a reef in it is unknown. They know they are still at the mercy of the carelessness of a fellow-passenger who may let a spark fall, or of a master who may have laid his account with cheating the underwriters. But never were lives of passengers lost at sea by an agency less within the power of themselves to compute or provide against than in this woful calamity. The figure of the Captain stands alone in the foreground of the picture. Vessels are often wrecked from the neglect of captains to exercise due supervision; but here it was the Captain's supervision which did all the mischief. We pass no judgment on the original accident. How far that might have been avoided by better seamanship on the part of any of his officers, or was due to want of seamanship on his own part, will be investigated by experts. But his narrative, and the very interesting account by a passenger which we publish, furnish means for forming a view on the manner in which he exercised his discretion subsequently. The two stories do not contradict each other. The only difference between them is that the Captain's tale omits certain particulars which the passenger's letter supplies. It is perfectly clear from both that no loss of life need have occurred had the boats been resorted to on the morning after the wreck. The sea was then tranquil. There may have probably been a certain amount of surf off shore; but even Captain Jones does not refer to that as having constituted a justification of delay. It is charitable to suppose that one reason for his persistency in lingering on board till it became a question of minutes when the vessel should become waterlogged and heel over may have been the greater certainty that they would be seen by passing ships and rescued than if they quitted the reef for the island. But it would have been absurd to apprehend they could be overlooked on an island in a sea which is so beaten a throughfare as the Red Sea, and with the abundant materials they might by forethought have provided to attract attention. The true motive was undoubtedly that which our correspondent declares Captain Jones himself to have mentioned as an excuse for his original reluctance to ask his passengers' advice. It was that he desired "to take every measure for the salvation of the ship, which he still trusted would be got off the rocks." The hope to which this faithful servant of his company, but very unsafe guardian of the lives of passengers, clung probably was that the *Sumatra* might come up in the course of a day or two, and aid in making the *Carnatic* seaworthy and dragging her off the reef. In the meantime, only by the combined energies of the whole crew, by putting out anchors, setting sails, keeping the engines going and the pumps at work, was there, he knew, any chance of preserving the vessel steady in its place. The departure of the passengers would both have robbed him of some stout arms, and, besides, have taken the heart out of the crew's efforts. Captain Jones's first thought was of his ship; his passengers were only his second care. We cannot admit that the concurrence of a committee of the passengers in his recommendation to remain in the ship diminishes his responsibility. Our correspondent affirms that two gentlemen who formed a majority on the committee were the sole passengers in favour of staying, and, if this were so, the captain was certainly not entitled to let their opinion, whatever it might be, on a subject like this, overrule that of the rest. But even if this supposed eagerness of the mass of the passengers to go ashore be an afterthought, at least Captain Jones does not allege that he consulted the committee and obtained their approval of further delay at two on Tuesday morning, when "the water had gained and put the fires out." They would be hardly likely, we should surmise, to have felt then sufficient sympathy with Captain Jones's love for his ship to decide, as they did earlier, and "without the slightest hesitation, that it was the best plan to remain on board, as it appeared impossible that the ship could move or be in any danger unless a gale sprung up." But, however fervent their approval, and however unanimous might have been the acquiescence of the passengers at large, Captain Jones's responsibility would have continued just as great, just as entire. A captain of a ship on these occasions, like a general calling a council of war, may gain useful hints and secure a more cheerful co-operation; but it would be a very dangerous doctrine to hold that he could by such devices either abdicate or even share his responsibility.

Perhaps Captain Jones may be able to give a more plausible explanation to the public than he has thought it necessary to give to his owners of his delay in taking to the boats. From the accounts we have it does not appear that there would have been any real danger in reaching the shore for some time after the *Carnatic* struck. The enterprise was accomplished later without loss of life under far more difficult conditions. As yet the reasons he has suggested imply a care only for the ship's safety. He appears to have deliberately staked the lives of his passengers and crew on the hazard of the *Sumatra's* arrival before the wind rose. The loss of life which eventually occurred occupies but a casual place in his narrative. But for a single line in the opening sentence a reader might have supposed that all had been saved. Even, however, had no lives been lost, we should still have required special justification for a resolution which forced a mass of helpless passengers to endure the horror of watching, during two nights and a day, the waters creeping up higher and higher, while they were tantalised with the spectacle close at hand of a certain and obvious means of escape of which they were barred from availing themselves. On a route like that to India Great Britain cannot afford to pardon an economy which would try to preserve a ship at the chance of losing lives. Every Peninsular and Oriental Company's servant must be taught that his first duty is to his passengers, and that nothing is precious enough to be suffered to challenge a comparison with their safety.

## THE LATE CONSUL GIBSON.

In addition to the many eulogiums which have appeared in our columns on the conduct of the late Mr. Gibson at Formosa, based chiefly on correspondence from the spot, we have now to add the tribute of Mr. Hugh Matheson. It is seldom, indeed, that Mr. Matheson appears in print, and he must have felt strongly the injustice cast upon Mr. Gibson by the Foreign-office to induce him to do so. Mr. Matheson has, fortunately, also allowed his pen to run on to an expression of opinion as to the wretched policy of the present Government towards China, and we rejoice at such an authority in support of the principles we have advocated, in common with those who know and understand China and the Chinese. Mr. Matheson says:—

I have no desire to be hard upon Lord Clarendon. Being personally unacquainted with the Chinese, and failing to realise to the full their unquestionable duplicity, he had been greatly influenced by the plausible misrepresentations of Mr. Burlingame, and I trust sincerely it is not too late for the Government to adopt instead the sounder views of our present able Minister, Sir Rutherford Alcock.

The remarkable success of Mr. Gibson's proceedings in obtaining the punishment of wicked and persecuting mandarins was appreciated quite as highly by the Chinese population as it was by the British community, and a reign of something like justice had begun, which was unhesitatingly attributed to the straightforward, upright, and consistent conduct of this admirable and excellent man.

The tidings of his recal from Formosa, and the severe animadversions upon his conduct made in England in high official quarters, proved a crushing blow to Mr. Gibson. The iron entered into his soul. Conduct which for its skill, its rectitude, its considerateness, its patience, its firmness, and every noble quality that could distinguish a British officer, plainly merited commendation and honour, and which, moreover, was so signally successful in restoring tha "reign of law" and promoting peace and harmony among all classes, was visited instead with severe censure and degradation.

I cannot close without repeating my own deliberate conviction, shared by almost every one who has had any acquaintance with the Chinese, that the recent policy of our Government in its intercourse with the Government of China is a mistake, all experience having shown that in dealing with Chinese officials nothing can be gained and no progress made *without firmness*, and nothing that has been gained can be kept *without firmness*. And he will be the most successful representative of Great Britain in China, and the most influential as well as respected and honoured, who firmly insists upon the proper fulfilment of treaty obligations, and who is constantly prepared firmly to demand prompt redress for studied and intentional breaches of national rights.

# Foreign Intelligence.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Sept. 30.

Both the First and the Second Chambers of the States General have issued addresses in reply to the Speech from the Throne, and, as usual, they were only echoes of the Speech itself. The Minister of the Financial Department has laid his budgets before the members, with regard to which I have nothing to add when I have stated that the Minister was obliged to communicate the fact that there is a deficiency, the total receipts amounting to 85,456,583f., and the expenditure to 96 228,916f. 91c., leaving a deficit of 10,772,333 91c., which will this year be covered by Treasury bonds, while next year the Minister will propose to raise a loan, the amount of which is not yet fixed. Notwithstanding that the Conservatives are crying out that we are on the eve of a State failure, there is nothing in the Minister's statement to create uneasiness, because the deficit of ten millions is owing solely to the completion of the railway system, for which purpose a hundred millions were expended without borrowing one cent. India has produced this enormous amount, and still our Tories are trying to demonstrate that the Liberals are ruining the Fatherland, now that they propose measures tending to improve the condition of India. As I said in a former letter, Mr. De Waal has proposed to fix the annual contribution of India at ten millions. In his budget speech the Minister Van Bosse also announced some changes, namely, the abolition of the licence-tax, to be counterbalanced by a tax upon tobacco. Both the Liberal and Conservative papers disapprove of this proposal, and it may be predicted that it will not pass the Chamber.

The *Rotterdam Courant*, a Conservative paper, has set a rumour in circulation that Mr. van Bosse is to be appointed Governor-General of the East India colonies, and that Mr. Myer will be immediately recalled. Notwithstanding that this rumour has not been contradicted, I do not think that it is true. Another paper of that party, *De Noordstar*, has stated that the Minister of the Foreign Department will resign, and that Mr. Cremers, Mr. van Lansberge, or Professor Asser will have the portfolio. Still another *on dit*, which, perhaps, deserves no more belief, is, that the Minister of the Colonial Department intends to appoint Mr. O. van Rees a member of the Council of India. The Conservative papers, which set this last rumour in circulation, add expressions of their disbelief in its correctness.

The Minister de Waal has asked for a credit of f.317,916, in order to establish a steam line between Padang and the harbours of the west coast of Sumatra. He hopes that this measure will tend to improve the trade of Padang. No credit is asked for the steam line between Java and Australia.

The Second Chamber has elected as their president the Liberal deputy, Mr. Dullert. It is probable that in the place of Mr. van Reenen Mr. Pynappel will be elected M.P. at Amsterdam.

H.R.H. Prince Henry will assist at the opening festival of the Suez Canal.

In Amsterdam and Almelo some riots have taken place, but they were not of a serious character.

### PRODUCE MARKETS.

Coffee.—The Dutch Trading Company's public auction on the 22nd (briefly noticed in our last), at which 129,243 bales were offered, went off most favourably. The demand was very animated, and from ½c. to 2½c. was paid above the valuation. The quotation for good ordinary Java is now 35½c. to 36c., and for good ordinary greenish 34½c. to 35c. This result has given the more satisfaction, because the market was extremely inactive before the auction. The private transactions include 645 b. Padang, ex Maria Sarah, at 40½c.; 1,000 b. Java, at a price that did not transpire; and 570 b. Java, ex County of Bute.

Rice meets with a good demand; 5,500 b Rangoon, ex Berend, were sold at 5⅞f.; 8,300 b. Bassein, ex Amity, at 5¾f.

Spices.—For fine qualities there is some demand for export; 23 casks Nutmegs, 40 casks and 8 chests Mace, ex County of Bute, County of Berwick, and Bezoekie, sold at prices that did not transpire. The market remains firm. The stock of Pepper is nearly exhausted. The nominal quotation in second hands is 24½c. to 25c.

Sugar (Raw).—On the 23rd inst. 28,310 mats Java were offered in public auction by the Dutch Trading Company, and the whole quantity was sold; for the brown qualities an advance above the July prices was paid of ½f., and for the yellow and white of ¾f. to 1f. The greater part of the quantity was bought by refiners. The market closes with a very good tone. Since the auction 510 mats Passaroeang, floating per Jupiter, No. 12/14, new crop, at ½f. under the value of the auction. The stock of Raw Sugar is 35,963,826 kilo.

Tobacco (Java).—There are no transactions to report. The auctions will take place early in October.

Drugs.—Camphor without transactions, there being no buyers, on account of the important quantities afloat for the Trading Company. Cubebs dull, notwithstanding that the article can be bought at very low prices. Cassia Fistula meets with a good demand, and nothing can be bought under 9f. Cassia Lignea: Stock nearly exhausted; 76½c. is the actual quotation. Cocoanut-oil Soap is quoted 185c., but nothing is offered. Preserved Ginger firm, owing to want of stock. Java Vanila: 29 chests imported by the Bezoekie will shortly be offered in auction; the valuation is from 4f. to 10f. per ½ kilo. For Japan Wax there is somewhat more demand; the quotation is for A, 50f.; B, 48f.; D, 44f. The Trading Company has a stock of 4,397 chests.

Rattans.—340 piculs, ex Bezoekie, and 151 piculs, ex County of Bute, have been sold.

Indigo.—Great firmness still prevails in the market; 246 chests private import have changed hands at an advance of 20c. to 40c.

Kapok.—300 bales uncleaned, and 130 bales half cleaned were sold at prices that did not transpire.

Arrack.—47 casks ex Gerard Pieter Servatius, 10 casks Batavia, 53 casks Indramayo, ex Equator, and 479 casks Sourabaya; 248/1 and 115/2 casks, imported also by the Equator, were offered by private tender, but were not sold.

Money and Stocks.—The market is very dull, and business is unimportant. Netherlands Bank, 235¼f.; Trading Company, 116¾; Rotterdam Bank, 81½; Dutch Two-and-a-Half per Cents., 53; Three per Cents., 61½; Four per Cents., 61¾.

P.S.—Oct. 1.—The sale of Tin to-day went off at 74 to 74½.

### SHIPPING INTELLIGENCE.

Arrivals.—September 22, at Brouwershaven, from Rangoon, Jupiter; from Bassein, Alice Tainter; at Texel, from Rangoon, Bartholomeo; 24, at Brouwershaven, from Batavia, Schiedam; at Texel, from Padang, Jan van Brakel; from Rangoon, Norenside; from Bombay, Kurrachee; 25, at Hellevoet, from Rangoon, Berend; at Zierikzee, from Batavia, Marie; 27, at Texel, from Kurrachee, Empress Eugenie; at Zierikzee, from Batavia, Triton.

Loading.—For Batavia, Noach III., Cornelis Wernard Eduard, Jonge Cornelis; for Macassar, Neerlands Vlag; for Melbourne, Cornelis Gips; for Samarang, Friesland; for Shanghai, Mexicana; for Singapore and Hong Kong, Isaac da Costa; for Sourabaya, Jonge Jan.

Passengers Inward.—From Java, per Batavia: Mr. C. J. Morel and family; per Schiedam: Messrs. A. W. J. Lina and family, L. J. Boyer and family, H. du Croo, A. E. Hanson, H W. Wysman; per Marie: Messrs. Hoog and family, Kramer and family, Mrs. van Oven and family, Verkouteren and family, Miss Wertheim; per Triton: Messrs. Boogaard, Serlé and family, Thepass and family, Knechtmans, Mrs. Anemaet, Kunneman and family.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

# Monetary and Commercial.

The various telegraph schemes for carrying on communication with the Straits and China (and which we may describe as the Read-Patterson scheme through Siam, the Kresser-Pollard scheme by Saigon, and the American Pacific line, all of which we have fully described during the past few months) have not yet assumed the shape for launching for general subscriptions. The direct light Varley cable, from Ceylon to the Straits, styled the India, China, and Australian Submarine, is at present the only one on the market, and it is still doubtful if the capital for the first section has been subscribed. The times are not propitious for companies, the break up of the Albert and European Insurance offices having again checked confidence in boards of directors, their managers, and secretaries.

At the fifth ordinary general meeting of the shareholders in the National Bank of India (Limited), held, on the 28th inst., at their offices, No. 80, King William-street, City, the report of the directors, of which a summary appeared in our last issue, and which recommended the payment of an *ad interim* dividend at the rate of six per cent. per annum, carrying forward £8,777 0s. 8d., was unanimously received and adopted. The Chairman, Mr. W. S. Fitzwilliam, stated that the progress of the bank was most satisactory, and that its business was steadily increasing.

The prospectus of the Great Oceanic Telegraph Company (Limited) has been issued. The object is stated to be to establish a cheaper system of ocean telegraphic communication. By means of light cables, containing "no perishable materials in their construction," the promoters contend that they can "release the telegraph world from its utter dependence on a *Great Eastern*," and at the same time effect, as compared with the existing heavy cables, a saving of 40 per cent. on first cost, with extra working capacity. In the first instance, it is proposed to carry a direct line from the south-west coast of Ireland to Sable Island and Halifax, Nova Scotia, which is in complete telegraphic communication with New York and America generally; and the company proposes to commence with a uniform rate of 1s. 6d. per word, or 15s. for a message of ten words, with 7s. 6d. for every additional five words, being about one-half the present charges. The construction of the main line from point to point is estimated to cost £450,000. The present capital of the company is to be £600,000, in 30,000 A shares and 30,000 B shares of £10 each, the A shares being guaranteed a preferential dividend of 10 per cent. by the B.

Advices from New York state that the "Western Union Telegraph Company" are making efforts to induce the Government to take over and work their lines in a similar manner to our own Government. At present the company has 3,462 stations, 52,099 miles of poles, and 104,584 miles of wire, which traverse every State and Territory in the Union except Minnesota and New Mexico. The receipts last year were equal to about £1,460,000, and the net revenue was about £550,000, or about 6½ per cent. on the capital stock. The company, it appears, contend that the terms at which the Government should buy them ought to be calculated on the assumption that a 10 per cent. stock may be considered worth par, and that their stock paying 6½ should be taken over at 65.

A new undertaking is announced under the title of the Home and Foreign Telegraphic News Company (Limited). It is suggested by a desire to take up the "intelligence department" of the Electric and International Telegraph Company, which will not be continued by the Post-office authorities when the Electric Telegraph system is transferred to them. The services of a portion of the working staff of the present agency are to be retained, and it is stated that the system is to receive a considerable extension, both at home and abroad. The capital proposed is £20,000, in 4,000 shares of £5 each.

The *Manchester Examiner* mentions the failure of Messrs. Hague and Penny, of Moor-hall Mill, Preston, with liabilities of £20,000 to £25,000; also that of Mr. Luke Isherwood, of Rochdale, yarn agent, for a small amount.

The prospectus of the Ceylon Gas Company, which has been in circulation for capital in Ceylon, will shortly be put on the London market.

A meeting of the Oriental Bank Corporation is called for the 28th October, when a dividend of 30s. per share will be declared, equal to 12. per cent. per annum.

The amount of bullion by the P. and O. Company's steamer *Bangalore*, from Southampton, on the 2nd inst., was—in gold, to Galle, £800; to Madras, £1 948; in silver, to Bombay, £10,000; to Hong Kong, £200; to Foochow, £960; to Shanghai, £3,450; total in gold, £2,748; in silver, £14,610.

## BOARD OF TRADE RETURNS.

The Board of Trade returns for the month and eight months ending August 31 have been issued. The declared value of exports of British and Irish produce for August was £17,364,691, against £16,427,597 for the corresponding month of 1868, and £17,880,999 in August 1867. For the eight months the totals are £126,244,907, £116,777,023, and £121,056,913, in 1869, 1868, and 1867 respectively. These figures purport to show the large increase of £937,094, or nearly six per cent., in the declared value of our exportations, compared with the corresponding month of last year; but to most persons conversant with the state of commerce they will appear to carry their own refutation. For the eight months of the present year ended the 31st of August an increase of more than eight per cent. is represented to have occurred. As regards the month's imports, the statement of the "computed real value" of the principal articles is given as under: July, 1867, £19,221,633; July, 1868, £21,494,611; July, 1869, £20,960,848. And for the seven months ended the 31st of July, 1867, £128,989,619; July, 1868, £132,352,276; July, 1869, £128,023,486.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## ARTICLES OF IMPORT.

### TEA.

The sales of the 30th Sept. and 1st Oct. comprised about 10,000 packages ex Ajax, Titania, &c. Fine Monings (counterpart sold a fortnight ago at 2s.) sold for 1s. 8½d. to 1s. 8¾d.; common (new season's) 1s. 1¼d. to 1s. 2d. (lowest this season), to fair medium, 1s. 5d. Greens: Moyunes, No. 5 Gunpowder, 3s. 9d.; Young Hyson, 2s. 4½d. Old season Red Leaf, 1s. 0½d. to 1s. 1d. The feature of the market is a run on fine sorts, and neglect of medium and common.

The following is from Messrs. Shepard and Co.'s Circular:—The short interval that has elapsed since our tea letter of the 24th inst. has been chiefly directed to looking over the cargoes of steamer Ajax and West Indian, and the out-turn of the latter proves superior (as anticipated) to the Achilles cargo, and a large quantity of fine Kaisow has been taken at 1s. 10d. to 2s. 2d., crack chops of the season at 2s. 3d. to 2s. 8d., and finest and extra fine Paklings (for export) at 2s. 2d. to 2s. 9d. per lb. All lower grades are again easier, as low as 1s. 2½d. per lb. being given for brisk burnt Kaisow kind. Of the Ajax cargo the bulk is of a lower class than previous imports, chiefly good medium to fine quality Oonfas and teas of the ripe fruity character selling at 1s. 5½d. to 1s. 9d. per lb., and show real good value. The dry Pekoe flavoured Oopack district (the only purchases at Hankow and costing high), continue hard to move over 1s. 9d. per lb., and many parcels yet remain. The business of the week is considerably larger than any since the arrival of the new Teas, notwithstanding the public sales for to-morrow and following day of about 10,000 packages New Teas. Green: The new Ping Sueys have arrived in large quantity, and are selling at satisfactory prices, seing the limited business for export. Prices average perhaps 5 per cent. over last year's. A few old Moyunes have sold at full prices. New Season's Indian Tea (Assam Company's growth) sold, at very full prices in yesterday's public sale. The yield from all India season 1869-70, is put at 15,000,000 lbs., an important increase over previous year's, and must influence materially the position of China growth.

The Circular of Messrs. Wm. Jas. and Hy. Thompson is as follows:—The market is unsettled, and kept in a state of irritation by frequent public sales, and, as a natural consequence, all grades of Congou, excepting those for which there is demand, are lower, and sales most difficult. The system of auctions at stated periods, which was adopted for the general benefit, having been broken up, sales are now declared for almost every day of the week, to the manifest injury of the holders of stock. The steamer West Indian, from Foochow, arrived on the 25th inst., and anything fine to finest, from 1s. 10d. to 2s. 6d., has sold readily, the bulk being neglected. The flavoury and fine chops, ex Ajax, have also been picked out, and full prices paid.

Foochow Congous.—Some broken leaf, ex West Indian, has been sold at 9½d. to 11d. per lb.; common may be quoted 1s. 1d., but without inquiry. A few sales of new fair to medium have been made with the greatest difficulty at 1s. 3d. to 1s. 6d. per lb., showing a reduction of 2d. per lb. upon the first day's sales; fine to finest at 1s. 10d. to 2s. 6d. per lb., although irregular, are the only kinds that sell readily. Paklings, good to fine, at 1s. 10d. to 2s. 3d.; sales difficult to effect. Black-leaf Congous: Common to fair, at 1s. 1d. to 1s. 2d., continues dull; sales have been made of new, ex Ajax, fair to medium at 1s. 3½d. to 1s. 6d., good to fine 1s. 8d. to 2s. 4d., the inferior grades not selling freely. Tayshan Congous: In these descriptions we have nothing new to report. Oolongs: Fine only meet with buyers. Scented Orange Pekoes: Sales of Foochow descriptions have been made at lower rates—1s. 8d. to 2s. 2d. for good to finest. Green Teas: Sales, ex Ajax, of Ping Sueys; Gunpowders, fair to finest, 1s. 4d. to 3s. 6d.; Imperials, good to fine, 1s. 8d. to 2s. 3d.; Young Hysons, fair to fine, 1s. 3d. to 2s. 8d. per lb.

Prices for new season's medim black-leaf Congous are about 1d. per lb. lower, or fully 4d. per lb. below opening rates, and fair to medium brown leaf 2d. per lb. Scented Orange Pekoes are also easier; other kinds unaltered.

| Amount "on the water," advised by the last mail ... .. ... ... ... | 40,901,200 | ,, | 58,080,800 |

Silk.—Market dull, the late large arrivals of China neglected, the quality being very unsatisfactory. Of Japans the rates are barely upheld, and purchasers hold back. No. 3 Tsatlee quotation is 29s.; Red Peacock, 24s.; Maibash, 24s. to 26s. for ordinary, and 28s. to 31s. for superior. Stock: China, 16,652; Japan, 5,246. Deliveries for Sept., 3 225 China, and 422 Japan.

Cotton.—An improvement has been exhibited in the Liverpool market since we last reported, there having been a more extensive demand with less pressure to sell, and prices show an advance of about ⅛d. per lb. on our last quotations, the current rates being Surat, 8¾d. to 11⅛d.; Bengal, Scinde, &c., 8¼d.; Middling Uplands, 12⅛d.; Middling Orleans, 12⅞d.; fair Dhollerah, 9⅞d.; fair Oomrawuttee, 9¾d.; fair Broach, 9⅝d.; fair Pernam., 13¼d.; fair Egyptian, 13⅛d.; fair Smyrna, 10⅜d.; fair Bengal, 8⅝d. In the London market a better tone is also apparent, and prices show a hardening tendency. Quotations:—Tinnivelly, middling fair, 9d.; fair, 9¼d.; good fair, 9⅝d.; Northern and Western, middling fair, 8⅞d.; fair, 9⅛d.; good fair, 9⅜d.; Cocanada, fair, 9⅛d.; good fair, 9½d.; Scinde, middling fair, 8¼d.; fair, 8½d.; good fair, 8¾d.; Bengal, middling fair, 7¾d.; fair, 8⅛d.; good fair, 8½d.

Coffee.—The supplies of Ceylon at auction since the 24th inst. have been considerable, but they have found ready buyers at the advance established on that day, Plantation realising for triage and ordinary, 48s. 6d. to 55s.; middling dull, 69s. to 69s. 6d.; bold, 74s. 6d.; middling coloury, 70s. to 76s. 6d.; good middling bold, 78s. 6d. to 85s.; pea-berry, 78s. to 83s. Native has brought 48s. 6d. for small, 53s. to 53s. 6d. for good ordinary, and 58s. 6d. for bold qualities. Manila has been for the most part bought in at 55s., but a few bags dull pale have been sold at 47s. There have been no offers of Singapore. Stock Ceylon, 13,123 tons. Latest telegraphic advices of Sept. 7 from Brazils quote as follows:—Coffee, good first, 7,000 reis; stock, 100,000 bags; sales 112,000; total export since the departure of the last mail, 112,000 bags, of which 2,000 were for the Channel, 20,000 for the North of Europe, 22,000 for the Mediterranean, 62,000 for the United States, and 6,000 for other ports.

Cinnamon.—240 bales 14 boxes Ceylon met less demand, and barely 100 bales found buyers at easier prices—first sort at 3s. 2d. to 3s. 8d.; second, 2s. 3d. to 3s. 6d.; third, 1s. 8d. to 2s. 5d.; fourth, 1s. 10d.; the remainder bought in, chiefly low coarse, at 1s. 4d. to 1s. 6d. Cinnamon Chips: The large supply of 2,353 bags Ceylon met a less active demand, and only about one-third sold at lower prices—dust, 4d.; common coarse to good common bark, 4½d. to 5½d.; middling thin bark and chips, 6d. to 6¾d.; good middling, 7¼d.; good 8¾d.

Cassia Buds.—16 cases China bought in at £9, 5 cases wild Bombay withdrawn.

Coir Goods.—A fair supply of Yarn has been offered, and nearly all disposed of at steady prices, more especially for the better kinds. Of Yarn, 25 bales Ceylon sold—good, £59; fine, £45 to £51; superior, £61 to £62; 36,741 dholls (46 tons) nearly all sold—very common and common, £26 10s. to £28; good common to low middling, £29 5s. to £30 5s.; middling, £32 to £33 15s.; fine, £40 to £44. Of Fibre, 3,642 ballots (9 tons) Ceylon 1 ton good sold at £28 10s., the remainder being bought in at £22.

Cocoa-Nut Oil.—The market for Ceylon is quiet, the quotation being still £42 5s. per ton.

Isinglass.—At the last auction 60 cases Penang chiefly sold, good tongue, 3s. 11d.; middling tongue, 3s. 6d. to 3s. 7d.; ordinary thin and dark, 3s. 2d. to 3s. 5d.; low, 2s. 11d.; pickings, 2s. 7d.; good leaf, 4s. 1d.; middling to fair, 3s. 10d. to 4s.; ordinary, 3s.; good Manila sort, 2s. 5d. to 2s. 6d.

Japan Wax.—There is a fair demand, and 300 boxes good saucer have realised by private sale 80s. per cwt. At auction 131 boxes were bought in at 85s.

Manila Hemp.—The sales, although small in quantity, have been at full prices, viz., common brown, £49, good roping, £53 to £54, superior, £56.

Mace.—Of 22 cases Penang 15 cases low middling to middling sold at 3s. 3d. to 3s. 6d.; 6 cases Java sold, common 2s. 6d. to 2s. 10d., middling 3s. 4d.

Nutmegs mostly sold at barely the previous value, 3 cases Penang 76's bought in at 3s.; 5 cases Java sold, 69's at 3s. 6d., 85's at 2s. 4d., 94's at 2s. 2d.

Plumbago.—In auction 1,331 barrels Ceylon met a fair demand, 800 barrels finding buyers at steady prices—good middling to good bright lump, at 20s. to 23s.; middling, 16s. 6d. to 18s. 6d; low middling lump and dust, 15s. 6d.; chips, 11s. 6d. to 14s.; fine bright dust, 11s. 6d. to 11s. 9d.; good, 10s. to 10s. 9d.; low middling to middling, 8s. 6d. to 9s. 6d.; ordinary, 8s. per cwt.

Pepper.—The sales since our last report have been exclusively of Penang Black, of which about 1,200 bags have been taken at 4 1-16d. for medium, and 4⅛d. for good qualities.

Rice.—The market continues quiet, and the only sale reported has been of 200 tons damaged Garden Siam, good quality, at 8s. per cwt. A few other parcels have been sold, of which the particulars are not given.

Rum.—Sales of Penang at 2s. 2d.

Sugar.—The market is in a quiet condition, the demand being limited; prices, however, have not given way, owing to the firmness of holders. There have been no offers of Manila at the public sales, and privately only a few parcels have changed hands at the rates previously current. Of Penang at the auctions 270 baskets Date sort, very low dark, 25s 6d., very ordinary to middling brown, 26s. to 28s. 6d., gray, 29s. A parcel of 6,469 mats brown China has been offered at auction and withdrawn, but by private contract 1,000 bags have since been sold at 27s. per cwt. The floating cargo per Bernhard Carl, 25,181 bags unclayed Manila, Ilo Ilo, has been sold at 20s. 6d. for a near continental port.

Sago.—Of 359 bags, only a few lots sold, small pearl 18s.; 75 boxes large bought in at 23s. Tapioca: Of 904 bags good Penang, 100 bags sold, one lot sound 2¾d.

Sticklac.—At public sale 111 boxes Siam realised steady prices, good free sifted, 69s. 6d.; free rather small, 55s. 6d. to 56s. 6d.

Tin.—The sale in Holland on the 1st inst. comprised 61,633 slabs, which sold at 74f., or about 4½f. decline. This rate is equal to about £127 10s. in London, at which rate transactions have taken place.

## ARTICLES OF EXPORT.

### MANCHESTER GOODS.

The general tone of the Manchester Market continues extremely quiet, and although producers are encouraged by the course of the Liverpool Cotton Market to demand better terms for goods, buyers are unwilling to make purchases except on the low terms resulting from the late depression. Shipping Yarns are a shade firmer in price, and but for the full terms required by spinners, a considerable amount of business might be done. At the low rates quoted last mail a large business is offering, but spinners, having sold with sufficient freedom lately to reduce stocks, are not disposed to accept the same rates which tempted them at that date. With respect to production, we hear from many parts of the cotton manufacturing districts of curtailment, and there is a hope that a relief will be given to the market by these means, which will have a beneficial effect on prices. It is under-

Digitized by Google

stood that Continental producers have to make sacrifices in price, owing to the depression of trade; and some Belgian cloths have tempted Manchester merchants to invest in them to a small extent for home consumption.

## NEW YORK MARKETS.

Tea.—There is a pretty active demand for invoices from the Trade, and while prices are steady for all descriptions, those for desirable parcels, Green, are well supported. The sales are 4,569 half-chests and 726 boxes Oolong, per Benefactor; 1,596 half-chests do. per Eliza Nicholson, &c.; 300 Japan, and 8,402 Green, mostly per Anglo Saxon, Monkchester, Golden State, Dartmouth, and Chinaman. The following were the prices paid:—Hyson, common to fine, 90c. to $1.35; finest, $1.40 to 1 65; Japan, common to fine, 80c. to $1.5; finest $1.10 to 1.25; Oolong, common to fine, 70c. to $1.15; finest, $1.20 to 1 60; Souchong, common to fine, 70c. to $1 5; finest, $1.25 to 1.50.

Silk.—The business is extremely limited, and prices are nominal.

Coffee.—The market for Java and East India descriptions, though not active, continues strong, all desirable grades being held with much firmness, and commanding full prices. Sales: Java, in mats in lots, 24 to 24½c.; and 1,117 mats Manila, per Enoch Train, an old importation, 18¼ gold.

Camphor.—No transactions; quotations for China, 23c. to 25c. per lb.

Crackers.—A small business doing in Canton at $2.75 to 2.80 per box of 40 packages.

Hemp.—The accounts from Manila of light receipts there, and the departure of ships looking for full cargoes, only partially loaded, have imparted considerable activity to the market, and an advance of half a cent has been established, and at the close a further improvement was demanded. The sales are 2,000 bales, per Rattler, at 12⅜c., 60 days; 2,900 per Sea Serpent, on speculation, 13, 30 days; 1,000 per Witch of the Wave, 13, cash; and 4,000 per Agnes, in Boston, 13½, time, all gold. Manila cordage is quoted 23c. to 24 per lb.

Indigo.—The market continues strong for all descriptions, with a good jobbing demand for Manila and Madras—the sales are 20 cases Manila, at $1 10c. to $1 47½c. currency; and 15 chests $1 18c. to $1 20c. gold.

India Rubber.—No business in East India.

Pepper.—A few hundred bags have been sold at 8c. to 8⅜c. gold, in bond.

Spices.—There has been considerable activity and some excitement in the market, especially for Nutmegs and Mace, which have been bought up, and are concentrated almost, if not entirely, in the hands of one house. Other descriptions have also shared in the movement, chiefly, however, in a jobbing way, the market for all kinds closing very firmly at hardening prices. Among the sales are 50 casks and cases Mace, 50 casks and 500 cases Nutmegs. We quote Mace $1 15c. to $1 20c. No. 1 Nutmegs, 97½c. to 100c. gold.

Sugar.—An improvement in the demand for all descriptions has occasioned an advance of ¼ cent. The sales are, 9,491 bags Manila, per Frederick, and 31,477 do., per Golden Fleece, at 11⅛.

Tin.—The market closes strong; holders demanding 32½c. to 32⅝c. for Straits, though several parcels have been taken up at a lower figure—the sales are 1,750 pigs at New York and Boston, part at 32c., the remainder at 32c. gold.

## FREIGHTS AND CHARTERS.

We can report no improvement in outward berth freights, export business still continuing very restricted. Coal freights exhibit a slight decline.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osako: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £42. For Hong Kong: £34. For Singapore: £25. For Batavia: £17. For Galle: £22. 10s. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. To Chefoo: £2 2s. For Shanghai: £2 2s. 6d. For Hong Kong: £1 12s. 6d. For Singapore: £1 4s. For Galle: £1 2s. 6d.

## CASUALTIES.

Advices from Amsterdam, dated Sept. 7, state that the Nicholas Witzen, De Groot, from Batavia, which arrived at Texel, Sept. 5, had experienced heavy gales, May 12 and 17, when east of the Cape of Good Hope, during which she was thrown on her beam-ends, sprung deck seams, and damaged bulwarks, &c.; the master apprehended damage to the cargo.

Advices from Cape Town, dated August 17, state that the Nereus, den Broeder, from Saigon to Falmouth, which put into Simon's Bay, July 25, with damage, was surveyed on the 27th, when it was found that she had seven inches of water in her, and was much strained in her upper-works, but tight in her bottom; the cargo in the between decks was badly damaged and much heated; everything was carried away forward, except the foremast, bowsprit, and foreyard; the long boat and bulwarks were stove, and the rudder-head and maintopmast badly sprung. She had since discharged all her cargo, and would have to be coppered; 2,520 bags of the cargo had been sold.

The Dolores Ugarte (San Salvadorian ship), Saul, from Havana to Macao, put into Rio de Janeiro, Aug. 9, leaky.

Advices from Rotterdam state that the Gertrude (ship), Dewar, from Saigon, got aground Sept. 13, at Helvoet, but had since got afloat, and proceeded to Rotterdam.

Digitized by Google

The Minden, from Manila to New York, put into Mauritius, Aug. 16, in charge of the mate (Dolbell), the master (Bell) having fallen overboard July 8. On July 30, in lat. 16 S. lon. 101 E., she had experienced very bad weather, during which she had decks and cabins flooded, boats stove and lost, and sprung a leak, making twelve inches water per hour; she was discharging, and would probably go into dock.

The Niger (s.s.), Jobling, from China, Singapore, &c., to London, put into Mauritius, Aug. 22, to repair some of her machinery (the eccentric sheaves), which had broken down; she proceeded Aug. 27.

The Agnes, Knapp, which arrived at Boston, Sept. 14, from Manila, had lost bulwarks, &c., off the Cape of Good Hope.

Advices from Reunion, dated Aug. 27, state that the Bilbaina (Spanish ship), de Izaurieta, from Manila to Cadiz, with tobacco and coffee, foundered, Aug. 11, about sixty miles S.S.E. of that island; crew, except four, saved, and arrived there.

The Salamander, Detlefsen, from Saigon to Copenhagen, put into Falmouth, Sept. 28, leaky, with fore and main topgallantmasts carried away, and part of cargo thrown overboard. The Sandersons, Humphreys, from Bangkok, put into Falmouth, Sept. 28, with part of cargo thrown overboard, and loss of bulwarks, boat, sails, &c.

## MISCELLANEOUS.

At Simon's Bay.—Aug. 19, Amur, Gyllenpalm, from Hong Kong and Singapore, for London.

At Mauritius.—Aug. 16, Minden (late Bell), from Manila; 26, Tycho Brahe (s.s.), Peel, from Liverpool, for Singapore, China, &c.

## LAUNCH.

On the 23rd inst. a splendid new ship was launched from the yard of Messrs. Denton, Gray, and Co., the eminent shipbuilders, at West Hartlepool. She has been built to class AA at Lloyd's, and 20 years in the Liverpool underwriters' registry. It is intended by Messrs. Adamson and Ronaldson, of London, to whose order she was built, to place her in the China trade, for which she will be specially fitted. She will be full rigged, and is built entirely of iron. As she glided off the stocks, amidst the ringing cheers of the spectators and the workmen, she was christened The Inflexible, by Miss Tristram.

HONG KONG.

HOLLOWAY'S OINTMENT and PILLS
—DYSPEPSIA, JAUNDICE. — These complaints are the result of a disordered liver, which secretes bile in quality or quantity incapable of digesting food. Digestion requires a free flow of healthy bile, to insure which Holloway's Pills and Ointment have long been famous, far eclipsing every other medicine Food, irregularity of living, climates, and other causes are constantly throwing the liver into disorder; but that important organ can under all circumstances soon be regulated and healthily adjusted by Holloway's Ointment and Pills, which act directly upon its vital secretion The Ointment, rubbed upon the skin, penetrates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed; a cure will soon follow.

# HONG KONG AND SHANGHAI BANKING CORPORATION.

## EIGHTH REPORT OF THE COURT OF DIRECTORS

TO THE

**ORDINARY HALF-YEARLY GENERAL MEETING OF SHAREHOLDERS,**

**HELD AT THE BANKING HOUSE OF THE CORPORATION,**

**HONG KONG,**

**On MONDAY, the 16th AUGUST, 1869.**

### TO THE PROPRIETORS OF THE HONG KONG AND SHANGHAI BANKING CORPORATION.

Gentlemen,—The Directors have to lay before you the Eighth Half-yearly report upon the transactions of the Corporation for the six months ending on the 30th June last, together with a Statement of Accounts, Assets, and Liabilities.

The Net Profit for the period covered by this Report, including $63,252.14 brought forward from last account, after paying all charges, deducting interest paid and due, and making ample provision for bad debts, amounts to $315,731.96, of which, after taking out rebate on bills not yet due and remuneration to Directors, there remains for appropriation $296,791.51.

From this sum the Directors recommend the distribution of a Dividend of $7.50 per Share on the Paid-up Shares, and $1.50 per Share on the New Shares, being equivalent to 6 per cent. for the half-year (or 12 per cent. per annum), which will absorb $180,000, and the balance, $116,791.51, they recommend being carried forward to the credit of new Account, deferring the carrying of any sum to the Reserve Fund until the result of the Bank's working for the year, shall, in the General Balance Sheet for 31st December next, be submitted for consideration at the ensuing Yearly Meeting.

The Directors have pleasure in attesting the growing favour shown by the public to the Corporation, as evidenced by the steady increase of Current Accounts, Deposits, &c.; at the same time, while congratulating the Shareholders on the satisfactory condition of the funds and resources of the Bank, they regret that during the greater part of the period under review the general depression and inactivity of trade, the unusual lateness of the opening of the Tea Market, and the consequent stagnation of Exchanges, have, by leading to the accumulation of much unemployed capital in China, resulted in the acquisition of a profit much smaller than that realised in the corresponding six months of last year.

CALLS.

The second call of $25 per Share on the New Shares in the Capital of the Corporation has been promptly paid up.

BOMBAY AGENCY.

This Establishment has been formally opened, and commenced its operations on the 1st of July.

AUDITORS.

The Honourable W. H. Rennie and Mr. W. J. Bryans having both left the Colony, it becomes necessary for the Meeting to elect Auditors to supply their places until the next Yearly Meeting, and the Directors have pleasure in recommending to the Shareholders Messrs. William Macaulay and J. M. Vickers, by whom the present accounts, at the request of the Directors, have been audited.

GEORGE F. HEARD, Chairman.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

ROYAL MAIL ROUTE, *via* PANAMA, for NORTH and SOUTH PACIFIC, Central America, Japan, and China.—The ROYAL MAIL STEAM PACKET COMPANY'S ATLANTIC STEAMERS now run through from Southampton to Colon (Aspinwall), by which arrangement passengers for the above localities will be conveyed to the Isthmus of Panama in the vessel in which they embark at Southampton.

Passengers and goods are booked

For the South Pacific, Central America, West Coast of Mexico, California, British Columbia ... ... } By steamer from Southampton on 2nd and 17th of each month.

For Japan and China... ... 17th of each month.

For further particulars apply to

J. M. LLOYD, Secretary.

Royal Mail Steam Packet Company, 55, Moorgate-street, London, E.C.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

**LONDON AGENTS.**

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

### THE MAILS, &c.

The above Mails were delivered this morning. Dates to the 29th Aug. have been received from Yokohama, via San Francisco, and we have included the six days' later news. The next Mails (French) are due on the 25th inst., and will bring seven days' later from Japan, China, Singapore, and Ceylon.

The Galle telegraphic line has not improved, messages occupying ten days. The latest dates to hand are Shanghai 9th, Hong Kong 16th, Singapore 24th Sept. Via Kiachta dates from Shanghai to the 25th Sept. were received on the 16th inst.

## List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Ceylon*, arrived Oct. 16.—From Shanghai: Mr. T. Wakutze. Mr. T. Kwaski. Mr. S. Luigo. Mr. R. Login. From Hong Kong: Mr. and Mrs. Thomas. child and servant, Mr. W. P. Galton, Mr. R. Hamilton. From Penang: Captain J. Dodds, Mr. H. W. Biddy. From Singapore: Mr. T. H. Gottlieb. From Galle: Mr. J. Greig.

By last Bombay mail to Southampton, per P. and O. steamer *Syria*, arrived Oct 15.—From Hong Kong: Mr. W. G. Furguson.

By *Great Republic*, arrived at San Francisco, Sept. 18.—For New York: Messrs. C. D. Williams, John H. Foote, Peter Bouze, Lucas Craig, Edward Baker, Michael Sing. For England: Commander E. W. Brook, Mr. Hallam.

PASSENGERS OUTWARD.

Per P. and O. steamer *Pera*, from Southampton, Oct. 16.—To Yokohama: Mrs. A. K. Brown and child. To Hong Kong: Mr. R. Bruce, Mr. C. D. Surman, Mr. G. R. Donkin. To Singapore: Mr. W P. Beck. To Penang: Miss Napier. To Ceylon: Mrs. Wilson, Mr. J. Hamilton, Mr. N. L. Bartholomenez, Col W. W. Cox.

Per P. and O. steamer *Ceylon*, from Marseilles, Oct. 24.—To Shanghai: Mr. John Fraser, Mr. and Mrs. J. F. Wallace, Mr. J. Holliday. To Hong Kong: Mr F. Hüchting, Mr. C. Holliday, Mr. P. Ryrie, Mr. A. Helland, Mr. H. G. Allen. To Singapore: Mr. R. C. Smith, Mr. J. Ogilvie. To Penang: Mr. G. M. Sandilands. To Ceylon: Mr. Garbutt, Mr. W. C. Brodie, Miss Payne, Mrs. Longley, Mr. H. D. Cunningham.

Per P. and O. steamer from Suez, Oct. 31.—To Shanghai: Mr. F. Müller.

Per P. and O. steamer *Nyanza*, from Southampton, Oct. 30.—To Hong Kong: Mr. E. S. Scott. To Singapore: Mr. P. McMaster. To Ceylon: Mr. Carson, Mr. E. Layard, Mr. R. A. B. Dobree.

Per P. and O. steamer *Bangalore*, from Marseilles, Nov. 7.—To Hong Kong: Mrs. Pauncefote, Mr. A. Bazley. To Ceylon: Mr. and Mrs. St. Albin.

Per P. and O. steamer from Suez, Nov. 14. To Batavia: Mr. Wilmer

## Summary of News from the Far East.

### JAPAN.

### YOKOHAMA.

#### THE GALE OF 20TH AUGUST.

The following account is from the *Japan Gazette*; later advices by the San Francisco mail to August 28 correct some of the reports on shipping, which will be found noted below :—

The strongest blow that Yokohama has experienced for years, passed over the harbour on the 20th. The state of the atmosphere on the 19th was such as to lead the weatherwise to look for a storm; and during the night the wind gradually rose, and the glass fell, in a manner to awaken apprehensions. About 9 A.M. the gale had so strengthened that two vessels arriving thought it wise to anchor far outside of the shipping; and the ships of war began to send down topgallantmasts and make all snug. About 10 most of the steamers in port got up steam, to be ready for whatever might happen; a little after 11, the *Nautilus*, having broken from her anchor, made an effort to get out of the midst of the shipping, but the force of the gale was now more than she could contend with, and after, as it appeared from the Bluff, she was driven against a sailing vessel.

The shore has more casualties than usual, for the houses on the Bluff have all suffered more or less. Some merely have a few tiles to repair or fences to restore, but a few of the residences are so damaged as to be but barely habitable, and the actual loss to the proprietors for their tenements and the furniture will certainly amount to several thousands of dollars. In the foreign settlement the casualties have been fewer, but the native town has had houses blown down bodily, and several persons have been killed thereby. One hotel in the native town was wrecked, and three persons buried beneath its ruins. The Bund has suffered greatly, from one end to the other; and the American and English Consulates were slightly injured. Afloat the damage has been considerable, but nothing like what might have been anticipated from such a tempest. The steamer *Nautilus*, having parted her cable, turned her engine a-head, but the force of the wind drove her against the *Bezaleel*, which she forced from her anchors and cast adrift. The latter then went on to the bow of the French barque *St. Germaine*, carrying away that vessel's bowsprit. The *Bezaleel* herself is almost a wreck.

The brig *Maggie* dragged, and came to close quarters with the steamer *Adeline*, receiving much injury. Meanwhile the *Nautilus* steamed about the harbour, in an all but unmanageable condition, and did further damage to other vessels. Some lighters belonging to the P. M. S. S. Co., loaded with coal, were wrecked, and several Japanese boats came to grief. But the greatest misfortune of all was the loss of the American ship *Naples*. She had sailed on Wednesday morning, and had lain becalmed for hours, about two miles below the anchorage. As the breeze sprung up, she bore merrily away, flying light, in ballast, alas—only to be caught before she could get out of the gulf, and driven back by the typhoon. She now lies dismasted on the beach at Homoco, about three miles from Yokohama. These were some of the more important losses experienced. As to minor ones their name is legion. Roofs untiled, buildings in frame blown over, rain penetrating and making all uncomfortable, shrubs and other plants torn up by the roots. Indeed, the effects of this typhoon are so great as to impress it strongly on men's minds. Yet, when we consider the crowded state of the harbour—with nearly one hundred ships in it, and all moored indiscriminately, without any superintendence, and many giving a foul berth to their neighbours—it is providential that the damage is no worse. The glass was 29·77, at 3 P.M. 29·30, at which it continued steady until 4 P.M., when it commenced to rise and the gale to abate. To-day (the 21st) is among the loveliest of the season, and the sea looks as if it never had raged since the Creation.

We have received a copy of the report of Mr. Adams, the Secre-

Digitized by Google

tary to the Legation, on the silk districts, which we propose to notice in detail in our next.

The following on Municipal Reform has been published :—

To the Residents of Yokohama.

"Gentlemen.—We, the special committee appointed by you on the 8th of April last to address the Foreign Ministers, with a view to obtaining some measure of Municipal Reform which is so much needed in this settlement, have to report to you the progress we have made to that end. We have drawn up the memorial of which we annex a copy, and have personally presented it to the Foreign Representatives. This we did at the end of May last. We were courteously received by the Ministers, some of whom expressed a great desire to assist the community in the matter, and all appearing interested in the scheme we proposed. We left with each of them a copy of our memorial, but have up to this date received from no one of them any reply. Under these circumstances we have deemed it advisable to report progress through the medium of the public press.—We are, gentlemen, your obedient servants, (Signed) J. G. Walsh, A. Bovenschen, R. Godardd, H. J. Hooper, A. Milsom, R. J. Carst, Charles Rickerby."

There has been a good deal of talk in reference to the fitting-up of Hamagotan for the Duke of Edinburgh. The members of the English Embassy, it is said, have been making themselves "generally useful" in procuring furniture, &c., for the Japanese. Now, although we cannot find fault with the Embassy in rendering any advice to the Japanese in so gracious and liberal a work as preparing for the Duke's entertainment, we do object to their going so far as to negotiate the actual purchase of the goods required. No one knows better than Sir Harry Parkes the odium which has been cast upon his brother Ministers for becoming the actual transactors of the business of Japanese officials, and we trust that the particular member of the Embassy who has been guilty of such will be made an example of by Sir Harry. There are plenty of merchants and storekeepers in Yokohama to whom the Embassy could have recommended the Japanese, but it is not their province to transact such matters themselves.

The following relates to the United States Squadron in Japan and China.—Admiral Rowan's flagship *Piscataqua*, Captain English, is at Yokohama; also, the *Aroostook*, Commander Mahan; *Monocacy*, Commander McRea, who relieved Captain Carter (gone home); *Oneida*, Commander Williams; *Iroquois*, Commander Law. The *Idaho*, Commander Taylor, and *Ashuelot*, Commander Bradford, left Nagasaki for Yokohama. The *Maumee*, Commander Cushing, is at Foochow The *Unadilla*, Commander Hooker, transferred from the *Idaho*, is at Hong Kong. The expected movements are the vessels of war at Yokohama will go to Hong Kong, the *Oneida*, will leave soon for San Francisco, also the *Idaho*, store ship. The *Maumee* leaves for Hong Kong in October, the *Ashuelot* to come to this coast. Lieutenant Commander Smith and Dr. White, of the *Ashuelot*, go home; Dr. Boyer, of the *Iroquois*, detached to the *Ashuelot*.

A correspondent writing on the 28th August (*via* San Francisco) says :—

Admiral Keppel will proceed home by the next Pacific mail steamer. Mr. Frederick Lowder, for some time Consul at Nee-e-gata, has taken up the post here vacant by the death of Mr. Fletcher. Sir Edmund Hornby is here, and the case of Venede *v.* Hudson is to be again referred to him.

The contest between the Japanese and the Italian buyers of silkworm egg cards still goes on, and the Japs say if they cannot get the price they will go themselves to Italy with them.

The Government have issued a notification about the *neboos*, calling those in held by Foreigners to the Government office, where they will be schroffed and stamped, and handed back to holders, and then will be received for duties.

The Daimios have handed over their armies, navies, and lands to the Mikado, and will themselves become just the Governors of provinces. This, I am inclined to think, is a good move, and at a right time. Some foreigners think not. It is the right time, because the Southern Daimios are the great advocates, and the Northern Daimios, now only a few in number, and after the civil war, could not oppose it. The Daimios will now be able to turn their attention to those businesses which make a country—mining, farming, and the like.

Mr. Kramer, an experienced florist, has established at Yokohama, and we are assured is a competent and reliable person to entrust with orders for Japanese plants or seeds.

The damage done to shipping by the gale on the coast on the 18-20th August has been exaggerated. The *Jacoba* was dismasted, and put back into Yokohama on the 22nd August. The *Naples* (American), reported lost, sustained little damage beyond losing her masts. She was towed into Yokohama on the 28th. The small steamer *Flying Scud* has been sighted, but much damaged—no further details. The *Peruvian* (American) and *Aurora Australis* (British) are reported as on shore—no particulars. The P. and O. Company's steamer *Sultan* had gone out to look after them, but not returned when the mail left. The best description of the gale is that of the *Ocean Queen*, as follows :—

British steamer *Ocean Queen* left Yokohama at 10 P.M. August 18, with about 650 Japanese passengers. Passed Rock Island the following morning. Had light E.N.E. winds and fine weather. Steered S.W. by W. ¾ W. for Oosima. During the day wind freshened to strong breeze from same quarter. Running full speed, with topsails and foresail set; afternoon averaging about ten miles per hour. Had a heavy S. swell. At 6 P.M. the glass showed symptoms of falling, it then standing at 29.92; by 9 P.M. had fallen to 29.85. Raining heavily, but no signs of a further blow. At 11.30 P.M. barometer at 29.70. Hauled up foresail and lowered topsails. Suddenly the wind increased, before further precautions could be taken. These sails blew away at midnight, and other sails and awnings were shattered. Saw Oosima about ½ mile ahead. Hauled the ship's head off to S.E. At 12.30 P.M., wind N.E., the ship's head E.S.E, laying-to on the port tack. Blowing a hurricane, sea rising fast and raining heavily; the spray so heavy, impossible to see to windward. At this time the gig blew out of the davits. Nearly all the passengers put below, and the hatches put on. Bar. 29.30. At 1 A.M., 29.10; at 1.15, 29; at 1.40, 28.90; at 2 A.M., 28.70; at 2 30, 28.60; wind N.E.; ship's head E.S.E.; at 3 A.M., bar. 28.40, wind N. by E., ship's head E.; at 3.15, bar. 28.30., wind N., ship's head E. by N. The barometer remained at this point, blowing about 1-10th up and down. The carpenter and his assistant were standing by with axes to cut away masts from 1 to 4 A.M. At 2 A.M. the port life-boat was filled, the davits broke, and the boat was lost; the engine-room skylight blew overboard, drawing out the fastenings; also two main hatches blew off; also, binnacle on skylight and standard compass. The after-tackle of the starboard quarter-boat giving way, the boat fell into the water, but the wind took it and blew it inboard again, throwing it over the top of the davits and smashing it down on deck.

From this till daybreak (5 A.M.) the wind continued with unabated violence, when the glass began to rise. Tried to get the ship's head off to southward, but, her engines going full speed and having no way on her, it was impossible to set any head-sails, in their shattered condition, till about 6.30 A.M. Then set fore-staysail and got her off to the S.S.W., when the barometer gradually rose and the clouds broke to the S.W, and by degrees the storm broke up. Then wore round and hauled in for the land, and made Oosima at about 5.30 P.M. on the 20th. Saw the *Oneida* at the same time, and also again on Saturday morning. At about 8 A.M. saw the *Algerine*. Went into Osaki Bay and landed the troops and baggage. Left again at 1.15 P.M. Reached Hiogo at 6 30 P.M. on the 21st. At 10 A.M. on Thursday morning passed the *Ashuelot* about 25 miles W.S.W. of Rock Island, going in.

## HIOGO.

The following is from the *Hiogo News* of August 18 :—

Our Settlement was thrown into some excitement on Saturday last by various reports that were circulated during the afternoon. One was that several boats, with ronins on board, were anchored just outside, and that they would probably land during the night and attack the foreign residents. Another was that it was a party of fanatics, consisting of men who had leagued themselves together for the purpose of exterminating Foreigners, that they had landed down the coast, and were going to attack us from landward. Another that they were people called "Toi" (expellers of Foreigners), and that there were six boats outside, containing about thirty men each. As time flew by these reports assumed some shape, and evidence was soon obtained that a dangerous party was in our close proximity. Nakasima, the Vice-governor, communicated with the Consuls, and informed them that a large body of dangerous men were ashore and afloat, rendering it inadvisable for Foreigners to go out after dark; that the Government would take all steps to protect Foreigners, but in case they could not do so effectually, Foreigners would have to take care of themselves. This information was at once circulated by the Consuls to their countrymen, who received the news pretty coolly, and did not appear to apprehend anything serious, whilst considerable excitement prevailed among the Japanese, and many packed up their goods and made for the country.

Some anxiety was felt as night approached, as the Settlement was entirely unprotected. There was not a man-of-war or gunboat in the harbour; indeed, we have not had one in port for a fortnight past, and this fact should be brought to the notice of H.E. Sir Harry Parkes and Admiral Keppel, for the Settlement without a gunboat is quite defenceless, to say nothing of the Osaka residents, who, even with men-of-war in harbour, would necessarily, in any emergency, be a long time without assistance.

Several arrests were made by the Japanese, but nothing beyond that occurred. Most of our residents armed themselves, and some parties kept watch until early morn. On Sunday circulars were issued by the Consuls, stating that the Vice-Government had informed them that the Toi had left.

It has since transpired that the men belonged to the Princes of Chikuzen, Chosiu and Awa, and were returning from the interior of the country where they had been stationed, to their homes. It is also reported that some Toza men were amongst them, but our informant is only aware of the first three.

The Dutch steamer *Kebondalem* changed her flag last week. We hear she has been sold by the Netherlands Trading Society to the Prince of Kanga for $35,000.

## NAGASAKI.

A letter from this place of the 20th Aug. says :—

"The U.S.S. *Idaho*, after having been here some eighteen months, left on the 14th for Yokohama on her way home. Previous to her departure she received a new crew of two hundred and ninety men, and she is now called the U.S. frigate *Idaho*, and not hospital ship, as before. The Fête Napoleon was celebrated in grand style. There was Te Deum sung at the Catholic Church at eleven o'clock, and all the Consuls and the officers of H.M.S. *Icarus* attended. At noon the Japanese Government battery saluted with twenty-one guns, though I am sorry to say that an

Digitized by Google

accident occurred which cost the life of a Japanese gunner, and two others seriously wounded. The man who was loading had his head and arms burnt, and was blown into the sea. In the evening Mons. Dury, the French Consul, gave a dinner to the Consular body and a few of the residents. The French Consulate was beautifully illuminated, and a large portrait of the Emperor in transparent paper was placed on the top of the roof, having a novel though rather effective appearance. Several bungalows, more especially that of Messrs. Walsh and Co. (Russian Consulate), were tastefully illuminated."

## CHINA.

—o—

### PEKING.

The English missionaries residing in the capital have united in presenting a memorial to Sir Rutherford Alcock. The object sought by the memorialists is to meet and confute the statement lately published, that there have been instances of "unseemly contests" with Romish missionaries in China, and to show that the policy of the English Government towards missionaries should not be to require them to confine their operations to the Treaty Ports.

A wing of the Emperor's palace at Peking has been destroyed by fire. It contained the printing blocks for most of the works issued from the Imperial press, and the loss is said to be incalculable.

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, August 26, 1869.

The P. and O. steamer *Sunda* arrived on the evening of the 15th inst, two days before time, with the English mail of the 2nd July and telegrams to the 24th ult.

The United States mail left this at noon on the 20th inst., carrying, with other cargo, twenty-five Chinese females for matrimonial purposes in San Francisco.

On the 18th the British ship *Dhollerah* arrived, 30 days out from Sydney, and 140 from London *via* Melbourne and Sydney.

On the 21st inst. London telegrams, trans-Mongolian and *via* Kiachta, to the 27th ult. were received. The same startling differences between the advices that I have before noticed were not wanting on this occasion either.

On the 23rd the French mail arrived with telegrams to the 30th July, and on the 25th (yesterday) we received telegrams, trans-Mongolian and *via* Kiachta, to the 3rd inst.

LEGAL.—The only purely legal case of importance decided since my last letter was the collision between the S. S. N. Co.'s steamer *Hangchow* and a lorcha under the British flag, which I mentioned before. Judgment was given on the 24th inst. in favour of the steamer, with costs.

COMMERCIAL.—An extraordinary general meeting of the Union Steam Navigation Company was held on the 13th inst., when Messrs. Ashton, Baker, Groom, Hagg, Probst, Amook and Hip Maw (natives) were elected directors for the current year. The resolution passed at the last meeting depriving the directors of the power to purchase new steamers was rescinded.

An important case has recently been decided in the Mixed Court. Messrs. Gundry and Co. sold to one Tai fung 10,000 pieces shirtings, Eagle chop; no muster was shown. On the day after the contract had been closed Tai fung objected to abide by it, on the ground that there was a new chop on the bales in addition to the old one; and two days after (Sunday intervening) he returned the contract note. Messrs. Gundry and Co. sued for Tls. 1,000, bargain money, but after the examination of Messrs. F. B. Johnson (Jardine Matheson, and Co.), E. Elias (Barnet and Co.), and A. Mickie (Chapman, King, and Co.), all of whom stated that the alteration of or addition to a well-known chop was sufficient to depreciate the goods in Chinese eyes, the Court gave judgment for the defendant. There can be little doubt of the justice of the decision, but it should be a warning to shippers unacquainted with the unreasonableness of native prejudices. It is, in fact, a reproduction in another form of the old Mexican and Carolus difficulty.

In the matter of the proposed line of telegraph from Shanghai to the Kin-toan Beacon, the Taoutai has again addressed the Consuls, refusing to communicate the recommendation to his superior officers.

GENERAL.—The British ship *Hamilla Mitchell*, from London, with a general cargo and £40,000 of treasure, struck on Luconia at midnight on the 10th inst., the wind being light and variable and the weather very thick. The captain attributes the disaster to the unexpected set of currents. Immediately after she struck eight feet of water was found in the well. The boats were got out, and the crew lay a short distance from the vessel until daylight; by that time the water was over the mizen top, but the bow was high and dry, apparently jammed on the rock. The boats made for Shanghai, and the steamer *Quanshing* (revenue cruiser) at once started for the scene. Arrangements were promptly made to send down raising apparatus, but the success of any attempt to save the cargo must be at least doubtful. The Consular clerk sent down to report found her stern immersed to the cross-jack-yard, and the surf breaking over her. Wreckers had already been at work, and had saved quantities of cargo; but six at least had been suffocated during their attempts, their bodies having been found in the hatchway. Close to the stern the soundings varied from fifteen to seventeen fathoms, so that the only chance of saving anything lay in a continuance of calm weather. As it turned out, however, a storm from the north sprang up on the 19th inst., and the surf was so heavy that she broke across at the forecastle, and then parted down the middle. The deck floated out, so that now the chief obstacle in the way of saving the treasure is the depth (seventeen fathoms) at which it lies. H.M.'s *Zebra* sailed for the Luconia island on the 23rd inst., and we have just heard that enormous quantities of cargo have been recovered by the natives since the break up.

On the evening of the 12th inst. Captain Bell, of the British barque *Lorton*, was accidentally drowned while stepping from a sanpan to his ship's ladder. The chief officer, seeing the occurrence, flung a life-buoy overboard and threw himself into the river; but the ebb tide was running with such strength that it was impossible to overtake and seize the drowning man.

On the 14th inst. Messrs. Farnham and Co. launched a lorcha-rigged vessel, seventy feet long, nineteen feet beam, and seven feet depth of hold. She is intended to perform all the duties required in the river by the Harbour Master's Department. Accordingly she is fitted on the stern with a derrick for hoisting heavy anchors, buoys, moorings, &c. As she is likewise intended to visit the various lighthouses, light-vessels, &c., she is appropriately named *The Relief*.

A meeting of the general community was held on the 16th inst at the British Consulate, H.B.M.'s Consul in the chair, to consider what measures should be taken to receive suitably H.R.H. the Duke of Edinburgh on his approaching visit. There was a large attendance of members of all nationalities. Nothing was decided upon, save to elect a committee for the purpose of elaborating a scheme to be submitted to a future public meeting. The following British subjects have consented to act: Messrs. Medhurst, Butcher, F. B. Johnson, A. Mickie, J. McDonall, F. H. Bell, F. A. Groom, F. H. Porter, D. Reid, and W. F. Lewes. These have been authorised to add to their number by inviting the co-operation of persons of other nationalities. The German community are said to be about to organise a magnificent (for Shanghai) theatrical entertainment at the Concordia Club, wherewith to regale the Duke.

On the 15th the Fête Napoleon was celebrated by a Te Deum, chaunted at the French Cathedral, and illuminations of a very tasteful character on the French bund. The Consul-General was unfortunately absent, but his place was well supplied by Mr. Dillon, his *locum tenens*. The day was the first secular anniversary of the great Napoleon's birth, yet this seemed to add but little zest to the demonstration. On the whole, it was "slow;" but it must be remembered that the French residents in Shanghai are few and far between.

Ting. Futai of this province, has issued a proclamation decrying extravagant religious processions, which in the present impoverished condition of the people tend still further to pauperise them for the benefit of a set of lazy priests. He threatens the infliction of the statutory penalty upon all civil and military officials who encourage such processions by their presence.

It is unofficially announced that Mr. Hart will not leave Peking this year. Various opinions are expressed as to his reasons, some asserting that the gross and notorious failure of his Legation and university scheme has opened his eyes to the limited extent of his influence, and has made him reluctant to leave the capital for a moment, lest some other person should step into the very desirable position he holds. It can hardly be believed that he is now required to act as a buffer between the native officials and the board of Foreign Ministers, for the Western representatives now "aggravate their voices so that they roar as gently as any sucking dove." It was long believed that the Chinese would not allow him to make any lengthened stay away from Peking, but this notion is exploded. However, as he is certainly a political agent, and no longer merely head of the Customs, it is possible that the final arrangements connected with the Austrian treaty, and the devices being concocted to postpone the revision of the existing treaties are sufficient to make his presence invaluable to the Cabinet. We are told by rumour, apparently well supported, that the Government have ordered Mr. Hart to cease the supplies hitherto devoted to the Burlingame mission. It would seem that the mission having fulfilled its purpose of staving off a reckoning for a few months is now condemned as a needless extravagance. I should mention that there is a hitch in the conclusion of the Austrian treaty, the Chinese insisting on no merchant consuls being appointed. This the Austrian Minister is willing to accede to, but will not agree to its being made a stipulation *in the treaty*. He holds out for a separate article, and the Chinese are as obstinate on the other side.

Sir Rutherford Alcock has confirmed the sentence of death passed on George, who was convicted recently of the murder of a native carpenter.

OFFICIAL.—Mr. Man, Commissioner of Customs at Takow, goes home on eighteen months' leave, and will be replaced by Mr. Jones, at present Acting Commissioner at Amoy. Dr. Jamieson has been ordered from Shanghai to Hankow to take medical charge of the "Customs" staff.

By next Pacific Mail, Mr. G. F. Seward, U.S. Consul-General

Digitized by Google

in China, will leave on two years' leave of absence. There is a hope very generally expressed both by his own nationals and by the British residents, that after doing his share in the explosion of the Burlingame delusion he will return to this country as U.S. Minister.

The Ports.—From Hankow we have received no confirmation of the report, transmitted some weeks ago as a well ascertained fact, namely, that a large number of French missionaries were lately murdered at Szechuen. On the contrary, it is said that up to the present the Catholic mission at Hankow have heard nothing of the occurrence, but disbelieve it utterly, on the ground that the massacred priests still draw their salaries with regularity. An outrage was committed some days ago at a place called Tienmun (Heaven's gate), a short way from Hankow. Defamatory placards were posted, and a mob collected and sacked the Catholic chapels. No lives were lost, but a great quantity of property was destroyed, for which, I hear, the French Consul is claiming heavy damages.

A fortnight ago the water at Hankow, which had previously been falling steadily, again rose to a height of three inches, in consequence of heavy and continued rain. It is now, however, again rapidly falling. Mr. F. Major's circular of the 21st inst. reports a declining market in all descriptions of imports.

The following notice in Chinese was posted up in several places in Hanyang a few days ago:—"All Foreigners who sell eatables and drinkables of all kinds are guilty of mixing them up with some hidden, inscrutable poison. After a time, those who have eaten of these five coloured beans (confectionery) fall ill, and in a few days more their faces swell. Do not allow yourselves on any account to eat any of them. Believe me, my fellow-Chinamen, they have been tested. It is high time instantly to cut short the nuisance."

The Protestant missionaries at Peking have addressed a letter to Sir Rutherford Alcock protesting against the representations made by him in recently published despatches. This letter has been published in the *Daily News*. The writers join issue with the Minister on the points of their assumed want of judgment, and the general offensiveness of their conduct to the natives: of the demoralising and degrading influence of foreign trade, in the wake of which they are recommended to follow; and finally of the defective education of a large number, if not of the greater number, of the missionaries. They assert that they have invariably suffered as Foreigners and not as missionaries, that the annual import of Opium nearly equals in value the total export of Tea and Silk (an argument of which you may see the application, but I confess I do not), and that far from being uneducated, all the dictionary compilers and most esteemed authors of works on Chinese subjects have been missionaries. This last statement is doubtless true, but it does not affect the question at issue. The lexicographers, grammarians, and so forth are exceptions to the general rule, which is, that the Protestant missionary in China is an uneducated man supplied with zeal only, destitute alike of the subtlety of mind requisite to meet and conquer the objections raised by intelligent natives, and of the adaptability of intellect necessary to anyone who, at an adult age, attempts to overcome the difficulties of the Chinese language.

In the absence of all commercial intelligence from Newchang, the newspaper correspondents confine themselves to reports of the weather, which has been exceptionally cool during the entire summer.

## HONG KONG.

Dates are down to the 2nd September. The P. and O. mail of 16th July arrived out on the 25th August with telegrams to the 6th August. The following items are from the *China Mail*:

The official Reception Committee for the Duke of Edinburgh, presided over by his Excellency the Governor, have not yet published, or, we believe, even finally decided upon, the programme, but we are able to state that no efforts have been wanting on their part to put matters in train. As his Excellency the Governor is desirous that the inauguration of the City Hall should form a portion of the programme, those members of the official Reception Committee who are unconnected with the building have been busily engaged in obtaining estimates, &c., of the expense of the necessary arrangements for the inauguration; but the general programme, regarding which so many inquiries are made, will, we presume, be drawn up by, and published under, official authority.

A circular has been issued directing all heads of departments to pay all moneys into the Oriental Bank, instead of the Treasury, as hitherto. The Colonial Treasury will henceforth be no more than a check-office.

With much pleasure we copy the following announcement from the *Government Gazette*:—His Excellency Sir Richard Graves MacDonnell, C.B., has been pleased to appoint provisionally, until Her Majesty's pleasure may be known, Richard Rowett, Esq., to be a member of the Legislative Council of Hong Kong, vice the Hon. Henry John Ball, absent on leave.

M. Pedro Loureiro has, we understand, been finally released from prison at Macao.

The report of the delegates of the Shanghai Chamber of Commerce, upon the trade of the Upper Yangtze, has been issued. It is a most interesting and well got up compilation.

Rumour says that larger supplies than usual are being brought to Tientsin this year, to meet the wants of soldiers to be concentrated in the Chihli province. Several large cannon have been taken North this summer.

### FIRE BRIGADE PARADE.

The Colony can now boast of possessing as complete material for fire brigade purposes as any other city of similar size in the East. With active and intelligent European volunteers, a trained body of natives, and a police force of amply sufficient strength to keep the ground, we may fairly hope that Hong Kong will no longer be liable to such extensive and destructive conflagrations as have hitherto distinguished its somewhat short existence. Nothing, as regards the existing force, is in fact wanting but exercise and drill to accustom its members to act in concert, an object to which the fire-master and his assistants are evidently devoting their attention. The parade of last evening was conducted, it is but fair to say, under extreme disadvantages as regards the motive power recently brought to the colony. The two new engines and that of the Hong Kong Company lit fires within a few minutes of each other, and assembled at the Canton steamer wharf. Despite the great weight of the new acquisition they were drawn with comparative ease. Shortly after arrival the Hong Kong Insurance engine was moving ahead (time fourteen minutes from lighting fires; pressure of steam, 25 lbs., pressure on hose 10 lbs.). It rapidly ran up the steam, and in twenty minutes was under a pressure of 60 lbs. steam, and throwing two streams of some fifty-five or sixty feet in height, the bursting pressure on the hose varying from 52 to 65 lbs. on the square inch. The smaller of the two new engines threw its first jets of water in twenty-eight minutes from lighting the fires, under 50 lbs. of steam, the pressure on the hose being but little over 20 lbs. The larger engine was unfortunate; the pumps could not to be moved until 41 minutes had elapsed from the fires being lit, and no water was thrown until 51 minutes had passed. When, however, it got fairly into play the result was magnificent, and though the Hong Kong Insurance engine had hitherto overtopped its competitor, the giant, under 130 lbs. of steam, and a pressure of from 60 to 72 lbs. per square inch on the hose, threw its four powerful jets into the air above its rivals, eliciting signs of unmistakable admiration from the crowds around. The sight of the ten lofty streams from the three engines was really magnificent in its way, and we do not wonder that the fire-master and brigade feel proud of their new machines. It will never do, however, to take 51 minutes to get up steam, and so far as yesterday's trial went the insurance engine certainly carried off the palm for "rapidity and power combined."

### HONG KONG HOTEL COMPANY.

The adjourned half-yearly meeting of shareholders in the Company was held on the 23rd. Present: Messrs. Walker (in the chair), Delbanco and Belilios, directors; Messrs. Barton and Hodgson, auditors; Messrs. C. L. Davies and J. J. Francis, shareholders and Mr. E. Baker, secretary.

The Chairman, having answered several questions regarding the accounts put by Mr. Francis, proposed that the report be adopted.

Mr. Delbanco having seconded the motion, the report was accordingly adopted without a dissentient voice.

Mr. Davies then put the following resolution in a formal manner:—"That the thanks of this meeting on behalf of the Shareholders generally be offered to the direction for the energy and zeal they have so successfully displayed in steering the Company through its difficulties and placing its business in its present promising condition." This resolution was carried *nem. con.*, having been seconded by Mr. Hodgson, auditor.

The Chairman, on behalf of himself and co-directors, thanked the meeting for the resolution they had just passed, although so few were present. They now saw that the best thing was the farming of the Hotel to the Chinese; they had tried partial farming, and found that, while the farmed portion succeeded, that under the Company's control generally went to wreck and ruin. The directors had had meeting after meeting and consultation after consultation, and after great anxiety they had concluded that the only way to proceed was to let the place at the best rent to some respectable Chinese with trustworthy security.

Mr. Barton proposed, and Mr. Davies seconded, that Mr. Landstein be re-elected a director of the company; which motion was unanimously carried. The Chairman then said there was only one thing remaining, viz., to re-elect the auditors (Messrs. Barton and Hodgson), in whom he had entire confidence. This was seconded by Mr. Delbanco, and also carried unanimously. The proceedings closed by a vote of thanks to the chairman.

Her Majesty's vessel *Rifleman* and the gunboats *Weazel* and *Bustard* will be sold by auction at the Naval Yard, Hong Kong, on the 18th Nov.

A third dividend of 7 per cent. on all claims on the estate of Dent. and Co. is announced, payable by the trustees.

The Oriental Hotel, situate on the Praya Manduco, close to the wharf at which the Macao steamers discharge their cargoes and land passengers, has been completely destroyed by fire. It broke out on the night of the 18th Aug., at about half-past ten o'clock, in an upper story of the house, several people being inside the establishment at the time. Four or five gentlemen who were in the billiard-room describe the rapidity with which the flames spread as something unprecedented.

Digitized by Google

Major-General Whitfield, Commandant of Her Majesty's forces in China and Japan, and Lieutenant-Governor of this colony, arrived by the last English mail. He took up his quarters temporarily at the Hong Kong Hotel.

The *Customs Gazette*, giving the returns of trade to June 30th, has been issued. The *N. C. Daily News* gives the following as the figures of the leading imports into Shanghai. For the most part they show a satisfactory increase over the corresponding period of 1868. Grey Shirtings, 860,000 pieces against 822,000; T-cloths, 432,000against 291,000; English drills, 71,000 against 14,000; and American drills, 66,000 against 43,000; Dutch, 84,000 against 5,000; Lustres 47,000 against 43,000; Camlets 29,000 against 12,000; Iron, 74,000 against 36,000 piculs; Coal (Australian), 17,000 against 7,000 tons; British Coal has fallen from 13,000 tons to 3,000; Brown Sugar also shows a falling off from 196,000 to 129,000 piculs, and White from 160,000 to 116,000.

## JAVA.

—o—

### BATAVIA.

We *(Straits Times)* learn from the Java papers that the railroad from Samarang to Solo was opened on the 15th ultimo, on which day a fast train left the former for the latter place. The officials and the military, with a large assemblage of natives, were present at the opening. The Emperor, with the Ratu, and the Court of Solo, made a trial trip, and the *Locomotif* newspaper makes mention of many tokens of childish simplicity which the native great ones gave on the occasion. Sharing the general enthusiasm, the Emperor for a moment set *adat* aside, and in the midst of a vast crowd of natives he took a seat on a stool in a freight waggon, placed at his disposal. The *Locomotif* also speaks in high commendation of the manner in which the works have been completed, considering the ways and means and working powers by which they were put together. The regular transport of goods will commence in September, and the line to Solo will be finally opened for passengers, &c., in October next.

The English ship *Ouangondy*, Captain Emslie, has been finally got off the reef on which she stranded, and came into Batavia Roads on the 15th August. The captain reports that he saw, on the 17th, an English ship aground on the south-west side of Krakatoa Island, in the Straits of Sunda.

The Java papers give information that one of the most notorious and accomplished swindlers of modern times has made his escape from Sourabaya, where he had been imprisoned, and where he awaited his trial for extensive frauds on some of the first banks in Europe. He succeeded in escaping from the hospital, where he had been placed on account of sickness. He was formerly arrested at Sourabaya, in October, 1868, for fraudulently drawing on the Bank of Rotterdam for £700, of which he succeeded in receiving f.2567 50c. before further advices caused his arrest. He had passed a successful swindling career in the highest financial quarters, through Holland, Belgium, Egypt, Australia, Timor, &c. His display of official documents, articles of dress, passes, and even family albums, which he produced, having coats of arms, and inscriptions wearing every appearance of being genuine, may be in a great measure accounted for if we take over the statement of a correspondent of the *New York Herald*—namely, that the said swindler, whose real name is Kurt Schmalz, was originally valet to the real Count von Attems, and on the death of his master took up his effects and acted the part he has done.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Dates from this port are down to the 10th Sept. The London mail of 30th July arrived out by P. and O. steamer on 1st Sept., and that of 5th August, per French steamer, on the 6th. The following summary of news is from the *Straits Times*:—

There have been two meetings of the Legislative Council since the return of his Excellency from Penang, but the business brought under discussion has not been important. The Preservation of the Peace Extension Act has become law; accompanied, however, with a remonstrance from the Chief Justice and one of the unofficial members of Council. This opposition to the measure seems, however, to be based rather upon principle than upon any practical objection to its clauses; and it is noteworthy that the two unofficial members of Council present were not agreed on the subject. An amount of $20,000 has, on the motion of the Honourable Mr. Read, seconded by Mr. Scott, been placed at the disposal of his Excellency by the Council for the entertainment of his Royal Highness the Duke of Edinburgh. The Governor has been very liberally met on this occasion, and it is to be hoped that the reception given to his Royal Highness may be worthy of the colony. The Committee of the residents, who were appointed about two months ago at a public meeting, to secure the proper reception of the Prince, have placed their services at the disposal of the Governor, and there appears to be every probability of a hearty unanimity on this occasion.

The Governor has made another effort, and this time with success, to fill the vacant seats in the Legislature, the same having been accepted by Mr. W. R. Scott, of Messrs. Wm. Macdonald and Co., and Mr. W. Adamson, of Messrs. Gilfillan, Wood, and Co. It is generally felt, however, that the whole constitution of the Council must be altered before unofficial members can accept office with much good result to the colony. Even now the unofficial element is so small that it might as well be extinct. To the seven or eight official members there are four unofficial present in Singapore, the fifth member being resident at Penang.

The public service has lost a good man in Mr. J. D. Vaughan—who has resigned the post of Magistrate to enter upon the practice of law. Mr. Vaughan has been for nearly twenty-five years connected with the public service of this place, and his resignation cannot but be looked upon with regret. Mr. Dunman, another old public servant, goes home very shortly, vacating the post of Commissioner of Police for the Straits Settlements; Mr. W. Hoe takes Mr. Dunman's position temporarily, and it is believed may be confirmed in the appointment. Mr. Gottlieb, Police Magistrate, goes home by this mail on leave. The Chief Justice is at present in Malacca on circuit. The members of the Sporting Club have decided to hold an Autumn Race Meeting in October, about the time that the Duke of Edinburgh will be here.

Mr. Arthur Knight has lately been appointed Acting Head Clerk in the Auditor-General's office, *vice* Mr. A. W. V. Cousins, who is to act as Senior Sworn Clerk to the Registrar, in place of Mr. W. E. Maxwell, who will perform the duties of Sitting Magistrate at Penang.

The Chinese Festival given by the opium and spirit farmers here, at their residence at Teluk Ayer, passed off very successfully. A large number of ladies and gentlemen were present, among whom were his Excellency the Governor and Lady Ord, and several Government officials. The illuminations were on a very superb scale, there being no less than thirteen lamp-posts specially erected for the occasion.

The British ship *Berwickshire* was on the 9th September put up for sale by public auction, and realised $6,400.

The circulation of the banks was as follows:—Oriental Bank $220,400; Chartered of India, $193,850; Chartered Mercantile $190,518.

*Extinguisher* gives another of his amusing series of letters to the *Straits Times*.

A meeting of the shareholders on the Tanjong Pagar Dock Company (Limited) has been held; the report and resolutions of the meeting will be found in our advertising columns.

### PENANG.

The London mail of the 30th July arrived out on the 30th Aug Dates are now down to the 12th Sept. From the *Penang Gazette* we take the following items:—

The schooner *Lucretia* arrived in Penang Harbour on the night of the 29th from Anak Labu, bringing on the captain and crew of the *City of Edinburgh*. This vessel was bound from Rangoon to London, and when eight days out she sprang a leak. The captain, Mr. J. Dodds, then bore up for the Mauritius, which he expected to fetch, but all in vain; she sankon the 29th July, in about 3 N., 92.50 E. All hands were saved, and reached Anak Labu in their boats. A Court of Inquiry has since been held, the result of which will not be disclosed until approved of by H.E. the Governor.

The failure is reported of a Chinese firm, trading under the chop of *Hock Choon* for something like $40,000. The Chinese share with the European merchants in the loss. The assets are said to be nearly up to the amount of the debit.

Thursday, the 18th, was the first day of the yearly race meeting, and was very well attended. We missed many old familiar faces from the grand stand—officers of the regiment that have been removed, men who took a lively interest in the sport.

We are glad to learn that the Bill for the amendment of the Preservation of the Peace Act, lately brought into the Legislative Council when sitting in Pinang, has been passed in Singapore. We have not seen a report of the debate, but we hear that the learned Chief Justice offered some objections to the passing of the Act, bringing forward the only thing in the shape of argument that has yet been used by its opponents.

One of the largest assemblages of the principal inhabitants of all classes that we have ever seen in Penang took place at the Exchange-room, for the purpose of presenting to the Hon. Charles Bushe Plunket an address from the Europeans and Mahomedans, and another from the Chinese, on his departure from Penang to Singapore.

## CEYLON.

—o—

### COLOMBO.

The buoys in connection with the breakwater have been laid down. Latest dates from London were up to 27th August, and telegrams to the 10th of September, which were 10 days in transmission, and most of the messages had been even longer.

Reports are current that Sir Hercules Robinson was to have the appointment of Governer of Madras, but there is no truth in it.

A meeting of the Policy-holders of the Albert Life Assurance Society is summoned at Colombo. There are eighty-five in this branch, the majority of them Enorpean descendants,

Digitized by Google

on whom the failure of the Society will fall heavily. We can only hope that an event so disgraceful and so deeply to be deplored will lead to such legislation as will establish life assurance on a firm and safe basis.

Mr. P. W. Braybrooke, who has for eleven years so ably administered the affairs of the Central Province, which, from the presence within its bounds of the great majority of the European coffee-planters, is perhaps the most important of the six provinces into which the island is divided, takes a final leave of Ceylon, and goes to Europe by this mail. Allclasses have vied in doing honour to the retiring official.

(FROM A CORRESPONDENT.)

The Currency question is now agitating our little community. Among the new ideas imported by our returned Governor is one relating to our circulating medium, which his Excellency thinks should be rupees in account as it is in fact. He has, therefore, come out with an ordinance on the subject, the draft of which has just appeared in the *Government Gazette* and quite electrified the banking and mercantile community. Sir Hercules Robinson had tried his hand at currency in Hong Kong; and seems determined to keep it in practice here and immortalise his name by rectifying our method of accountancy. The merchants and bankers, on the other hand, and they are the parties most interested, deny the necessity for any change. Their chief transactions being with England, and not with India, the £. s. d. system of reckoning suit them very well; and although the rupee was the coin most in circulation, it had for thirty years or more been considered the equivalent of two shillings, and the tenth part of one pound, and therefore there was no difficulty and no inconvenience in keeping accounts in pounds, shillings, and pence. But the Governor, it seems, had found out that great inconvenience to the public service might arise if payments were demanded in pounds; and that any civilian having a claim on Government, or any Government officer, or other person to whom money was owing by the Government could demand payment in gold, as gold is a legal tender, although it can never be bought at par. Hence inconvenience and loss might arise which would hamper the Government. Therefore his Excellency, fearing danger to the State if he made known the secret before he was prepared with a remedy, entered into correspondence with the Home Government some three years ago, which correspondence has been maintained during the reign of successive Colonial ministers, with a view to obtain their sanction for an alteration in the currency. He appears to have encountered considerable difficulty in proving the necessity for any change; but at length, during his recent visit to England, his pertinacity has conquered, for he comes out armed with full power to make the required alteration, and, as before stated, he has promulgated an ordinance, in draft at least. That it will be passed into law if he is determined on it admits of no doubt, because, constituted as our Legislative Council is, the officials, who are as nine to six of the unofficials, are *obliged* to vote with the Governor, while the unofficials, his nominees, are *expected* to vote with him. There is just the possibility that the strong representation the merchants are forwarding to Earl Granville, the Secretary of State for the Colonies, may delay the passing of the ordinance, or, if not, may prevent its confirmation by the Queen. In supposing he has made a discovery which never occurred to any one else, the Governor takes credit for more *kudos* than most people are willing to accord him, for it was well-known in mercantile circles that where a pound sterling was promised whether in a bank-note, or in an agreement for salary, or in a contract, gold could be demanded; and hence it has long been customary to specify on the face of obligations pounds sterling or pounds currency as the case might be, the latter chiefly prevailing; for, as the merchants say, as well might a Ceylon dollar of 1s. 6d. value be taken to mean a Mexican dollar of three times that amount as a Ceylon pound to mean an English pound.

According to Sir Hercules Robinson, the rupee is only the equivalent of 1s. 10½d. sterling. Hence he thinks that to legalise it as worth two shillings would be to establish a *fictitious par*. More correct views have been taken by both Lord Carnarvon and the Duke of Buckingham, as appears from their correspondence on the subject. Lord Carnarvon writes per Mr. Elliot, "It is objected by Sir H. Robinson, to this measure of recognising the rupee at two shillings by Order in Council, and he seems to consider the objection a conclusive one; that it would enact a fictitious equivalent to the pound sterling, the rupee he considers being really worth only 1s. 10½d. Without going into the question whether this or that rating would more correctly represent the comparative value of rupees and sovereigns placed together in Ceylon, Lord Carnarvon must doubt the validity of the objection. For it is not to the English pound sterling, but to the Ceylon pound currency that the supposed order in Council would declare ten rupees equivalent. A Ceylon pound has meant nothing but ten rupees for the last 30 years, and the order in Council would adopt no fictitious, but the actual and undoubted value of the rupee, in declaring this value to be two shillings, not two shillings sterling, but two shillings of Ceylon currency."

The Duke of Buckingham, per Sir F. Rogers, says:—"Steps should be at once taken, not to alter, but to secure from convulsion the existing state of things, by giving undoubted legal validity to existing obligations, in the sense in which they have been uniformly understood by those who have contracted them."

Now, it appears that a difficulty had either arisen or seemed possible to a previous Governor of Ceylon as regards the value of a rupee; and a minute was passed by Sir Robert Horton in 1836, and approved by his successor, establishing the rupee as the fixed standard of value, and equivalent to two shillings. The Home Government, while disapproving the policy, consented to it, "in consideration of the interests which had grown up in the meantime," and "to avoid inconvenience to the public." Doubts have from time to time arisen regarding the legality of that minute; but they never took any opposing shape till conjured up by our present Governor, who has taken the island by surprise by his proposed Bill to meet the inconvenience, and counteract it. The merchants and bankers, and others interested in accounting, see great difficulty, inconvenience, and risk in altering the currency. And they prefer continuing the system which has, for upwards of thirty years, given universal satisfaction, and been well understood and acquiesced in by the whole community. Taking their stand upon this point, and backed up by the opinions above quoted from Lord Carnarvon and the Duke of Buckingham, they consider any supposed difficulty will be met by legalising the rupee, as of the value of 2s. Ceylon currency, and they ask accordingly.

# Commercial Report.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN IMPORTS.

*(For dates see First Page.)*

YOKOHAMA, AUG. 28.*—There had been an improved demand for Grey Shirtings and Cotton Yarn, leading to fair sales of both staples at slightly higher prices. Very little had been done in other descriptions of Cotton Goods, which, together with Woollen Manufactures, remained unchanged, but were more or less nominal in value. Slight inquiry for suitable sizes of Nail Rod Iron, other Metals nominal; Lead unsaleable. The current quotations were:—G. E. Grey Shirtings, 7 lbs., $2.35 to $2.40 per piece; 8¼ to 8½ lbs., $2.80 to $2.85; G. E. White Shirtings, $2.80 to $3.20; T-Cloths, $1.80 to $2.20; Cotton Yarn, Nos. 16 to 24, $46.50 to $47.0; 28 to 32, $47.50 to $48.0; Camlets, SS, $13 to $14; Cloth, medium and cloth, 80c. to $1.60 per yard; Long Ells, assorted, $8.0 to $8.75 per piece; Lead, $6.75 to $7.0 per picul; Iron, Nail Rod, $3.0 to $3.50. The exchange on London on 28th August was Bank Bills, 6 months' sight, 4s. 5d.; credits, 4s. 5¾d.

HIOGO AND OSAKA, AUG. 24.*—At Hiogo a marked improvement in demand had manifested itself, especially for Grey Cottons; the reported failure of the native cotton crop, owing to heavy rains, having doubtless influenced the market. Fears were also entertained for the rice crops, and native grain was daily advancing in value. Cottons: 8¼ lb. Grey Shirtings and No. 28/32 Cotton Yarn in good demand at advanced rates; market very firm, with an upward tendency. Turkey Red Cloth much wanted; no stocks on offer. Black Velvets in more demand. Woollens: Camlets in less demand. Black Lastings, Orleans, and Mousselines de Laine continued saleable. Black Cloth and Blankets in more favour. Metals: Tin Plates in fair demand, and Nail Rod Iron attracting more attention. At Osaka a considerable improvement had taken place, and for most staple articles a fair inquiry existed. The continued unsatisfactory state of the native currency, however, prevented much business being done. Yarn and Grey Shirtings were much wanted, and higher rates were looked for.

TIENTSIN.—The current quotations at date of latest advices were—8¼ lbs. Grey Shirtings Tls. 2.1.1 to Tls. 2.1.2; 8 lbs., 36 in. T-Cloths, Tls. 2.0.6; English Drills, Tls. 3.0.8; Grey Shirtings were firm; Drills and T-Cloths neglected.

SHANGHAI.—An irregular and somewhat speculative business had been transacted in the chief staple, but the demand for several articles had been much less than might have been looked for, and the general position of the market was not satisfactory. The total value of foreign goods sold from first hands showed a falling off of more than 25 per cent. when compared with the previous fortnight, and the current range of prices had generally shown no improvement. Grey Shirtings.—About 150,000 pieces of these goods had been sold from first hands at slightly fluctuating rates. Some of these were "Eagle chop" to arrive, at Tls. 2.18 and Tls. 2.20 per piece, but the bulk of the transactions had been for all kinds of goods on the spot, with ordinary or extended credit. Prices had ranged from Tls. 2.14 to Tls. 2.20 per piece for 8.4 lbs., and Tls. 1.93 to Tls. 1.97 per piece for 7 lbs. Heavy goods were dull, and had fallen to Tls. 2.45 to Tls 2.85 for 9 lbs. to 9.12 lbs. The market closed very firm, with a good demand. T-Cloths: Only moderate sales had transpired in all weights of these goods, and the market was very weak—6 lbs. entirely neglected; of 7 lbs., sales chiefly ordinary makes at low values; fine to finest cloths had been but little sought for, even at a reduction 8 lbs. had changed hands in small lots at Tls. 2.1.5 per piece. We quote 6 lbs. Tls. 1.4 to Tls. 1.6.8 per piece; 7 lbs. Tls. 1.6.5 to Tls. 1.8.8 per piece; and 8 lbs., 36 inch, Tls. 2.0.0 to Tls. 2.1.5 per piece. White Shirtings: About 2,500 pieces of these cloths had found buyers at quotations, but the general demand was very slack, and only best makes were saleable, even then only in small parcels. Quotations—Tls. 2.0 to 2.1 for 56 reed: Tls. 2.1.5 to 2.2.0 for 60 reed; Tls. 2.3.0 to 2.3.5 for 64 reed; and Tls. 2.4.0 to 2.4.5 per piece for 66 reed. Drills: Fair sales of English and Dutch at a slight advance on last values. The latter goods most sought for, and still wanted. Further sales of American goods at a drop on last mail's figures, and the quotation of Tls. 4.05 per piece for the best chop must be considered nominal. Sheetings: American Cloth in no inquiry at Tls. 3.6 to 3.7 per piece; one sale of English quoted at Tls. 3.2.0 per piece. Jeans: Sales of American at Tls 3.1.7 to 3.2.0; English declined to Tls. 2.8.5 to 2.9.5 per piece. Woollens, &c.: There had been rather more activity in this class of manufactures, prices

* The market reports from these ports are by the Pacific Mail, and are later than those to hand by the P. and O. Mail delivered this day.

Digitized by Google

howing little or no change. Camlets: Sales of assorted quoted at last rates; scarlet slightly firmer, also green; but dark blue showed a small decline. Long Ells: Moderate inquiry, resulting in the sale of about 8,500 pieces at former values. Metals—Lead: Dull of sale; a small lot of L B sold for cash at Tls. 4.8.5. Coals: Arrivals—Rufine with English; Diamond from Cardiff. Few sales, and market quiet. Australian and American further declined, owing to excessive supplies; other kinds as last quoted.

Hankow.—Grey Shirtings: During the early part of the fortnight the demand was active, at steady rates. Later supplies came to hand on too large a scale, and sales were less readily effected. Closing quotations:—Tls. 1.96 to 1.99 for 7 lbs., and Tls. 2.15 to 2.19 per piece for 8¼ lbs. goods. For heavy makes no inquiry, and quotations nominal. White Shirtings: 60 and 64 reed in small demand, at previous rates. T-Cloths: No improvement, business confined to a few retail transactions. Drills: Sales again on a considerable scale, at about previous rates. Market closed rather quieter, in consequence of heavy receipts. Fancy Cottons: Moderate business, at steady prices. Camlets met with little attention, few sales being reported. Lastings continued dull of sale. Long Ells: Prices for assortments had given way 1 mace per piece, and the demand had been very limited. Scarlet dull, at 5 candareens per piece decline. Spanish Stripes in moderate inquiry; prices unchanged. Medium Cloth sold at lower rates, but without inducing much business. Figured Orleans: Sales to some extent at easy rates. Metals: Lead declined, and a slack demand was expected for some time. Quotation:—Tls. 5 to 5.3.0. Quicksilver: A slight inquiry apparent at Tls. 51 per picul.

Foochow.—The sales during the interval had been 120 pieces assorted Camlets, at $18 per piece, and 800 piculs Lead at $8 per picul. No business had been effected in Cotton goods. Quotations were:—Gray Shirtings, 8¼ lbs., $3. to $3.05, 7 lbs., $2.75; T-Cloths, 7 lbs., $2.50 to $2.55, 6 lbs., $2.20 to $2.25.

Hong Kong.—Messrs. Olyphant and Co.'s report contains the following remarks upon the condition of the market:—Cotton Yarn: Settlements have been restricted to some small parcels of Nos. 16 to 24 only, taken at previous rates. Dealers have shown but little disposition to operate, as importers are demanding still higher prices, and the advices from the Canton market are as yet unfavourable to purchases. Flower Tye brand, Nos. 38 to 42, is quoted $2.50 per bale dearer. Piece Goods: The improvement in the market for Manchester goods last noted has kept up, and in some instances values have further advanced, whilst sellers are firm in their increased demands. 7lbs. and 8.4 lbs. Grey Shirtings have been fairly dealt in at rather improved figures. The stock of 7 lbs. has become somewhat reduced, and with but small supplies of 8.4 lbs. arriving both these weights command ready sale, though the demand is not so much for other markets as it is that dealers are seeking to fairly supply themselves in expectation of the inquiry later on. Quotations for White Shirtings are unaltered, though the common kinds are very easy of sale, while the fine makes have receded in value. An enhancement of 10c. in the value of English and Dutch Drills is noticeable, as the demand for the northern trade is now setting in; American goods, however, have not participated in the movement, and with almost no inquiry prices are apparently somewhat weaker. 6lbs. and 7lbs. T-Cloth find a ready market at a rise of 2c. to 5c. per piece. Considerable quantities of 8lbs. are still held by native dealers, and the inquiry for this weight is very slack. Brocades and Spotted Shirtings do not find favour at a decline of 10c. for assorted. Turkey Reds have been moderately taken at an improvement of 5c. Woollens: The hoped for activity in this market has not shown itself, and no change for the better seems near at hand. The few settlements reported have, in most instances, been at lower or unchanged rates, and, with the exception of a slight improvement in Medium Cloths, no change has occurred worthy of noting. Metals: Nail Rod Iron is in increased supply, and has slightly declined; Bar Iron is rather dearer, though Soft is not inquired for; Hoop is only to be had in small quantities, and is firmly held. Wire and Steel continue without improvement. Lead nominally 10c. dearer. Tin has again advanced $1.50 to $2. Quicksilver is weaker. Coal: The arrivals have been 1,425 tons Sydney and 2,107 tons West Hartley; of the latter 1,400 tons come to consumers. Sales have been 990 tons Sydney at $7, deliverable in Canton, and 435 tons Sydney, deliverable in Hong Kong, at $6.10 per ton. Ginseng: Beyond a single sale of 64 casks Crude at $118 per picul no settlements have resulted, and offers made have been much below what holders are willing to accept. The market for the article both at this and Canton is very dull, and quotations are considered almost nominal. The following were the current quotations:—Cotton Yarn, Nos. 16 to 24, $132.50 to $137.50 per bale; 28 to 32, $140.0 to $145.0 per bale; Grey Shirtings, 7 lbs., $2.50 to $2.60 per piece; 8.4 lbs., $2.80 to $2.85; White Shirtings, $2.50 to $4.80 per piece; T-Cloths, 6 lbs., $1.90 to $2.40 per piece; 7 lbs., $2.17½ to $2.40; American Drills, 40 yards, 15 lbs., $5.20 to $5.50 per piece; Dutch Drills, 40 yards 14 lbs., $4.60 to $4.80 per piece; Spanish Stripes, Scarlet, $0.73 to $0.75 per yard; ditto, Assorted, $0.70 to $0.72 per yard; Medium, Ladies' and Habit Cloths, $1.15 to $2.0 per yard; Long Ells, Scarlet, $7.80 to $7 90 per piece; ditto, Assorted, $7.80 to $8.00 per piece; Camlets, SS Scarlet, $16.25 to $16.50 per piece; ditto, Assorted, $15.70 to $16.00 per piece. Iron—Nail Rod, $2.75 to $2.80 per picul; Lead, $6.75 to $6.90 per picul; Tin-Plates, $6.25 to $6.50 per box; Steel, $4.25 to $4.50 per tub; Quicksilver, $62.50 to $62.75 per picul; Coals, English, $8.50 per ton; ditto, Welsh, $9.50 to $10.00 per ton.

Batavia.—The only alteration to notice in Grey Shirtings is some improvement in the value of 39 in. 7 lbs., which had been in some request at 7¼f. short credit; stocks light, and other descriptions firmly held. Supplies of Madapollams in first hands reduced, and there was a better demand. Drills of Dutch make held for prices which dealers were unable to pay, and inferior qualities moving at some improvement. 36 and 40 inch White Shirtings dull, and values unchanged. White Madapollams in little inquiry, stocks of Dutch make being ample and difficult of sale; mediums, 24s. Cambrics in request for shipment to Samarang; finer qualities neglected; 15s. and 16s. sold at 4.90f. to 5f., short credit. Dyed Cloths only saleable at low rates; superior Dutch Turkey Red Cambrics placed at 8f.; plain orange Madapollams in request at 4¼f. Demand for Prints quiet, dealers having fully supplied themselves by late purchases. Prices low, and in most instances unremunerative. Grey Yarn advanced in value, stocks small and in few hands. Sales of 40s. at 450f.; a further advance demanded; lower counts comparatively neglected; Dyed Yarns saleable at about previous rates; Woollens very dull; Metals generally overstocked and difficult of sale.

Singapore.—The tendency of prices for most descriptions of Grey Goods was upwards, but transactions were comparatively small; some large sales at auction of sea-damaged cloth, moreover, had weakened the demand for sound goods. 8¼ lbs. Shirtings sold to a fair extent at $3 per piece; and in T-Cloths an advance of about 5 cents had been established. Drills in moderate request, prices nearly unaltered. Madapollams in more inquiry, prices maintained. Demand for White Shirtings limited to one or two makes of fine goods, no alteration in price. Imitation Irish Linens sold to a small extent at previous rates. Cambrics of finer makes neglected, price barely maintained. No transaction in Figured Shirting. Jacconets, Brocades, Damasks, Lappets, and Mulls in no demand. In Dyed Cottons scarcely any transactions to report, some small sales of Orange Shirtings, and the lighter weights of Turkey Red Cambrics at the same rates as last mail. Prints unsaleable, except for patterns of two and more colours. Sarongs very dull and in large stock. Grey Yarn again advanced about five dollars a bale, No. 40's quoted $152½. No. 30's sold on the spot at $135, and to arrive at $140. Coloured Yarn in moderate demand, some fair sales of Turkey Red at slightly higher prices. Woollens quite unsaleable. In Metals a moderate business had been done. Iron in large stock and unsaleable except at low rates. Pig Lead firmer, and fair sales at $6.25 to $6.35. Yellow Metal declined in price, sales as low as $21¾. Nails in large stock and unsaleable. Coal without alteration; the only sales being a cargo of 900 tons West Hartley at $7¼ cash, and of 200 tons Lancashire at $5½.

Penang.—The business in imports generally was, as usual at the season, dull. Grey Shirtings, 6lbs., weak, at $48 per corge. 7lbs. had gone off to a small extent, at $51½ to $52½ per corge. 8¼lbs. dull, at $62 to $63 per corge. Grey Long Cloths and Madapollams inactive, and nominal. Grey T-Cloths somewhat brisker—5lbs. at $31½ to $32½, 7lbs. at $45 and $46 per corge. Sale of White Shirtings very moderate, at $90 to $108 Fine, $65 to $88 Medium, per corge.

Colombo.—Messrs. Geo. Wall and Co.'s Circular is as follows:—Our market, which had closed very dull at the date of our last report, subsequently revived to some extent to receive the supplies brought in by late arrivals. In the beginning of the fortnight a considerable amount of business was transacted, and although prices tended in favour of buyers, no material change will be found, except in Grey Mule Twist, which has experienced a serious decline. For some days, however, business has been almost completely at a standstill. Dealers are advised for the ports on the coast of full supplies, with little inquiry, and late home advices check any disposition towards speculative business. Our quotations are derived from sales actually effected, but we close with nothing doing. Grey Mule Twist, 9s. 3d. per 5 lbs. bale. Grey Shirtings, 39, 7 lbs., 11s. 3d. to 11s. 6d.; 8¼ lbs., 14s.; 45, 9 lbs., 16s. 9d.; 10 lbs., 18s. 6d. to 19s.; 11 lbs., 20s. 6d.; 50, 10 lbs. to 11 lbs., 20s. 6d. to 21s. Grey Long Cloths, 1s. 5½d. to 1s. 6d. per lb. Grey Jacconets, 50, 7s. 6d. to 8s. 6d. White Shirtings, 45 by 40 yards, and White Cambrics, 45 by 12 yards, and 45 by 24 yards have found buyers at fair prices. Prints: A few of favourite styles have been placed at previous rates. There has been no inquiry for Printed Muslins, Handkerchiefs, or Dresses, nor for any description of Wove Goods.

## CEYLON, STRAITS, JAVA, CHINA, AND JAPAN EXPORTS.

### TEA.

Yokohama, August 28.—Business in Tea had been on a fair scale. Settlements amounted to rather more than 3,000 piculs, at prices which show but little alteration. Stocks estimated at about 3,000 piculs. Quotations:—Common, none; good common, $23.0 to $25.0 per picul: medium, $26.0 to $27.0; good medium, $28.0 to $30.0; fine, $31.0 to $33.0; finest, $34.0 to $36.0.

Hiogo and Osaka, August 24.—At Hiogo about 800 piculs of good medium to finest had been settled, at rates showing a margin on those ruling at Yokohama. Advices from that port, quoting an advance in price with large settlements, had caused teamen to demand higher rates than these asked at the commencement of the season, and which buyers refused to pay. Arrivals—About 2,800 piculs. Stocks estimated at about 3,000 piculs, principally consisting of the finer qualities. Musters of many of the late arrivals had not been shown, and it was difficult to ascertain the actual stock. At Osaka the settlements had been of a trivial nature, and quotations remained unchanged.

Shanghai.—Black: A large business had been transacted at rates showing upon the whole little alteration. Arrivals had been very liberal, and notwithstanding the important settlements, the stock was slightly increased; commonest descriptions remained very firm, and Shantaam kinds found ready sale at Tls. 20 per picul. The lower rates of exchange and freight had tempted buyers. Settlements, 32,800 chests; reshipments on owners' account, 4,800 chests; stock 112 chops, or 32,500 chests. Quotations, duty paid, exchange for credits, six months' sight, at 5s. 11d. per tael, and freight at £1. 10s. per ton:—Hohow, common to fair, 1s. to 1s. 2d. per lb.; Oonam, common to fair, 1s. 0¾d. to 1s. 5d. per lb.; Ningchow, 1s. 1¼d. to 1s. 5d. per lb.; Oopack, 1s. 2¼d. to 1s. 5d. Green: A considerable business had been transacted in Teenkai Teas at high but gradually weakening rates. A few chops of Fychow had also been bought, and a few parcels of Pingsuey likewise, the two latter kinds showing no alteration in rates. Quotations: Teenkai, Tls. 38¼ to 45½; Fychow, Tls. 35 to 37; Pingsuey, Tls. 33½ to 39. The bulk of the purchases had been on American account. The stock was increased. Settlements for the fortnight, 23,700 half-chests; reshipments on owners' account, 1,440 half-chests; Stock 64 chops, or 49,000 packages.

Hankow.—Messrs. Drysdale, Ringer, and Co.'s report is as follows:—Arrivals since our last have been on a larger scale than during the subsequent fortnight, or since the country has been flooded; contrary to anticipation, they are about equal to the quantity received during corre-

Digitized by Google

sponding period of last year. We do not, however, think this must be considered a proof that supplies will continue to equal those of last season, as a considerable portion of the quantity just received has been detained up country by the high state of the water, and is not entirely an unexpected or increased supply consequent on the advanced rates which have now been current for some time, both here and in Shanghai. Natives are still very confident in their assertions that we shall see a considerable falling off, which, if true, will only allow of bare supplies from now till end of season. For the last three or four days they have been limited. The business of the fortnight has been about 10,000 chests and 1,500 half-chests, principally fair to medium second crop Oopacks, as nearly all the com-i mon and Shuntam packed teas have been, as usual, sent on to Shanghae without being offered to our buyers. Shipments to Shanghai on nativd account are nearly 22,000 packages, but little of which has been purchased here, as the Shanghai market has been less active and encouraging. Prices for the better grades declined shortly after date of our last, and have remained easier, but common grades are, if anything, a fraction dearerr. We quote fair to good second crop Oopacks, 17 to 20; Oonams, 16 to 18, but few on offer; and Shuntam packed Teas 15 to 16 taels per picul. Oanfas, none on offer. Settlements:—2,440 chests, at 1s. 1½p. to 1s. 2d.; 3,560 chests, 1,850 half-chests, at 1s. 2½d. to 1s. 3½d.; 3,860 chests, 700 half-chests, at 1s. 3½d. to 1s. 4¾d.; total, 9,860 chests, 1,550 half-chests.

Foochow.—Congou: In the early part of the interval, owing to paucity of supplies and eagerness on the part of Foreigners to continue purchases, a slight advance in prices was established; subsequently, however, arrivals from the country were on a more extended scale, and the Teamen became more willing to realise. A few parcels of better grade second crop Teas had come to hand, and found ready sale at full rates; but the bulk of the arrivals showed no improvement as regards quality. Souchongs had been in brisk demand, and prices had advanced 2tls. to 3tls. per picul from the lowest point. Oolongs had arrived freely from the country, but were held for rates far above the ideas of American buyers. Scented Teas in fair inquiry, at about previous rates. Flowery Pekoes: A few small parcels had been settled. Settlements for the fortnight had been:—Congou, 44,757 chests, at Tls. 9.5.5 to Tls. 29.8 per picul, ship off; Souchong; 8,901 chests, at Tls. 18.8 to Tls. 30.8 per picul, ship off; Oolong, 184 half-chests, at Tls. 22.3 per picul, ship off; Scented Teas, 6,085 boxes, at Tls. 8.5.5 to Tls. 26.8; Flowery Pekoe, 200 chests, at Tls. 32.8 to Tls. 48.3.

Kiukiang.—Blacks had been coming forward more freely, and a few small parcels had been taken at about former quotations, but the bulk of the Teas had been forwarded to Shanghai on native account, as had the only two chops of new Green Teas that had arrived.

Amoy.—Congous had continued in demand, and settlements for the fortnight comprised the whole quantity on offer, amounting to 6,889 packages, at $14½ to $16½ for ordinary, and $18 to $19½ for fair to good common. No further transactions in Oolongs were reported; arrivals were over 33,000 packages short of those to same date last year, and Teamen, in view of this, were demanding enhanced prices, to which buyers were not likely to submit. The Cresswell had sailed for London, and the Insulaire for New York, leaving the Polar Star loading for the former, and the Nantib for the latter port.

Canton.—Three chops Country Congou on offer had been taken at prices over the last received London quotations for similar teas. No transactions had taken place in District Congous, and in Scented Capers only a moderate business had been done, at prices slightly over previous currencies. Scented Orange Pekoes in some request, especially the finer grades, and some late settlements showed an advance of fully 2 taels. A limited quantity of Canton Made Greens had found buyers, partly for the Continent.

## JAVA PRODUCE.

Batavia.—Arrack: Sales at f.120 to f.122 per leaguer of 133 Imperial gallons. Coffee—Java: Sales of ordinary Green Java at Samarang at f.32 to f.32.50 per picul. Blue Bean worth f.36 to f.37 per picul. Padang: None in the market. Cassia Vera: Market barely supplied. Cubebs obtainable at Samarang at f.17 to f.18 per picul. Gum Damar still very scarce, and in brisk demand. Sales of No. 1 cleaned at f.48.50 per picul. Indigo: Sales of first quality at Samarang at f.5.25 to f.5.35 per Dutch pound. India-rubber obtainable at f.90 to f.100 per picul. Gutta-percha none in the market. Tin—Billiton: 5,000 piculs would be sold early in October. The average price realised at the last auction was f.71.42 per picul. Nutmegs: Sales of 110 to the pound at f.110 to f.115 per picul. Mace: In brisk request at f.100 to f.110 per picul. Pepper—Black: Market bare. White: None offered. Rattans: Padang f.8 to f.8.50. Borneo f.10.50 to f.13 per picul. Sugar: This staple was in keen inquiry. Sales as high as f.16.50 to f.16.75 per picul for No. 14; 10,000 piculs White Refined changed hands at a secret figure, supposed to be f.18 50 per picul, bags included.

## STRAITS AND CEYLON PRODUCE.

Singapore.—A fair business had been done, most produce coming to hand being readily taken up at slightly higher rates. Gambier advanced to $3.30 per picul, and about 550 tons contracted for. Black Pepper bought at $7 per picul. White Pepper in more inquiry, and $10.18 to $10.20 had been paid. Gutta-Percha of good quality asked for; price firmer. Pearl Sago advanced 10c. to 20c. per picul; some considerable purchases made. Sago Flour advanced; $2.62½ to $2.70 paid for Borneo and $2.72½ to $2.75 for Singapore. Tin advanced to $33½ per picul during the fortnight, but subsequently receded to $29 to $32.50.

Penang.—Tin in good demand; closing quotation $31 per picul. Pepper: $6.80 per picul was the closing quotation for East Coast and Acheen. A great part of the arrivals of Cutch secured at $5¼ to $5½ per picul. The balance offering at the higher price. Gum Benjamin in fair supply—No. 1, $42; No. 2, T. T. and Co., $20.90 and $28 per picul. Hides very scarce and increased in value. Buffalo $10.10, Cow $13.60 per picul. Horns: $10½ the last price paid, and in demand at that figure. Tapioca had changed hands at $4.55 per picul.

Colombo.—Cocoanut Oil at 3d. to 6d. cheaper since last mail; a considerable quantity waiting shipment. Cinnamon in good demand and firmer at 1s. 11d. to 2s.; good quilly pieces and clean chips also easily placed, the former at 6d., the latter at 3½ per lb. Coir: Full contracts reported in medium to fair yarn, at 18s. to 24s.; Fibre inactive, at 14s. to 16s.; Rope, 16s. to 17s. Plumbago: Fine bright lump, £14 to £16 chips, £6 to £6 10s.; fine dust, £4 to £4 10s.; considerable quantities waiting shipment. Cotton: Nothing passing. Coals continue without any inquiry.

## SILK.

Yokohama, Aug. 28.—There had been considerable activity, with scarcely any change in prices. Settlements had been large, but, owing to the quantity rejected on account of inferiority, they did not actually exceed 600 piculs; all Hank Silk, save about 50 bales Koshiu and a few bales Hamatzky Oshiu. Of this quantity 600 bales were shipped per P. and O. steamer Ottawa, on the 25th Aug. Unsold stock, 350 to 400 piculs. Arrivals of silk worms' eggs amounted to about 250,000 cards, and purchases to 40,000, settled at rates ranging from $3 to $3.80 per card for fair quality. The Japanese continued to ask very high prices, beyond the views of most buyers. The current quotations for Silk were—Mibash and Sinshu, $620 to $820; Koshu, $630 to $650 per picul.

Shanghai—The following is from Messrs. C. J. Skegg's and Co.'s Circular:—Early in the fortnight business was resumed at previous rates, but higher cost in the country; the enhanced price of dollars here, and a lower sterling exchange, combined with the general anticipation of better news from England, enabled the dealers to place about 1,600 bales, at an advance of Tls. 7½ to 10 on Chop Silks, and about Tls. 5 all round on Medium and Good descriptions. This, however, was checked on receipt of telegrams, and only a dragging business has since resulted, sellers being very strong in holding Fine Silk, but going back to about last mail's rates for Medium and Common sorts, whilst foreigners generally are holding out for a further decline. Settlements, including about 500 bales bought at the close of last mail, amount to about 2,600 bales, and the following are a few of the leading quotations:—In Tsatlees, Koo-fong-sing and Dragon chop thirds, at Tls. 565; Donkey, Tls. 560; Ya-kee, Taels 557½; Incense, Tls. 547½; and Red Peacocks, Tls. 465 to Tls. 470. No. 2 Fat-mow Hainins, Tls. 482½ to Tls. 485. Kahing and Chin Cum Taysaam unchanged; Long Reels, Tls. 395 to Tls. 400; and Skeins, Tls. 365. The P. and O. steamer has 1,900 bales engaged.

## SUNDRIES.

Macao.—The market was bare of Cassia, and further arrivals of consequence were not looked for. A small lot of inferior Cassia Buds on the market was unsold, no offers having been made for it. Cassia Oil was held but not inquired for at $135. Some 30 to 40 piculs of Aniseed Oil had been disposed of at $215, but for the supplies arriving holders had refused $220. Of Aniseed Stars there were none of really good quality in stock, but about 200 piculs of inferior were on offer at $22. The supply of Galangal Root was large, while inquiry was but slight.

Canton.—Cassia had advanced to $20.75 to 21 per picul for mats and boxes with moderate demand. Settlements 1,000 piculs, 400 piculs of which for America. Stocks 10,000 piculs, with more than an equal quantity to come forward. Cassia Buds: Quoted at $39 to $40 per picul. Stock 20 to 30 piculs. Cassia Oil: No stock. Aniseed Star: $23 to $25 per picul. No sales. Rhubarb: Sales 50 piculs at $50 per picul, leaving a stock of 550 piculs of common quality, for which $40 to $50 per picul was asked. Fire Crackers: Contracts reported for 5,000 boxes Manhing's best at 78 cents per box, and 5,000 boxes with another maker at a proportionate price. Shipments, per Chattanooga, 20,000 boxes of best and good quality. Matting: Manhing had taken some further contracts, making his engagements for new season's make about 12,000 rolls. Gowqua had 7,000 rolls contracted for; Ayoke, 9,000 to 10,000 rolls; Acheen, 3,000 rolls; Choey-sun, 10,000 rolls. A portion of these quantities were intended for shipment to England and South America, so that it was impossible to form a correct estimate of the probable export to America. Ginseng: No business doing; the native dealers reported trade in the country as being very dull. Stocks very small.

Smith—On the 21st Aug., at the General Hospital, Shanghai, Charles H. Smith, of the ship *Mary Moore*

## NEW STEAMERS FOR CHINA AND JAPAN.

Messrs. Denny and Co. have a screw steamer in hand for Messrs. Jardine, Matheson, and Co., similar to the *Lismore*. Captain Dearborn is also superintending the building of two steamers for the Shanghai Steam Company; one is a paddle on the American principle for the Yangsze, and one a screw for the Tientsin trade. The builders are Messrs. Inglis, on Clyde, and we hear they will be very fine boats.

Messrs. Randolph, Elder, and Co. are just finishing off a screw for the Tientsin line of Messrs. Trautman and Co.

The Union Co. of Shanghai will probably soon give an order for one. The *Erl King* is being thoroughly overhauled, and will soon proceed again to China.

Messrs. Hall, of Aberdeen, are building another gunboat for Japan. A tug is being built at Newcastle, intended for the Shanghai river; she will be a strong little vessel of about 60-h.p., capable of burning any coal, and able to perform towing trips on a much reduced scale; the consignees will be Messrs. Hall and Holtz, Shanghai.

The William Miller, screw collier for the Oriental (Labuan) Coal Company, will be put on the berth for a port in the Straits or China, and afterwards proceed to Labuan. She carries out coal waggons, and two road steamers for the conveyance of coal, as described in our last issue.

There are still, however, some shipowners who do not consider the days of clippers as numbered. Messrs. John Willis and Sons have one on the Clyde and two on the Thames nearly ready for the China trade.

The *Great Republic* arrived at San Francisco on the 18th Sept., having left Yokohama on the 29th August, and Hong Kong 19th. Shanghai dates also to the 19th. The items from Japan are later than to hand by the P. and O. mail, but their value is very materially destroyed by the extraordinary mixture of old news already received. This arises from the want of knowledge on the part of the agent in San Francisco who makes up the messages. They should be made up in China and Japan, and forwarded on to San Francisco, there to be wired immediately on arrival. We hope the Associated Press of New York, who have charge of these messages, will see to this.

Digitized by Google

Captain Jones, of the P. and O. steamer *Carnatic*, is expected from Bombay about the end of the month, when the Board of Trade inquiry will commence. The Salvage Association have not yet received any of the treasure, &c. The officer sent out writes, on September 30, from Shadwan:—

"On my arriving here I found that everybody had left the wreck; the Egyptian gunboat, which had been here, had also left. I saw only that bale goods and cases were being washed up on Shadwan; but as they broke in landing, and some difficulty might be found in recovering them, they were not thought worth the trouble of salving. The captain of the *Tor* (Egyptian Government vessel), acting under my advice, chased a number of Arab dhows, which we found filled with cloth, muslins, &c., and one had some of the letters, which I have addressed to the Postmaster at Bombay. The foreyard of the *Carnatic* is above water. It is blowing fresh now, but we shall not lose a moment's time in ascertaining the actual depth, and work at the specie."

Our London, Hamburg, and Rotterdam, market reports are now supplemented by reports from New York and San Francisco.

## THE NEW SEASONS' TEA CLIPPERS.

In our issue of the 4th inst. we gave the particulars of the passages of some of the clippers. We have now to announce the arrival of the *Leander*, Captain Petherick, owned by the Merchant Shipping Company, from Foochow, off Scilly, in 98 days; the *Ariel*, Captain Courtenay, owners Shaw, Maxton, and Co., off Plymouth, in 100 days; the *Lahloo*, Captain Smith, owner Captain Alexander Rodgers, off Eddystone, in 98 days; the *Sir Lancelot*, Captain Robinson, owners MacCunn and Co., in the Downs, in 88 days; the steamer *Nile*, Captain Gaine, owners W. Gray and Co., in the Downs, in 86 days; the *Spindrift*, Captain Innes, owners Findlay, at Gravesend in 105 days; the *Eliza Shaw*, from Hankow, Captain Gaye, owners Charles Shaw and Co., in the Downs, in 121 days; the *Taitsing*, from Hankow, Captain Blomfield, owners Findlay, in the Downs, in 112 days.

The passages this season excel on the whole those of previous years, and it seems impossible to predict to what greater speed sailing vessels can attain. The passage from Foochow can be put down at 15,000 miles, and the actual distance sailed over, allowing for head winds, must be about 16,000 miles. This in 90 days is an average of 178 miles per hour, the maximum speed of some of the vessels ranging as high as 15 knots per hour. Some of the passages have been made by what is commonly called the Eastern passage. The *Lahloo*, *Ariel*, *Spindrift*, and *Eliza Shaw* came by this route, while the *Thermopylæ*, *Leander*, *Taitsing*, *Sir Lancelot*, and *Titania* came down the usual beat of the China Sea to the Straits of Sunda, reporting at Anjer. The *Sir Lancelot* is the champion ship, her passage to the Lizard being 85 days, Downs 88, docks 89. The passages into dock are as follows:—

| Steamers. | From | Dock | Days |
|---|---|---|---|
| Nile ... ... | Foochow ... | Oct. 12 ... | 87 |
| Clippers | | | |
| Leander... ... | Foochow ... | „ 12 ... | 103 |
| Ariel ... ... | Foochow ... | „ 12 ... | 103 |
| Lahloo ... ... | Foochow ... | „ 12 ... | 101 |
| Sir Lancelot ... | Foochow ... | „ 14 ... | 89 |
| Taitsing ... | Hankow ... | „ 14 ... | 113 |
| Eliza Shaw ... | Hankow ... | „ 14 ... | 122 |
| Spindrift ... | Foochow ... | „ 18 ... | 106 |

The *Glasgow Herald* has the following comments on the passage:—Special intelligence was received by Mr. MacCunn, the owner in Greenock, that the celebrated Clyde-built ship *Sir Lancelot*, Captain Robinson, had arrived in the Downs from Foochow after a passage of 88 days, the fastest passage on record. The *Sir Lancelot* left China on the 17th of July, and reached St. Helena on 11th Sept.—56 days out. The new Aberdeen clipper *Thermopylæ*, which arrived on the 4th inst., reached the Lizard from Foochowfoo this season in 88 days, but the sailing distance from the Lizard to London docks occupied upwards of two days; while the time occupied from the Downs to the docks being one day, the *Sir Lancelot* thus beats the *Thermopylæ* by fully 24 hours. The latter ship was 90 days from Foochoow to London docks. Under these circumstances the "blue riband" of this justly celebrated race is yet retained by a Clyde-built ship, and that after the performance of the most remarkable voyage that has ever taken place in the history of the China clippers. In 1867 the *Sir Lancelot* arrived in the Downs from Shanghai after a very rapid passage of 96 days. The same feat was performed this year by the Clyde-built ship *Titania*, which also arrived in 96 days.

## AMERICAN TRADE WITH CHINA.

The *New York Herald* is doing its best to call attention to the expected increase in the trade with China to be developed by the Pacific railway and steamers. A full and detailed account of all the ports in China has been published, which contains the usual amount of ignorance of localities, &c. A letter, purporting to be written by a governor-general of *several* provinces in China, has also been published, from which we give an extract as a specimen:—

"It may be said in general that, during many centuries past, the inhabitants in Western lands have been striving to encroach on each other's kingdoms; and in every case one has tried to possess itself of the profits of the other's trade, as a preliminary to getting hold of its territory. They have established places of business throughout China, and trafficked or become carriers in all kinds of produce, simply that they may carry out their unscrupulous schemes of injury, which will end in depriving our merchants of their means of livelihood. Since the time when we raised troops against them our people have long suffered every grievous calamity. If we now open three or five more ports to their trade, and the entire length of the Yangtsze river, it will daily add to the distress and indigence of our poor people, who, alas! are now nearly quite driven to the wall.

"Among all the various demands which they make, however, that of opening coal mines should be excepted; for by working mines in the foreign way, and employing machinery, our own country would be permanently benefited, and it appears to me, therefore, worthy of a trial In regard to the two proposals of steamers going up all our rivers, and of building railroads, if Foreigners are allowed to carry them on, the profits and advantages of our own country will gradually be carried off to other lands; and even if our own subjects join such enterprises, and get Foreigners to conduct them, the rich and the strong will then engross the labour of the poor. Neither of them, therefore, is admissible. If, however, the Foreigners press for their adoption unceasingly, it will be desirable to let them know that even if they should be able to force the authorities at Peking to consent, the provincial rulers, like myself and others, would still resist their introduction with all our strength; and if, by some means, we too should be compelled to give our consent, there would still remain the myriads of common people, who, in the extremity of their poverty, would see how they could better themselves, and rise to oppose the Foreigners in a manner that all the authorities in China could not curb or repress. The princes and magnates of the middle kingdom need have no lack of argument in pleading for the lives of their people; and even if our course should bring about a rupture, and we resort to force to preserve the rights and employments of our people, the struggle would not be owing to a mere empty discussion on things of no importance. On the one hand, we could appeal to heaven, earth, and our sainted emperors, and on the other to the inhabitants dwelling within every sea (for the justice of our cause). We, in fact, between these parties ought to fear nothing as to the result, as after it we would have nothing to repent of. Upon the question of granting an audience, sending Ministers to foreign Courts, and permitting the propagation of religion, I did not make any observation in the despatch forwarded to Peking. I have humbly ascertained, however, that in the year 1676 our canonised Sovereign, the Emperor Humane (Kanghi), admitted the Russian Nicholas and others to the presence, but the offering given and ceremonies then practised cannot now be fully ascertained. Though it is certain that the Russians were then discussing the frontier between our two countries, and the conditions of trade between us and them, they were still treated as an Empire of equal position, and in a manner totally different from the usages practised toward the Coreans and other outside tribes."

## OUR POLICY IN CHINA.—RETROGRESSION.

Evidence in support of our position that the real policy of the Chinese Government is one of retrogression rapidly accumulates; in vain does Mr. Burlingame utter bombastic eulogiums on his employers—every act of theirs falsifies his words. In vain does Prince Kung assure us that he is eager to welcome foreign civilisation and improvements, and that only the wrong-headed obstinacy of the people stands in the way—the manner in which all suggestions for railways and telegraphs is received is alone sufficient to refute his assertions; In vain do the mandarin-worshippers insist that China is progressing, and point to the Anglo-French College at Peking and a few other myths of the same sort, as proofs of their accuracy; the college is tumbling to pieces, and the only establishments based on foreign aid that are likely to receive any permanent countenance are the Customs—wherein the foreign element is indispensable seeing that the Government has grown too wise to entrust any of its native officials with the handling of the vast sums that are now collected in the way of duties—and the Arsenal at Kiangnan, by means of which they doubtless hope some day to be enabled to turn the tables on their instructors in the art of war. The last-named establishment, by the way, is now being rapidly developed, its latest extension being the opening of a sort of school, or college, for the tuition of the native youth in the higher branches of science, the medium of instruction being Chinese. This innovation, however, is as yet only in its infancy, and awaiting approval at Peking, which is pretty sure to be accorded, considering that Mr. Hart's college at the capital is (as already observed) in a moribund condition. The causes of its failure are not far to seek. From the first, its foundations were of sand; the Chinese were not ready for so long a stride in advance; they consented to it at a time when England and France seemed inclined to enforce a literal fulfilment of their treaties, and their respective Ministers were hoodwinked by the movement, regarding the promised college in some sort as a pledge that *this* time the palaver about a new era of progress was not destined to turn out all moonshine. Then, again, the Chinese wanted to gratify Mr. Hart, and this was a pet scheme of his; they knew the thing could give but little trouble, and might be "burked" at any moment. Their calculations were verified; it served its purpose by helping to stave off an unpleasant crisis, and being thoroughly rotten in itself will now be left to perish of sheer inanition. For all this, we doubt not that Mr. Hart himself entertained a sincere conviction of the benefits to accrue from the college, and indeed some good must have come of it, even in its unexpectedly brief career, had the "professors" been better fitted for their posts. Of their individual merits or demerits our aversion to personalities forbids us to say anything, whatever we may think. But some demands they recently made (as a body) on the Government may be briefly alluded to. One was, that they should be at liberty to wear the Chinese official costume when lecturing; another, for runners to precede their chairs; a third, for Chinese rank of the fifth grade (equal to a prefect); with others of the same sort. Just fancy a Chinese professor at an English college insisting on being made a magistrate, lecturing in a court suit, and requiring the Foreign-office to provide him with outriders to precede his carriage! It is no difficult task to gauge the value of a college when its "professors" are occupied with such childish puerilities as these. The condition of the Peking College is clearly a symptom, not of progress but of retrogression.

Another instance is the renewed rebuff met with at Shanghai regarding the proposed line of telegraph between that settlement and the Kintoan Beacon. The impudence with which the Taoutai brings forward arguments that he knows to be worthless as though they were all-sufficient and convincing, shows that he is quite sure of support from headquarters, and is far from encouraging to those who are inclined to hope for any good from the Burlingame Mission. How Lord Clarendon can retain his present infatuation in the face of such facts as these, and of such opinions as those lately expressed by Sir Rutherford Alcock, and still more recently by Mr. Hugh Matheson, it is hard to understand. To all who are not blinded by party feeling or "peace-at-any-price" sentiments, it is as clear as daylight that the Chinese, after throwing dust in the eyes of the Western Powers by such outward similitudes of progress as a college and a mission, are entering on a determined policy of retrogression; and in this they are unhappily aided and encouraged by what Mr. Ross Browne forcibly but justly terms the "the folly and imbecility" of our present Cabinet. There can be no doubt that the policy of Lord Clarendon must entail consequences that he and his colleagues little dream of; and the responsibility they assume, by thus obstinately disregarding the many warning voices raised by those who are capable of foreseeing these results is a very heavy one. For thus pursuing a course utterly at variance with both common sense and expediency, they have no better justification to offer than the constantly-repeated affirmation that "we have "no right to force ourselves, our civilisation, or our com-"merce on the Chinese against their will;" in reply to which it cannot be too often repeated that our presence in China is not against the will of the people, but of a section of the governing classes only, who find it producing results inimical to their own selfish interests. And even if some degree of pressure be necessary to maintain and improve the *status* of Foreigners generally in that country, would it be right on that account for England to withdraw, and leave a rich field of commerce and enterprise, created by herself, to other less scrupulous competitors? We say emphatically, No. And yet this is what the Clarendon policy, if consistently pursued, would bring us to in the end.

---

We are informed that the dues from the light vessel moored off the Little Basses Rock, Ceylon, are to be appropriated towards the construction of the lighthouse on the Great Basses Rock, the remainder of the necessary funds being provided by a loan from the Lighthouse Commissioners. The works will be proceeded with forthwith, a quantity of available materials being already on the spot, and the remaining portion will shortly be despatched in the charge of Mr. Douglas, the constructor of the celebrated Wolf Rock Lighthouse on the east coast of Scotland, who has been appointed engineer to the undertaking.

---

Mr. Wm. Muirhead, an old and much respected resident of Shanghai, a Chinese scholar and a missionary, addresses us on our present relations with China. Mr. Muirhead entirely condemns the policy pursued by our Foreign-office, and upholds the reasonable demands of our mercantile residents in China. Such expressions of opinion from a man of Mr. Muirhead's long experience and Christian principles are indeed worth reading, and, coupled with the opinion of Mr. Matheson—given in our last—must surely carry weight, and tend to open the eyes of Lord Clarendon.

---

We understand that a Memorial has been forwarded by the Chamber of Commerce of Mauritius to the Secretary of State for the Colonies, praying for the establishment of mail communication with Galle, by which means they can connect with the lines to India and China on the one side, and Europe on the other. The tender of Mr. Holt to perform the service for $20,000 per annum is probably the cheapest that will be received.

---

Sir James Elphinstone proceeded by the last mail to Ceylon, and Judge Smale to Hong Kong by the Bombay mail of the 17th inst.

## TELEGRAPH SCHEMES FOR INDIA AND CHINA.

The *Great Eastern* is to leave on the 23rd inst. with about 2,000 miles of cable for the section between Aden and Bombay, to be laid in one line. The cable is manufactured by the Telegraph Construction Company, of which Captain Sherard Osborn is the managing director. The steamers *Hibernia* and *Chiltern*, with the Suez-Aden section will also leave with about 1,500 miles of cable in about a month. The *Chiltern* is to remain out to effect any repairs necessary. The same company will lay down, about next August, the cable from Falmouth to Gibraltar and Malta. We shall thus have an entire submarine from England to Bombay, and we may then hope to enjoy some regularity in telegraphic communication instead of the present wretched line through Turkey and the Persian Gulf, which seldom delivers a message in an intelligible shape, and is generally out of order in some section, causing a delay of a week to two weeks in the transmission, and for this miserable performance we have to pay £3 per message. The concessions and general interests of Mr. Read and Mr. Patterson have been merged with the "Telegraph Construction Company." The intention is not only to connect the Indian wires with Siam and the Straits, but to lay a submarine from Galle to the Straits, and ultimately to China, Java, and Australia. The Galle and Straits cable will be laid before the end of the year 1870, and on to China in the following year.

The companies now in existence for carrying out the new lines we describe are the British India Submarine Company, the Anglo-Mediterranean Company (from Malta to Alexandria), and the Falmouth, Gibraltar, and Malta Company. For laying the cable from Galle to the Straits and China another company, with a distinct capital, will be formed and put on the market. Sir James Anderson is the managing director of the three companies now in existence. Between these companies and the Telegraph Construction Company there is also a combined working arrangement.

The scheme which has been already noticed by us to connect Saigon with the Indian system by Burmah, Cambodia, and Siam is likely to be carried out in a short time. The remainder of the line, about 1,000 miles, with apparatus, &c., has been shipped by the steamer *Nestor* for Singapore. When these sections are working the submarine from Saigon (or probably a nearer point) to Hong Kong will be undertaken and laid without delay. Up to this point the operations have been carried out by private resources under the management of Messrs. Augustine, Heard and Co., of Hong Kong, and Messrs. Fearon and Co., London. When the time arrives for laying the cable on to China the company will be placed on the market, and the necessary capital invited by shares in the usual way.

In addition to the above projects, there is one to lay a submarine from Possiet Bay, in the locality of the Amoor River, to Nagasaki, thence to Shanghai and down the coast ports. The land lines of Russia are now being extended towards Possiet Bay, and will be completed probably before the winter sets in. There is another scheme in training under American auspices, which we noticed some months ago, styled the "East India, Asiatic, and American Company," which proposes to lay cables down the coast of China on to Singapore, and by the Pacific to North America. The China Submarine, which proposes to carry a submarine from Rangoon to the Straits, and thence to Hong Kong and Shanghai, is, we understand, well supported, and may be brought out at any moment. It will be perceived by our readers that some of these schemes are rival ones, and it is quite uncertain which will get the lead, but it seems pretty certain that amongst them we shall have telegraphic communication with China. The company formed to lay the light Varley cable from Galle to the Straits is not abandoned, although the capital is not all raised.

---

The Messageries Imperiales will despatch the *Godavery* for Alexandria, which will take passengers for the ceremony of the opening of the Suez Canal, and afterwards proceed on to Calcutta. The extra service for India, China, and Japan will not commence before July, and the new vessels necessary to maintain it will pass through the Canal.

---

We understand that Admiral Sir Henry Keppel, Commander-in-Chief on the China and Japan station, is expected home by the next Pacific mail, *via* San Francisco and New York.

## CHINESE LABOUR FOR THE UNITED STATES.

An article in *The Times* of the 11th on this subject indicates that the United States will be speedily flooded with Chinese emigrants; but from our information on the subject the statements are somewhat in advance of the actual position of the case. That the planters of the Southern States are anxious to procure Chinese labour, and that even the Northerners desire them for domestic purposes in preference to the Irish, whom they find become in a short time intolerably lazy and impudent, is not to be surprised at; but the other side of the question requires to be understood. For many years the Chinese have been cajoled into agreements for working in the plantations of Cuba, and we know the result; they have been cruelly treated, and their agreements flagrantly broken. The accounts of their sufferings have been told in China, and it is now most difficult to induce the Chinese to enter into any agreement for emigrating. The last mail from the States brings accounts of an attack by a party of Americans on Chinese who were building a railway in the State of Nevada. The present traffic to San Francisco has altogether different features; it began with the discovery of gold in California, and large numbers of them went over in bands from the different southern provinces of China, assisted by a few of the elders or moneyed men of their district, under a promise to return them the sums so advanced with good interest. But the emigration was a perfectly free one. A few of their number had the sagacity to set up stores, and import such articles of food and clothing congenial to the Chinese at the gold mines. Thus gradually a trade sprung up, which has increased with the running of the Pacific Mail Co.'s monthly steamers; but that the company intend to run a *weekly* service we know is not the case at present. When the passengers offering at Hong Kong partake of the nature of an emigration to all parts of the United States, the company may find it desirable to put on an extra steamer occasionally during the summer months, but, as we have before said, the business is not yet so far advanced With the winter now setting in no progress will be made until next spring, for the Chinamen will be cute enough not to cross the Rocky Mountains in winter. Indeed, it would be very injudicious to induce them to do so, for the accounts of suffering from cold would increase the difficulty of procuring emigrants. It must also be borne in mind that Chinese passengers alone, even at the present rate of $35 nett, including provisions, &c., will not pay the run. It is with freight, and the subsidy from Government of $500,000 per annum, that the Pacific Mail Company make the present service pay. It is stated that the company have applied for an increase in their postal subsidy, but there is little chance of the United States Government granting it. The following is the extract from *The Times*:—

Notwithstanding the opposition raised by a powerful party in California to the introduction of Chinese labourers, there now seems to be little room for doubt that a large and continuous influx will set in, not only to that and the adjoining States, but also to the cotton-growing sections of the Union, and that in this respect the world is likely to see during the next ten or twenty years some of the most important changes ever witnessed from the distribution of races. It is understood that the Pacific Mail Company of New York intend to put on weekly steamers to China to import labour at a low price, rendering it entirely feasible for Southern planters to procure hands directly from China *via* the Pacific Railroad, which will co-operate with the company in the project, the company will also, it is understood, petition Congress for subsidies for a weekly instead of a monthly mail, but it is asserted that, irrespective of Government support, there is little doubt that the passenger and freight business between San Francisco and Japan and China will soon be fully sufficient to sustain a weekly line across the Pacific, and that a large part of the money earned will come from the importation of Chinamen. From all parts of the South reports are almost daily received at New York of committees organising and subscriptions pouring in to procure Chinese labour. Even in New York a strong disposition is manifested in favour of a supply, and the *Journal of Commerce* says:—"We believe that in this city, to-day, ten thousand freshly imported Chinese would have no difficulty in finding kitchen work, chamber work, and other household service to perform, so high expectations have been formed of their intelligence and versatility from the authentic statements which have appeared in this and other papers." Among the most recent steps in connection with this movement has been the departure of a New Orleans merchant for China, *via* New York and the overland route to San Francisco, who goes out as the representative of a number of New Orleans commercial houses to establish an agency at Hong Kong, Peking, or some other advantageous point. He will be accompanied by a Chinaman of experience in the business, and will visit the various agricultural districts of China, to find which will furnish the best and cheapest labour for the cotton and sugar fields of Louisiana. His first importation, to meet the expenses of which he and his correspondents are stated to be fully prepared, will be from

Digitized by Google

300 to 500 hands. Other Southern agents are already in China, and "it will not be many months, with the present and soon-to-be-increased facilities for importing Chinamen, before the tide of immigration will fairly set in to the South, and also, in some measure, to the Atlantic cities."

The correspondent at New York has the following on the same subject. Mr. Koopmanschaap, formerly of Hong Kong and San Francisco, has had considerable experience with Chinese emigration, but we think he is "counting his chickens before they are hatched:"—

The coolie labour question is approaching a solution in the South. Koopmanschaap, the coolie contractor, has again come East, and after spending some days in New York and Washington, has gone South to make his contracts for the importation of Chinese labourers. To an inquiry from a planter, he writes that it is the intention of his house to furnish Chinese labour wherever there is a demand for it, provided no objection is offered by law. They propose to import labourers direct from China to work under five-year contracts for $8 to $12 a-month and their board. The expense of bringing them over to this country, taxes, advances, and commissions will aggregate about $200 a-head, and is to be paid by the persons ordering them if the labourer faithfully fulfils his contract to its close; but if, after one or two years' labour, he should desire to throw up his engagement, the sum of $100 is to be deducted from his wages earned as a penalty for such default. Security for the prompt payment of expenses is to be deposited by the planter ordering coolies before anything will be done. During his visit to Washington, Koopmanschaap had an interview with the Secretary of the Treasury, when the Secretary stated that the Government had no intention of interfering with the scheme of Chinese immigration unless the laws were violated. Koopmanschaap states that he proposes to bring over none but voluntary immigrants, who came with the full knowledge and consent of the Chinese authorities. In this way violations of the laws will be avoided. The coolie labour project is evidently growing into more favour in America; opposition to it sensibly diminishes; and the probabilities are that next year will see a good many Chinamen at work in the cotton fields. Koopmanschaap in his journeyings through the south and his solicitations of contracts exhibits certificates showing that he has supplied the Pacific and other railways with 30,000 Chinese labourers, and that they have given ample satisfaction to their employers. He also states that he has already made contracts to bring over 10,000 Chinamen to work on Southern plantations and railroads.

## AMERICAN AND ENGLISH POLICY IN CHINA.

(SATURDAY REVIEW.)

The recall of Mr. Ross Browne, lately Minister of the United States at Peking, was a natural result of his open disapproval of the policy of his Government. It may be hoped that Sir Rutherford Alcock, who probably holds the same opinions with his late American colleague, will be less candid in his censure of Lord Clarendon's declarations and instructions. The success of Mr. Burlingame's mission, both at Washington and in London, happens to be utterly distasteful both to American and to English residents in China. The temporary popularity of Mr. Burlingame, when he appeared in his own country as a Chinese plenipotentiary, was perfectly natural. Politicians and journalists, with their ordinary instinct, discovered that the choice of an American citizen to represent the Imperial Court was at the same time a proof of confidence in the United States, and a slight to England; and there was some colour for the assumption that a protest against Western pressure was principally addressed to the Power which has opened China to intercourse with the civilised world. English statesmen, whatever may be their errors of judgment, are never influenced by prejudice against America. Lord Clarendon perhaps remembered that Lord Elgin had formerly advised the Chinese Government to send a mission to Europe; and although a Christian envoy had neither the need of learning nor the opportunity for teaching his employers which would have belonged to a native ambassador, Mr. Burlingame was welcomed in England, and his proposals of non-interference were in general terms approved. The sincerity of the English Government was proved by the stern reproofs which have been inflicted on naval and consular officers who have from time to time undertaken to redress the wrongs of their countrymen. Lord Clarendon has steadily insisted on the rule that the redress of grievances is to be sought from the Government of Peking through the Ambassador alone. If the strict doctrines of international law are applicable to China, there can be no doubt that the English and American Governments ought to concede the perfect equality which is demanded by Mr. Burlingame; yet it must be unsatisfactory to observe that enthusiasm for Chinese rights varies inversely with knowledge of the country and of the relations between natives and Foreigners. Merchants, admirals, consuls, and ambassadors all seem inclined to disbelieve in the beautiful sentiments which are exchanged between distant diplomatists.

Although the Chinese Government would probably not hesitate at its convenience to disavow a Foreigner who had been accredited as its ambassador, Mr. Burlingame's instructions represent with sufficient fidelity the traditional policy of isolation and exclusion. If the Treaty Powers will but renounce the right of remonstrance and of contingent interference, the Emperor and his advisers have no difficulty in pledging themselves to the prosecution of internal reforms. The Central Government will gladly accept a nominal responsibility for the acts of subordinate officers who might, in accordance with former custom, be made directly liable to consuls and to commanders of gunboats. It may be collected from the Foreign Office correspondence that the English ambassador at Peking entertains but little confidence in the efficacy of his own representations, and it is still more certain that the foreign merchants regard the fine phrases of Chinese dignitaries and envoys as a mass of worthless fiction. Their opinions have lately found an irregular expression in the form of an address to Mr. Ross Browne on the occasion of his recall, and it is not a little remarkable that the American merchants in China entirely agree with the Englishmen who are supposed to be their rivals. To the journalists of New York, of Washington, or of Boston, it is simply unintelligible that any American should, under any circumstances, fail to express ill will and jealousy to England; but for many years the foreign traders in China, and more especially those who speak a common language, have found that a perfect identity of interest tends to produce harmony in sentiment and in action. Shanghai is, in spite of the eminent domain which Mr. Burlingame claims for the Chinese Government, really an independent republic, administered by the mixed community of merchants. If a Chinese officer were to attempt an ejectment of the foreign residents, or to interfere too vigorously in their affairs, he would soon be convinced that the eminent domain of his Government exists wholly on parchment. Every American or English gunboat which is employed to prevent or redress an outrage adds to the security of the whole body of residents, and, with a scepticism not shared by their respective Governments, all the merchants of every nation unanimously disbelieve in the professions of intended progress and civilisation which are fluently uttered by Chinese functionaries.

In an elaborate reply to the address either of his own countrymen or of the English residents, Mr. Ross Browne declares that "reference of all important questions back to the Home Government before a single gunboat can be used, and where telegraphic communication is rigidly prohibited, is simply to nullify and bring into contempt all diplomatic power in China." It is not understood that the English Government has imposed any equally peremptory limit on the discretion of the Ambassador at Peking. The censures which have been addressed to Consular agents are for the most part founded on their anticipation of the decision of the Ambassador; but Lord Clarendon has intimated plainly enough his disapproval of a resort to force, except in the case of extreme necessity. It may be confidently assumed that Mr. Ross Browne's successor will, either immediately or after a time, adopt the views which he will find universally prevalent among his countrymen in China; nor is it improbable that Mr. Burlingame, when his mission is once terminated, will recur to the policy in which he formerly concurred with Sir Frederick Bruce. As the English trade with China, exclusive of the traffic in opium, is tenfold that of the United States, the result of the experiment which has been lately tried by the present Government will be still more important. The exploits of the Consuls and of navy lieutenants, as recorded in various Blue-books, are not a little startling. The capture of towns, the sinking of junks, the humiliations imposed on offending mandarins, seldom admit of a full justification, and in many instances official reproofs have been well deserved. One naval officer not long since burnt a considerable town, and put many of the inhabitants to death, because some idle vagabonds had fired upon one of his boats. In such a case there could have been little inconvenience in applying through the Ambassador for satisfaction; and Sir Rutherford Alcock was afterwards forced to submit to the mortification of a complaint, on the part of the Emperor's brother, to which he could give no sufficient answer. Mr. Ross Browne objects to this, or to some similar act of violence, for the singular reason that "so good an opportunity was lost of demonstrating beyond question the utter insufficiency of the policy declared both by the Government of the United States and by that of Great Britain The danger to the foreign community was not imminent, and the action of the consular and naval officers prevented what all experience had shown to be inevitable, failure to obtain redress by diplomatic means unsustained by force." It is interesting to watch the dissolution of cosmopolitan philanthropy as it crosses the Pacific or the Indian Ocean. The English Government reproves its agents for not trusting to the good faith of Peking; and the American Minister on the spot thinks they were censurable because they missed an occasion of exposing the absurdity of any similar credulity.

Eventually there will probably be a compromise between the philanthropic doctrines which prevail at home and the vigorous measures which are habitually demanded or practised by English residents in China. The enterprise of adventurers in half-civilised countries often inclines to lawlessness, which Governments at home, with greater impartiality and less local knowledge, attempt, with more or less success, to restrain. The civil and ecclesiastical authorities of Spain in the sixteenth century were incessantly occupied with attempts to protect the American Indians and the Negro slaves from the oppression practised by the colonists. In the aggressive days of the East India Company public feeling in England was on the side of the native princes who were successively reduced to subjection by English governors and generals. There is no such claim to sympathy on the part of the Chinese, who are but incidentally exposed to oppression; but, in the quarrels which occur from time to time, popular prejudice is aroused by proceedings which in a civilised State would be outrageous violations of law. It is not enough to lay down rules for the government of outlying communities which are exclusively concerned with the pursuit of their own interests or with provision for their own security. The English merchants will pay a certain deference to the opinion of their countrymen and to the regulations of their Government; but they will neither abandon their trade, nor submit to oppression on the part of the Chinese. It is impossible that their Government should refuse to give them reasonable protection. The adventurous spirits who display their energy in distant fields of enterprise are not the worst specimens of the English race. The Government could not, if it would, keep them at home, and it must follow them with its care, even at the cost of occasional inconvenience.

---

Several inquiries have been made of us as to the formation of the "China Association," as proposed in Shanghai. We find that no steps have yet been taken by any of the China firms in London with a view to its establishment.

## NEW YORK TO SAN FRANCISCO AND JAPAN.

From the description given by several travellers across the American Continent by rail, it appears that the fatigue of a seven days' ride is by no means so severe as might be supposed. As any information on this route is serviceable to our readers, we append the notes of a traveller just returned from China, which may be relied on. The Pacific steamers, which now consist of the *Great Republic*, *China*, *Japan*, and *America*, are all highly spoken of for general comfort. The Japan inland sea line to Shanghai is to be strengthened by the *Golden Age* and *Ariel*, to leave New York this month.

The agents of the Pacific Mail Company have undergone some change. We are pleased to see our old friend Capt. Lane placed at Yokohama at the head of them. A more competent and obliging man could not be found. Mr. Harris has been transferred from Acapulco to Hong Kong, and Mr. Bowman from the latter place to Shanghai. At Nagasaki Mr. Gibbons has been transferred from Yokohama. Mr. Irwin, from the New York office, has been appointed at San Francisco as sub-agent to Capt. Eldridge. In London the agents are Messrs. Starr and Co., Moorgate-street.

The fare across the Continent from San Francisco to New York is $112 gold. You proceed by steamer to Sacramento, distant 120 miles from San Francisco, starting at 4 P.M., and arriving at 2 A.M. next morning (the steamer fare is included in the $112). I had two trunks and a portmanteau, and paid nothing additional. The Depot (station) of the Central Pacific Railroad lies close to the steamer landing. The train starts at 6 A.M., and takes you over some charming mountain country (Sierra Nevada) to Promontory, the end of the line. Later in the day there is a second-class train. It took us from 6 A.M. of the 21st to 10 P.M. of the 22nd Aug. to reach Promontory. Sleeping cars are provided on this line, but you must book them at San Francisco. The charge for their use is about $1.50 a day.

At 1 A.M. of the 23rd we were on the Union Pacific Railroad. The "Depots" for the two lines are side by side. A run of four hours brings you to Uintah, where you have to get out if you wish to visit Salt Lake City. Stage coaches await the train and take you to the Mormon City, a journey of six hours, for from $2 to $3. Uintah is not marked on the map, but it is close to Ogden, whence they are laying a rail-track to Salt Lake City. If you do not stop at Uintah, fifty-six more hours will land you at Omaha, the end of the Union Pacific line. Sleeping cars are provided on this line also. Throughout the journey you have sufficient time given to eat three meals a day, the train stopping twenty minutes each time for such purpose. You can stand and walk about in the cars, and being able to get fair rest during the night in the sleeping bunks, you suffer but very slightly from fatigue. The bridge from Omaha to Council Bluffs across the Missouri River is not yet built, so you cross in coaches taken over on the steam-ferry. From Council Bluffs you have a choice of routes to New York, and can ride right through without further change; but it is of course necessary to make this choice when you take your through ticket at San Francisco. The total distance from San Francisco to New York (over 3,000 miles) is done in seven days.

From Shanghai to San Francisco, touching at Nagasaki, Hiogo, and Yokohama, takes twenty-six days, and from New York to Liverpool ten days. The fare to San Francisco is $300, and from New York to Liverpool $100 gold. Total from Shanghai to Liverpool $512. For summer transit no route could be pleasanter, but in winter it will be severe work crossing the Nevada and Rocky Mountains.

In California and along the Central Pacific Railway gold and silver are required for use, but onwards "greenbacks" are the currency. We got good exchange in San Francisco for Mexican dollars.

The first-class hotels in San Francisco, such as the "Lick House," "Occidental," "Cosmopolitan," &c., charge $3 a-day, and give you excellent fare. The climate is cool and delightful. Labour and coach hire are at enormous rates.

## MISSIONARIES IN CHINA AND JAPAN.

(NEW YORK HERALD.)

Our news from San Francisco, embraced the main points of an interesting budget of news from Asia, narrating, as it did, reports of the leading events transpiring in China and Japan to the 19th and 29th of August respectively. Financial distracting and class jealousies kept Japan still convulsed. The industrial and political situations experienced little or no change in either country, but from both we have intelligence of the existence of troubles with the Christian Church missionaries, of the murder of Catholic and other missionaries, the hunting up of missing or strayed or lost missionaries, as well as of the prevalent existence of a still more intense spirit of native fanaticism at different points of the vast territory. It is the old story—Confucius against the Bible and the ancient religions of Sin-Siu and Buddhism, with priests descended from the sun, against the apostles of Exeter Hall and the American Board of Foreign Missions, interesting and venturesome ladies, Brahmapootra explorers, writers for the magazines, and dabblers in the sale of naval stores. Confucius, it must be remembered, lays down some very excellent rules for the guidance of man during his journey through this terrestrial vale of tears, and his writings have been and are received as a "standard authority" by the Chinese, and, to a great extent, by the Japanese, and on all matters concerning both the here and hereafter of man from a period which had become hoary in its antiquity before the advent of the Christian dispensation. The educated Asiatics are most acute logicians and exceedingly subtle in their mode of reasoning on the spiritualities, facts of which Francis Xavier, with others of the ablest propagandists of Rome, became convinced at a very early date. One of the very first demands which the natives make of a foreign missionary is to prove to them the inspiration of the Bible from on high, and having listened, as they will, with great attention in such instance to his reply, they for the most part assure him, in other words, to the effect that his is a very nice theory, but not nearly so old or perfect in its connecting parts or unities as is that of Confucius; that the system of Confucius suits them very well, and that they are convinced the Foreigners have no regular commission to teach or preach, not knowing half as much as they do themselves.

It is no wonder, therefore, that we hear by telegraph of missionary troubles in China and Japan, and have been, and still are, compelled to print the doleful accounts given by our returned missionaries from these countries during anniversary week in each succeeding year since we commenced, being the first newspaper to do so, to spread the home anniversaries' proceedings broadcast before the world in our columns. Having learned a good deal about missionary "labour" in the East by our enterprise in this direction, we beg to day to say to the missionaries to leave China and Japan alone for a time, and permit the people of both countries to experience the good effects of the grand civilising agencies of the hour—of steam and the telegraph, the electric wire and the railroad, of the steam plough, the river steamer, and the rest. Let the Churchmen wait and see what the use of the "modern improvements" will accomplish. The missionaries and the Bible may follow, and will then, we doubt not, accomplish a great work in Asia. It will be a day of "peace and harmony and bliss" when the leading newspapers will be telegraphing to New York the proceedings of the first Church anniversary meetings, attended alike by Europeans, Americans, and Asiatics, which will be held in Peking and Yedo. If the missionaries will only keep quiet this "day of jubilee is at hand."

## THE OLD ROMAN CATHOLIC CEMETERY AT PEKING.

BY REV. J. EDKINS, PEKING.

Among the many spots worthy of a visit in Peking are the three Catholic cemeteries, all outside of the west wall. These are the Portuguese cemetery, as it is often called, outside of the Pjing-tse men; the French cemetery, four miles further to the North-west; and another for native priests and converts outside of the Si-pien-men. Of the three, the most interesting is the first; for though in the French cemetery are buried Amyot, Gaubil, and many well-known French missionaries of the last century, they are not equal in fame to Ricci, Schaal, and Verbiest, who at an earlier date laid the foundations of Roman Catholic prosperity in China.

In summer the entrance court is made attractive by the vines trailed over poles in the native manner, so as to form a broad spreading shade. Passing through these, the cemetery itself comes into view. At the south end there is a mausoleum on the right hand to Ignatius Loyola, and on the left to Saint Joseph, the patron of China. These are very imposing structures, with Latin inscriptions. The path conducts the visitor between them, through long rows of tombs regularly arranged in four rows from north to south, to the end of the cemetery, where there is a marble raised terrace. On the east is the tomb of Ricci, and on the west that of Schaal. It was the Emperor Wan-li, who, in 1610, gave this land for the burial of Matteo Ricci, who died in that year, after thirty-two years' residence in China. Before that time it had been the custom to transport the bodies of deceased missionaries from the provinces to Canton. The companion of Ricci, Pantoya, petitioned the Emperor to grant a burial ground for the deceased, and the bestowment of a Buddhist temple for this purpose was the result.

The tomb of Ricci is at the head of two rows of tombs on the east side. Among those near him are Rho, Lombard, and Verbiest. After Ricci's death the opinions he had advocated on the worship of ancestors and of Confucius were strongly opposed by Lombard, who, after much study and inquiry, came to the conclusion that all the Chinese worship, whether of heaven, of ancestors, or of Confucius, ought to be forbidden to converts. The permission to retain these rites had been accorded to them by Ricci and his companions during the first three decades of the missions, and there had been a flow of prosperity. The number of neophytes of high and low rank had become very considerable, and doubtless this liberality of opinion which characterised the early Jesuits had powerfully aided in facilitating conversion. The symbols of Buddhist idolatory are found here, before the tombs of Ricci and others, and on the terrace. The incense urns, candlesticks and flower jars, cut in marble, and arranged in the order followed in all Buddhist temples, show how great a willingness there was at the time of the death of Ricci to avoid opposition to idolatrous customs. This was a consistent development of the practice in regard to the use of images of the Latin Church at home. Lombard, the successor of Ricci as superior of the missions, introduced a new set of opinions, which, after many years of bitter controversy, were confirmed by the Pope, and made binding throughout China. But these Buddhist symbols have never been removed, and no priest has ever ventured to deny that the old missionaries should be worshipped with incense and prayers. The prohibition from the Vatican only extended to the honouring of ancestors and the sages in this way. The laxity of the first Jesuits, though recommended by worldly prudence, was resolutely checked, and Roman Christianity undertook to extend her reign in China in a way as nearly as possible like that she has pursued in Europe. As a consequence, since that time she has made few distinguished converts from among the literati. Sü Kwang-chi and others were not followed by men so celebrated; neophytes of brilliant minds from the scholars' class ceased to join the Catholic community. It was in after years made a criminal charge against Christianity that it interfered with honour to parents. The Emperor Tung-cheng spoke in this way to the missionaries, and it was made a ground for persecution. The system of opposition to Confucianism, and the rejection of the old classical term for God which had been greatly favoured by the early Jesuits, have had much to do in modifying the subsequent history of the missions. The converts have become more and more foreign in their views, and in these times have come to look for protection and for every privilege very much to foreign aid.

The following account of the funeral of Verbiest illustrates the manner in which the obsequies of the missionaries are conducted. It took place March 11, 1688:—"The Mandarins sent by the Emperor to

Digitized by Google

honour the illustrious deceased arrived at 7 A.M., and at that hour we proceeded to the apartment where the body lay in its coffin. The Chinese coffins are large, and of wood three or four inches thick, varnished and gilt on the outside, but closed with extraordinary care to prevent air from entering. The coffin was taken to the street, and placed on a bier within a sort of richly covered dome, supported by four columns. The columns were wrapped in white silk, that being the Chinese mourning colour. Festoons of many-coloured silk hung from one column to the other, with a very pretty effect. The bier was attached to two poles, a foot thick and long in proportion, and was borne by six or eight men. The Father Superior and the other Jesuits present knelt before the coffin in the street. We made three profound inclinations down to the ground, while the Christians present were bathed in tears.

"In front was a tableau twenty-five feet high and four wide, ornamented with festoons of silk. At the bottom was a red piece of taffety, inscribed with the name of the missionary, Nan hwai jen, and his dignities, in gold characters, Before and behind were bands of musicians and of standard-bearers. Then came the cross, in a large niche, ornamented with columns and various silk ornaments. Several Christians followed, some with flags and others with wax tapers in their hands.

"Then came an image of the Virgin Mary and the child Jesus holding a globe in his hand. A picture of the guardian angel followed, with more flags and tapers, and then a portrait of the Father Verbiest, habited as an official, with all the honours conferred on him by the Emperor.

"We followed immediately after in white mourning, according to the custom of the country; and at intervals we expressed our deep grief by loud weeping, in the manner of the people.

"The body came next, accompanied by the officers named by the Emperor to do honour to the memory of this celebrated missionary. They were on horseback. Among them were the Emperor's son-in-law and chief captain of the guards. The procession was closed by a party of fifty horsemen,"

The graves are made seven feet long and five feet wide, with a depth of six feet. They are paved, and built up with brick all round, and the coffin is placed in the centre upon two low walls of bricks a foot high. The graves are covered with a brick construction in vault shape and surmounted by a cross. The tombs have consequently a semi-cylindrical appearance—the ends of the cylinder facing south and north. A few feet in front of the tombs are placed upright marble slabs, inscribed with the name, date of arrival in China, date of decease, and age of the missionary.

The evidence to be gathered from the tombs in regard to the longevity of the missionaries is favourable, and shows the climate of Peking to be well suited to European constitutions. A few have lived forty years in China, a considerable number twenty-five, and a very large proportion sixteen. From a cursory view of these monuments, it may be concluded that a missionary may hope to live twenty-five years in this country.

The chapel has disappeared, but there is an old arbour for meditation at the north end of the cemetery. Schaal's tomb is on the west side. He was in disgrace when he died, but the Emperor Kang-hi, becoming aware that he had been a faithful servant of his dynasty, caused a handsome monument to be erected over his remains on the west side of the cemetery, where he heads a double row of tombs, as does Ricci on the east.

## THE CONFLICT OF OPINION ON OUR CHINA POLICY.

(To the Editor of the *London and China Telegraph.*)

Sir,—I have read your valuable paper for several months, and feel a deep interest in the condition of things now current in China. I am sorry there should be anything like dissonance between the home and foreign views on the subject, but it would seem as if such were the case to a large degree. The foreign or European opinion in China is that the country should be universally opened and increased facilities given to our commerce and intercourse with it. The home sentiment is expressed in a more cautious style, and tends apparently to lay restrictions in the way and impede the onward progress of things.

The first occasion of difficulty is the interpretation of the old treaty. Some construe it in a liberal manner, and especially on the ground of the favoured nation clause insist on the right of missionaries in particular to occupy the interior, and settle down wherever they please. This, as is well-known, is owing to the French Treaty, which entitles the Catholic missionaries to do so. The late troubles in the country are intimately connected with this. One feels very keenly that it is possible, and deemed right in the opinion of not a few, that such a construction should be made. Until very lately it was otherwise understood, and action was taken accordingly. Had it been supposed by parties long resident in China that this view was admissible, many would have rejoiced at it, and pursued a course more corresponding with it. The fact is, however, that our foreign authorities in China have all along announced a totally different view, and simply empowered merchants and missionaries alike to reside at the Treaty Ports, and travel under passport to all parts of the Empire. This has been occasionally broken through, but it was not supposed to be in harmony with treaty stipulations. About two years ago a gentleman applied to the Consul in Shanghai for a mandarin proclamation, warranting his establishing an English dispensary in Soochow, that no trouble might ensue. The Consul signified his high approval of the object, yet stated it was too serious a thing for him to make application for to the Taoutai, and he would require three or four days to consider it. Just at that moment our late Chargé d'Affaires was passing, and the Consul requested his advice on the matter. His counsel was, that though he wished to see such institutions dotting the country everywhere, he could not sanction a proceeding of the kind intended. Were missionaries to be sustained in their design of getting to Soochow, merchants would make the same demand, and the Chinese Government would not consent to such a request. This is only an instance of similar refusals on the part of our officials to allow missionaries to settle in the interior, and all the pleas that were adduced at the time bearing upon the French Treaty and the occupation of the country to some extent already by foreigners, would not be entertained.

It was well that in the late troubles at Yangchow such pusillanimity was not shown, and that the present consul showed that he was of a different mind as it regarded the English treaty. Still, the thing is now referred to as bearing upon the altered circumstances in which Foreigners were placed under a different official. There seemed to be not long ago another interpretation altogether of the old treaty, and those who were compelled to act according to it are not to be blamed now for asserting that it was not intended by it to warrant our settling in the interior. There was always stated in relation to the favoured nation clause that the British Government would no more sustain it in application to the Catholic right of living in the country than it would in the matter of priestly equality with the mandarins of the country.

But what is to be done now? Our opinion is that the merchants and others should not cease to agitate, agitate, agitate, until every reasonable claim is granted at the hands of the Chinese authorities. Their opposition to all progress and change is not to be wondered at in present circumstances, and from the very constitution of things. We should be more surprised at their ready concession of our demands than we are at their refusal of them. If we cannot get what we reasonably want, in the meanwhile let the matter be an open question, ever liable to be brought up by the proper parties. At home and abroad let this agitation of Chinese points be devotedly pursued, and we would urge one duty requiring to be no less performed in China than it was necessary in critical times among ourselves. The Chinese need enlightenment, and they are perhaps not more prejudiced against it than were thousands in England in reference to the slavery question, the Reform Bill, the Corn Laws, and the Irish Church. Ought not merchants interested in the opening of China and in the formation of railways, the laying of telegraphs, and such like things, endeavour to diffuse information about them? Allow it that the literary and ruling classes are opposed to these innovations, the very introduction of which would mightily dispel their narrow-minded and stereotyped ideas, yet, with a view to effect these innovations, might not our mercantile community do much by the dissemination of good, readable literature on the subject among the masses of Chinese? We doubt not that Foreigners might be got capable of doing excellent service of this kind, and the useful Chinese newspaper now in operation might be then more extensively read than it now is.

We only hope that neither our political representatives will recede from the demands they have made nor our merchants will cease to prosecute every well considered aim they have in view. If the old treaty will not do, or is of doubtful application, let the revision of it be expressed in the clearest terms, and all due provision make for the introduction of Western science in its most appropriate and needful forms.—I am, my dear Sir, yours truly, William Muirhead.

Edinburgh, 5th October, 1869.

## THE LETTER OF MR. KIERNAN.

(To the Editor of the *London and China Telegraph.*)

Sir—I have read, with much amusement, the letter you reprinted in your last issue which has been addressed by Mr. J. L. Kiernan to the *New York Herald*. One statement of his especially requires, in my opinion, to have some light thrown on it, for, as it stands, it would lead people to think that Mr. Kiernan had been a long time in China, and was thoroughly conversant with the manners and customs of the people. I allude to the statement that, "during his residence in China, he has had much experience among the Chinese, and travelled the Empire extensively." Now, Mr. Kiernan—I beg his pardon, Brigadier-General Kiernan—was for about twelve months U.S. Consul at Chinkiang, during the whole of which period I was a resident at that port, and I can state, without fear of refutation, that his *extensive travels* were limited to constant jaunts to Shanghai in the S.S.N. Company's steamers, and an occasional trip to Yangchow and Nanking, respectively fifteen and fifty miles distant from Chinkiang! Being entirely unacquainted with the Chinese language, the General was naturally eminently qualified to gain information from the natives.—Your obedient servant, China.

October 15, 1869.

## STATIONS OF THE ROYAL NAVY IN CHINA, JAPAN, &c.

Adventure, 2, screw troopship Capt. Henry J. Raby, V.C.—Japan.
Algerine, 3, screw gun vessel, Lieut. H. R. E. Grey—China.
Alligator, at Whampoa, lent to Consular Department.
Avon, 4, double-screw composite gun-vessel, Com. G. D. Fitzroy—China and Japan.
Banterer, 2, screw gunboat, Lieut.-Com. C. F. W. Johnson—China.
Bouncer, 2, screw gunboat, tender to Princess Charlotte—Hong Kong
Bullinch, 3, double-screw gun-vessel, Com. Edward F. Lodder—India.
Bustard, 2, screw gunboat—China.
Cockchafer, 2, screw gunboat, Lieut.-Com. Seymour S. Smith—China.
Cormorant, 4, screw gun-vessel, Com. Hon. Albert D. S. Denison—China.
Cossack, 16, screw corvette, Capt. John E. Parish—India.
Daphne, 4, screw sloop, Com. G. A. Douglas—India.
Dove, 2, screw gunboat, Lieut.-Com. M. J. Dunlop—Japan.
Dryad, 4 screw sloop, Com. P. H. Colomb—India.
Dwarf, 4, double-screw composite gun-vessel, Com. C. F. Walker—China.
Elk, 2, double-screw composite gun-vessel, Com. Algernon G. Wootton—China.
Firm, 2, screw gunboat, Lieut.-Com. John Hext—China.
Forester 2, screw gunboat, China, to be sold or disposed of.
Grasshopper, 2, screw gunboat, Lieut. and Com. L. C. Keppel—China.
Haughty, 2, screw gunboat, Lieut. K. H. A. Mainwaring—China.
Havock, 2, screw gunboat, Lieut. and Com. Yelverton O'Keefe—China.
Hornet, 4, double-screw gun-vessel, Com. Duncan G. Davidson—China.
Icarus, 3, screw sloop, Com. Lord C. T. M. D. Scott—China.
Insolent, 2, screw gunboat, China.
Leven, 3, gun-vessel, Lieut. and Com. H. H. Edwards—China.

Manila, screw steam-vessel—Japan.
Meeance, hospital ship at Hong Kong.
Melville, hospital ship—Hong Kong.
Midge, double-screw composite gun-vessel, Com. Charles C. Rising—China.
Nymphe, 4, screw sloop, Com. Edward S. Meara—East Indies.
Ocean, 24, screw armour-plated ship, Capt. Wm. N. W. Hewett, V.C., flagship of Vice-Admiral Hon. Sir H. Keppel, K.C.B.—Japan.
Opossum, 2, screw gunboat, Lieut.-Com. A. C. May—Hong Kong.
Pearl, 17, screw corvette, Capt. J. F. Rosa—Japan. To be relieved by Barossa.
Princess Charlotte, 12, receiving ship, Commodore O. J. Jones—Hong Kong.
Rifleman, 5, screw sloop, Staff-Com. John W. Reed—China Sea, surveying service. Ordered to be paid off and sold at Hong Kong.
Rinaldo, 7, screw sloop, Com. Frederick C. B. Robinson—China.
Rodney, 72, screw ship, Capt. A. C. F. Heneage—China. Ordered home.
Salamis, 2, paddle despatch vessel, Com. Henry M. Miller—Japan.
Star, 4, screw gun-vessel, Com. Walter S de Kantzow—East Indies.
Starling, 2, gunboat, Lieut. and Com. Charles Crowdy—China.
Sylvia, 5, screw surveying vessel, Com. H C. St. John—China and Japan Seas.
Zebra, 7, screw sloop, Com. H. A. Trollope, China.

# Monetary and Commercial.

Again we fear we must record another bad year for tea and silk. How many more capitalists can stand is a question fraught with great importance to those engaged in the trade. The late public sales of tea show a fall in new season's of four-pence. The current market prices are now leaving losses on most chops, and with the heavy arrivals no improvement can be expected. The prices paid this year in China, although more moderate, were too much on the speculative. The principal mischief, however, has been caused by the indiscriminate manner in which the teas have been forced off at public sales here. The anxiety to press sales on the part of importers has amounted almost to a panic; every one wished their teas to be in. Had the large importers acted a little in concert, and allowed the trade to be supplied sparingly with the lots put on the sale by comparatively small holders, the market would not have given way so fearfully; it has been fairly "smashed" by the weight of teas pushed forward in advance of the proper sale days. There is now but little chance of the market recovering itself for at least a month, when we shall know more of the probable yield of the season. According to advices, the crop at Foochow will certainly be short. The most important question at present is, "Who shall hold the stock?" The dealers seem determined not to hold, and the importers also struggle against it. So long as the buyers in China ship off such enormous supplies in the first month of the season no improvement can be expected. In all other staple productions the purchases are regulated by the demand, clearances, and stock, and why should tea be an exception? The article will not deteriorate by keeping in China more or even so much as in the warehouses in England. If the orders from this side are sufficient in the aggregate to cover all the first crop teas as they arrive, the buyers at Foochow and Hankow are not to blame in that respect; the fault is on this side; but they are certainly to blame for their valuations and discrimination in giving the price of the fine and finest, say 2s. to 2s. 2d., for what turns out on arrival to be only medium, worth about 1s. 6d. to 1s. 8d. But even these errors—which will always take place—would be counteracted to a great extent if the early shipments were on a scale of about one-half the present quantity. The large collection of ships which now congregate for the opening of the season must be stopped, and the Chinese interested must have such lessons as will necessitate them to bring forward a better article, instead of the trash brought down this season, and for which the *chasee* should have had the power of rejecting as altogether unfit to buy as *first* crop tea. We know that some who had this power used it, but they were borne down by the weight of the majority.

We notice the intended despatch by the Messageries Company of the steamer *Godavery* for the ceremony of the Suez Canal, and that she is to pass through the Canal to Calcutta. This is taken to be an earnest of the opinion of the directors that the Canal will be in working order. It may be possible to get a vessel through like the *Godavery*, which is under 1,000 tons, but we still doubt its being ready for general traffic, with a depth of 26 feet, for several months. The London agent, Mr. Lange, writes that the directors have not modified their announcement. We know, however, that they will not guarantee shipowners that their vessels will be carried through after the formal opening.

We have received from the Yokohama and Hiogo Chambers of Commerce a copy of their reports for the half year. From the Yokohama report we find that during the period mentioned 59 American vessels entered Yokohama, and the same number cleared, while 154 English vessels entered and 132 cleared. North Germany ranks next to England, showing 43 vessels entered and 44 cleared in the six months. The amount of tea shipped to England during the period specified was 489,387 pounds, while the United States, including San Francisco, which is separately mentioned in the report, took 10,183,252.

From the Hiogo Chamber of Commerce report we perceive that during the year ended 30th June last, 362 vessels entered the harbour—205 British, and 120 American; and 329 vessels cleared—186 British, and 111 American. The value of the imports for the period named was $4,439,879, and of the exports, $1,945,205; the quantity of tea exported was 2,867,600 lbs.; of silk, 1,504 bales; and of silkworms' eggs, 28,517 cards. The imports for the six months ended 30th June amounted in value to $2,032,395, and the exports to $551,820, the tea exported being 782,133 lbs., and the silk 397 bales.

We are glad to find that the Home Secretary has directed the release from custody of Mr. Shipman, who was committed by the Court of Bankruptcy to a year's imprisonment in respect of certain speculations during his management of the Agra and Masterman's Bank. Mr. Shipman had served only half his term of imprisonment. There never was a clearer case of a man being made the scapegoat for other people's delinquencies.

The project which has been for some time in negotiation, and frequently noticed by us, of running a line of steamers from Java to Queensland and Sydney, is, we understand, to be undertaken by the British India Steam Company.

The line from Holland to Java by the Suez Canal, which has been noticed by our Rotterdam Correspondent, is still in training.

Mr. Joseph Freeling Wilkinson, late manager of the Joint-Stock Discount Company (Limited), who was some time ago released from custody, has been compelled to enter the Court of Bankruptcy. He is described as a bill-broker, Clement's-lane, City. The adjudication was made on the petition of Mr. E. H. Stanley, bill-broker, Lombard-street, a creditor for £140. Mr. R. P. Harding, the official liquidator of the Joint-Stock Discount Company, proved for £36,000, and was appointed creditors' assignee.

The directors of the Moyar Coffee Company (Limited) have declared a dividend of 3 per cent. per annum, free of income tax on the company's capital.

An interim dividend at the rate of 5 per cent. per annum has been declared by the Netherlands India Steam Company.

An extraordinary general meeting of the Singapore Gas Company (Limited) is called for the 26th inst., when a dividend is to be declared.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton, on the 16th inst., was—in gold, to Galle £117; to Bombay, £25,000; to Madras, £4,450; in silver, to Hong Kong, £12,365; total in gold, £29,567; in silver, £12,365.

## ARTICLES OF IMPORT.

—o—

### TEA.

The market has been freely supplied during the week, and only, finest taken readily, as buyers believed the quantity can be but limited, hence their eagerness to buy. Other grades, both Red and Black, are very flat, and good medium to fine Black sells at 1s. 5½d. to 1s. 7½d.; Scented Foochow Orange Pekoe sells fairly, as prices are moderate. No Cantons yet arrived; first import of finest will sell well, of Capers more especially, as stock is small. Green difficult of sale, even at the low prices that would be taken by importers. Of new Pingsueys no further arrivals have come to hand, and the market is steady for them, with no particular change in value. No Moyunes offering. Japan (uncoloured): The Ariel has brought 6,000 half-chests ordinary common to fair quality; no sales reported.

The following is from Messrs. A. Capel and Co.'s Circular:—

The quantity offered of new season's being much larger than usual so soon after arrival, the result has been a further serious decline in prices, both of old and new Congou, for all but the finest descriptions, new black-leafs being fully 2d. per lb., 2d. to 3d. per lb. in Kaisows, 3d. to 4d. per lb. in Pak Lins, ½d. per lb. in common Congou, and 1d. per lb. in good to fine old season's black and red-leaf kinds. The demand still continues inactive, and quite insufficient to take off all Teas as they arrive, and if importers insist on pressing sales as they have done hitherto, we fear prices will rule still lower. The public sales of the 30th ultimo, 1st and 5th instant, comprised 38,359 packages, of which 36,141 packages were printed without reserve. The stock in the United Kingdom on the 30th ultimo was estimated at 68,200,000 lbs., against 67,000,000 lbs. last year, and the quantity afloat at 52,325,000 lbs., against 68,058,000 lbs.

Several parcels of siftings and broken-leaf Congous have arrived, and prices realised have been from 8d. to 10d. per lb. Broken-leaf kinds have sold ½d. per lb. lower. Fair to good common at 1s. 0½d. to 1s. 1d. show ½d. per lb. decline. Fair to good Kaisows of old season have sold from 1s. 1½d. to 1s. 2½d., being ½d. to 1d. per lb. lower. New have been very difficult of sale at from 1s. 3d. to 1s. 6d. per lb. for fair to good, 1s. 8d. to 2s. for fine, but finest from 2s. 2d. to 2s. 9d. per lb. have met with a ready sale. Pak Lins, except choice parcels, have been most difficult to move; half-chests have sold from 1s. 2d. to 1s. 11d. for common to fine; boxes from 1s. 6d. to 1s. 9d. for fair to

Digitized by Google

good, 1s. 11d. to 2s. 4d. for fine to finest. Amoy kinds must be quoted ½d. per lb. lower. Good common black-leafs have been sold at 1s. 1d. per lb., being fully ½d. per lb. lower. Old season's good to fine sold from 1s. 2½d. to 1s. 6d. per lb., being fully 1d. per lb. lower. In new Teas, good qualities have sold from 1s. 4½d. to 1s. 8d., being 1d. to 2d. per lb. decline; finest, being scarce, command full prices, say 2s. 2d. to 2s. 6d. per lb. New-make Canton kinds have sold ½d. per lb. lower, from 1s. 1d. to 1s. 2d. per lb. Common to fair Oolongs have sold at low prices for old imports; in new some good quality has sold from 1s. 4d. to 1s. 7d., fine, 1s. 8d. to 2s. 2d. per lb. Souchongs show no material alteration; no really fine new season have come to hand. Flowery Pekoes remain unaltered. Scented Teas—Canton kinds: Capers remain much as before, in the absence of new arrivals. Foochow kinds have sold readily from 1s. 9d. to 2s. 2d. Orange Pekoes: Canton kinds have shown little change. Foochows of old season have been dull; new have been sold from 1s. 4½d. to 1s. 9d. for fair to good, 1s. 10d. to 2s. 2d. for fine to finest. Uncoloured Japans show no alteration. Green Teas: A considerable portion of those per Ajax have been sold, 4,000 packages at the auctions on the 30th ult. and 1st inst., and several invoices by private contract before these sales. The Ping Sueys have realised about 2d. per lb. less than those per Nestor. A few old season's fine Moyunes have changed hands at rather lower prices.

## SILK.

The market during the past week has been very flat; prices are lower; holders of both China and Japan have submitted to a reduction to effect sales. The deliveries continue unsatisfactory, and show no improvement whatever upon the previous month, having been in September 2,783 bales China, 442 Canton, 422 Japan, and 385 Bengal; total, 4,032 bales, and from 1st to 6th instant respectively, 523, 93, 76, and 65 bales; total, 757 bales.

London Quotations, October 16.

THE CONTINENTAL MARKETS.

The Silk market of Lyons is still in a very unsatisfactory condition; there is scarcely any business doing, and prices continue to fall. There is scarcely any demand for manufacture, yet nearly all the looms in the country, as well as in the town, are at work. It is considered that the present lack of purchasers of Silk goods cannot last long, and then the manufacturers will be in a position to execute the orders which will certainly arrive before long in considerable numbers, and then there will be a corresponding change in the raw Silk markets. From a return of the quotations for September 1868 and 1869, it appears that the prices of raw Silks have fallen on the average 25f. in the twelve months; the value of Italian Silk has decreased by 26f.; that of the Levant, 28f.; while Chinese and Japanese Silk have not fallen more than 14f. or 15f. At Turin and Milan the markets are very heavy, and prices low, and holders at the latter place have been again compelled to make concessions in the case of raw Silk and current Organzins. The following are the last quotations received:—Organzins, first class, 18/20, 125f. to 127f.; do., fine current, 112f.; do., good, 20/22, 104f. to 106f.; do., seconds, 22/26, 96f. to 98f.

## COFFEE.

The quantities of Ceylon offered at public sale have been larger than for some time past, and being in excess of present wants prices have given way; the prices realised at the last sales were—Plantation Ceylon chiefly sold; triage, 40s. to 57s. 6d.; ordinary and small grey, 59s. to 63s.; low middling grey and dull, 64s. 6d. to 69s. 6d.; bold do., 70s. to 73s. 6d.; small coloury, 63s. 6d. to 67s. 6d.; middling coloury, 70s. to 77s.; good middling, 77s. 6d., to 81s. 6d.; pea-berry, 74s. to 79s.; native small, 47s.; ordinary, 51s.: good ordinary, 52s. 6d. good bold pale, 57s. to 58s. 6d.; pea-berry, 56s. 6d.

The quantity of Ceylon Coffee afloat for Great Britain on the 4th inst. was as follows:—Plantation, 123,818 cwt., against 85,002 cwt. at the corresponding date of 1868; Native, 34,300 cwt., against 30,677 cwt. The quantity afloat for Europe was—Plantation, 1,167 cwt., against 4,275 cwt. The quantity of Coffee landed in the forty weeks ended 2nd October, 1869, was, of Ceylon, 31,932 tons, against 37 465 tons during the corresponding period of 1868; of all descriptions, 58,111 tons, against 57 212 tons. The quantity entered for home consumption was, of Ceylon, 8,337 tons, against 9 686 tons; of all descriptions, 14,367 tons, against 14,971 tons. The quantity exported was, of Ceylon, 20,385 tons, against 22,864 tons; of all descriptions, 35,638 tons, against 33,478 tons. The stock on the 2nd October was, of Ceylon, 14,205 tons, against 14,902 tons; of all descriptions, 27,326 tons, against 25,095 tons.

Of Singapore good pale Bonthyne has realised 59s. 6d.; mixed, 52s to 56s. 6d. Of Manila the qualities offered do not appear suited to the present requirements of buyers; 7,115 bags mixed small palish, per Sir H. Havelock, and 500 bags ditto, per Sarah Scott, were all bought in, the first lot at 57s., the second at 54s. to 55s. per cwt. The only sale has been 400 bags by private contract, at 55s. per cwt.

In the Brazil market, according to the latest advices, an active business has been effected, owing to dealers having somewhat lowered their pretensions, and sales were reported of some 110,000 bags. Receipts continue slightly increasing, and stock was estimated at 110,000 bags Washed, 7,500r. to 9,500r.; fine superior, 8,000r. to 8,500r.; superior, 7,600r. to 7,800r.; good firsts to 6,900r. to 7,200r.; ordinary first, 5,400r. to 6,400r.; good seconds, 4,700r. to 5,800r.; ordinary second 4,200r. to 4,600r.

Cotton.—Both the London and Liverpool markets are very dull, and prices are depressed and irregular. The current quotations at Liverpool are:—Surat, 6½d. to 10½d.; Bengal, Scinde, &c., 7½d. to 8½d.; Middling Uplands, 12½d.; Middling Orleans, 12½d.; fair Dhollerah, 9⅝d.; fair Oomrawuttee, 9⅝d.; fair Broach, 9⅝d.; fair Pernam., 12½d.; fair Egyptian, 12½d.; fair Smyrna, 10½d.; fair Bengal, 8⅝d.

Cocoa-nut Oil.—Ceylon in moderate inquiry at £41 10s. to £42.

Camphor.—There is scarcely any inquiry, and we have no sales of Japan to report. Of China 96 cases rather dark colour realised 85s. to 86s. per cwt.

Coir Goods.—Good and fine qualities of Yarn continue in good demand; and at public sale, although a larger portion consisted of these qualities than usual, they sold readily at advanced rates; medium mixed and common, however, sold slowly at some decline. Of Yarn, 1,123 ballots 39 972 dholls (52 tons) Ceylon sold, low and very common, £24 to £24 15s.; common, £25 10s. to £26 15s.; medium, £32 10s.; good medium to good, £35 5s. to £38 15s.; fine, £43 10s. to £44 5s.; also 150 bales fine, £46 5s. to £54; very fine, £58; superior bright, £67 15s. to £71. Of Fibre, 4 tons Ceylon were bought in at £22, except 15 cwt., which sold at £22 10s.

Gums.—Benjamin.—45 cases Sumatra partly found buyers, fair seconds, £8, good fair thirds, £5 2s. 6d. Damar: 28 cases good Batavia obtained 98s. to 98s. 6d. Myrrh: 60 cases realised £6 5s. to £10 12s. 6d. for middling to good. Olibanum being largely offered is lower. ordinary to good, 70s. to 83s. Kowrie: 320 cases part sold, ordinary rough to middling, at 53s. to 57s. 6d., fine bold scraped, 101s. per cwt.

Galls.—We have no transactions to report, either in China or Japan.

Hides and Skins.—The following were the transactions at the recent public sales:—Batavia: 730 Batavia Buffalo Hides sold at 7½d. per lb.; 902 Java Buffalo, heavy, 6¼d.; light, 6½d.; seconds, 5⅜d.; thirds, 4d. per lb. Singapore, Penang, &c.: 2,874 Dry and Brined Penang Ox and Cow sold, dry light, 8¾d.; heavy, 7⅞d.; extra heavy, 7½d. to 7⅞d.; small, 9½d.; thirds, 6½d.; brined, light and small, 10¼d.; heavy, 7⅞d. per lb. 319 Rangoon, dry, heavy and light, 6½d. to 7d. per lb. 2,240 Singapore and Penang Buffalo, best, 5½d. to 6¼d.; seconds, 5d. to 5¼d.; light, 5¼d. to 6¾d. per lb.

Japan Wax.—The demand is less active than for some time past, but prices show no alteration. At auction, of 588 cases saucer offered, only 200 cases sold, realising 80s. for middling and 75s. to 75s. 6d. for mixed.

Manila Hemp.—There has been an active inquiry during the interval, at improving rates, £60 to £62 for fair to good roping, and £65 for Boluzan, being the current rates. A few lots of inferior white offered at the public sales have brought £59 to £62 10s., and a parcel of four bales Quilot has been sold at £65.

Plumbago.—The market for Ceylon exhibits no great activity, but prices are steady; at auction of 806 barrels offered only one fourth sold—fine bright lump, at 26s.; ordinary small lump and dust, at 14s.; chips, at 10s. to 11s.; middling dust, at 10s. 9d.; the remainder consisting chiefly of dust, being bought in at 9s. to 11s.

Pepper.—Black: At the last public sales Penang sold, fair, at 4d. to 4⅛d., including all the damaged; common, 4d.; common Trang sold at 4 1-16d., 285 bags 585 mats Siam sold, fair, partly damaged, 4¼d. to 4¼d. White: A good supply of Singapore, amounting to 2,105 bags, was offered, of which 800 bags sold at steady rates, fair, 5⅞d. to 6d., common, 5⅝d. to 5⅞d.

Rice.—There has been an improved inquiry for white Bengal, of which extensive sales have been effected at advanced rates, but for all other descriptions the market continues very dull. On the spot Necransie realises 8s. to 8s. 6d.; Rangoon, 9s. 3d. to 9s. 6d.; Saigon, 9s.; Siam, 8s. 6d. The cargo per Margaretha Delphina, 750 tons Rangoon, arrived off the coast, has been sold at 8s. 10½d. for the Continent. By private contract, 2,000 bags Rangoon have realised 9s. 3d. to 9s. 6d.; 7,000 bags low-heated Necransie, 7s.; and 200 tons damaged garden Siam, first-class, 8s.

Rhubarb.—Of 96 chests China at the auctions 38 chests sold, common at 1s., ordinary to good middling at 2s. to 3s. 10d. per lb.

Sugar.—The quiet tone we noted in our last has continued throughout the interval, and prices have slightly receded; low brown Penang has been sold at 26s.; soft brown China, 27s.; low damp Java, 26s.; clayed Manila, 30s. By private contract 1,000 tons unclayed Manila sold, price not reported. Afloat, a cargo of unclayed Manila (Yloilo) realised 20s 6d. for a near port.

Spices.—Mace has sold rather cheaper; 5 cases Madras common red, 2s. 6d.; 6 cases Java ordinary to good, 2s. 6d. to 3s. 4d.; Penang bought in at 3s. 4d. to 3s. 10d. per lb. Nutmegs: The demand does not improve, and of the parcels offered only part sold; 14 cases Madras, 160 to the lb., 1s. 2d. to 1s. 3d.; 114. 1s. 9d.; and 94, 2s.; and 5 cases Java 94, 2s. 2d.; 88, 2s. 4d.; and 69, 3s. 6d. per lb., Penang bought in. Cinnamon: Immediately after our last report was issued business was done at higher prices, but at auction more recently of 325 bales only part sold at easier rates; fourth sort, low, 1s. 4d. up to 1s. 10d for mid.; third, 1s. 8d. to 2s. 10d.; second, ordinary coarse to good, 2s. 1d. to 3s. 6d.; and first, good to fine, 3s. 2d. to 3s. 8d., with middling at 2s. 6d. per lb. Chips, being firm, prices are higher than those last quoted; 2,633 bags have been offered by auction and part sold, coarse bark 4⅛d. to 4⅞d.; thin do. 5d. to 5⅛d.; middling to good 8⅛d. per lb. Cloves are steady: 631 bags Zanzibar sold, dark to fair, 2⅞d. to 3d.; Penang, 11¼d. to 11½d. per lb.

Terra Japonica.—Cutch: The market is dull, and of 352 boxes good Pegue at auction part only sold at 24s. to 25s. per cwt. Gambier: There is a slightly improved inquiry, and about 1,000 bales have been sold privately at 17s. 1½d., per cwt. ex ship.

Tin.—There is scarcely any business doing in Straits; nominal quotation, £126 per ton.

Digitized by Google

## NEW YORK MARKETS.

Tea.—An active demand has sprung up for desirable invoices Green, and Japan and Black have also attracted more attention. Pretty full values have been realised, the more settled state of the Gold market affording a safer basis for trade operations, and imparting confidence to operators. A portion of the sales of Green in fine new crop Pingsuey, received *via* California, bringing satisfactory prices. The sales are 6,056 half-chests and boxes. Green, per Horatio, Anglo-Saxon, Dartmouth, Monkchester, and steamer from California, 1,217 half-chests Oolong, per Glenaros, 1,398 new crop do., *via* California, and 6,743 half-chests and 168 boxes old and new crop Japan, per Pallas, Caractacus, and steamer from California, a small portion for Canada. These sales were effected at the current rates which rule as follows:—Hyson: Common to fair, 90c. to $1.10; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1 65. Young Hyson: Canton made, nominal; common to fair, 82c. to $1.65; superior to fine, $1.15 to $1.35; extra fine to finest, $1.40 to $1.70. Gunpowder and Imperial: Canton made, nominal; common to fair, $1 to $1.15; superior to fine, $1.25 to $1.50; extra fine to finest, $1.60 to $1.90. Hyson Skin and Twankay: Canton made, nominal; common to fair, 75c. to 80c.; superior to fine, 85c. to 88c.; extra fine to finest, 90c. to 95c. Uncoloured Japan: Common to fair, 80c. to 90c.; superior to fine, 95c. to $1.05; extra fine to finest, $1 10 to $1.25. Oolong: Common to fair, 70c. to 78c.; superior to fine, 85c. to $1.15; extra fine to finest, $1.20 to $1.60. Souchong and Congou: Common to fair, 79c. to 80c.; superior to fine, 90c. to $1 05; extra fine to finest, $1.25 to $1.50. Orange Pekoe: Common to fine, 70c. to $1. The total receipts of Tea from China and Japan in the United States from the 1st January to the 21st Sept., 1869, were as follows:—Greens, 18,382,541 lbs.; Japans, 9,380,140 lbs.; Souchongs, 1,810 096 lbs.; Oolongs, 9,569,722 lbs.; other sorts, 263,748 lbs.; total 39,397,247 lbs. The stock on the 1st January was 9,577,014 lbs.; which, added to the above total, gives a result of 48,974,261 lbs. Subtracting from this total the exports from 1st January to the 21st Sept., 4,681 815 lbs., and the withdrawals for home consumption during that period, 30,285,754 lbs., there remains a total of 14,606,692 lbs., representing the stock on the last-named date. The receipts from Sept. 8th to Sept. 21st amounted to 4,635 lbs., the withdrawals for home consumption to 1,406,649 lbs., and the exports to 427,892 lbs.

Silk.—The following is from Messrs. Haywood and Co.'s Circular:—Manufacturers continue for the most part to buy very sparingly. Prices are a little weaker, and though some firmness is manifested by a few importing houses, the general feeling is a want of confidence in the present rates being maintained. Good Re-reeled, Tsatlee and Taysaam are selling steadily. Usual Reel Tsatlee and Taysaam of the best descriptions are fairly in demand. Japans remain quite neglected. Canton Re-reeled are selling fairly, but at lower rates. The current quotations are as follow:—Tsatlees, No. 1, none; No. 2, $11; No. 3, $10 to $10.50; Nos. 4 and 5, $8.50 to $8.75; Taysaam, No. 1, $9; No. 2, $8.50; No. 3, $8; Nos. 4 and 5. $6.50 to $7; Re-reeled Tsatlee, No. 1, $10; Nos. 2 and 3, $9.50 to $9.75; Re-reeled Taysaam, No. 1, $9 25 to $9.50; Nos. 2 and 3, $8 50 to $8.75; Haineen, No. 1, none; Nos. 2 and 3, none; Re-reeled Canton, extra fine, $9; good, $7.50 to $7.75; fair to medium, $7.25 to $7.45; Mybash, Nos. 1 and 2, none; Nos. 3 and 4, $10 to $10.25; Ida, Nos. 1 and 2, $11; Nos. 3 and 4, $10; Sodai, Nos. 1 and 2, $9.50; No. 3, $9.25; Sinchews, No. 1, none; No. 3, $10 to $10.25; Koshu, No. 1, $10.50; Mashta, good, none; Atchezan, good, $8.

Coffee.—The market for East India descriptions is very quiet, the enquiry being exclusively for Brazil sorts. No sales of either Manila, Singapore, or Ceylon are reported; of Java 250 bags Government realised 22¼ cents gold, and 1,000 mats in lots from second hands 23 to 24 cents gold. The current quotations, which show but little change, are:—Java, duty paid, Government bags, 22c. to 23½c; mats, 23c. to 24c.; Singapore, duty paid, 20c. to 22½c.; Manila, duty paid, 16c. to 18c.; Native Ceylon, duty paid, 17½c. to 19½c. gold.

Cordage.—There is fairly active enquiry at the following rates:—Manila Cordage, 24c.; do. 6 thread and 9 thread (¼ in and 5-16 in. diam.), 25c.; do. 12 thread (⅜ in. diam.), 24½c.; Manila Hay Rope, 24½c.; Manila Cordage, bolt rope yarns, 26c.; do. 6 thread and 9 thread, 27c; Tarred Manila, 23½c.; Fine Tarred Manila Lath Yarn, 25c.; Jute Rope, 11c.; and Sisal Rope, 21½c. cash.

Camphor.—No transactions: quotations for China, 23c. to 25c. per lb.

Crackers.—There is still a fair business doing in Canton at the previous price of $2.75 to $2.80 per box of 40 packages.

Dyewoods.—There is a good supply on the market, but in the absence of demand prices are nominal; Sapanwood is quoted $40 per ton currency.

Gambier.—No enquiry; nominal quotation $3.75 gold.

Hemp.—The enquiry for Manila has entirely ceased, and there have been no sales; 13½ cents gold is the nearest market value.

India Rubber.—Nothing doing in East India.

Indigo.—The market for Manila is steady and firm, the enquiry running exclusively on that description; sales have been effected of 70 cases, in lots, at $1.20 to $1.50 currency, and $1.10 gold per lb.

Rice.—In the absence of heavy arrivals the business is chiefly confined to small parcels of Rangoon, which are taken at fair prices; the sales of this description have been 1,000 bags at $7.50 to $7 75 (chiefly at $7.62½), and 1 150 bags in bond for export at $3 to $3.25 (chiefly at $3.12½) gold per 100 lbs.

Spices.—The market is active at firm prices; we note sales of 1,500 bags Sumatra and Singapore Pepper at 23½ to 24 cents per lb. gold; of 50 bales Cloves at 26½ cents per lb. gold; and of 2,000 mats Cassia, per N. B. Palmer, on private terms. Quotations:—Cassia in mats 46c., in cases 46c., in bond 26c.; Mace, $1.30; Nutmegs, No 1, 95c. to $1; Pepper, 24c. to 24½c., in bond, 8c. to 8¾c.; Cloves, 26c. to 26½c., in bond, 6c. to 6¼c.; Cinnamon (prime wild) 42½c. to 43c. per lb. gold.

Sugar.—The tone of the market has become dull, and prices have slightly receded. The only sale of East India has been 7,500 bags Manila on private terms. Quotations, Java, Nos. 10 and 12, 12c. to 12½c.; Manila, current clayed and superior, 11¼c. to 11⅝c. per lb. gold.

Tin.—The market is dull, all descriptions being out of demand; Straits is quoted 32⅜c. to 32½c.; Banca, 39c. per lb. gold; the only sale reported is of 25 pigs Banca at 38½c.

## SAN FRANCISCO MARKETS.

Tea.—Imports from Jan. 1st to Sept 16th: China, 478,946 lbs., 6,347 packages; Japan, 695,712 lbs., 4,806 packages. By the steamship Great Republic were received about 6,000 packages, chiefly from Japan. This arrival was timely, as stocks are thought to be less than the average of past seasons. We quote Comet Oolong, $1; Japans, 62½c. to 67½c. for chests and half-chests; small boxes, 5s. and 10s.; fancy and lacquered, 70c. to 75c.; extra fine chops, 80c. to 85c. There is a fair demand for Japans, with but limited call for Oolongs. The stock of low grade China Blacks is ample for trade wants.

Coffee.—Imports from Jan. 1st to Sept. 16th, Java, 899,836 lbs., 70 packages; Manila, 170,375 lbs., 3,395 packages. There is a limited inquiry generally, and no sales of East India are reported.

China Matting.—Imports from Jan. 1st to Sept. 16th: 60 bales, 6,069 rolls. The Elcano, from Hong Kong, brought over 2,200 rolls Beyond a moderate jobbing trade, the demand for Chinese cargo and contract is light, and prices more or less nominal. The market price for both cargo and contract has been seriously disturbed by large sales of English Grass Cloth at very low prices, the latter having a decided preference at the rates ruling.

Cordage.—No transactions in Manila.

Rice.—Imports from Jan. 1st. to Sept, 16th: China, 14,845,395 lbs., 126,120 packages: Siam, 1,066.862 lbs., 28.142 packages; Batavia, 110,271 lbs. The Elcano, from Hong Kong, added 28,688 bags, and the Great Republic 2,000 mats, to very full supplies. The general market continues quiet, with sales aggregating 12,500 mats China at 5½c. to 6c. We quote Siam, recleaned, 5c. to 5¼c.

Spices.—The current quotations are Cloves, 30c. to 33½c.; Cassia, 45c to 47½c.; Nutmegs, $1.10 to $1.12½; Pepper, 25½c.

Sugar.—Imports from Jan. 1st to Sept. 16th: Manila, 8,845,568 lbs., 69,135 packages; China, 1,396,013 lbs., 1,111 packages; Batavia, 628,449 lbs., 2,357 packages; Siam, 320 packages. The Refinery Company have received 2,000,000 lbs. Manila, per Nellie Abbott and Singapore, and have purchased 200,000 lbs. Java, ex Schwan, at 10c. to 10⅜c. per lb. Quotations: China, 9c. to 10¼c.; Manila, 8½c. per lb.

Tin.—Banca is quoted 40c. to 42½c. per lb.

## SHIPPING.

Arrivals.—Sept. 16, at San Francisco from Hong Kong, Elcano; 18, from Yokohama, Great Republic (s.); from Manila, Nellie Abbott, 22, from Singapore, Comfurious; from Yokohama, Evangeline; 25, at Boston from Manila, Southern Cross.

Departures.—Sept. 21, from San Francisco for Yokohama, Golden Age (s.); 22. for Hong Kong, Malay; 29, from New York for Hong Kong, Golden State.

Loading.—At San Francisco for Hong Kong, Parsee. At New York for Shanghai, Benefactor, Surprise. At Boston, for Hong Kong, Mutlah.

Maria Aurinna (?) (Norwg. brig), Amsterdam to Batavia.
Tryphena (Pruss. barq.), Sarawak to London, 91 days out, 6 S., 16 W.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports still continue without change; coal freights from the Northern outports are very dull, and show no signs of amendment.

Current rates of freight for vessels on the berth:—To Yokohama: 32s. 6d. weight, 30s. meast. To Nagasaki: 45s. weight or meast. To Hiogo or Osaka: 40s. weight, 35s. meast. To Shanghai: 40s. weight, 35s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £42. For Hong Kong: £33. For Singapore: £24. For Galle: £22. 10s. From Newport, Cardiff, or Swansea per ton. For Shanghai: £2. For Hong Kong: £1 10s. For Singapore: £1 4s. For Galle: £1 2s. 6d.

The Admiralty have invited tenders for the conveyance of small stores to Hong Kong.

## CASUALTIES.

A telegram received from New York Oct. 1, per Atlantic Cable. states that the Chaturanga, from Singapore to new York, was disabled, and discharging at St. George's, Bermuda.

The Malakoff, from Colombo to London, was spoken, Aug. 9, off Agulhas, with maintopmast gone.

The Early Morn, from Dundee to Singapore, was spoken, Sept. 1, 13 N., 27 W., with bowsprit sprung and foretopgallantmast carried away.

The Tinnevelly, Bone, from Shields, for Galle, put into Plymouth, Oct. 5, to have her bottom examined, having touched on the Shipwash, Sept. 22.

The Solent, Meldrum, which sailed from Cardiff, Sept. 25, for Hong Kong, was towed back to Penarth, Sept. 26, with loss of anchor and chain and cutwater.

Advices from Amsterdam, dated 5th October, state that the Waterloo, Abrahams, from that port to Batavia, had put back to the roads, having been in collision; she had lost mainyard, and would return to harbour.

The Lochleven Castle, M'Diarmid, arrived at Liverpool from Singapore, had experienced strong westerly gales from the 22nd July to 12th August, and been obliged to throw part of cargo overboard; she also shipped a very heavy sea on the 30th September, and lost a boy, two boats, chain plates of mizen rigging, &c.

The Gustav, Schult, from Hamburg, to Shanghai, put into Port Elizabeth leaky, Aug. 23, having experienced heavy weather after leaving Table Bay; her cargo was being discharged, but did not appear to have sustained any damage.

Digitized by Google

According to advices from St. Thomas, of the 22nd September, the A. Lloret, Gonzalez, from Manila to London, which put in there August 15 leaky, had been condemned, and the master had advertised for vessels to bring on her cargo.

The Callao (ship), from China, with coolies, put into Honolulu previous to the 15th Sept.; soon after leaving port the coolies attempted to seize the vessel, but were unsuccessful.

The Granville, Gallichan, from Colombo to London, which touched at St. Helena, Aug. 28, had decks swept in a hurricane July 31.

The Corsair (bq.), Miller, which sailed from London Sept. 2, for Hiogo and Yokohama, was spoken, Sept. 23, forty miles west of the Lizard, with loss of sails, bulwarks, &c., having experienced heavy gales off the Lizard on the 11th, 13th, and 18th Sept.

## MISCELLANEOUS.

At St. Vincent, C. V.—Sept. 9, Lismore (s. s.), Morrison, from Dumbarton, and left 10 for Singapore.

At Dakar.—Aug. 1, Georges and Marie (str.), Leprovost, from Havre, for Singapore, &c.

Advices from Amsterdam, dated Oct. 2, state that the wreck of the Appelina, Youll, from Saigon to Schiedam, which was stranded at Velsen, near Wyk-aan-zee, about Sept. 13, was sold on the 29th, with the cargo, which was still on board.

At Ascension.—Aug. 29, Java, from Batavia, and sailed 30 for Falmouth.

Off Ascension.—Aug. 28, Kanagawa, from Batavia, for Rotterdam; 29, Anna and Sophia, from Batavia, for Amsterdam; Sept. 5. Hochelaga, from Penang, for London; 11, Taitsing, from Shanghai, for London; 12, Cavalier, from Philippines, for Falmouth.

At St. Helena.—Aug. 28, Granville, Gallichan, from Colombo, and sailed for London; Algernon, Otty, from Hiogo, and sailed 29 for Rotterdam; Tycoon, Mutter, from Shanghai, and sailed 29 for New York; 29, Macao, Morales, from Amoy, and sailed Sept. 2 for Havana; Fop Smit, Mets, for Batavia, and sailed 30 for Rotterdam; Eleanor, Maxwell, from Singapore, and sailed Sept. 2 for London; Tamaris, Cayales, from Macao, and sailed 31 for Havana; Santa Maria, Fernandez y Garcia, from Manila, for Cadiz; W. H. Haselden, Rose, from Ceylon, and sailed Sept. 4 for London; 30, Ternate, Cars, from Batavia, and sailed Sept. 5 for Rotterdam; Sept. 2, Meggie, Brodie, from Singapore, and sailed 3 for London; 6, Cavalier, Simpson, from Ilo Ilo, and sailed 7 for Falmouth; 8, Catharina Elizabeth, Brakker, from Sourabaya, and sailed for Amsterdam; Medea, Ankringa, from Batavia, and sailed for Rotterdam; 12, Presto, Bonjer, from Tjilatjap; 14, Honigby, v. d. Valk, from Batavia, and sailed for Middleburg.

Off St. Helena.—Sept. 2, Voladore (Span. barq.), from Manila; 3, Palanquin; from Manila, for Cadiz, Asterion; from Singapore, 11, Sir Lancelot (ship), from Foochow.

At Table Bay.—Aug. 23, Chrysolite, Long, from Nagasaki, and sailed 25 for London.

The P. and O. Company's new screw steamer *Hindustan*, Captain Curling, at her trial on the 7th inst., attained a mean speed of 14 knots, with a pressure of 30lbs. steam and 55 revolutions. The builders are Messrs. Day and Co., of Southampton. The length between perpendiculars is 349ft. 10in.; over all, 382ft. 8in.; breadth moulded, 42ft. 3½in.; depth of hold, 33ft.; tonnage, builders' measurement, 3,086 tons; and engines of 600-horse power. She has accommodation for 176 first and 55 second-class passengers, and will be able to carry 800 tons of coals and 1,400 tons of cargo. She will shortly be despatched for the Calcutta and Suez line. The company have another vessel of similar size building by Messrs. Caird and Co., on the Clyde, to be called the *Mirzapore*.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: Iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

# THE TANJONG PAGAR DOCK COMPANY
## (LIMITED).

MINUTES of the ELEVENTH ORDINARY GENERAL MEETING of the Shareholders in the TANJONG PAGAR DOCK COMPANY (Limited), held at the Company's Offices, Collyer Quay, Singapore, on MONDAY, the 30th August, 1869

Present—Hon. Thos. Scott; R. Padday, Esq.; A. T. Carmichael, Esq.; G. Lipscombe, Esq.,; P. Joaquim, Esq.; F. Kustermann, Esq.; J. L. Kirby, Esq.; W. Adamson, Esq.; J. B. Caldbeck, Esq.; Whampoa, Esq.; H. Buchanan, Esq.; Dr. Little; A. Logan, Esq., Solicitor to the Company; E. M. Smith, Esq., Manager; and the Hon. Thos. Scott in the Chair.

The Directors' Report, Balance-sheet, and Profit and Loss Account for the half-year ending 30th June 1869, having been for some days in the hands of all present, were taken as read.

Proposed by G. Lipscombe, Esq., seconded by Dr. Little:—"That the Directors' Report be received, and the accounts as rendered passed." Carried unanimously.

The severe competition which has hitherto rendered the working of the Dock so little profitable, and the possibility of an arrangement being come to between the three Docks as to rates of charges, having occupied the attention of the meeting, it was decided to authorise the Directors to receive and consider any proposals which may be made to them having that object in view, if they considered it necessary, calling an extraordinary meeting to obtain the sanction of the Shareholders to any proposition it may appear to them desirable to accept.

A unanimous vote of thanks to the Directors, proposed by Mr. Carmichael, closed the proceedings.

THOS. SCOTT, Chairman.

## REPORT OF THE DIRECTORS.

TO THE SHAREHOLDERS IN THE TANJONG PAGAR DOCK COMPANY (LIMITED).

GENTLEMEN.—

In laying before you the accounts of the half-year ending the 30th June, 1869, your Directors have to congratulate you on the realisation of the hopes expressed in their last report, that public confidence would increase, and that they would soon be in a position to place new shares and liquidate existing debentures and loans.

The Shareholders are already aware that at an Extraordinary Meeting held on the 28th June last, and confirmed at a subsequent meeting held on the 17th July, your Directors were empowered to raise the sum of 250,000 dols. by the issue of Preference Shares at 7 per cent., with an increase to a maximum dividend of 9 per cent., contingent on a certain increase in profits.

Owing to the substantial assistance afforded by the leading Shareholders, Preference Shares to the amount of 75,900 dols. have already been issued, and a further sum of 60,000 dols. is promised.

The amount received has been applied in liquidation of the claim of the Oriental Bank, which has been paid in full, the requisite balance being supplied by another Bank, pending the receipt of further sums for preference shares.

The Company will thus be relieved of a heavy charge for interest, amounting to a sum of from 7,000 dols. to 8,000 dols per annum, and it is expected that when the first debentures fall due, others can be issued if found necessary at a reduced rate of interest.

The first series of Debentures will fall due on the 10th of October next, but the majority of holders have intimated their desire to have them renewed for another year in the terms of the original bond.

It will be seen that the immediate benefit to shareholders will not be so great as if it were in the Directors' power to pay off all debentures at once, and that we must wait until after October, 1870, to reap the full benefit of the reduction in interest. The last six months, of course, have been in no way affected by this reduction.

The business at the Wharf for the last half-year has yielded a fair return, the net profits for this period are 14,822 dols. 27c., being an increase of 5,279 dols. 73c over the previous half-year, and your Directors hope that the income from this source will steadily improve.

As regards the Dock, which ought to give at least as large profits as the Wharf, your Directors regret that an unreasonable competition has prevented any adequate return from this source. It is well known that your Dock has the largest constituency of any in the place, and it is not reasonable to suppose that the competition can be carried much further.

The net profits on the Dock and Machine Shop for the half-year have been only 4,371 dols 21c., the profits derived from these accounts having been lessened this half-year by the fact that a considerable portion of the wages and other charges for December, 1868, were not paid and debited until January of this year, whilst the whole of charges for salaries, material, and labour to 30th June, in both departments, are taken to account.

At your last meeting the Directors stated that all expenditure on capital account was now limited to a small charge for dredging the entrance, and completing the pier head at the eastern side of the Dock; no change has been made in this respect, excepting some new Coal sheds and filling up of ground called for by the large increase in the stock of Coal.

The increase in the capital account is 12,731 dols. 11c., being 4,400 dols 79c. for the half-year, and 8,330 dols. 32c paid this half for work previously performed.

During the half-year there have been berthed at the Wharf 99 steamers, of 60,654 tons register; 65 sailing vessels, 30,752 tons register; and the Dock has accommodated nine steamers, of 4,578 tons register; and 24 sailing vessels, of 12,197 tons register.

The Coal stored on account of constituents amounts to about 32,000 tons.

The Directors have again waived their claim to the fees they are entitled to under the Articles of Association.

(Signed) THOS. SCOTT, Chairman.

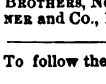
PROCEEDS UNDER STEAM, GLASGOW to YOKOHAMA (will call at Nagasaki should encouragement offer, and with leave to call at Singapore and Hong Kong), the splendid new Clyde-built, powerful, composite screw steamer WILHELMINA EMMA, 16 years, A1 at Lloyd's, 600 tons, 100-h.p. nominal, 550 indicated. This magnificent vessel offers an excellent opportunity to shippers of box and bale goods, and has handsome accommodation for first-class passengers. Will be at a loading berth in a few days, and will sail about middle of October, under the charge of an experienced commander.

For Freight or Passage apply to Messrs. MILLER BROTHERS, No. 9, Prince's-square, or to THOMAS SKINNER and Co., 12, Gordon-square, Glasgow.

---

To follow the "Spirit of the North." With immediate despatch.



DIRECT for COLOMBO, the favourite Clipper Ship WARRIOR, A1 12 years; 397 tons register, J. TURNBULL, Commander; West India Docks. This magnificent clipper is well-known for her rapid passages, and for the good order in which she always delivers her cargo. Has just passed her half time survey, and is newly metalled.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

---

Malabar Coast. To follow the "Dione." Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, MANGALORE, and CARWAR, the beautiful clipper ship ANN LUCEY, A1 11 years; 270 tons register, 450 tons burthen; WILLIAM NOBLE, Commander; West India Docks. This magnificent vessel, so well and favourably known in the Ceylon trade, presents the finest opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on Craft sent alongside without their instructions.

N.B.—Shippers are particularly requested to have the Port for which the goods are intended distinctly marked on the packages, to prevent delay and confusion on delivery.

Will meet with quick despatch, having the greater portion of her cargo engaged.

FOR POINT DE GALLE, CEYLON (calling at TRINCOMALEE), the beautiful clipper ship SIMON, A1 12 years, 223 tons register, T. VOLK, Commander; London Docks. This fine vessel is well known for the fine order in which she invariably delivers her cargoes.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

---

To sail punctually on the 26th October.

FOR SHANGHAI, the celebrated clipper ship ARIEL, A1 16, years, 853 tons register; WILLIAM COURTENAY, Commander; East India Docks.

For Freight apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

To follow the "Ariel."

FOR SHANGHAI, the splendid composite clipper HUNTLEY CASTLE, A1 14 years, 623 tons register; J. STEWART, Commander; East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

### THE MAILS, &c.

The above mails reached London yesterday, and were delivered this morning. The next inward mail, P. and O., is due next Monday, the 1st Nov., with seven days' later news. The Southampton part of the last mail arrived per *Tanjore*, on 24th, with 1,600 bales silk.

The Galle telegraphic line is still interrupted between Bagdad and Fao by the Arab insurrection The latest dates are from Hong Kong to 16th Sept. *Via* Kiachta dates from Shanghai are to the 5th Oct., received on 23rd. The Suez and Alexandria lines are working well.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per *Peluse*, arrived at Marseilles, Oct. 22.—From Yokohama: Messrs. Lauer, Laurie. From Shanghai: Messrs. Mowatt, Borel, Sicco, Wittell, Monseignors Sinclan, Pickson, Languillot. From Hong Kong: Messrs. Lopez, Serrana, Giminez, Franza, Serer, Sereza, Martinez, Cepeda, Racca, De Castellaza, Elizu, Cotti, Sagunen, Hillario, Alcazar, Alvarez, Rodriguez, Morlat, Mesdames Dilbart, Del Rio, Rajas. From Saigon: Messrs. Lafan, Toubantier, Marx, Centrieres, Mayer, Mulaton, De la Gandolie, Madame Philartre and two children. From Batavia: Messrs. Voorman, Kock, Fleury. From Singapore: Messrs. Le Maitre, Adin, Horman. From Galle: M. Garavel.

Per *Belted Will*, arrived Oct. 21.—From Hong Kong: Mr. and Mrs. Jarman and children.

By last mail, to Southampton, per P. and O. steamer *Tanjore*, arrived Oct. 24.—From Shanghai: Mr. and Mrs. Whelan. From Hong Kong: Rev. J. Kyle, Lieut. Mead, R N., Mr. Breeze. From Singapore: Mr. George. From Penang: Mr. J. Mahomed Aragai. From Galle: Lieut. and Mrs. Smithett, Mrs. Caulfield and child, Mr. Kendrew, child and servant, Mr. and Mrs. Braybrooke, three children, and two servants, Mr. Johnstone, Mr. Chitty.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Pera*, from Southampton, Oct. 16.—To Yokohama: Mrs. A. K. Brown and child. To Hong Kong: Mr. R. Bruce, Mr. C. D. Surman, and three second-class passengers. To Batavia: Mr. W. P. Beck. To Ceylon: Mrs. Wilson, Mr. J. Hamilton, Mr. N. L Bartholomenez, and two second-class passengers.

Per P. and O. steamer *Ceylon*, from Marseilles, Oct. 24.—To Shanghai: Mr. and Mrs. J. F. Wallace, Mr. J. Holliday. To Hong Kong: Mr. F. Hüchting, Mr. CHolliday, Mr. A. Heiland, Mr. H. G. Allen, Mr. G. R. Donkin, Mr. John Fraser. To Singapore: Mr. R. C. Smith, Mr. J. Ogilvie, Miss Payne, Miss Napier, Mrs. Lewis, child and daughter. To Ceylon: Mr. W. C. Brodie, Mrs. Longley, Mr. H. D. Cunningham, Col. W. H. Cox.

Per P. and O. steamer from Suez, Oct. 31.—To Shanghai: Mr. F. Müller.

Per P. and O. steamer *Nyanza*, from Southampton, Oct. 30.—To Hong Kong: Mr. E. S. Scott, Mr. C. C. Huhlmann. To Singapore: Mr. P. McMaster. To Ceylon: Mr. Carson, Mr. E. Layard, Mr. R. A. B. Dobree, Mr. and Mrs. Jessop.

Per P. and O. steamer *Bangalore*, from Marseilles, Nov. 7.—To Hong Kong: Mrs. Pauncefote, Mr. A. Bazley, Mr. P. Ryrie. To Penang: Mr. and Mrs. G. M. Sandilands. To Ceylon: Mr. and Mrs. St. Albin, Mr. Garbutt.

Per P. and O. steamer from Suez, Nov. 14. To Batavia: Mr. Wilmer. To Ceylon: Capt. D. G. Sandeman, Capt. J. H. Warnes.

Per P. and O. steamer from Marseilles, Nov. 14.—To Hong Kong (viâ Bombay): Mr. D. Maclean.

Per P. and O. steamer *Tanjore*, from Southampton, Nov. 13.—To Hong Kong: Mr. and Mrs. F. W. White, Mr. J. A. Drought. To Singapore: Mr. A. D. Forbes. To Ceylon: Mr. H. L. Forbes, Mr. Vanderspar, two Misses Vanderspar.

Per P. and O. steamer *Pera*, from Marseilles, Nov. 21.—To Singapore: Mr. A. Fraser, Mr. and Mrs. Weir and two children, Miss A. M. Dare. To Ceylon: Mr. and Mrs. J. H. Cheape, Mr. D. A. Hambrough, Mr. and Mrs. H. F. Shipster, Captain and Mrs. Irvine, Capt and Mrs. Ballantyne, Mrs. Vetch, Mr. W. Douglas, Mr. and Mrs. Newman and three children.

Per steamer *Nestor*, from Liverpool, Oct. 19.—To Singapore: Mr. H. Dalgleish, Mr. T. McMicking, Mr. W. Koll, Miss E. Mitchell. To Hong Kong: Messrs. W. Waterfield, J. S. Cape, W. Spey, J. Pill, W. H. Trout, E. Roberts, T. Harrup, F. Brockton, J. Adamson, E. Bishop, J. W. Owen, J. Phillips, E. C. Roberts, J. R. Harvey, J. Plumley, T. Tregidge, W. Macey, J. D. Chater, N. Meaden, F. W. Robinson, J. Miller, W. E. Roskelly, G. W. Whitting, Mr. Murry. To Shanghai: Mr. and Mrs. J. Simpson, Miss Irvine, Rev. G. E. and Mrs. Moule and children, Miss Laurence.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Advices by the present mail are to Aug. 31, only two days later than given in our last. A correspondent on the arrival of the Duke of Edinburgh says that the *Galatea* steamed into harbour on the 29th, saluting the fleet and the flag of Admiral Keppel. The Prince landed on the 29th and 30th, and was to proceed to Yedo in a day or two. Great interest and excitement prevailed.

#### HIOGO.

Letters from this port from the American squadron relative to the late gale have been received at New York. We give the following extract from an officer of the *Oneida*, dated Hiogo, Aug. 24 :—

We arrived here on the morning of the 21st, having left Yokohama under sail on the 17th inst. for this place, and when about mid-distance, on the night of the 19th, at eight o'clock, and logging nine knots, the barometer fell suddenly, indicating a storm, when all hands were called immediately to take in sail, but before the order could be carried out a typhoon was upon us in all its fury, which lasted for twelve hours, lashing the sea into foam, deluging our decks with water, and tearing all our sails into shreds. From the time it struck us, after which we lay to, it increased in fury, and reached its culminating point between two and three o'clock on the morning of the 20th, when an immense sea made a breach over us, carrying away our launch, second cutter, and dingy, staving in both quarters of our third cutter, and carrying away a portion of our hammock netting and pivot ports. The typhoon at this point was blinding in its rage, and during its prevalence it was almost a matter of impossibility to keep the decks or work with any result. Nevertheless, our officers and men determinedly persevered in their efforts to save the ship amid the fury of the elements, which momentarily threatened to overwhelm her. The typhoon took its course from the south-east, veering round to the south-west in its increasing fury, and, returning to its point of departure, gradually abated in violence from 8 A.M. of the 20th, shortly after which it died away, the barometer gradually lifting, and the sun at last peering through the tempest clouds. Our vessel passed through the trying ordeal nobly, and rode the gale like a stanch seaboat, which she has proved herself to be. We passed a number of native boats dismasted and waterlogged.

The *Iroquois*, which left Yokohama under sail on the 18th for Nagasaki, came in here on the night of the 22nd. Her experiences

Digitized by Google

of the typhoon and its duration were similar to those on the *Oneida* She was struck by it when close in shore three hours later than this vessel, or about 11 P.M. of the 19th. She lost all her sails, which were torn to ribbons, sprung her foremast, had her launch and a portion of her netting and pivot ports driven in board, and lost an anchor and 120 fathoms of chain cable overboard by the violence of the storm on dropping both her anchors to prevent her being dashed to pieces on the wild and rocky coast along which her course lay, and on which she was driven. One of the anchors having parted and gone by the board, steam was got up to lighten the great strain on the remaining anchor. On the abatement of the storm she steamed for this port. where we transferred to her one of our spare anchors before leaving for her destination on the 23rd.

The American steamer *Mars*, from Yokohama on the 21st, arrived here on the 24th, and from her we learn that the *Ashuelot* had reached that place in safety. A part of the typhoon visited this place, levelling some buildings in process of erection and doing damage generally throughout the Settlement.

We find that the foreign merchants and residents of this place, numbering some 300 persons, mainly composed of American, English and Dutch pioneer settlers, now in extensive business, have armed and are preparing to organise themselves into a rifle brigade or club for their mutual protection, as it appears that ten or fifteen days since, when no foreign national vessels were in harbour, some 200 Ronans, two-sworded men (a species of swash-buckler), belonging to some of the native clans, declared their design of clearing out all foreigners from this locality; whereupon the Japanese Governor had informed the various settlers, through their respective consuls, of his inability to afford them any protection whatever.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Sept. 2.

The English mail of July 16, per *Malacca*, came to hand on the afternoon of the [30th ult., bringing London telegrams—by the *London and China Express Telegraphic Extra*, Galle, Aug. 10—to Aug. 5. Telegrams have been received, *via* Kiachta, dated London, Aug. 10, in nineteen days.

PEKING.—Baron von Gumpach writes to the *North China Daily News* that Sir Rutherford Alcock has not pressed the telegraph question on the Tsung-li-Yamun since November last. It is openly said that the Chinese Government have stopped the supplies to the Burlingame Mission. The expenses of the Mission for the first year are said to be $263,000. These rumours appear to have some foundation, as they are not contradicted in Shanghai. Mr. Hart will spend the winter in the South; he evidently considers himself safe while England and America are represented by Mr. Wade and Dr. Wells Williams. Sir Rutherford Alcock will return on leave of absence to England shortly after Mr. Wade arrives in Peking. It is decided that the Duke of Edinburgh will not visit the capital. The Throne has been memorialised on the subject of Lekim taxation; it is advised that a tariff of dutiable goods, and of the duties payable, shall be posted up at every barrier, so as to prevent extortion. "On the best authority" it is said that the Chinese Government seriously entertain a project for the construction of an experimental railroad from Shanghai to Soochow.

CHEFOO.—Mr. Markham, H.M.'s Consul, is about to proceed shortly on leave of absence to England. A Christian convert has been cruelly beaten near Tung-chow by the Che-Hsien, for preaching the Gospel.

HANKOW.—There is a slight rise in the river since my last letter. A correspondent says that the real object of the visit of Li-Hung-Chang to Szechuen, to enquire into, and if possible arrange, a disagreement between the Viceroy and the Commander-in-Chief. A very pretty harmonium has arrived for the church.

NEWCHWANG.—As the *Kiu-shu* was leaving Newchwang she saw the British barque *Falcon*, Linnell, master, bound out, with a cargo of peas, &c., a total wreck in the river; a pilot was in charge.

NINGPO.—Some misunderstanding about placing the buoys on the Tiger's Tail has arisen between the Commissioner of Customs (Mr. Bowra) and the Harbour Master (Capt. Law); the latter has been suspended by the former, pending the decision of Mr. Hart. The concessionaires of the proposed telegraph from Singapore to Saigon have made arrangements to lay a submarine wire from the coast of Cochin China to Hong Kong, and thence to Nagasaki, connecting *en route* with a vessel to be moored near Chusan.

SHANGHAI.—Steps are about to be taken to get a survey made of a new channel from the Yangtsze to the sea. The channel lies to the north of the Tungsha bank, and bears E. by N. and W. by S. between Shaweishan and Block House Islands. The channel, if used, would save about fifty miles to the northern steamers.

Regarding the much wanted light on Gutzlaff, the *Courier* has the following:—

"From Mr. D. M. Henderson, chief lighthouse engineer, we hear that the works of the new Gutzlaff Lighthouse are progressing satisfactorily, though slowly. Indeed, when we learn that all the materials have to be landed on a difficult shore, where even in favourable weather such operations are only possible at a particular state of the tide; and that, being landed, they have to be carried by coolies up a steep ascent to a perpendicular height of 250 feet, which makes the carrying up of a dozen bricks an hour's labour for one man, we can well understand that rapid progress in such a work is impossible. Still the tower has been carried up as far as the light-chamber, and considerable progress has also been made with the light-keeper's house."

Mr. Medhurst, H.B.M.'s Consul, has been suffering from indisposition. The members of the China Inland Mission have presented him with a testimonial in the shape of a handsomely bound copy of the "Bible of Every Land," with a suitable inscription, in commemoration of his action at Yungchow.

The Shanghai summer may be said to be finished; it has not been a long one. but it has been a very hot one. The mortality has been small. Those who can manage it are off to Chefoo, or to the Chusan Islands, which is getting quite a favourite place.

Prince Alfred is expected here at the end of the month. The Reception Committee have had meetings; no external show has yet been made.

Robert Evans, third steward of the *Diomed*, fell from a sampan and was drowned. George, the murderer of the Chinaman at Farnham's Dock, was hanged on the morning of the 31st Aug. in the presence of the Consular officials, the Che-Hsien, the magistrates of the Mixed Court, and the brother of the murdered man. The execution was private, and conducted within the walls of the English Gaol.

At a sale of land on the 28th August, four mow near the race-course went off for Tls. 90. A plot of about 14 mow, with a 400 feet water frontage, at Woosung, went for Tls. 135, so that land is *not* looking up.

The Shanghai General Chamber of Commerce has paid a graceful and well-merited compliment to Messrs. Michie and Francis, its delegates, undertaking the expedition with Consul Swinhoe into Szechuen.

The Municipal Council held their meeting on the 31st August. The Finance and Public Works Committees furnish long reports; the main features are, in the first, the early prospect of a revaluation of land for the purposes of taxation; this has long been wanted, as the present assessment must tend to give people at home a false notion of the value of landed property. The Council have effected arrangements for the commutation of the foreign tolls over the Soochow Creek Bridge. The Bridge Company are to put up a new iron bridge at once. The Council have effected re-engagements with their present staff, as agreements expire. A legal adviser, Mr. Rennie, has been appointed. The Public Works Committee's report is of a routine character; it sanctions erection of telegraph wires through the settlements. A contract has been made for constructing floating pontoons along the front of the English settlement. Additional funnels are being constructed. It is proposed to renew the present wooden bridges across the Yang-Kong-Pang Creek by iron bridges, when opportunity offers. The Council have *again* written to the consular representatives of the Powers not yet having given their consent to the revised code of land regulations, "pressing upon their attention the imperious necessity of very prompt and decided action in establishing the revised regulations."

In my last I informed you that H.M.S. *Zebra*, Commander Trollope, R.N., had left for the wreck of the *Hamilla Mitchell*. The *Zebra* reached the Island of Leuconna on the 24th Aug., steamed round the rocks, and then went to anchor at Senhouse Island, some twenty miles off. She remained there until the 28th, when she paid another visit to the wreck, and then shaped her course for Shanghai, arriving on the 30th. Indeed, Captain Trollope, by his indecision, has done little in the interests of British shipping—at least in this case—to assist in saving valuable property. Had the *Zebra*, when she heard of the wreck, gone down as requested by H.M.'s Consul, she most undoubtedly could have rendered the greatest assistance, and perhaps saved a considerable portion of the cargo, as well as the treasure, nearly £50,000. I am sure, had Sir Harry Keppel been at hand, things would have been different. Captains Bash and Trollope appear to be hardly the men for service in China.

The Customs' steamer *Kwa Sing* started on the 28th, with Capt. Lewes, the principal marine surveyor at this port, for the wreck. The ship has broken in two, the forepart falling forward, the afterpart settling by the stern in deep water; but little chance is entertained of recovering the treasure.

The case of the Wae-Kung Bank *v.* captain and owners of the S.S. *Suwonada*, a collision case, damages claimed Tls. 1,450, has been heard before the U.S. Consul-General.

Shortly before the *Osaka* left Nagasaki the *Iroquois* arrived from Yokohama, bringing the intelligence that that place had been visited with a severe typhoon; what extent of damage was done was then hardly known. The *Ocean Queen's* deck had been swept and five men washed overboard; the *Algerine* had all her boats washed away, and fears were entertained for the safety of the barque *Juan Rattary*, and the U. S. S. *Ashuelot*, as they were both just outside Yokohama when the blow came on. The *Ashuelot* was last seen steering for Simoda Bay, but making very heavy weather.

Digitized by Google

We hear that the Dutch schooner *St. Helena*, while at anchor in Nagasaki, sunk at her moorings.

Shipping.—The Diomed made a capital run of 78 days out, from Liverpool; 65 were her actual steaming days. The following ships from England have arrived since last writing:—John Lidgett, Tyburnia, Ocean Chief, Shun-lee, Lizzie Iredale, Albuera Gladiateur. The Stanley Castle has left for New York. The Austrian frigate Archeduc Friedrick has left for Japan.

COLLISION.—THE "SUWONADA."

The following decision in this case is from the *Evening Courier*:—

The libellants claim that a junk, their property, was run into on the evening of the 11th July by the *Suwonada*, while at anchor in the Woosung river, one mile below the inner-bar mark, and 200 feet from the Eastern shore. They say they had lights up, were in a proper anchorage, and neglected no precautions before the collision, or failed in any way to discharge duties incumbent on them.

The libellants' case is rested on the above statement.

The evidence shows that they were not at anchor where represented. Steamers by no chance go there, and the steamer *Suwonada* took the usual course over the bar on the night in question. It does, however, show that if the junk was run into while at anchor, she was at anchor on the inner bar, or near it toward Shanghai.

The passage or thoroughfare at the bar, and near it toward Shanghai, is narrow, and an improper place for vessels to anchor.

It is a settled principle that a vessel which anchors in such a passage cannot recover damages for injuries sustained in a collision with a vessel using the passage, provided the second vessel is managed with care and discretion. There is no divergence on this point between English and American precedents. The burden of proof rests in such a case with the libellants.

The libellants have failed to show that there was negligence or mistake on the part of the steamer, unless it was negligence or mistake to use the river at all at night. There is no such rule, nor, so far as I can judge, sufficient necessity for it.

I see no reason to doubt that the *Suwonada* was managed with carefulness and in a seamanlike way. She had a proper lookout; her lights were set; she was, and had been, running slow; she could not stop without becoming unmanageable in a dangerous place; she could not drop an anchor, as the water was too shoal to admit of it being done with safety; she had no chance to pass to one side or the other without doing greater damage to other junks, or going on shore.

The respondents urge that the junk was not at anchor when the collision occurred, but under way, and dropping up the river. The evidence which they offer is very strong indeed; consisting of that of the officers of the steamer, and of an outside witness, the Assistant Harbour Master at Woosung, who denies the statement of the Chinese that the junk was at anchor at the place of the collision at sundown on the 11th July. If dropping up, and an unavoidable accident occurred, it would be necessary to divide the damages.

But to give judgment for the libellants on this score would be to go outside of the case which they have presented to the Court. There is no obligation on me to do this, nor have I any disposition to give a favourable judgment when I can only do so by convicting the successful parties of having presented a false case.

Decree: I dismiss the complaint, with costs.

George F. Seward,
United States Consul-General, Acting Judicially.

Assented to—W. G. Blydenburgh, John Lindsley, A. C. Percy, Associates.

The following items are also from the *Evening Courier*:—

A Naval Court was held at the British Consulate to inquire into the circumstances attending the loss of the British ship *Hamilla Mitchell*, on the Leuconna Island, on the 10th of August last.

The Court was composed of the following members:—Lieut. Yelverton O'Keeffe, commanding H.M.'s gunboat *Havoc*, president; R. J. Forrest, Esq., H.M.'s Acting Vice-Consul; Lieut. R. Pipon, H.M.S. *Zebra;* Navtg. Lieut. W. P. Haynes, do.; Captain Stephens, *Tyburnia;* W. H. Whyham, Clerk of the Court.

Judgment.

We are unanimously of opinion that the loss of the British ship *Hamilla Mitchell*, on the night of the 10th of August last, was occasioned by the influence of unknown currents, causing the vessel to drift on the Leuconna Island. From the evidence we think that no fault can be found with the navigation of the ship. The captain, officers, and crew are, therefore, entirely exonerated from all blame in the matter.—Yelverton O'Keeffe, President; R. J. Forrest, R. Pipon, W. P Haynes, J. Stephens,—W. H. Whyham, Clerk of the Court.

We hear that the steamer for a long time known as the *Nora Creina*, has, under the name of *Fun-lee-yuen*, been purchased from the Chinese by a British firm here, and is once more under her old flag.

We have received information that three lorchas or junks have arrived at Ningpo, laden with merchandise salved from the wreck of the *Hamilla Mitchell;* the native authorities have taken possession of it, but we understand that Captain Brunscombe will proceed to Ningpo as soon as possible and claim the cargo.

☞ In the list of passengers leaving by this French mail will be observed the name of R. A. Mowat, Esq., who has for two and a-half years performed the duties of Law Secretary and Police Magistrate in our Surpreme Court. He will be succeeded here by Geo. A. Jamieson, Esq.

An Amoy correspondent mentions that the Viceroy of Fohkien has deputed a commission to inquire into the effect of the Lekim; and that good is expected from the investigation.

## HONG KONG.

Dates from this port are to the 9th Sept.; on the previous day the London mail of 30th July arrived out with telegrams to 16th Aug. The items of news are of no great interest or importance.

A rumour has obtained currency that the Government had succeeded in finding a purchaser for the old Mint property. A meeting of the Legislative Council which had been called for the day of the mail's departure was postponed until the 17th Sept. The United States steamer *Iroquois* had arrived from Yokohama; she had sustained considerable damage in a hurricane, and had been compelled to put into Nagasaki in order to effect some temporary repairs. H.M.S. *Rodney* grounded upon entering the port, but was backed off without difficulty. Mr. Wilson, the late Surveyor General, has been presented with a tablet bearing complimentary inscriptions in English and Chinese by the Government contractors who have been working under him during the last six years.

The *Government Gazette* contains an amended return of the number of inhabitants in Hong Kong on the 1st June last, from which it appears that the total of European residents reached 4,889, of Chinese 114,280, and of other native population 2,810, the grand total, therefore, being 121,979.

A bill had been filed in the Supreme Court, by Messrs. C. P. Henderson and Co., to recover from the Comptoir d'Escompte the value of certain goods shipped to Messrs. Lyall, Still, and Co. Invoices were made out bearing the words, "Proceeds to be specially remitted to meet the acceptances of G. Lyall and F. Still." This document was deposited with the defendants as collateral security for the payment of a promissory note given by the firm of Lyall, Still, and Co., and the goods were sold by the defendants on arrival. On a plea founded upon the heading to the invoice and an omission of the words "or assigns" from the bill of lading, the plaintiffs claim to have an equitable lien upon the goods, and maintain that they were not assignable. The defendants' answer, while admitting the facts as stated, maintains that the plaintiffs can have no lien nor claim. Judgment on the case was reserved.

## COCHIN CHINA.

—o—

### SAIGON.

The following is from the Circular of Messrs. Wm. G. Hale and Co.:—

Rice.—At the close of our last market report we gave $1 27c. as the quotation for round grain; upon the arrival of the mail from China, bringing considerable orders for Japan, the Chinese sellers advanced their rates to $1 34c., and subsequently $1 36c. was paid, at which some 70,000 piculs were sold. The demand subsequently abated, and prices receded to $1 33c., at which transactions for about 50,000 piculs were made, nearly all of which was for the Japan market. We now quote round grain at $1 33c. (equal to 5s. 4¼d. f. o. b.) and the long grain at $1 16c. (equal to 4s. 8¼d. f. o. b.), at which about 20,000 piculs were taken for Bourbon. For Europe the only vessel loading is the *Jeanne Alice*, 20,000 piculs for Belle Isle, f. o. As to future prices, should the demand for Japan continue, we cannot at this late season look for any material change, although the supplies for the past two weeks have been more liberal. Reports from the interior are very encouraging for the coming crop, the rains have been most abundant, and the prospects are that next year's product will not only be larger than the present, but will be earlier in the market.

Tonnage.—The arrival of many seeking vessels has still further depressed the rates. For Europe there has been no settlement; for Hong Kong, round sums equivalent to 10 cents per picul have been accepted, for Japan 32½ cents is the current rate; we annex list of charters since our last.

Exchange.—With no demand for Europe there is no sterling offering, and we give 4s. 6½d. as nominal rate Hong Kong 30 days' sight with documents 2½ to 2¾ per cent. Singapore 3 days' sight —par.

The following is from the Circular of Messrs. Kaltenbach, Engler and Co.

Cotton.—Arriving lots being immediately shipped off to China stocks on hand are small, and prices have been well kept up at $5 for uncleaned, $18 for cleaned No. 1, and $16 for cleaned No. 2. Exports since our last amount to 12,625 piculs.

Hides.—Have experienced no material change since our last, and are worth $12½ for Cow and $8¾ for Buffalo Hides. We may observe that the choice of the quality of the hides offers great difficulty.

Horns.—Some lots shipped to Europe per *Jeanne Alice* have been bought at $8¾.

Black Pepper.—The season may be considered at an end. The *Rosendael* and *Jeanne Alice* are filling up very slowly, and it is not likely that there will be anything left for another vessel. Last lots have obtained $9¼ per picul.

Digitized by Google

Cocoa-Nut Oil.—Supplies have not been of great importance; nevertheless holders had to consent to further reductions. We quote to-day $5¼ per picul.

Gamboge.—The greatest part of this produce has hitherto been sent from Cambogdia to Singapore or Bangkok, but lately larger lots have been directed to our port and shipped off to Europe. Present quotations are $58 per picul.

Piece Goods.—Arrivals have been rather heavy, especially of White Irishes, for which the demand has become weaker, while Grey Shirtings 8¼ lbs. are still inquired for. Grey Shirtings, 8¼ lbs., $3.10; 7 lbs., $2.60; T-Cloth, 6 lbs., $1.80; 5¼ lbs., $1.75; T-Cloth, 5 lbs., $1.70; 4¼ lbs., $1.60; Irish Linen, $2.32½ to $2.35.

## SIAM.

—o—

### BANGKOK.

The *Bangkok Summary* has the following:—

Formerly, at this season of the year, the harbour has generally been nearly empty of foreign vessels, but this year it is different. By the shipping list it appears that there are to-day 29 foreign vessels of all rigs, sizes, and nationalities in port, and still they continue to arrive, and, being quickly loaded, are as quickly despatched. Rice from up-country comes in with little or no diminution in supplies, and with scarcely any difference in price. The supply is fully equal to the demand, and we believe it will continue to be so till the new crop makes its appearance in the market. As far as we can learn, the rice up-country is still abundant, notwithstanding the large quantity which has been exported during the former part of the year. The cultivators of the soil are now reaping the benefit of their extra labour last year in bringing a larger area of ground under cultivation, and planting more seed than they ever did in Siam in any previous year.

The annual meeting of the Protestant community of Bangkok assembled in H.B.M.'s Consulate, T. G. Knox, Esq., H.B.M.'s Consul-General, in the chair.

The Treasurer, J. Blythe, Esq., presented the accounts of the church up to date, by which it appeared that the church is debtor to the Borneo Company (Limited) 258 ticals.

The accounts having been passed, Dr. D. B. Bradley rose and stated that the time having now expired during which it had been proposed, at the last annual meeting, to try the form used in the Church of England service in the chapel here, it was desirable that a change should be effected in the services on the Lord's day, and proposed a return to the old mode of worship. Dr. House seconded the motion. Mr. Blyth rose and said that, as he understood that most of the missionaries desired a change in the services he believed it would be best to do so. The motion was carried unanimously.

Mr. Knox proposed that a committee be appointed to arrange the services of the current year, and named Dr. Bradley, Dr. House, and Mr. Partridge, which was seconded by Mr. Blyth, and carried. Mr. Knox proposed a vote of thanks to Mr. Smith, for having conducted the Church of England service during the past year. Mr. Blyth seconded the motion.

A daily and weekly sheet is now issued at Bangkok, called the *Advertiser*. Bangkok is certainly going ahead.

## CEYLON.

—o—

### OPENING OF THE LEGISLATIVE COUNCIL.

#### THE COFFEE DUTY RESCINDED.

(FROM A CORRESPONDENT.)

Colombo, Sept. 23.

The Governor has delivered his utterances on our circumstances present and past, and our prospects present and future, in a very able speech to the Legislative Council at its opening yesterday. In reviewing our position, compared with what it was when he left us 15 months ago, his Excellency observes a great improvement in the country, and a marked difference in the condition of the people. These he means to encourage, and considers our first and greatest wants to be "more food for the people and greater facilities for locomotion."

To these points he directs the first attention of the Council, and proposes that the export duty on coffee should cease from Jan. 1, 1870, as he proves to them by figures that it is no longer required, and that the income of the railway over its working expenses will suffice to pay off the interest of the railway debt and the debentures as they fall due. You must understand that the export duty was originally imposed at the request of the planters, as a guarantee to the Government that there would be no financial embarrassment or risk in their guaranteeing interest on the money necessary to be raised for the construction of the line from Colombo to Kandy. But they qualified the offer by stipulating that this tax should be collected only so long as the railway was unable to provide for itself, and for such a sum as the local Government were unable to meet.

Our late clever but subtle Colonial Secretary converted the planters' conditional offer into an unconditional primary mortgage over their estates for some twenty-five years; and he did it thus: he caused to be endorsed on the coupons that the export duty was especially created to cover the interest, and was, therefore, mortgaged to the scrip-holders in security till all the debentures should be paid off. The trick was complete before the public were aware of it, and when they became so they claimed for a release from such a binding bargain—a bargain to which they had not been parties; but this high-minded official waxed indignant at what he stigmatised as an intended fraud upon the debenture holders, and insisted on the planters continuing to be mulcted of their pound of flesh. No matter that it was not required; no matter that the surplus railway revenue was of itself sufficient. It had been promised, and, in the eyes of this red-tape official, must be yielded up till the last debenture, some fourteen years hence, fall due and be liquidated. Now the fallacy of this reasoning was pointed out to him at the time. It was shown that besides the railway surplus being sufficient, there was always the general revenue, of which this export tax formed only a small portion, to guarantee the debentures. There was also the railway itself—now become a property—as a further security, for, as was pointed out in a series of able letters signed "Coloniensis," in the Ceylon *Observer* some two years ago, the debt had been reduced by two-thirds of its original amount, the railway itself having thus become a property, and being available against debts contracted on its behalf. All was of no use in the eyes of this inexorable statesman, who, in the Governor's absence, was more than Governor in his stead, as he was the chief adviser (and a very close-fisted one too) of the gallant officer who nominally held the reins, but who, being only a *locum tenens*, was not likely to undertake risks by opposing the counsels of his chief adviser in the Government, whom he had a right to consider better informed and more experienced in such matters than himself.

While, however, our astute Colonial Secretary was working in this obstinate and obstructive way here, our real Governor, then at home on leave, was using his influence with the Home Government to rid us of a burden under which the island groaned, which was felt to be oppressive, and which he saw to be unnecessary, and he succeeded. In his inauguration speech he now tells us he has authority to relieve us of the tax, which will therefore end with this year. But he has not considered one class alone in his scheme for improvement; he has ordered a sum of money to be at once appropriated to extend irrigation works for the natives, and he recommends the Council to include a large sum for this purpose in the estimates for next year. He has thought of roads also, and has laid before the Council a scheme for thoroughly metalling that very important road from Colombo, by Ratnapoora, to Happatella and Badulla, thus benefiting that long neglected and outlying district. And in order that other districts not benefited by the railway may not be without their recompense, he suggests the purchase of a steamer on the colony's account to trade round the island, and bring to market the produce of those distant provinces at present difficult of access and far from a market or a proper shipping port. If after all this there be money in the Treasury, or if the public choose to submit to the Export tax for another year, he proposes that the railway line should be continued to Gampola. And this would be a wise submission if the planters and the public interested would only see it. But I fear they have felt the oppressiveness of the tax so acutely when forced to bear it, that it is very doubtful if they will wish to continue it self imposed now that they have an opportunity of getting relieved of it.

The Governor also treated of the Galle Harbour improvements in contemplation, and for which his own views are favourable, but which matter he leaves in the hands of the Council. The barrack construction, too, he has got the consent of the Imperial Government to limit to the funds set aside for the purpose—now some £40,000—which will doubtless be enough for all the troops this island will now require, in addition to the accommodation already existing throughout the country. The Royal Engineers, who are dab hands at framing estimates, had put in some which to carry out would have cost the country some hundreds of thousands of pounds, and used up all their surplus for many years to come.

The currency question had also a little of the Governor's attention. But it was dismissed with the intimation that he had appointed a commission to consider the question, and that when their report was made it would be submitted to the Council. Some people think his Excellency ought to have taken the public into his confidence before framing the minute, making the rupee the standard currency; what the commission are now called on to decide is merely whether we are to have rupees, annas, and pie, rupees, shillings, and pence—or rupees and cents, the £. s. d. being predestined to annihilation on the ground that the Lords of the Treasury cannot recognise any false or fictitious currency.

On the whole it was an able, an exhaustive, and a statesman-like speech, and shows that during his leave in England the Governor has not been idle in the interests of the Colony.

The following members were present at the opening of the Legislative Council:—President: His Excellency the Governor, Sir H. G. R. Robinson, K.C.M.G. Official members: *Major-General Renny, C.S.I., Senior Officer Commanding the troops; *the Hon. H. T. Irving, Colonial Secretary; the Hon. R. F. Morgan, Queen's Advocate; the Hon. C. Vane, Treasurer; the Hon.

[The Governor's speech can be seen at our office by any subscriber.—Ed. *L. & C. T.*]

## THE ALBERT LIFE ASSURANCE COMPANY.

(FROM A CORRESPONDENT.)

Much consternation has been felt in Ceylon and in India by the failure of this great company, and no little obloquy is being heaped upon the directors and others who have been in the secret of the rotten state of the company's affairs for some years back. They had a considerable standing in the East. In Ceylon even an unusually great number of premiums had fallen to their lot; for although there are several other companies competing with them for business, the office that was easiest to deal with, and least particular as to the character of its select lives, came in for the largest share of such business. Besides, their policies were open to classes not usually accepted by other insurance offices. Hence, as well as because of their low rates of premium, applicants for assurance flocked to their standard. In the Indian mutinies it was believed they lost heavily; and among the well-informed it has long been considered that they ought to have failed then, when general sympathy would have been accorded them, and very likely another office would have taken over their business. They did not adopt this course, however, but carried on in the same bouncing manner as before, and went into the purchasing of other doubtful companies. In 1866 they began to be blown upon in Ceylon, for the following reasons:—1. They had not paid a bonus, which they had promised two years before; and. 2ndly, their balance-sheets, published in London and India, did not show the same balance. Questions were asked, but not answered. The Ceylon secretary and board of directors resigned. The Indian secretary came down frm Calcutta to set things right, and gave out that the office was sound, but slandered, and appointed a mercantile firm of standing here as managing agents. In consequence of this move confidence was restored to some extent here. New policies were issued, and all went merry as a marriage bell. Still the leaven which had been dropped by those official resignations here was at work. A writer under the signature of "Life Assurance" pointed out in one of the local newspapers the inconsistency between their published statements at home and those published in India, denied the accuracy of their balance-sheet, and asked a number of pertinent questions which it did not suit them to answer. He was threatened with an action, but winced not—nor was action taken against him. Meantime the doubts as to the company's stability had crept up to Madras, and on to Calcutta. At the latter place a meeting of policy-holders was convened to take into consideration the various circumstances affecting the company. Other meetings followed. A committee was appointed to confer with the directors, who were asked certain questions. These were not answered, but referred to the head office in London. Head office telegraphed out—"Don't let meetings be got up. Tell policy-holders a special guarantee is being provided for Indian policy-holders. London board will answer questions if put in writing." Policy-holders had by this time got more anxious and more inquisitive, and appointed a deputation to go home and face the directors there, and get explanations. Presently out comes a telegram, saying that the Albert had suspended payment. But agents advised policy-holders to pay premiums now falling due, and it would be returned if the office did not recommence, or be taken over by another company by January next. Not many, I fancy, responded to this polite request. In Calcutta a meeting of policy-holders brought the directors there to book. They appeared, and through their secretary explained that ever since 1861 the London office had abstracted from the Indian up to £270,000; that Indian office had repeatedly but in vain protested, and now state it in self-vindication ! ! ! Meantime at home they seem to be working the oracle pretty much as they like. They first propose, under date Aug. 27, to go on again, paying policy-holders the value of their premiums less 25 per cent., and creditors less 50 per cent.! Close on the back of this (August 30) follows a telegram announcing that a meeting of shareholders in London resolved that the company be registered under the Act of 1862 for voluntary liquidation; that official liquidation has found that profits from 1854 to 1861 had been £114,774; and that during the subsequent seven years £1,250,000 had been lost, chiefly by buying up other companies. The policy-holders here and in India have a right to some say in this matter, and should certainly object to any winding-up as proposed till they know how the funds have gone, and how it is that seven years are lumped together at a time to show a profit or a loss; also how the distinct years showing losses should not be indicated, and those showing profits the same. Many other pertinent questions, such as the position and ability of the shareholders, would naturally suggest themselves, and ought to be asked before consenting to the voluntary liquidation so complacently proposed by the shareholders.

In this little place even much loss will ensue. Many a widow that was thought provided for will be left destitute, and many an orphan will be without the support to which he was entitled to look on the decease of a parent, who thought he had left to his family this last pledge of affection and duty.

# Commercial Report.

(*For dates see First Page.*)

## IMPORTS.

YOKOHAMA.—The advices by the present mail are two days later than those received *via* San Francisco which appeared in our last issue.

SHANGHAI.—Grey Shirtings: A quiet market has to be reported. Arrivals from England had been numerous, and had somewhat frightened Chinese buyers, and put a partial stop to foreign speculation. Holders continued firm, but Chinese were not prepared to pay the rates asked. 7 lbs. Cloth had been in better inquiry, and prices showed an advance of 8 cand. per piece. T-Cloths were much as last advised, a few sales of good Cloth being quoted at Tls. 1.81 per piece. The lower counts of White Shirtings had risen in value, and prices were 5 cand. per piece higher. In other goods there was not much change to note. Metals—Iron: Sales of Nail Rods had been on a limited scale, comprising only about 25,000 bundles, at Tls. 1.80 to Tls. 2.10 per picul; the dealers having supplied their wants to a great extent at public sales; stocks had been greatly increased by the simultaneous arrival of several vessels, and prices were, in consequence, lower by 1 to 2 mace per picul. Bars had also been affected by the above causes, but not to so great a degree; prices had fallen 1 mace per picul. Lead: Numerous arrivals had caused still further depression. There had been no sales of importance. Coals: No transactions on the market, and rates unchanged. Current quotations:—Grey Shirtings, 7 lbs., $1.9.6 to $2.0 per piece; 8.4 to 8.6 lbs., $2.1.6 to $2.2.0; White Shirtings, $2.1.0 to $2.9.0; T-Cloths, 6 lbs., $1.4.0 to $1.6.8; 7 lbs., $1.6.5 to $1.8.8; 8 to 8.4 lbs., $2.0.0 to $2.4.0; American Drills, 40 yds., $3.8.5 to $4.0.5; American Jeans, 30 yds., $3.1.0 to $3.1.5; American Sheetings, 40 yds., $3.6.0 to $3.7.0; English Drills, 40 yds., $3.5.0 to $3.8.0; Dutch Drills, 40 yds., $3.6.0 to $3.7.0; Camlets, English, SS, $12.0 to $12.5.0; Spanish Stripes, $0.5.5 to $0.8.0 per yard; Medium Broad and Habit Cloth, $0.9.0 to $1.4.0 per yard; Long Ells, Scarlet, $6.3.5 to $6.4.0; assorted, $6.5.0 to $6.6.0 per piece; Iron—Nail Rod, $1.8.0 to $2.1.5; Hoop, $1.8.0 to $1.9.0; Flat and Round, $2.1.5 to $2.2.0 per picul; Lead. $4.8.5 to $4.9.5; Tin Plates, $4.5.0 to $4.8.0 per box; Steel, $3.2.0 to $3.4.0 per tub.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular:—An improved feeling is to be noted in the market for nearly all staple imports, though transactions in most articles have been moderate, settlements of Cotton Yarns only having been upon an increased scale. Raw Cotton has been taken to a very moderate extent at previous rates, holders displaying no wish to part with their stock except at their own prices. Cotton Goods show a further improvement, and all descriptions are held with more firmness. T-Cloths and Grey Shirtings may be quoted rather dearer. Fair settlements of Dutch Drills have been made at $4.80—an advance of 10 cents per piece. No change has taken place in American Cotton manufactures, but dealers are inquiring somewhat. Transactions in Cotton Yarns have been large, sales having amounted to about 1,000 bales Nos. 16 to 24, and 250 bales Nos. 28 to 32, a considerable proportion of which have been taken at an advance of $3 per bale.

## EXPORTS.

### TEA.

Messrs. Olyphant and Co.'s Circular contains the following review of the condition of the market at the several ports:—

SHANGHAI.—Black: Common Black leaf has been in good demand during the week, and the quotation for this grade is now Tls. 20.50 to Tls. 21., equal at 5s. 11d. exchange and 30s. freight, to 1s. 1¾d. to 1s. 2d. laid down in London. No Teas having any pretensions to quality can be obtained under 22 tls. (1s. 2¼d.), and fair medium kinds are firm at 24 tls. (1s. 3¾d.), higher rates being in some instances demanded. There are no good medium or fine Teas now on offer, but there are one or two parcels in the hands of speculators, probably intended for resale on this market. Settlements and reshipments amount to 15,500 chests, and the stock is estimated at 30,000 chests. Green Teas: Further settlements have been made for American account, at prices showing little or no decline from those paid at the opening of the market. Fychows and Twankis have realised Tls. 40 to Tls. 44.25, and Shanghai packed and Pingsuey Teas Tls. 28 to Tls. 35.25, the latter being probably destined for England. Two chops of fine Moyune have also been taken at Tls. 40.50 to Tls. 41. We hear of further business to a slight extent, but the market is now very quiet, and we hope that it may remain so until holders give way, to a sensible extent, in their demands. Settlements and reshipments aggregate 13,700 half-chests, and the stock consists of 56,000 half-chests of all kinds. The Mary Moore took 767,185 lbs. for London, and the Stanley Castle 588,560 for New York.

FOOCHOW.—No change of special interest has transpired in this market. Prices remain firm, and Congous in steady demand. As, however, supplies continue to come forward, easier rates are anticipated. The stock of Oolongs is steadily increasing, and there is no business to report in them. There are eight vessels on the berth for London, two nearly full. With this full supply of shipping a decline is looked for before long. Departures for London—Magellan with 797,722 lbs. and John Milton with 785,623 lbs.

AMOY.—In Teas there is literally nothing doing; Oolongs are very firmly held by teamen, in expectation of a deficiency in the supply, while Congous are bought up in advance of arrivals. There is nothing of interest to report with regard to shipping.

CANTON.—Some small settlements of Scented Teas, chiefly Capers, have been made at prices about on a par with those last reported. The native brokers state that prices have advanced in the country, and that teamen have made purchases at the increased rates.

### SILK.

SHANGHAI.—The English mail of 27th August had about 1,718 bales on board. Since its departure barely 350 to 400 bales had found buyers; and notwithstanding the adverse home advices received by telegrams, the majority of the settlements were reported to have been purchased at a further advance. The transactions consisted chiefly of medium to common Tsatlees and Taysaams, the only lot of chop silks said to have been set

Digitized by Google

tled being ten bales Kin-tsong at Tls. 555 per picul. The Chinese were very firm in their demands for full rates, the enhanced value of dollars and the consequent higher cost of silk up-country causing them to hold their stocks, although estimated at fully 7,000 bales. Many complaints had again been made about mildewed silks, several lots had been rejected on account of such damage, and the unsold stock was believed to contain a great quantity of this very undesirable silk. The French steamer took 405 bales.

CANTON.—The market had advanced, and Loong Kongs were $10 per picul dearer, while for descriptions suited to the Bombay market a still greater rise has to be reported. Indian buyers had bought largely at the enhanced rates. In Re-reels but little had been done, and the quotation was $560 for best quality.

The Admiralty have accepted the Simon for the conveyance of stores to Trincomalee.

## STATIONS OF THE ROYAL NAVY IN CHINA, JAPAN, &c.

Adventure, 2, screw troopship, Capt. Henry J. Raby, V.C.—Japan.
Algerine, 3, screw gun vessel, Lieut. H. R. E. Grey—China.
Alligator, at Whampoa, lent to Consular Department.
Avon, 4, double-screw composite gun-vessel, Com. G. D. Fitzroy—China and Japan.
Banterer, 2, screw gunboat, Lieut.-Com. C. F. W. Johnson—China.
Bouncer, 2, screw gunboat, tender to Princess Charlotte—Hong Kong.
Bullfinch, 3, double-screw gun-vessel, Com. Edward F. Lodder—India.
Cockchafer, 2, screw gunboat, Lieut.-Com. Seymour S. Smith—China.
Cormorant, 4, screw gun-vessel, Com. Hon. Albert D. S. Denison—China.
Cossack, 16, screw corvette, Capt. John E. Parish—India.
Daphne, 4, screw sloop, Com. G. A. Douglas—India.
Dove, 2, screw gunboat, Lieut.-Com. M. J. Dunlop—Japan.
Dryad, 4 screw sloop, Com. P. H. Colomb—India.
Dwarf, 4, double-screw composite gun-vessel, Com. C. F. Walker—China.
Elk, 2, double-screw composite gun-vessel, Com. Algernon G. Wootton—China.
Firm, 2, screw gunboat, Lieut.-Com John Hext—China.
Forester, 2, screw gunboat, China, to be sold or disposed of.
Grasshopper, 2, screw gunboat, Lieut. and Com. L. C. Keppel—China.
Haughty, 2, screw gunboat, Lieut. K. H. A. Mainwaring—China.
Havock, 2, screw gunboat, Lieut. and Com. Yelverton O'Keefe—China
Hornet, 4, double-screw gun-vessel, Com. Duncan G. Davidson—China.
Icarus, 3, screw sloop, Com. Lord C. T. M. D. Scott—China.
Insolent, 2, screw gunboat, China.
Leven, 3, gun-vessel, Lieut. and Com. H. H. Edwards—China.
Manila, screw steam-vessel—Japan.
Meeanee, hospital ship at Hong Kong.
Melville, hospital ship—Hong Kong.
Midge, double-screw composite gun-vessel, Com. Charles C. Rising—China.
Nymphe, 4, screw sloop, Com. Edward S. Meara—India.
Ocean, 24, screw armour-plated ship, Capt. Wm. N. W. Hewett, V.C., flagship Vice-Admiral Hon. Sir H. Keppel, K.C.B.—Japan.
Opossum, 2, screw gunboat, Lieut.-Com. A. C. May—Hong Kong.
Pearl, 17, screw corvette, Capt. J. F. Ross—Japan. To be relieved by Barossa.
Princess Charlotte, 12, receiving ship, Commodore O. J. Jones—Hong Kong.
Rifleman, 5, screw sloop, Staff-Com. John W. Reed—China Sea, surveying service. Ordered to be paid off and sold at Hong Kong.
Rinaldo, 7, screw sloop, Com. Frederick C. B. Robinson—China.
Rodney, 72, screw ship, Capt. A. C. F. Heneage—China. Ordered home.
Salamis, 2, paddle despatch vessel, Com. Henry M. Miller—Japan.
Star, 4, screw gun-vessel, Com. Walter S. de Kantzow—India.
Starling, 2, gunboat, Lieut. and Com. Charles Crowdy—China.
Sylvia, 5, screw surveying vessel, Com. H. C. St. John—China and Japan Seas.
Zebra, 7, screw sloop, Com. H. A. Trollope, China.

## OUR TELEGRAPHIC EXTRA.

The Telegraphic Extra to *The London and China Express* can be obtained at the following agents. Subscription: $6 to subscribers to *Express*, and $12 to non-subscribers. The Extra contains the latest telegrams on political and general news, quotations of shares and exchanges, market reports, shipping arrivals, &c.; also latest quotations and shipping from Bombay and Calcutta, sent by special telegram to Galle, for the departure of the steamer to the Straits, China, and Japan:—

LONDON OFFICE, 2, COWPER'S-COURT, CORNHILL.

Breakfast.—Epps's Cocoa.—Grateful and Comforting.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½ lb., and 1 lb. tin-lined packets, labelled—James Epps & Co., Homœopathic Chemists, London.—Advt.

## SINGAPORE AND NEW HARBOUR RAILWAY.

The long delay in the commencement of the projected line of railway between the town of Singapore and New Harbour has been a matter of surprise in many quarters, and to none more than ourselves; for we have always given the colonists of the Straits Settlements credit for a highly commendable degree of enterprise and public spirit. The line is not only a work that is urgently required, but one so evidently beneficial alike to the town and its outlying dependencies that the mere fact of its non-existence is calculated to give even a casual visitor a most unfavourable impression. The chief obstacle seems to have been the difficulty of meeting and reconciling the numerous conflicting interests arising out of the various docks, wharves, and depots situated at New Harbour, and other properties through or near which the proposed line must pass. We are glad, however, to hear that most of these have been successfully dealt with; that both the Peninsular and Oriental and the Messageries Companies are willing to give their aid; and that there is now a prospect of the works being proceeded with at an early date. In a pamphlet published so long since as 1866, now before us, we find copies of correspondence, plans, estimates, and tables of statistics, clearly showing that even in the then condition of the trade of Singapore it would have been a most remunerative undertaking; how much more so now, with the increased development of the past three years! We trust that no minor considerations will be allowed to delay any longer the carrying out of this important work, and that it may prove to be but the first step to a chain of railway and telegraph communication along the entire Malay peninsula. The amount of capital required for this first section is so small that surely no difficulty can be found under this head.

## CEYLON CURRENCY.

Sir Hercules Robinson has introduced an ordinance which, if carried, will produce nothing less than a monetary revolution in the island. Not that a revolution is in all cases to be regarded as an unmixed evil; but then it should never be resorted to until milder measures have failed, and in this instance it seems to us that a moderate measure of reform is all that is requisite. That some change in the system might carry with it a good deal of benefit is admitted on all hands; neither merchants nor bankers—surely the best judges—deny this. For the last thirty years or more, accounts have been kept in pounds, shillings, and pence, as in this country, yet the actual currency, the medium of all payments and receipts, has been the rupee. Here is certainly an anomaly, and one that at first sight would seem to involve a financial paradox, for the rupee is current at a fixed rate of two shillings, whereas its intrinsic value in relation to English coin is about three halfpence less. And the possibility of somebody having a claim on the Government insisting on payment being made in gold, appears to be the bugbear that has induced Sir Hercules to initiate a remodelling of the currency. On a closer examination, however, a good deal of the apparent incongruity vanishes. The Ceylon pound in fact, is not an English pound; it is not a current gold coin of a given weight, but a measure of value used in computation as the equivalent of ten rupees—which is quite a different thing. Moreover, this method of reckoning, inconsistent as it may appear, has the sanction of some thirty years' usage, and we all know how habit becomes a second nature, and how very cautiously alterations in money, weights or measures, have to be attempted in any country. The subject is not now under discussion for the first time, but those merchants and bankers who have given attention to it have been deterred from recommending any sudden or sweeping alteration by considerations of the difficulties that might arise regarding existing contracts. But Sir Hercules is bolder; to paraphrase, without disrespect, a well-known line, "Governors rush in where colonists fear to tread." At his request, apparently, the ordinance under consideration has been drafted, whereby the sovereign and its subordinate coins will be "demonetized," and all accounts must in future be kept in rupees, annas, and pie; and as his Excellency—like other Excellencies who preside over Crown colonies—not only reigns but governs (the Legislative Council, to speak somewhat irreverently, being merely a box of tools wherewith he works his will), we suppose there is no escape from the threatened revolution. There is, however, on the Governor's own showing, another alternative
